Implementing IDEA Warger, Eavy & Associates.2001 This guide is designed to provide information on ensuring quality special education services and early intervention to building principals in elementary and middle schools. It sets forth standards of excellence that directly relate to implementing the Individuals with Disabilities Education Act (IDEA) and presents guidelines for principals to use when assessing themselves and their school community. It is intended that the standards and guidelines in this document be used to assess quality practices and program improvement. The guide is organized around the following categories: (1) school organization, which addresses the need for an adequate supply of qualified personnel; (2) leadership; (3) curriculum and instruction, which addresses student access to a high-quality curriculum, provision of adequate financial and material resources, and use of effective instructional practices; (4) staff development; (5) school climate, which addresses the need to ensure all children feel respected and welcome; and (6) assessment. For each section, standards are presented along with specific guidelines. Appendix A contains a checklist that principals or other stakeholders may use to assess the extent to which their schools meet the quality standards and guidelines. Appendix B includes excerpts from the text of the IDEA regulations referenced in the guide. (CR)

**Keeping the Promise?** Leigh Dingerson, Barbara Miner, Bob Peterson, Stephanie Walters. 2008  
Keeping the Promise? Examines one of the most complex reforms in education: charter schools. This wide-ranging and thought-provoking collection of essays examines the charter school movement's founding visions, on-the-ground realities, and untapped potential--within the context of an unswerving commitment of democratic, equitable public schools. Essays include overviews from nationally known educators Ted Sizer and Linda Darling-Hammond, interviews with leaders of community-based charter schools, and analyses of how charters have developed in cities such as New Orleans and Washington, D.C.

**Charter Schools** Deb Yoder, Judy Rooney. 2007-01-23 Charter schools are public schools that may be started by anyone willing to do the work and who can get approval from a chartering authority. Over the last ten years, charter schools have popped up all over the nation. These schools are officially public schools, but there are a few differences. Charters are the epitome of local control. They offer a much wider variety of choices to parents and students than do the traditional public schools. In their years of being directly involved in charter school teaching and administration, Deb and Judy have seen the excitement these schools have brought to education, but they have also found a few unsettling pitfalls that need to be avoided to insure charter school success. They have compiled their thoughts and experiences with the intention of publishing a book for charter school boards and principals. This book could also be of assistance to those groups that are interested in starting a charter school or joining the charter school community. Deb and Judy hope that sharing the lessons they have learned can help others to avoid some common mistakes that have been made early in the charter school movement.

Bradbury examines the history of education in the U.S., the relationship between minorities and education, the current state of teacher preparation, supply, and demand, and the potential impact of pedagogical dissonance, resilience, and best practices can have on creating diverse educational settings.

**Charter Schools** Steve P. Jefferson. 2004 The purpose of this book was to describe the variables that contributed to the establishment of a charter school in an urban Arizona and rural California school district, noting the similarities and dissimilarities and disclosing the factors used to justify implementation of the Montessori theory of education. The secondary purpose of this book was to describe the guidelines for maintaining a charter school, the evaluation methods and factors used in the school's unique experience with staff development. The two schools experienced many similarities when the same variables were applied to both schools. As a result, the stakeholders of both schools used the principles of the organizational theory area of empowerment to implement choices in curriculum. This book provides an insight for parents, teachers, and community leaders to develop strategies by utilizing the same principles to meet the educational needs of children.

**The Making of Americans** E. D. Hirsch.2009-09-15 From the bestselling author of *Cultural Literacy*, a passionate and cogent argument for reforming the way we teach our children. Why, after decades of commissions, reforms, and efforts at innovation, do our schools continue to disappoint us? In this comprehensive book, educational theorist E. D. Hirsch, Jr. masterfully analyzes how American ideas about education have veered off course, what we must do to right them, and most importantly why. He argues that the core problem with American education is that educational theorists, especially in the early grades, have for the past sixty years rejected academic content in favor of “child-centered” and “how-to” learning theories that are at odds with how children really learn. The result is failing schools and widening inequality, as only children from content-rich (usually better-off) homes can take advantage of the schools’ educational methods. Hirsch unabashedly confronts the education establishment, arguing that a content-based curriculum is essential to addressing social and economic inequality. A nationwide, specific, grade-by-grade curriculum established in the early school grades can help fulfill one of America’s oldest and most compelling dreams: to give all children, regardless of language, religion, or origins, the opportunity to participate as equals and become competent citizens. Hirsch not only reminds us of these inspiring ideals, he offers an ambitious and specific plan for achieving them. “Hirsch’s case is clear and compelling. His book ought to be read by anyone interested in the education and training of the next generation of Americans.”—Glenn C. Altschuler, *The Boston Globe* “Hirsch once again challenges the prevailing “child-centered” philosophy, championing a return to a “subject-centered” approach to learning.”—*Publishers Weekly*

*Charter School Primer* Anne Marie Tryjankowski.2012 Book Description: The Charter School Primer presents an overview of public charter schools in the United States. *A Smarter Charter* Richard D. Kahlenberg, Halley Potter.2014-12-04 “A remarkable new book.... Wise and energetic advocates such as Kahlenberg and Potter can take the charter movement in new and useful directions.” —*The Washington Post* Moving beyond the debate over whether or not charter schools should exist, *A Smarter Charter* wrestles with the question of what kind of charter schools we should encourage. The authors begin by tracing the evolution of charter schools from teacher union leader Albert Shanker’s original vision of giving teachers room to innovate while educating a diverse population of students, to today’s charter schools where the majority of teachers are not unionized and student segregation levels are even higher than in traditional public schools. In the second half of the book, the authors examine two key reforms currently seen in a small but growing number of charter schools—teacher voice and socioeconomic integration—that have the potential to improve performance and reshape the stereotypical image of what it means to be a charter school.

Important reading for policymakers, educators, researchers, and all citizens interested in the future of America's public schools, *A Smarter Charter* features: Profiles of charter schools that are bucking the prevailing trends, including their performance data and the challenges they face. Best practices from successful charter schools, such as methods for attracting a diverse student body and examples of innovative teacher contracts. Reform strategies that can improve student outcomes in a variety of public schools, not just charters. "Kahlenberg and Potter have delivered a thought-provoking, serious contribution. Agree or not with their views on the purpose and performance of charter schools, they have important things to say on where charters have been, where they need to go, and how they can get there. Friends and foes of charter schooling, alike, would do well to read this book." —Frederick M. Hess, resident scholar and director of Education Policy Studies, American Enterprise Institute "Read this book and draw inspiration and ideas from charter schools and educators bucking the trend and reclaiming that original, collaborative, and powerful promise and spirit. I hope parents, educators in all sectors, concerned citizens, policymakers, philanthropists—and charter sector leaders—will take its compelling message to heart and act on it." —Dennis Van Roekel, former president, National Education Association "A tour-de-force, laying out in singular fashion what has gone wrong with the charter school movement, and what must be done to get it back on track.... *A Smarter Charter* is a must-read for those concerned with the future of charter schools and public education." —Randi Weingarten, president, American Federation of Teachers

**Charter School Outcomes** Mark Berends, Matthew G. Springer, Herbert J. Walberg. 2017-09-25 Sponsored by the National Center on School Choice, a research consortium headed by Vanderbilt University, this volume examines the growth and outcomes of the charter school movement. Starting in 1992-93 when the nation's first charter school was opened in Minneapolis, the movement has now spread to 40 states and the District of Columbia and by 2005-06 enrolled 1,040,536 students in 3,613 charter schools. The purpose of this volume is to help monitor this fast-growing movement by compiling, organizing and making available some of the most rigorous and policy-relevant research on K-12 charter schools. Key features of this important new book include: Expertise - The National Center on School Choice includes internationally known scholars from the following institutions: Harvard University, Brown University, Stanford University, Brookings Institution, National Bureau of Economic Research and Northwest Evaluation Association. Cross-Disciplinary - The volume brings together material from related disciplines and methodologies that are associated with the individual and systemic effects of charter schools. Coherent Structure - Each section begins with a lengthy introduction that summarizes the themes and major findings of that section. A summarizing chapter by Mark Schneider, the Commissioner of the National Center on Educational Statistics, concludes the book. This volume is appropriate for researchers, instructors and graduate students in education policy programs and in political science and economics, as well as in-service administrators, policy makers, and providers.

**Vision and Action** Charles M. Reigeluth, Jennifer R. Karnopp. 2019-11-22 In *Vision and Action: Reinventing Schools Through Personalized Competency-Based Education*, authors Charles M. Reigeluth and Jennifer R. Karnopp provide readers with a comprehensive guide to the personalized, competency-based system of education, its numerous benefits, and its implementation. This book acknowledges the challenge of transforming to a PCBE system but asserts the necessity of implementing PCBE as the system most capable of preparing students for life in the post-industrial age. The authors explain that PCBE must be implemented at all levels of education and among all school stakeholders in order to succeed. Therefore, this book is broken into two complementary and

digestible aspects-vision and process. Readers will learn to define their vision of PCBE and proactively design a complete, holistic model. Next, they will learn how to realize that vision and implement the system fully throughout their schools and district. In this book, readers will find all of the knowledge and strategies they need to overcome the challenges of the change process and succeed in bringing the sorely needed PCBE system to their students and schools--
