The Effect of No-fault Automobile Insurance on Driver Behavior and Automobile Accidents in the United States

David S. Loughran.2001 No-fault auto insurance opponents frequently argue that no-fault may ultimately lead to higher auto insurance costs by reducing drivers' incentives to drive carefully and thereby increasing the accident rate. The intuition behind this criticism of no-fault is simple: No-fault auto insurance lowers the cost of driving negligently by limiting first-party liability for the injuries suffered by third-parties in auto accidents. This book evaluates this criticism of no-fault by examining trends in fatal and non-fatal automobile accidents rates and rates of driver negligence in the United States between 1967 and 1989. Contrary to some earlier research, the author finds no evidence that the adoption of no-fault auto insurance between 1971 and 1976 in 16 states increased fatal accident rates in those states. This book also finds no correlation between the presence of no-fault auto insurance and a state's overall accident rate or rate of driver negligence.

Automobile Insurance: Road Safety, New Drivers, Risks, Insurance Fraud and Regulation

Georges Dionne, Claire Laberge-Nadeau. 2012-12-06 Motor vehicle accidents are still a leading cause of death, even if the trend has somewhat declined over the past 20 years. Indeed, motor vehicle accidents are a significant cause of death in comparison with air and space transport accidents, homicides and even HIV infections, causes which are more often highlighted in the media. As shown in this book, motor vehicle accidents are particularly damaging to very young drivers. The assessment of driving risks is a common concern for road transportation safety and the automobile insurance industry. In both cases, there is an awareness of the great losses resulting from the deaths, injuries and property damage caused by traffic accidents. Research is essential to counteract this public health threat, to assess the success or failure of countermeasures, and to solve the problems it generates in the insurance industry. This book is for people concerned about road crashes (prevention and compensation) and about the insurance problems they pose - namely private and public institutional authorities, consultants, administrators, practitioners, and researchers interested in sharing the authors' experience in this domain. The book presents original contributions related to motor vehicle insurance and road safety. All papers have been evaluated by external referees. Four subjects are covered: 1) Automobile Insurance Pricing, Risks and Asymmetric Information; 2) Insurance Fraud; 3) Young Drivers: Licensing Policies, Evaluation and Risks; and 4) Road Insurance Regulation.

The Making of an Insurance Warrior Keith Kauten. 2010-09-02 My sincere and heartfelt motivation for writing this book has risen out of and because of the stressful economic conditions facing individuals and families of today. The last twenty years of my life have been devoted to serving clients as their insurance agent. I have worked to match needs and wants with the financial budgets that were before us and available at the time. However, I have come to realize and witness that the industry I love, worked in, and was educated in is one of many industries that are causing economic stress in the family today. The vision I have for this book is to help equip you as a consumer before purchasing any and all types of insurance. I don't intend to make you an expert, but I do intend on sharing with you the knowledge I have gained over the last twenty-four years. My intention for the book is to be an easy read with thought-provoking questions. I have included the questions for the purpose of helping you ask the right questions. When purchasing insurance, you have to ask questions and not feel like the questions you are asking are dumb or do not apply. Further, my vision for the book is that it will help consumers young and old be confident when making their insurance purchases. Also, I have shared some hypothetical situations that are simple, to the point, and in some case real life. Further, I hope the book will convey a real-life message to readers before something actually happens to them. Hopefully this book might create a picture in their minds that could save their lives or save them time and money. You as a consumer are purchasing an intangible product when you buy insurance. Insurance is a product that cannot be touched or seen. Another goal for this book is to give the consumer some tangible information to make the right decisions when purchasing insurance from their local insurance agent or buying online from someone he or she does not know and cannot see. Most importantly, my intentions for the book are to help the insurance consumer be most informed and knowledgeable, for knowledge is power.

Simplify Richard Koch,Greg Lockwood.2016-04-07 For the past 40 years Richard Koch has wanted to uncover the simple, elemental, elegant and parsimonious principles that are needed to create great new businesses. To qualify, a principle must be so overwhelmingly powerful that anyone can reliably use it towards extraordinary results. Is there any principle that can tell you how to do that consistently and with a high chance of success? Working with venture capitalist Greg Lockwood, his co-author on SUPERCONNECT, and supported by research from the elite firm of OC&C Strategy Consultants, Koch has the answer. The principle Koch and Lockwood have discovered behind extraordinarily successful businesses is simplifying. Some simplify on price - take Ryanair's budget flights which still take you from A to B, but so cheaply that nearly everyone can afford them, multiplying the size of their market - and some simplify on proposition, such as Apple's decision to cut down on the number of their product lines and focus on perfecting only a few devices. With case studies of famous companies in all different industries from finance to fast food, the authors show how anyone can analyse their business's potential to become a simplifier, and which route they should take to maximise the impact.

The cost of motor insurance Great Britain: Parliament: House of Commons: Transport Committee,Louise Ellman.2011-03-11 Fraud is one of the main factors driving up the cost of motor insurance. Wider access to justice should not provide a licence to make false personal injury claims under car insurance policies. A dedicated police unit - paid for by the insurance industry - should be established to tackle this escalating problem. The Committee also highlights the merry-go-round of 'referral' payments made to or by insurance and law firms, rescue truck drivers, vehicle repairers, credit hire firms, claims or accident management companies and medical experts in connection with motor insurance claims. It calls on the insurance industry to take steps to introduce much more transparency. The report also urges the Government to do more to bring down the casualty rate amongst young drivers, including by making the driving test more rigorous. In addition, the Committee recommends the Government: set out a clear timetable for new data sharing arrangements between the DVLA and motor insurers; undertake a promotional campaign, aimed at

young drivers, to alert them to Continuous Insurance Enforcement (CIE - the requirement for the keeper of any registered vehicle to have valid motor insurance); review the penalties for uninsured driving one year after CIE has been implemented; fund research to review international experience in restraining the number of personal injury claims relating to motor insurance, with the aim of publishing a discussion paper during 2012 outlining possible options for change.

Cheap Insurance for Your Home, Automobile, Health, & Life Carla Rowley, Lee Rowley. 2008 Insurance takes a huge bite out of the average American's monthly budget, and as stated above, many Americans simply forgo insurance because they consider it out of reach. Shopping for insurance requires more effort than many people want to devote to it. They simply grab the first price they come across or accept routine rate increases when it is important to compare not only the price but also coverage and exclusions among carriers. In this easy to read and comprehensive new book you will learn hundreds of ways to secure and or reduce your health, automobile, life, and home insurance costs. If you do not have or cannot afford insurance, we will show you how to get it at a price you can afford. The Internet and technology have opened up a great new way to search for low cost insurance services; we will give you the Web sites, tell you what to look for and to look out for. There is a great deal you can do right now to cut insurance costs. For example, did you know that installing a theft tracking device in your car can save you up to 35% on your auto insurance and that your credit history can dramatically affect your auto insurance premium. Recent studies have shown that more than 90% of insurers use credit information to create an insurance risk score,

which they then use as a factor to determine your insurance rate. Add a simple home security system to monitor your home, and your insurance rates may be discounted up to 30%, depending upon where you live. Your insurance could end up costing you more if you choose to make monthly payments rather than pay the entire premium annually. Notify your agent if you retire, your children go to school, or you start working from home (when you're not traveling as much your rates will go down). Have you stopped smoking? Lost weight? Started exercising? All of these efforts can have a dramatic effect on your insurance rates. Insurance topics covered in this book are How Insurance Works, Insurance Company Rating, National and Local Firms, Auto, Health, and Disability Insurance, along with work sheets and forms to assist you in your search for the best coverage at the lowest price.
