How to Get a First Thomas Dixon. 2004-08-05 In this informative guide, Thomas Dixon argues that you do not have to be a genius to get a first at university. He sets out to de-mystify first-class degrees in the arts, humanities and social sciences, clearly articulating the difference between the excellent and the merely competent in undergraduate work. This concise, no-nonsense guidebook will give prospective and current students advice on teaching and learning styles that prevail in university and on how to manage their two most important resources - their time and their lecturers. In an accessible and entertaining style, the author looks at subjects such as: making the transition from school to university developing transferable skills making use of lectures and seminars using libraries and the Internet note-taking, essays, seminars and presentations common mistakes to avoid writing with clarity and style revision and examinations. Illustrated with many examples from a range of academic disciplines, *How to Get a First* is an all-purpose guide to success in academic life. Visit the companion website www.getafirst.com

English Teachers' Accounts Nandana Dutta. 2021-10-20 This book looks at the figure of the English teacher in Indian classrooms and examines the practice and relevance of English and India's colonial legacy, many decades after independence. The book is an account of the varied experiences of teaching English in universities in different parts of the country. Basics of Law Librarianship Deborah Panella,Ellis Mount.2012-11-12 Here is an essential introductory guide on all aspects of law librarianship written especially for non-law librarians, library school students, and beginning law librarians. Although there are several excellent practical handbooks and numerous articles on specific topics of law librarianship for practicing law librarians, Basics of Law Librarianship is the only resource that addresses the information needs of the student or new law librarian. Author Deborah Panella, managing librarian of a large, prominent New York law firm, explores the major areas of law librarianship. She covers vital topics such as the legal clientele, collection development, research tools, technical services, impact of technology, and management issues, and describes what makes law libraries different from other special libraries. She has written a clear, readable volume without excessive detail or the use of special terminology. The bibliography of law library literature and the index add enormously to the book's value as a major reference.

Young Adult Offenders Friedrich Lösel,Anthony Bottoms,David P. Farrington.2012-07-26 This latest volume in the Cambridge Criminal Justice Series focuses upon young adults and their treatment in

the criminal justice system. The subject is very topical because there is increasing evidence that a rigid distinction between 'youth' and 'adulthood' is not appropriate in modern societies. For example, important developmental tasks such as finishing one's education, finding regular work and the foundation of one's own family are now completed later than in former times; neuropsychological brain functions are still developing beyond age 18; and desistance from criminal offending occurs most rapidly in early adulthood. Despite such evidence, the United Kingdom and other countries have largely neglected policies for young adult offenders in comparison with young people under 18. Although there seems to be no general transnational solution for this problem, there is a clear need for differentiation. This book brings together leading authorities in the field to analyse theoretical, empirical and policy issues relating to this neglected group of people, exploring different approaches to both crime prevention and offender treatment. It will be of interest to researchers, practitioners and policy makers in the fields of criminology, criminal justice, prisons, probation, forensic psychology and psychiatry, sociology, education and social work.
