The Construction of Words Geert Booij.2018-04-13 This volume focuses on detailed studies of various aspects of Construction Morphology, and combines theoretical analysis and descriptive detail. It deals with data from several domains of linguistics and contributes to an integration of findings from various subdisciplines of linguistics into a common model of the architecture of language. It presents applications and extensions of the model of Construction Morphology to a wide range of languages. Construction Morphology is one of the theoretical paradigms in present-day morphology. It makes use of concepts of Construction Grammar for the analysis of word formation and inflection. Complex words are seen as constructions, that is, pairs of form and meaning. Morphological patterns are accounted for by construction schemas. These are the recipes for coining new words and word forms, and they motivate the properties of existing complex words. Both schemas and individual words are stored, and hence there is no strict separation of lexicon and

grammar. In addition to abstract schemas there are subschemas for subclasses of complex words with specific properties. This architecture of the grammar is in harmony with findings from other empirical domains of linguistics such as language acquisition, word processing, and language change.

**Entrepreneurship Education and Training Programs around the World** Alexandria

Valerio, Brent Parton, Alicia Robb. 2014-05-06 Entrepreneurship has attracted global interest for its potential to catalyze economic and social development. Research suggesting that certain entrepreneurial mindsets and skills can be learned has given rise to the field of entrepreneurship education and training (EET). Despite the growth of EET, global knowledge about these programs and their impact remains thin. In response, this study surveys the available literature and program evaluations to propose a Conceptual Framework for understanding the EET program landscape. The study finds that EET today consists of a heterogeneous mix of programs that can be broken into two groups: entrepreneurship education and entrepreneurship training. These programs target a range of participants: secondary and post-secondary education students, as well as potential and practicing entrepreneurs. The outcomes measured by program evaluations are equally diverse but generally fall under the domains of entrepreneurial mindsets and capabilities, entrepreneurial status, and entrepreneurial performance. The dimensions of EET programs vary according to the particular target group. Programs targeting secondary education students focus on the development of foundational skills linked to entrepreneurship, while post-secondary education programs emphasize skills related to strategic business planning. Programs targeting potential entrepreneurs generally are embedded within broader support programs and tend to target vulnerable populations for whom employment alternatives may be limited. While programs serving practicing entrepreneurs focus on strengthening entrepreneurs' knowledge, skills, and business practices, which while unlikely to transform an enterprise in the near term, may accrue benefits to entrepreneurs over time. The study also offers implications for policy and program implementation, emphasizing the importance of

clarity about target groups and desired outcomes when making program choices, and sound understanding of extent to which publicly-supported programs offer a broader public good, and compare favorably to policy alternatives for supporting the targeted individuals as well as the overall economic and social objectives.

If Success Is a Game, These Are the Rules Cherie Carter-Scott. 2015-02-18 Do you wish you knew the rules for winning at the game of success? Contrary to popular belief, success is not just about becoming rich and famous. Chérie Carter-Scott, Ph.D., realizes that everyone has their own personal definition of success, whether it be to run a business, raise healthy, happy children, have more spare time, get good grades, or become President of the United States. In *If Success Is a Game, These Are the Rules*, Chérie addresses the issues at the heart of a meaningful and successful life. She helps you define what success means to you, and then tells you in ten simple rules how you can achieve it. Chérie learned the rules of success firsthand: she built her management consulting firm to serve top clients around the world, including IBM and GTE. Her books, including the #1 New York Times bestseller *If Life Is a Game, These Are the Rules*, touch hundreds of thousands of readers. And despite a calendar that shuttles her through dozens of time zones annually, she keeps her family close and connected. With rules as clear as *Self-trust is essential* and *Your actions affect your outcome*, Chérie guides readers step-by-step through all the various challenges on the path to success. From finding your true calling to discovering the riches abundant in day-to-day routines, to recognizing opportunities and managing your resources, *If Success Is a Game, These Are the Rules* is both inspirational and practical. Chérie explains the importance of having a vision but also the

importance of setting realistic goals. She provides tools to help you identify your gifts but also tools to help manage your time. She shows you how to believe in yourself but also how to cultivate relationships with others. Success can be a difficult and precarious journey, but once we understand what our goals are and the ways that both advances and setbacks can work for us, we can begin to move closer to what we want, and to grow as individuals. Illuminated with motivational and personal stories, and written in Chérie's warm, engaging tone, *If Success Is a Game, These Are the Rules* is the perfect guide for your journey as you seek to fulfill all your dreams.

*Revitalizing Entrepreneurship Education* Karin Berglund, Karen Verduyn. 2018-01-19 Within mainstream scholarship, it's assumed without question that entrepreneurship and entrepreneurship education are desirable and positive economic activities. Drawing on a wide range of theoretical approaches and political-philosophical perspectives, critical entrepreneurship studies has emerged to ask the questions which this assumption obscures. Students of entrepreneurship need to understand why and how entrepreneurship is seen as a moral force which can solve social problems or protect the environment, or even to tackle political problems. It is time to evaluate how such contributions and insights have entered our classrooms. How much - if any - critical discussion and insight enters our classrooms? How do we change when students demand to be taught how to do it, not to be critical or reflexive? If educators are to bring alternative perspectives into the classroom, it will entail a new way of thinking. There is a need to share ideas and practical approaches, and that is what the contributions to this volume aim to do and to illuminate new ways forward in entrepreneurship education.

**Leonardo Pisano (Fibonacci)** L. E. Sigler.2014-06-28 The Book of Squares by Fibonacci is a gem in the mathematical literature and one of the most important mathematical treatises written in the Middle Ages. It is a collection of theorems on indeterminate analysis and equations of second degree which yield, among other results, a solution to a problem proposed by Master John of Palermo to Leonardo at the Court of Frederick II. The book was dedicated and presented to the Emperor at Pisa in 1225. Dating back to the 13th century the book exhibits the early and continued fascination of men with our number system and the relationship among numbers with special properties such as prime numbers, squares, and odd numbers. The faithful translation into modern English and the commentary by the translator make this book accessible to professional mathematicians and amateurs who have always been intrigued by the lure of our number system.

*Farthest North* Fridtjof Nansen. 1898 In September of 1893, Norwegian zoologist Fridtjof Nansen and a crew manned the schooner *Fram*, intending to drift, frozen in the Arctic pack-ice, to the North Pole. When it became clear that they would miss the pole, Nansen and his companion Hjalmar Johansen struck off by themselves. Racing the shrinking pack-ice, they attempted, by dog-sled, to go farthest north. They survived a winter in a moss hut eating walrus and polar bears, and the public assumed they were dead. In the spring of 1896, after three years of trekking, and having made it to within four degrees of the pole, they returned to safety. Nansen's narrative stands with the best writing on polar exploration.
