Moving Money Robert E. Litan, Martin Neil Baily. 2009-12-01 Once we paid for things with bills, coins, or checks. Today we pay with zeroes and ones—digital entries on credit and debit cards, or electronic messages sent over the Internet. In *Moving Money*, distinguished analysts explore this trend, its development and likely future, and the ramifications of this transformation. This is a book about money as a medium of exchange—in the past, in the present, but particularly in the future. What forms has money taken over the years? Moreover, how have those means of payment changed in recent years, and how will they develop in the future? And what (if anything) should policymakers do to facilitate those changes, or at least allow them to develop and mature? Brookings economists Robert E. Litan and Martin Neil Baily and a distinguished group of experts dissect these issues and peer into the future of consumer payments. The landscape of the consumer payments industry will be shaped at least in part by public policies. Historically, governments have had monopolies on the manufacture of money. Any form of payment clearly requires trust on the part of both the seller and the buyer, and the government must establish and enforce laws to secure this relationship. More controversial is the issue of whether, and to what extent, government is also needed to protect the market in private sector payments systems. Why do these issues matter? The payments industry is a large and important sector of developed economies. In the United States, private-sector payments providers generate approximately \$280 billion a year in revenue, while the government invests substantial resources into making money (minting coins and printing bills) or moving it (via checks and various electronic transfers). And the way we pay for things influences our purchases—what we spend money on, how much we spend, and where we spend it. Thus the future of consumer payments is intertwined with the health of national economies.

**Rebound, Grades K-12** Douglas Fisher, Nancy Frey, Dominique Smith, John Hattie. 2021-03-30 For more than a year now, we educators have been tested and tested again. We've been stretched, we've been pulled, we've been put through the wringer. But now it's time to rebound. It's time to bounce back, come back better, and benefit from the many lessons learned to reignite engagement, accelerate learning, and move forward with fresh optimism and better systems for schooling. Enter Doug Fisher, Nancy Frey, Dominique Smith, and John Hattie, whose Distance Learning Playbooks have supported more than a half million educators across pandemic teaching and who are here now to advise you on this next, absolutely critical leg of our ongoing journey. Complete with tools and strategies, prompts and exercises, Rebound: A Playbook for Rebuilding Agency, Accelerating Learning Recovery, and Rethinking Schools will help you: Address the collective traumas we have experienced during the pandemic and rebuild our sense of agency and self, so that we can attribute student success to both teachers' and students' efforts Evaluate what we have learned about remote teaching and learning to determine what to carry forward and what to leave behind Shift the narrative from learning loss to learning leaps and implement instructional and assessment practices that ensure our students reclaim lost knowledge, build skills, develop agency, and accelerate gains Redefine classrooms, learning experiences, the ways schools operate, and the very idea of schooling itself The greatest travesty that can arise for schools after 2020/21, Doug, Nancy, Dominique, and John write, is to rush back to the old normal, and learn nothing, or little, about what worked well. That's why this book has focused on rebounding, and taking the opportunity to create an even better schooling system, one that serves even more students, and focuses more on what matters most. Let's agree not to reduce the impact that our expectations have on students' learning. What if we talk about learning leaps instead of learning loss? What if we identify where students are in their learning and identify critical content that they must learn now to accelerate their performance in the future? And what if we raise our expectations for students rather than lower them? —Douglas Fisher, Nancy Frey, Dominique Smith, and John Hattie

*Peer Leadership in Higher Education* Jennifer R. Keup,Betsy Overman Barefoot.2012-04-10 Peer leadership programs are not only pervasive, but also offer an effective and efficient means to advance students' adjustment, learning, development, and success. Student leaders, educators, and paraprofessionals make it financially feasible to run large-scale programs and are likely to be an even greater component of campus life and academic support in the future. The student outcomes of peer leadership are mutually beneficial: the students who provide the mentorship, leadership, or education gain as much, if not more, from the experience than the students they serve. Further, the range of positive gains from peer leadership has significant overlap with personal, civic, and social outcomes of college that are essential for success in a global society and economy.-- Publisher.

*Making Summer Count* Jennifer Sloan McCombs,Catherine H Augustine,Heather L Schwartz.2011 Despite long-term and ongoing efforts to close the achievement gap between disadvantaged and advantaged students, low-income students continue to perform at considerably lower levels than their higher-income peers in reading and mathematics. Research has shown that students' skills and knowledge often deteriorate during the summer months, with low-income students facing the largest losses. Instruction during the summer has the potential to stop these losses and propel students toward higher achievement. A review of the literature on summer learning loss and summer learning programs, coupled with data from ongoing programs offered by districts and private providers across the United States, demonstrates the potential of summer programs to improve achievement as well as the challenges in creating and maintaining such programs. School districts and summer programming providers can benefit from the existing research and lessons learned by other programs in terms of developing strategies to maximize program effectiveness and quality,

student participation, and strategic partnerships and funding. Recommendations for providers and policymakers address ways to mitigate barriers by capitalizing on a range of funding sources, engaging in long-term planning to ensure adequate attendance and hiring, and demonstrating positive student outcomes.

Leading Together Jonathan Eckert.2017-11-02 It's about the work, not the position. Leadership is what is done, not who is doing it. Leading Together introduces a collective approach to progress, process, and programs to help build the conditions in which strong leadership can flourish and student outcomes improve. All school teams will find applicable insights as they explore the Collective Leadership Development Model for School Improvement. This book: ? Breaks down this innovative model and explains the significance and interdependence of each proven and tested component. ? Asks fearless reflection questions that both challenge and demand deliberate practice. ? Offers case study insights from an urban, rural, and suburban school. Lead and learn together. Start building your team with an eye on the end game. Leading Together is the best guidance we have to date about how to collaboratively dismantle the wall that has stood between teachers and school administrators for over a century. This is a marvelously accessible book in which collective leadership is discovered through the eyes and voices of teachers and principals. Joseph F. Murphy, Frank W. Mayborn Chair and Associate Dean Peabody College of Education, Vanderbilt University, Nashville, TN Leading Together includes rich research-based stories, reflective activities to spark action, and optimistic evidence about what this needed shift in school hierarchies means for improving student outcomes. Don't just read this; adopt it as your guidebook to become an even more influential leader. P. Ann Byrd, COO & Partner Center for Teaching Quality, Carrboro, NC Once again, Jon Eckert offers his straightforward, no nonsense thinking to busy practitioners. **Drug Dealer, MD** Anna Lembke.2016-11-15 The disturbing connection between well-meaning physicians and the prescription drug epidemic. Three out of four people addicted to heroin probably started on a prescription opioid, according to the director of the Centers for Disease Control and Prevention. In the United States alone, 16,000 people die each year as a result of prescription opioid overdose. But perhaps the most frightening aspect of the prescription drug epidemic is that it's built on well-meaning doctors treating patients with real problems. In *Drug Dealer, MD*, Dr. Anna Lembke uncovers the unseen forces driving opioid addiction nationwide. Combining case studies from her own practice with vital statistics drawn from public policy, cultural anthropology, and neuroscience, she explores the complex relationship between doctors and patients, the science of addiction, and the barriers to successfully addressing drug dependence and addiction. Even when addiction is recognized by doctors and their patients, she argues, many doctors don't know how to treat it, connections to treatment are lacking, and insurance companies won't pay for rehab. Full of extensive interviews—with health care providers, pharmacists, social workers, hospital administrators, insurance company executives, journalists, economists, advocates, and patients and their families—*Drug Dealer, MD*, is for anyone whose life has been touched in some way by addiction to prescription drugs. Dr. Lembke gives voice to the millions of Americans struggling with prescription drugs while singling out the real culprits behind the rise in opioid addiction: cultural narratives that promote pills as quick fixes, pharmaceutical corporations in cahoots with organized medicine, and a new medical bureaucracy focused on the bottom line that favors pills, procedures, and patient satisfaction over wellness. Dr. Lembke concludes that the prescription drug epidemic is a symptom of a faltering health care system, the solution for which lies in rethinking how health care is delivered.

**Visible Learning for Literacy, Grades K-12** Douglas Fisher,Nancy Frey,John Hattie.2016-03-22 Every student deserves a great teacher, not by chance, but by design — Douglas Fisher, Nancy Frey, & John Hattie What if someone slipped you a piece of paper listing the literacy practices that

ensure students demonstrate more than a year's worth of learning for a year spent in school? Would you keep the paper or throw it away? We think you'd keep it. And that's precisely why acclaimed educators Douglas Fisher, Nancy Frey, and John Hattie wrote *Visible Learning for Literacy*. They know teachers will want to apply Hattie's head-turning synthesis of more than 15 years of research involving millions of students, which he used to identify the instructional routines that have the biggest impact on student learning. These practices are visible for teachers and students to see, because their purpose has been made clear, they are implemented at the right moment in a student's learning, and their effect is tangible. Yes, the aha moments made visible by design. With their trademark clarity and command of the research, and dozens of classroom scenarios to make it all replicable, these authors apply Hattie's research, and show you: How to use the right approach at the right time, so that you can more intentionally design classroom experiences that hit the surface, deep, and transfer phases of learning, and more expertly see when a student is ready to dive from surface to deep. Which routines are most effective at specific phases of learning, including word sorts, concept mapping, close reading, annotating, discussion, formative assessment, feedback, collaborative learning, reciprocal teaching, and many more. Why the 8 mind frames for teachers apply so well to curriculum planning and can inspire you to be a change agent in students' lives—and part of a faculty that embraces the idea that visible teaching is a continual evaluation of one's impact on student's learning. Teachers, it's time we embrace the evidence, update our classrooms, and impact student learning in wildly positive ways, say Doug, Nancy, and John. So let's see *Visible Learning for Literacy* for what it is: the book that renews our teaching and reminds us of our influence, just in time.

*Disruptive Thinking in Our Classrooms* Eric Sheninger.2021-04-19 Empower learners to think disruptively in your classroom or school... The world continues to change in ways that are difficult to predict. Regardless of the forces at hand, educators play a pivotal role in preparing students for success now and in the future. Eric Sheninger makes the compelling case that the best way to do this is to future-proof learning for ALL kids by creating a disruptive thinking culture in our classrooms and schools. Broken into four parts, this book combines stories, insight from thousands of school visits, practical strategies, research, and examples from classrooms to assist educators in transforming their practice. Each chapter ends with a disruptive challenge that encourages readers to actively apply concepts from the book into their professional practice. Readers will develop an understanding that: Disruptive change is the new normal. As such, our mindset must evolve in ways that help students develop meaningful competencies critical for their success in an unpredictable world. Comfort is the enemy of growth. We must critically evaluate if the way things have always been done in the classroom sets learners up for success now and in the future. Improvement in all we do is a never-ending journey. Learning is a process, not an event. It requires educators to develop and use instructional practices and pedagogical techniques that meet the unique needs of all students. Outlier practices promote disruptive thinking. Some innovative educational practices add value while others do not. When we discover new and better ways of empowering learners, we must act, making outlier practices the new norm. Packed with ready-to-use ideas and embedded resources, including the latest digital tools, templates, and artifacts from real classrooms, readers will learn: Why a mindset shift is essential in preparing learners for an unpredictable world.How to implement strategies that focus on developing critical competencies.How to ensure equity through personalization.What to reflect on to improve and build powerful relationships.
