**Integrated Curriculum for Secondary Education English - Years 1 and 2** Claire Manners,Rachel Kelly,Teresa Reilly,Susana Gómez-Randulfe,Denise Heather,Ma Leonor

Trenchard, Mercedes Bravo, Miriam Martínez Taboada, Deborah Richards, Raquel Rodríguez, Mar Román, Ma Pilar Medrano. 2012 The MEC/BC bilingual project, initiated in 1996 in primary as a unique experiment within the Spanish state education system, and in September 2004 the classes that had started their bilingual education 8 years earlier took the project forward into Secondary schools. The formal agreement between the MEC/BC states that the aim of the project is to provide students from the age of three to sixteen with a bilingual, bicultural education through an integrated Spanish/English curriculum based on the Spanish National Curriculum and aspects of the National Curriculum for England and Wales. The implantation of such a curriculum requires, firstly, with regard to English as a subject, a very different classroom approach from the traditional EFL classroom where the focus is on learning English as a foreign language; secondly, a similar new methodology for teaching and learning other curricular areas through English. Such an integrated approach sits very positively within the Directives of the Council of Europe which insists on the need for students to be competent in three European languages by the end of the obligatory period of Secondary Education and that the learning of the first foreign language should begin in the early years of formal education. In addition to this, the secondary integrated curricula have consistently focused on the continuing development of students' skills and learning strategies, thus firmly establishing learning as a lifelong process. The specific objectives of the Project in the Secondary education level are to: continue the acquisition and learning of both languages through an integrated content-based curriculum, encourage awareness and understanding of the diversity of both cultures, facilitate the exchange of teachers and students, encourage the use of modern technologies in learning other languages, promote the certification of studies under both educational systems, if and when appropriate.

**Brave New Digital Classroom, Second Edition** Robert J. Blake. 2013-03-28 Brave New Digital Classroom examines the most effective ways to utilize technology in language learning. The author deftly interweaves the latest results of pedagogical research with descriptions of the most successful computer-assisted language learning (CALL) projects to show how to implement technology in the foreign-language curriculum to assist the second language acquisition process. This fully updated second edition includes new chapters on the latest electronic resources, including gaming and social media, and discusses the realities and potential of distance learning for second language acquisition. The author examines the web, CALL applications, and computer-mediated communication (CMC),

and suggests how the new technologically assisted curriculum will work for the foreign-language curriculum. Rather than advocating new technologies as a replacement for activities that can be done equally well with traditional processes, the author envisions a radical change as teachers rethink their strategies and develop their competence in the effective use of technology in language teaching and learning. Directed at all language teachers, from the elementary school to postsecondary levels, the book is ideal for graduate-level courses on second language pedagogy. It also serves as an invaluable reference for experienced researchers, CALL developers, department chairs, and administrators.
