Daniel Goleman Omnibus Daniel Goleman.2004 Emotional Intelligence Does IQ define our destiny? Daniel Goleman argues that our view of human intelligence is far too narrow, and that our emotions play a major role in thought, decision making and individual success. Self-awareness, impulse control, persistence, motivation, empathy and social deftness are all qualities that mark people who excel: whose relationships flourish, who are stars in the workplace. With new insights into the brain architecture underlying emotion and rationality, Goleman shows precisely how emotional intelligence can be nurtured and strengthened in all of us. Working with Emotional Intelligence Do you want to be more successful at work? Do you want to improve your chances of promotion? Do you want to get on better with your colleagues? Daniel Goleman draws on unparalleled access to business leaders around the world and the thorough research that is his trademark. He demonstrates that emotional intelligence at work matters twice as much as cognitive abilities such as IQ or technical expertise in this inspiring sequel.

**Educación con serenidad: Soluciones creativas para padres desesperados / Educating Stress-Free** Patricia Ramirez.2019-08-20 Los padres y las madres nos tomamos la educación muy en serio, pero debemos dejar de copiar antiguos modelos para empezar a innovar, ser creativos y pensar que existe otra forma de educar sin recurrir a los gritos y a la figura de autoridad. Y, sobre todo, sin desesperarnos. ¿Qué padres y madres no han sentido alguna vez desesperación ante el reto de lidiar con los conflictos cotidianos con sus hijos e hijas? ¿Quién no ha estado al borde de un ataque de nervios cuando los niños tienen que ducharse, obedecer, ser más responsables, menos contestones, más obedientes, más empáticos, menos nerviosos o mejores comedores? Para cada una de esas situaciones, Educación con serenidad ofrece un remedio al alcance de cualquiera. Son soluciones creativas, fáciles de llevar a la práctica y respaldadas científicamente, fruto de la amplia y reconocida experiencia de Patricia Ramírez como psicóloga y, en particular, del taller donde aborda las inquietudes y los miedos de los padres preocupados por la educación de sus hijos. De su mano, descubriremos esas ideas que no se nos ocurren porque no encontramos tiempo: - Jugaremos a educar, a recoger o a inventarnos

concursos para aumentar así la motivación de los niños mientras se divierten. - Descubriremos cómo entrenar la capacidad de autocontrol, la nuestra y la de nuestros hijos. - Aprenderemos a sentir y a vivir las emociones, y a comunicarnos y a entendernos mejor. - Y también educaremos en valores para proporcionar a nuestros hijos una filosofía de vida que les permita convertirse en hombres y mujeres de bien. La autora destinará parte de los ingresos de las ventas de este libro a distintos proyectos que la ONG Cooperación Internacional desarrolla en Zaragoza. ENGLISH DESCRIPTION Educating Stress-Free: Creative Solutions for Desperate Parents Parents take their kids' education very seriously, therefore it is wise to stop copying old models and start innovating. Be creative, know that there is a better way to educate without shouting and without resorting to the phrase "because I said so". And, above all, without feeling hopeless. Who has not been on the verge of a nervous breakdown when children have to shower, follow directions, be more responsible, follow rules, be more empathetic, less nervous, or better eaters? For each of these situations, Educating Stress-Free offers creative solutions that are easy to carry out. In this book, Patricia Ramirez offers great ideas that do not occur to us because of our lack of time: - We will make a game out of learning, find or invent contests to increase the children's motivation while having fun. - We will discover how to teach them self-control. - We will learn how to feel and manage our emotions, and to communicate and understand each other better. - And we will also learn about values that will give our children a philosophy of life which allows them to become good men and women.

**The Chemical History of a Candle** Michael Faraday.2020-09-28 From the primitive pine-torch to the paraffin candle, how wide an interval! between them how vast a contrast! The means adopted by man to illuminate his home at night, stamp at once his position in the scale of civilisation. The fluid bitumen of the far East, blazing in rude vessels of baked earth; the Etruscan lamp, exquisite in form, yet ill adapted to its office; the whale, seal, or bear fat, filling the hut of the Esquimaux or Lap with odour rather than light; the huge wax candle on the glittering altar, the range of gas lamps in our streets,—all have their stories to tell. All, if they could speak (and, after their own manner, they can), might warm our hearts in telling, how they have ministered to man's comfort, love of home, toil, and devotion. Surely, among the millions of fire-worshippers and fire-users who have passed away in earlier ages, some have pondered over the mystery of fire; perhaps some clear minds have guessed shrewdly near the truth. Think of the time man has lived in hopeless ignorance: think that only during a period which might be spanned by the life of one man, has the truth been known. Atom by atom, link by link, has the reasoning chain been forged. Some links, too quickly and too slightly made, have given way, and been replaced by better work; but now the great phenomena are known—the outline is correctly and firmly drawn—cunning artists are filling in the rest, and the child who masters these Lectures knows more of fire than Aristotle did. The candle itself is now made to light up the dark places of nature; the blowpipe and the prism are adding to our knowledge of the earth's crust; but the torch must come first.

**World Development Report 2018** World Bank Group.2017-10-16 Every year, the World Bank's World Development Report (WDR) features a topic of central importance to global development. The 2018 WDR—LEARNING to Realize Education's Promise—is the first ever devoted entirely to education. And the time is right: education has long been critical to human welfare, but it is even more so in a time of rapid economic and social change. The best way to equip children and youth for the future is to make their learning the center of all efforts to promote education. The 2018 WDR explores four main themes: First, education's promise: education is a powerful instrument for eradicating poverty and promoting shared prosperity, but fulfilling its potential requires better policies—both within and outside the education system. Second, the need to shine a light on learning: despite gains in access to education, recent learning assessments reveal that many young people around the world, especially those who are poor or marginalized, are leaving school unequipped with even the foundational skills they need for life. At the same time, internationally comparable learning assessments show that skills in many middle-income countries lag far behind what those countries aspire to. And too often these shortcomings are hidden—so as a first step to tackling this learning crisis, it is essential to shine a light on it by assessing student learning better. Third, how to make schools work for all learners: research on areas such as brain science, pedagogical innovations, and school management has identified interventions that promote learning by ensuring that learners are prepared, teachers are both skilled and motivated, and other inputs support the teacher-learner relationship. Fourth, how to make systems work for learning: achieving learning throughout an education system requires more than just scaling up effective interventions. Countries must also overcome technical and political barriers by deploying salient metrics for mobilizing actors and tracking progress, building coalitions for learning, and taking an adaptive approach to reform.

With a lavishly illustrated chapter devoted to each tool, readers quickly realize just how far the imagination can stretch." —Booklist "A powerful book . . . Upside Down Eduardo Galeano.2014-05-13 From the winner of the first Lannan Prize for Cultural Freedom, a biting funny, kaleidoscopic vision of the first world through the eyes of the third Eduardo Galeano, author of the incomparable *Memory of Fire* Trilogy, combines a novelist's intensity, a poet's lyricism, a journalist's fearlessness, and the strong judgments of an engaged historian. Now his talents are richly displayed in *Upside Down*, an eloquent, passionate, sometimes hilarious exposé of our first-world privileges and assumptions. In a series of lesson plans and a program of study about our beleaguered planet, Galeano takes the reader on a wild trip through the global looking glass. From a master class in *The Impunity of Power* to a seminar on *The Sacred Car*--with tips along the way on *How to Resist Useless Vices* and a declaration of *The Right to Rave*--he surveys a world unevenly divided between abundance and deprivation, carnival and torture, power and helplessness. We have accepted a reality we should reject, Galeano teaches us, one where machines are more precious than humans, people are hungry, poverty kills, and children toil from dark to dark. A work of fire and charm, *Upside Down* makes us see the world anew and even glimpse how it might be set right. Galeano's outrage is tempered by intelligence, an ineradicable sense of humor, and hope. -Los Angeles Times, front page

Creativity and Intelligence Jacob W. Getzels,Phillip W. Jackson.2011-03-10 Creativity is one of the most highly valued of human qualities. It is also one of the most elusive to systematic inquiry. Questions without end have been asked and re-asked. What is the nature of the creative process? Can creative potential be identified before creative achievement? What is the effect of family environment on creative development? What is the relationship between creativity and personality? Between creativity and intelligence? We ourselves begin with the last question, hoping that in the course of seeking an answer we shall throw light on the other issues. The concept of intelligence and the consequent intelligence measure have been used to define individual differences in cognition as if the concept and the measure encompassed the totality of the human mind and imagination. In school, and more recently in other areas requiring intellectual accomplishment, the IQ (or some cognate of it) has become the critical metric on which individuals are evaluated and sorted, given preferment or denied it. Individual differences in potential for productive thinking have been made synonymous with individual differences in performance on one or another of the numerous intelligence tests. We began our studies with few preconceptions and few presuppositions. We did not begin (as is our more usual preference) with an explicitly stated theoretical framework and a set of formal hypotheses. Instead, we permitted the behavior of the children and our own interests, whatever their conceptual foundation, to lead us from problem to problem and from question to question. That this procedure enabled us sometimes to come upon

fascinating new vistas in the behavior of children seemed worth the cost of being often lost in phenomena without relevant explicit concepts to guide our observations.
