Predicting Rainfall Erosion Losses Walter H. Wischmeier, Dwight David Smith. 1978 The Universal Soil Loss Equation (USLE) enables planners to predict the average rate of soil erosion for each feasible alternative combination of crop system and management practices in association with a specified soil type, rainfall pattern, and topography. When these predicted losses are compared with given soil loss tolerances, they provide specific guidelines for effecting erosion control within specified limits. The equation groups the numerous interrelated physical and management parameters that influence erosion rate under six major factors whose site-specific values can be expressed numerically. A half century of erosion research in many States has supplied information from which at least approximate values of the USLE factors can be obtained for specified farm fields or other small erosion prone areas throughout the United States. Tables and charts presented in this handbook make this information readily available for field use. Significant limitations in the available data are identified.

Algorithms and Theory of Computation Handbook, Volume 1 Mikhail J. Atallah, Marina Blanton. 2009-11-20 Algorithms and Theory of Computation Handbook, Second Edition: General Concepts and Techniques provides an up-to-date compendium of fundamental computer science topics and techniques. It also illustrates how the topics and techniques come together to deliver efficient solutions to important practical problems. Along with updating and revising many

The Narratology of Comic Art Kai Mikkonen. 2017-05-08 By placing comics in a lively dialogue with contemporary narrative theory, The Narratology of Comic Art builds a systematic theory of narrative comics, going beyond the typical focus on the Anglophone tradition. This involves not just the exploration of those properties in comics that can be meaningfully investigated with existing narrative theory, but an interpretive study of the potential in narratological concepts and analytical procedures that has hitherto been overlooked. This research monograph is, then, not an application of narratology in the medium and art of comics, but a revision of narratological concepts and approaches through the study of narrative comics. Thus, while narratology is brought to bear on comics, equally comics are brought to bear on narratology.

Biomedical Engineering Fundamentals Joseph D. Bronzino, Donald R. Peterson. 2014-12-17 Known as the bible of biomedical engineering, The Biomedical Engineering Handbook, Fourth Edition, sets the standard against which all other references of this nature are measured. As such, it has served as a major resource for both skilled professionals and novices to biomedical engineering. Biomedical Engineering Fundamentals, the first volume of the handbook, presents material from respected scientists with diverse backgrounds in physiological systems, biomechanics, biomaterials, bioelectric phenomena, and neuroengineering. More than three dozen specific topics are examined, including cardiac biomechanics, the mechanics of blood vessels, cochlear mechanics, biodegradable biomaterials, soft tissue replacements, cellular biomechanics, neural engineering, electrical stimulation for paraplegia, and visual prostheses. The material is presented in a systematic manner and has been updated to reflect the latest applications and research findings.

Metastases in Head and Neck Cancer Jochen A. Werner, R. Kim Davis. 2012-12-06 -Richly illustrated; 109 illustrations, 57 in color -Cover a wide range of diagnostic and therapeutic techniques, i.e. MRI, PET, surgical treatment, radiation therapy

The State of the World's Cities 2004/2005 .2004 As towns and cities expand at unprecedented rates, sustainable urban development is one of the most pressing challenges facing the international community in the 21st century. This publication examines the realities faced by urban populations

around the world, focusing on the impact of globalisation and the way cities are governed and planned, on the make-up and density of their population, and on their cultures and economies. Issues considered include: the impact of globalisation on urban culture; urban renewal and cultural strategies; the concept of metropolitanization; socio-economic and cultural impacts of international migration; urban poverty and homelessness, social inequality and exclusion; urban governance, safety and crime trends; contemporary planning strategies and the role of civil society; progress towards attainment of the Millennium Development Goals targets for sanitation and housing. The report highlights the need for a new culture of planning to establish multicultural and inclusive cities, involving civil society as well as public authorities.

Stellar Pulsations J.C. Suárez, R. Garrido, L. A. Balona, J. Christensen-Dalsgaard. 2012-10-20 Analyses of photometric time series obtained from the MOST, CoRoT and Kepler space missions were presented at the 20th conference on Stellar Pulsations (Granada, September 2011). These results are leading to a re-appraisal of our views on stellar pulsation in some stars and posing some new and unexpected challenges. The very important and exciting role played by innovative ground-based observational techniques, such as interferometric measurements of giant pulsating stars and high-resolution spectroscopy in the near infrared, is also discussed. These Proceedings are distinguished by the format of the conference, which brings together a variety of related but different topics not found in other meetings of this nature.

Radiobiology for the Radiologist Eric J. Hall, Amato J. Giaccia. 2012-03-28 In print since 1972, this seventh edition of *Radiobiology for the Radiologist* is the most extensively revised to date. It consists of two sections, one for those studying or practicing diagnostic radiology, nuclear medicine and radiation oncology; the other for those engaged in the study or clinical practice of radiation oncology--a new chapter, on radiologic terrorism, is specifically for those in the radiation sciences who would manage exposed individuals in the event of a terrorist event. The 17 chapters in Section I represent a general introduction to radiation biology and a complete, self-contained course especially for residents in diagnostic radiology and nuclear medicine that follows the Syllabus in Radiation Biology of the RSNA. The 11 chapters in Section II address more in-depth topics in radiation oncology, such as cancer biology, retreatment after radiotherapy, chemotherapeutic agents and hyperthermia. Now in full color, this lavishly illustrated new edition is replete with tables and figures that underscore essential concepts. Each chapter concludes with a summary of pertinent conclusions to facilitate quick review and help readers retain important information.

Optimal Strategies in Sports Economics and Management Sergiy Butenko, Jaime Gil-Lafuente, Panos M. Pardalos. 2010-08-25 During the last century, we have witnessed the birth and evolution of sport as an economic activity, which has created jobs on the one hand, but also problems of management on the other. This process has not been immune from the particular characteristics associated with sport, typically united here more than in other activities: technique, physical effort, entertainment and passion. And all this within a framework of ever-increasing consumption of financial resources. It is not surprising, therefore, that commonly-used economic models, based on mechanistic approaches, do not provide a viable solution to increasingly complex and increasingly frequent problems. Any attempt to apply such an approach in this technical, economic and financial context can only result in failure. The high degree of subjectivity inherent in sporting activity requires new tools, in which remodeled conceptual, theoretical and technical elements should play an important role. Complexity, uncertainty and subjectivity are therefore basic to understand, and deal with, the phenomenon of sport. The necessity of resorting to these elements was identified over a quarter of a century ago by a small group of professors and researchers at the University of Barcelona. Together we started the first postgraduate courses and organized seminars to alert sports centre managers, as well as to make private and public organizations aware of the increasing importance of a proper, specific management for sports organizations.

Evolution of the Vertebrate Ear Jennifer A. Clack, Richard R Fay, Arthur N. Popper. 2016-12-21 The evolution of vertebrate hearing is of considerable interest in the hearing community. However, there has never been a volume that has focused on the paleontological evidence for the evolution of hearing and the ear, especially from the perspective of some of the leading paleontologists and evolutionary biologists in the world. Thus, this volume is totally unique, and takes a perspective that has never been taken before. It brings to the fore some of the most recent discoveries among fossil taxa, which have demonstrated the sort of detailed information that can be derived from the fossil record, illuminating the evolutionary pathways this sensory system has taken and the diversity it had achieved.

The Emergence of the American University Abroad Kyle A. Long. 2020 The American public is losing trust in its higher education institutions. Americans are increasingly divided about the purposes of a college education, with opinions split along partisan lines. The country's higher education leaders have responded with a litany of conferences, op-eds, and commissions aimed at regaining the public trust. While these efforts are necessary and important, they are more likely to be successful if supplemented with a view from abroad. The independent American university abroad is the oldest and most successful expression of U.S. higher education outside the United States. First established by Protestant missionaries in the Ottoman Empire during the U.S. Civil War, American universities abroad have since spread across the globe. Many enjoy widespread popularity in their communities and bipartisan support in the U.S. 'The Emergence of the American University Abroad' explores the development of this model as a distinctive institutional form in the U.S. higher education landscape. It traces the long history of support by American private citizens, the U.S. government, and stateside colleges and universities for these overseas institutions, and shows how leaders of American universities abroad have periodically come together to make sense of their changing environments and strategically align their messaging with potential supporters. The author demonstrates that what is most valuable about American higher education emerges clearly when it is practiced outside the United States. While discourse about higher education in the United States and around the world has shifted unequivocally toward its conceptualization as a private good, leaders of, and advocates for, American universities abroad have been remarkably consistent in promoting their public benefits. As such, study of these institutions represents a unique opportunity to reflect on underappreciated, yet essential features of American higher education.

Imagining the Global Fabienne Darling-Wolf. 2014-12-22 Based on a series of case studies of globally distributed media and their reception in different parts of the world, *Imagining the Global* reflects on what contemporary global culture can teach us about transnational cultural dynamics in the 21st century. A focused multisited cultural analysis that reflects on the symbiotic relationship between the local, the national, and the global, it also explores how individuals' consumption of global media shapes their imagination of both faraway places and their own local lives. Chosen for their continuing influence, historical relationships, and different geopolitical positions, the case sites of France, Japan, and the United States provide opportunities to move beyond common dichotomies between East and West, or United States and "the rest." From a theoretical point of view, *Imagining the Global* endeavors to answer the question of how one locale can help us understand another locale. Drawing from a wealth of primary sources—several years of fieldwork; extensive participant observation; more than 80 formal interviews with some 160 media consumers (and occasionally producers) in France, Japan, and the United States; and analyses of media in different languages—author Fabienne Darling-Wolf considers how global culture intersects with other significant identity factors, including gender, race, class, and geography. *Imagining the Global* investigates who gets to participate in and who gets excluded from global media representation, as well as how and why the distinction matters.

Frontier Encounters Franck Billé, Grégory Delaplace, Caroline Humphrey. 2012-08-01 China and Russia are rising economic and political powers that share thousands of miles of border. Despite their proximity, their interactions with each other - and with their third neighbour Mongolia - are rarely discussed. Although the three countries share a boundary, their traditions, languages and worldviews are remarkably different. *Frontier Encounters*

presents a wide range of views on how the borders between these unique countries are enacted, produced, and crossed. It sheds light on global uncertainties: China's search for energy resources and the employment of its huge population, Russia's fear of Chinese migration, and the precarious independence of Mongolia as its neighbours negotiate to extract its plentiful resources. Bringing together anthropologists, sociologists and economists, this timely collection of essays offers new perspectives on an area that is currently of enormous economic, strategic and geo-political relevance.

Damião de Gois Elisabeth Feist Hirsch.2012-12-06 Scholars have given relatively little attention to sixteenth-century Portuguese humanism, although Portugal's vital influence on the humanistic thirst for learning has been readily acknowledged. Through her heroic explorations of distant lands and dangerous sea routes, Portugal infected many humanists with the excitement of discovery, none more than Damiao de Gois, Portuguese student of history. Gois, although generally little known, was - in his life and finally as a victim of the Inquisition in Portugal - thoroughly representative of the course of sixteenth-century Erasmian humanism in Portugal; in addition he deserves recognition in his own right as a contributor to modern historiography. Portugal's explorations and the atmosphere of passion for discovery that prevailed in Lisbon had as strong an influence on Gois during his early years as that of the school of Erasmus, the prince of humanists who was eventually to become his personal friend and guide. Gois's two great chronicles of the Portuguese kings John II and Ma nuel I culminated a life spent as diplomat, composer, art collector, articulate pleader for religious tolerance, and scrupulous student of history. A factual report of Gois's life - in the main outlines accurate but not complete - exists in Portuguese, and a short resume of his life has been published in English, but so far no full study has been available in any language.

Virtual Auditory Space: Generation and Applications Simon Carlile.2013-11-11 An illusion of auditory space can be generated by the appropriate filtering of sounds presented over headphones: the so-called virtual auditory space (VAS). This book provides a bridge between many of the different disciplines that are involved in developing and exploiting this technology. The first part is fairly introductory in nature, while the second examines a number of issues relating to the generation of high fidelity virtual auditory space. The last two chapters review current research applications of VAS.

The MIT Encyclopedia of the Cognitive Sciences (MITECS) Robert A. Wilson, Frank C. Keil.2001-09-04 Since the 1970s the cognitive sciences have offered multidisciplinary ways of understanding the mind and cognition. The MIT Encyclopedia of the Cognitive Sciences (MITECS) is a landmark, comprehensive reference work that represents the methodological and theoretical diversity of this changing field. At the core of the encyclopedia are 471 concise entries, from Acquisition and Adaptationism to Wundt and X-bar Theory. Each article, written by a leading researcher in the field, provides an accessible introduction to an important concept in the cognitive sciences, as well as references or further readings. Six extended essays, which collectively serve as a roadmap to the articles, provide overviews of each of six major areas of cognitive science: Philosophy; Psychology; Neurosciences; Computational Intelligence; Linguistics and Language; and Culture, Cognition, and Evolution. For both students and researchers, MITECS will be an indispensable guide to the current state of the cognitive sciences.

The Auditory Cortex Jeffery A. Winer, Christoph E. Schreiner.2010-12-02 There has been substantial progress in understanding the contributions of the auditory forebrain to hearing, sound localization, communication, emotive behavior, and cognition. The Auditory Cortex covers the latest knowledge about the auditory forebrain, including the auditory cortex as well as the medial geniculate body in the thalamus. This book will cover all important aspects of the auditory forebrain organization and function, integrating the auditory thalamus and cortex into a smooth, coherent whole.

Volume One covers basic auditory neuroscience. It complements *The Auditory Cortex, Volume 2: Integrative Neuroscience*, which takes a more applied/clinical perspective.

Environmental Exposures and Human Health Challenges Papadopoulou, Paraskevi, Marouli, Christina, Misseyanni, Anastasia. 2019-03-15

Environmental health is an area with significant developments and noteworthy challenges that expand into various disciplines: medicine and public health, sociology and communications, technology, policymaking, and legislation. Due to the massive amount of health-related issues, additional literature involving environmental health is required to improve the wellbeing of citizens worldwide. *Environmental Exposures and Human Health Challenges* provides interdisciplinary insights into concepts and theories related to environmental exposures and human health impacts via the air, water, soil, heavy metal exposure, and other chemical toxins. The book also addresses inequalities and environmental injustices in relation to environmental exposures and health impacts. Covering topics such as health policies, pollution effects, and heavy metal exposure, this publication is designed for public health professionals, preventive medicine specialists, clinicians, data scientists, environmentalists, academicians, practitioners, researchers, and students.

Comics and Narration Thierry Groensteen. 2013-02-18 This book is the follow-up to Thierry Groensteen's groundbreaking *The System of Comics*, in which the leading French-language comics theorist set out to investigate how the medium functions, introducing the principle of iconic solidarity, and showing the systems that underlie the articulation between panels at three levels: page layout, linear sequence, and nonsequential links woven through the comic book as a whole. He now develops that analysis further, using examples from a very wide range of comics, including the work of American artists such as Chris Ware and Robert Crumb. He tests out his theoretical framework by bringing it up against cases that challenge it, such as abstract comics, digital comics and shojo manga, and offers insightful reflections on these innovations. In addition, he includes lengthy chapters on three areas not covered in the first book. First, he explores the role of the narrator, both verbal and visual, and the particular issues that arise out of narration in autobiographical comics. Second, Groensteen tackles the question of rhythm in comics, and the skill demonstrated by virtuoso artists in intertwining different rhythms over and above the basic beat provided by the discontinuity of the panels. And third he resets the relationship of comics to contemporary art, conditioned by cultural history and aesthetic traditions but evolving recently as comics artists move onto avant-garde terrain.

A Handbook of Mathematical Discourse Charles Wells. 2003

Protest and Resistance in the Tourist City Claire Colomb, Johannes Novy. 2016-07-01 Across the globe, from established tourist destinations such as Venice or Prague to less traditional destinations in both the global North and South, there is mounting evidence that points to an increasing politicization of the topic of urban tourism. In some cities, residents and other stakeholders take issue with the growth of tourism as such, as well as the negative impacts it has on their cities; while in others, particular forms and effects of tourism are contested or deplored. In numerous settings, contestations revolve less around tourism itself than around broader processes, policies and forces of urban change perceived to threaten the right to 'stay put', the quality of life or identity of existing urban populations. This book for the first time looks at urban tourism as a source of contention and dispute and analyses what type of conflicts and contestations have emerged around urban tourism in 16 cities across Europe, North America, South America and Asia. It explores the various ways in which community groups, residents and other actors have responded to - and challenged - tourism development in an international and multi-disciplinary perspective. The title links the largely discrete yet interconnected disciplines of 'urban studies' and 'tourism studies' and draws on approaches and debates from urban sociology; urban policy and politics; urban geography; urban anthropology; cultural studies; urban design and planning; tourism studies and tourism management. This ground breaking volume offers new insight into the

conflicts and struggles generated by urban tourism and will be of interest to students, researchers and academics from the fields of tourism, geography, planning, urban studies, development studies, anthropology, politics and sociology.

Telecommunication Economics Antonis M. Hadjiantonis, Burkhard Stiller. 2012-04-27 This book constitutes a collaborative and selected documentation of the scientific outcome of the European COST Action IS0605 Econ@Tel A Telecommunications Economics COST Network which run from October 2007 to October 2011. Involving experts from around 20 European countries, the goal of Econ@Tel was to develop a strategic research and training network among key people and organizations in order to enhance Europe's competence in the field of telecommunications economics. Reflecting the organization of the COST Action IS0605 Econ@Tel in working groups the following four major research areas are addressed: - evolution and regulation of communication ecosystems; - social and policy implications of communication technologies; - economics and governance of future networks; - future networks management architectures and mechanisms.

Pediatric Neuropsychology Elise K. Hodges, Jeffrey G. Kuentzel, Julie N. Hook. 2022-12-05 Pediatric Neuropsychology: Perspectives in an Ambulatory Care Setting provides an overview of the most commonly seen disorders in outpatient settings including ADHD, Autism, congenital heart disease, blood cancer and hematologic conditions, brain tumors, and epilepsy. Each chapter provides up-to-date information on these pediatric neurodevelopmental and medical disorders, including a review of the neuroanatomic contributions as well as an overview of the neuropsychological findings. Alongside the neuroanatomic and neuropsychological underpinnings, case examples and intervention recommendations are provided for parents, educators and others who work with these populations, to enhance the ecological validity of neuropsychological assessments. With reference to the latest diagnostic criteria, this book is an invaluable resource for neuropsychologists or neuropsychology students whose work includes pediatric patients with neurodevelopmental and neuro medical disorders. It is designed to provide practical information but also the most up to date research in neurobiological and neuroanatomical contributions of these disorders to inform the practitioner and enhance the care provided to their pediatric patients.

The Boston Process Approach to Neuropsychological Assessment Lee Ashendorf PhD, Rod Swenson PhD, ABN, David J. Libon PhD, FACPN, ABN. 2013-07-12 The Boston Process Approach to neuropsychological assessment, advanced by Edith Kaplan, has a long and well-respected history in the field. However, its theoretical and empirical support has not previously been assembled in an easily accessible format. This volume fills that void by compiling the historical, empirical, and practical teachings of the Process Approach. The reader will find a detailed history of the precursors to this model of thought, its development through its proponents such as Harold Goodglass, Nelson Butters, Laird Cermak, and Norman Geschwind, and its continuing legacy. The second section provides a guide to applying the Boston Process Approach to some of the field's most commonly used measures, such as the various Wechsler Intelligence Scales, the Trail Making Test, the California Verbal Learning Test, and the Boston Naming Test. Here, the reader will find a detailed history of the empirical evidence for test administration and interpretation using Boston Process Approach tenets. The final section of the book provides various perspectives on the implementation of the Boston Process Approach in various clinical and research settings and with specialized populations.

Algorithms and Theory of Computation Handbook, Volume 2 Mikhail J. Atallah, Marina Blanton. 2009-11-20 Algorithms and Theory of Computation Handbook, Second Edition: Special Topics and Techniques provides an up-to-date compendium of fundamental computer science topics and techniques. It also illustrates how the topics and techniques come together to deliver efficient solutions to important practical problems. Along with updating and revising many of

Speech Processing in the Auditory System Steven Greenberg, William A. Ainsworth, Richard R. Fay. 2006-05-09 Although speech is the primary

behavioral medium by which humans communicate, its auditory basis is poorly understood, having profound implications on efforts to ameliorate the behavioral consequences of hearing impairment and on the development of robust algorithms for computer speech recognition. In this volume, the authors provide an up-to-date synthesis of recent research in the area of speech processing in the auditory system, bringing together a diverse range of scientists to present the subject from an interdisciplinary perspective. Of particular concern is the ability to understand speech in uncertain, potentially adverse acoustic environments, currently the bane of both hearing aid and speech recognition technology. There is increasing evidence that the perceptual stability characteristic of speech understanding is due, at least in part, to elegant transformations of the acoustic signal performed by auditory mechanisms. As a comprehensive review of speech's auditory basis, this book will interest physiologists, anatomists, psychologists, phoneticians, computer scientists, biomedical and electrical engineers, and clinicians.

Comparative Hearing: Mammals Richard R. Fay. 2012-12-06 The Springer Handbook of Auditory Research presents a series of comprehensive and synthetic reviews of the fundamental topics in modern auditory research. The volumes are aimed at all individuals with interests in hearing research including advanced graduate students, postdoctoral researchers, and clinical investigators. The volumes are intended to introduce new investigators to important aspects of hearing science and to help established investigators to better understand the fundamental theories and data in fields of hearing that they may not normally follow closely. Each volume is intended to present a particular topic comprehensively, and each chapter will serve as a synthetic overview and guide to the literature. As such, the chapters present neither exhaustive data reviews nor original research that has not yet appeared in peer-reviewed journals. The volumes focus on topics that have developed a solid data and conceptual foundation rather than on those for which a literature is only beginning to develop. New research areas will be covered on a timely basis in the series as they begin to mature. Each volume in the series consists of five to eight substantial chapters on a particular topic. In some cases, the topics will be ones of traditional interest for which there is a substantial body of data and theory, such as auditory neuroanatomy (Vol. 1) and neurophysiology (Vol. 2). Other volumes in the series will deal with topics which have begun to mature more recently, such as development, plasticity, and computational models of neural processing.

Intensity-Modulated Radiation Therapy S. Webb. 2001-01-01 Clinical conformal radiotherapy is the holy grail of radiation treatment and is now becoming a reality through the combined efforts of physical scientists and engineers, who have improved the physical basis of radiotherapy, and the interest and concern of imaginative radiotherapists and radiographers. Intensity-Modulated Radiation Therapy describes in detail the physics germane to the development of a particular form of clinical conformal radiotherapy called intensity modulated radiation therapy (IMRT). IMRT has become a topic of tremendous importance in recent years and is now being seriously investigated for its potential to improve the outcome of radiation therapy. The book collates the state-of-the-art literature together with the author's personal research experience and that of colleagues in the field to produce a text suitable for new research workers, Ph.D. students, and practicing radiation physicists that require a thorough introduction to IMRT. Fully illustrated, indexed, and referenced, the book has been prepared in a form suitable for supporting a teaching course.

Mundane Objects Pierre Lemonnier. 2016-06-16 This concise book shows the importance of objects that are considered ordinary by cultural outsiders and scholars, yet lie at the heart of the systems of thought and practices of their makers and users. This volume demonstrates the role of these objects in nonverbal communication, both in non-ritual and in ritual situations. Lemonnier shows that some objects, their physical properties and their material implementation, are wordless expressions of fundamental aspects of a way of living and thinking, as well as sometimes the only means of expressing the inexpressible. Through the study of the most mundane technical activities such as fence building, creating model cars, or trapping fish, we often gain a better understanding of what these objects mean and how they work within their cultures of origin. In addition to

anthropologists and archaeologists, this book will also be of interest to sociologists, historians, philosophers, cognitive anthropologists and primatologists, for whom the intertwining of “function” and “style” is the very mark of all cultural behavior.

Cell and Molecular Biology of the Ear David J. Lim, Janet Stoeckert. 2013-11-11 Dr. Howard House, founder of the House Ear Institute and House Ear Clinic often uses the analogy of planting a seed when referring to establishing the House Ear Institute in 1946. Two grateful patients of Dr. House put forth the idea that his knowledge and innovative skills could be used to expand the understanding of hearing impairment and its treatment. Those two early patients provided the seed money to begin the Institute. Since that time, the growth has been phenomenal from a one-man laboratory to a multidisciplinary facility boasting over 175 scientists, physicians, and support staff, all dedicated to the advancement of otologic research and education. Six years ago after a half-century of remarkable success with prosthetic and device research, the Institute began cultivating a new field of endeavor-cell and molecular biology. Don Nielsen, then the Institute's Executive Vice President for Research and Scientific Director, began exploring the potential for hair cell regeneration and presented his ideas to the Board of Trustees. For a period of six months, we did a lot of fact finding to assess what role the Institute might take in this exciting new field.

The Bellybuttons Maryse Dubuc, Marc Delafontaine. 2009 Jenny and Vicky are super-cute girls - if a little catty - who would do almost anything to be the centre of attention. The third wheel of the group is the too-tall, plain Karine. When a guy named Dan shows interest in Karine, Jenny and Vicky are appalled and will go to any lengths to thwart the competition. An ironic take on chick lit in graphic novel format.

Computational Models of the Auditory System Ray Meddis, Enrique Lopez-Poveda, Richard R. Fay, Arthur N. Popper. 2010-06-16 The Springer Handbook of Auditory Research presents a series of comprehensive and synthetic reviews of the fundamental topics in modern auditory research. The volumes are aimed at all individuals with interests in hearing research including advanced graduate students, post-doctoral researchers, and clinical investigators. The volumes are intended to introduce new investigators to important aspects of hearing science and to help established investigators to better understand the fundamental theories and data in fields of hearing that they may not normally follow closely. Each volume presents a particular topic comprehensively, and each serves as a synthetic overview and guide to the literature. Advances in the Research of Aquatic Environment Nicolaos Lambrakis, George Stournaras, Konstantina Katsanou. 2011-11-02 The book focuses on the management of the aquatic environment. It is aimed at scientists, students, governmental officials and specialists dealing with groundwater and environment. Its main goal is to inform the reader of ideas, knowledge and experience in terms of a sustainable aquatic environment. The main

topics are as follows: Water Bodies and Ecosystems; Climate Change and Water Bodies; Water quality and agriculture; Interaction of Surface and ground waters; Karst Hydrogeology; Continuous Media Hydrogeology; Fissured Rocks Hydrogeology; Hydrochemistry; Geothermics and thermal waters; The role of water in construction projects; Hydrology

Virtual, Augmented, and Mixed Realities in Education Dejian Liu, Chris Dede, Ronghuai Huang, John Richards. 2017-11-13 This book describes the current state of the art of various types of immersive learning: in research, in practice, and in the marketplace. It discusses advanced approaches in the design and development for various forms of immersive learning environments, and also the emerging innovations in assessment and research in the field. In addition, it demonstrates the opportunities and challenges in implementing advances in VR and immersion at scale in formal and informal learning. We are living in a time of rapid advances in terms of both the capabilities and the cost of virtual reality, multi-user virtual environments, and various forms of mixed reality. These new media potentially offer extraordinary opportunities for enhancing both motivation and learning across a range of subject areas, student developmental levels, and educational settings. With the development of practical and affordable virtual reality and mixed reality, people now have the chance to experience immersive learning both in classrooms and informally in homes, libraries, and community centers. The book appeals to a broad readership including teachers, administrators, scholars, policy makers, instructional designers, evaluators and industry leaders.

Nanoparticle Enhanced Radiation Therapy Erno Sajo, Piotr Zygmanski. 2020 Improved targeting of abnormal cells and tissue in the radiotherapy of cancer has been a long-standing goal of researchers. The central purpose in Nanoparticle-Enhanced Radiotherapy (NPRT) is to more precisely control where the radiation dose is delivered, desirably with subcellular precision, provided we can find a method to bring the nanoparticles to target and control their concentration and size distribution. The contents within this book will cover the rationale and fundamental principles of NPRT, optimal nanoparticle sizes, concentrations, design and fabrication, effective nanoparticle delivery methods, emerging clinical applications of NPRT modalities, treatment planning and quality assurance and the potential of NPRT in global health. This volume will serve as a resource for researchers, educators and industry, and as a practical guide or comprehensive reference for students, research trainees and others working in cancer nanomedicine. Part of IOP Series in Global Health and Radiation Oncology.

Evaluating Theory-Practice and Urban-Rural Interplay in Planning Dino Borri, Abdul Khakee, Cosimo Lacirignola. 1997-02-28 This volume contains a selection of papers presented at the second workshop on Evaluation and Planning held at Centre International de Hautes Etudes Agronomiques Méditerranéennes (CIHEAM) in Valenzano (Bari) in November 1993. The workshop was financially and otherwise supported by the School of Engineering, Bari Polytechnic; the School of Agriculture, University of Bari; and CIHEAM. The publication of this book was made possible by the efforts of the contributing authors. Several other persons have provided invaluable support for the workshop or the preparation of this volume. One of these is Patsy Healey for her fascinating challenge to Andreas Faludi's most recent arguments about rational planning theory. Another is John Friedmann whose lecture at the workshop presented world future scenarios depicting interaction between economic growth, social justice and ecological balance. Angela Barbanente provided marvelous support in organizing the workshop and editorial advice in the preparation of this volume. Jeremy Franks carefully improved the English and the clarity of all the papers. Carmelo Torre made a final editing of texts and images. We owe thanks to Maurizio Raeli for providing all the support services during the workshop and Claudia Baublys for her excellent help with various administrative issues with regard to the workshop and publication of this book. This book is dedicated to the memory of Professor Giovanni Grittani, Professor of Land Economics, University of Bari.

Spirou A C Dition Commenta C E Tome 0 La Quick Su: Bestsellers in 2023 The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous engrossing novels captivating the hearts of readers worldwide. Lets delve into the realm of popular books, exploring the captivating narratives that have captivated audiences this year. The Must-Read : Colleen Hoovers "It Ends with Us" This poignant tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover masterfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can succeed. Uncover the Best : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This spellbinding historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids absorbing storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Discover the Magic : Delia Owens "Where the Crawdads Sing" This captivating coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens weaves a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These top-selling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of compelling stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a exceptional and suspenseful novel that will keep you speculating until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
