History of the Italian Agricultural Landscape Emilio Sereni.2014-07-14 Emilio Sereni's classic work is now available in an English language edition. History of the Italian Agricultural Landscape is a synthesis of the agricultural history of Italy in its economic, social, and ecological context, from antiquity to the mid-twentieth century. From his perspective in the Italian tradition of cultural Marxism, Sereni guides the reader through the millennial changes that have affected the agriculture and ecology of the regions of Italy, as well as through the successes and failures of farmers and technicians in antiquity, the middle ages, the Renaissance, and the Industrial Revolution. In this sweeping historical survey, he describes attempts by successive generations to adapt Italy's natural environment for the purposes of agriculture and to respond to its changing ecological problems.

History of the Italian Agricultural Landscape first appeared in 1961. At the time of its publication it was a pathbreaking work, parallel in its importance for Italy to Marc Bloc's masterwork of 1931, *The Original Characteristics of French Rural History*. Sereni invented the concept of the historical agricultural landscape: an interdisciplinary characterization of rural life involving economic and social history, linguistics, archeology, art history, and ecological studies. Originally published in 1997. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

**The Paper Museum** Kate S. Simpson.2022-11-01 In a world where paper is obsolete and magic is all but forgotten, Lydia has moved into the Paper Museum with her Uncle Lem following the disappearance of her parents. Convinced the key to finding them lies in the museum's book collection, Lydia spends her days digitally scanning her way through the museum's library. But when Uncle Lem is called away and her Uncle Renald is put in charge of the museum, Lydia's scanning project comes to an abrupt halt. Uncle Renald takes her aer reader—the personal device that everybody uses for reading, shopping, messaging, and more—but not before Lydia makes a desperate attempt at filing a missing persons report for her parents. The report activates a countdown, and now with nothing but a secret typewriter in her dogwood fort and a cryptic message, Lydia has thirty days to find her parents and stop the mayor from commandeering the museum. Otherwise, both her family home and the Paper Museum itself will be reassigned to someone else. With aer readers on the fritz and the town descending into chaos, Lydia needs to find her parents before the Paper Museum—and her parents—are lost for good. The Paper Museum is a story of family and friendship with a hint of magic.

**3000 Years of Urban Growth** Tertius Chandler,Gerald Fox.2013-09-24 3000 Years of Urban Growth compiles urban population data acquired from

large cities at different points in time throughout the centuries. This book describes the sources and methods used in historical urban studies, including an evaluation of the total size estimates, area, institutional factors, and volume of local activity. Illustrations of maps that locate large cities from several time tables and regions of the world are also provided. This text likewise covers the data sheets for ancient cities from 1360 B.C. to 200 B.C. and 100 A.D. to 622 A.D. The data sheets from 800 to 1850 A.D. provide estimates for countries such as Italy, Afghanistan, France, Brazil, India, and Russia. Other topics include the world's largest cities from 430 B.C. to 200 B.C., top six cities in each continent from 800 to 1850, and whereabouts of unfamiliar cities not shown on the maps. This publication is a good source for sociologists, historians, and researchers interested in population studies.

**Biochemistry of Insects** Morris Rockstein.2012-12-02 Biochemistry of Insects reviews the state of knowledge in insect biochemistry. The book begins by examining the function of carbohydrates in regulating and maintaining the life processes of insects. This is followed by separate chapters on the functional roles of lipids and proteins in insects; and protein synthesis in insects. Subsequent chapters cover the chemistry of insect cuticle; the structure, distribution, and chemistry of insect biochromes; and chemical control of insect behavior. Also discussed are the biochemical aspects of the natural products used by insects in defensive contexts; the reaction of insecticides and related compounds with their targets; detoxification mechanisms in insects; and genetic variation in natural populations. Designed to serve as a basic textbook in field, this volume should be equally useful as an auxiliary text for most relevant courses in insect biology, particularly insect physiology, insect ecology, insect control, and economic entomology. The book should also serve as an important reference source for the advanced student, the research scientist, and the professional entomologist seeking authoritative details of relevant areas of subject matter.

**Geoheritage and Geotourism** Thomas A. Hose. 2016 Europe's engagement from the late sixteenth century onwards in scientific Earth science inquiry has generated numerous and varied collections of minerals, rocks, and fossils, together with their associated archives, artworks and publications, forming a rich cultural geoheritage held in major private and especially royal and aristocratic collections, museums, universities, archives and libraries. The mines, quarries, geological structures, landforms, minerals, rocks and fossils - or geodiversity - that underpin these collections populate past and present-day Earth science literature. However, for too long their scientific, historic and cultural significance was not universally recognised and generally they were not accorded adequate resources and protection - or geoconservation. Hence, geotourism was developed in the 1990s to raise public awareness of Europe's geoheritage and geodiversity and to promote its geoconservation; the volume's theoretical essays and case studies examine these four core geoelements and provide a timely introduction for anyone interested in natural history museums, countryside management, and landscape-based tourism. Dr Thomas A. Hose is an Honorary Research Associate in the School of Earth Sciences, University of Bristol. He has pioneered the recognition of and research into geotourism, and is the author of the world's first doctoral thesis on the subject. Contributors: Kevin Crawford, Peter Davis, John E. Gordon. **Arab Paper** Joseph von Karabacek. 2001 Bibliophiles in Europe at the end of the nineteenth century began to take a serious interest in the manuscripts of the Middle East and the paper on which they were written. Perhaps the most important of these men were C.-M. Briquet working in Geneva, and J. Wiesner and J. von Karabacek working in Vienna. All three were concerned with the burning topic of the moment: Was oriental paper made of cotton? Within the space of two years these three writers published seminal articles for the European study of Arab paper. *Das Arabische Papier* is one of those articles. The late Don Baker's inspiration to set about the translation and interpretation of this work was 'simply the desire to know the contents of this much quoted article'. Students, historians, curators, collectors, conservators and all those interested in the historical development and spread of papermaking will realise why Don Baker wished to make this important text available to English readers. This Archetype edition is a revised edition of the volume, which Don Baker produced in 1991.

**The Cultural World of Eleonora di Toledo** Konrad Eisenbichler. 2017-07-05 Eleonora di Toledo was a powerful and influential woman who, over the course of nearly a quarter century (1539-62), contributed profoundly to the cultural flowering of ducal Florence. Her patronage of some of the leading artists of the time, her support of newly arrived Jesuit preachers, her involvement in charitable activities, her unflinching devotion to her husband and his policies, not to mention her successful farming and business ventures are only some of the areas where her influence was unambiguously exercised and felt. She also provided the House of Medici with a full stable of children to re-invigorate the failing family line, ensure

male succession even in the face of unexpected calamities, and provide enough females to establish marriage connections with a variety of noble and ruling houses in Italy. In spite of all these contributions, Eleonora has attracted little attention from scholars. This apparent disinterest may be a factor of Eleonora's personal style, or of the bad press that, as a Spanish noblewoman, she quickly received from her Florentine subjects, or of modern antipathy for some of the basic characteristics of ducal Florence. An examination of her impact on Tuscany is long overdue. In fact, a fuller, more nuanced understanding of the duchess can shed a more profound light not only on her as a person, or on her impact on Tuscan culture in the sixteenth century, but also on the contribution of female consorts to the vitality of a successful early-modern state. The essays collected here bring together a variety of scholars working in various disciplines. While many of the articles take their cue from art history (a natural reflection of the innovative research recent art historians have carried out on the duchess), they also reach out towards other disciplines - political history, literature, spectacle, and religion to mention just a few. In so doing, they expand our understanding of Eleonora's place in her society and reveal a very complex,

**Rethinking Clusters** Luciana Lazzeretti,Francesco Capone,Annalisa Caloffi,Silvia Rita Sedita.2021-05-13 Research on the topic of clusters and industrial districts is very extensive. However, most of it has focused more on understanding the past than on trying to map out the future. The aim of this book is to fill this gap by identifying and discussing the main research topics that populate the current scientific debate and highlight the emergent lines of research that will constitute the future research agenda. It does so by drawing on the debate started with the rethinking clusters workshops, which in a short time have become a rich place for discussion among cluster scholars around the world. *Rethinking Clusters: Towards a New Research Agenda for Cluster Research* collects contributions from authoritative colleagues, who cover a number of relevant and timely issues, such as the territorial roots of radical innovation processes, new ways of understanding and measuring the role of place in economic development, path renewal, internationalization and entrepreneurship. The final section is devoted to the critical analysis of policies that support smart specialization. The chapters in this book were originally published as a special issue of the journal *European Planning Studies*.

**Italy and the Grand Tour** Jeremy Black.2003-01-01 For members of the social elite in 18th-century England, extended travel for pleasure came to be considered part of an ideal education as well as an important symbol of social status. Italy, and especially Rome - a fashionable, exciting, and comfortable city - became the focus of such early tourists' interest. In this book, historian Jeremy Black recreates the actual tourist experiences of those who travelled to Italy on a Grand Tour. Relying on the private diaries and personal letters of travellers, rather than on the self-conscious accounts of literary travellers who wrote for wider audiences, the book presents an authentic picture of how British tourists experienced Italy, its landscapes, women, food, music, Catholicism, and more. illustrations, the book highlights the discrepancy between the idealised view of the Grand Tour and its reality: what people were meant to do was not necessarily what they did, what the guide books described as splendid was not always so perceived. Black quotes British visitors as they reflect on their trips, and he discusses what their Italian experiences meant to them. And he considers the intriguing effects of tourism on British culture during this most exciting of centuries.

*Eruptions that Shook the World* Clive Oppenheimer.2011-05-26 What does it take for a volcanic eruption to really shake the world? Did volcanic eruptions extinguish the dinosaurs, or help humans to evolve, only to decimate their populations with a super-eruption 73,000 years ago? Did they contribute to the ebb and flow of ancient empires, the French Revolution and the rise of fascism in Europe in the 19th century? These are some of the claims made for volcanic cataclysm. Volcanologist Clive Oppenheimer explores rich geological, historical, archaeological and palaeoenvironmental records (such as ice cores and tree rings) to tell the stories behind some of the greatest volcanic events of the past quarter of a billion years. He shows how a forensic approach to volcanology reveals the richness and complexity behind cause and effect, and argues that important lessons for future catastrophe risk management can be drawn from understanding events that took place even at the dawn of human origins.

Medicinal and Aromatic Plants Tariq Aftab, Khalid Rehman Hakeem. 2020-05-12 Growing consumer interest in organic and herbal-based products has led to great demand in the botanicals industry in the past few years. However, the growing number of products utilizing medicinal and aromatic plants (MAPs) has threatened an estimated 9,000 medicinal plant species worldwide, making it critical to reevaluate their research and development, production, and utilization. Continuing advances in Omics methodologies and instrumentation are essential to understanding how plants cope with the dynamic nature of their growing environment, how yields and characteristics can be improved, and how to most effectively direct conservation efforts. With a focus on metabolomics, genomics, proteomics, transcriptomics, and more, *Medicinal and Aromatic Plants: Expanding Their Horizons through Omics* illustrates the genetic mechanisms of MAPs, providing a better understanding of MAPs conservation and methods to improve characteristics for medical applications. With an introduction on the role of MAPs in human health, subsequent chapters discuss using proteomics to increase MAP yields and plant quality, genome editing, and CRISPR/Cas9. A valuable resource for farmers, scientists, chemists, biochemists, pharmacists, and students interested in medicinal and aromatic plants and plant biology, *Medicinal and Aromatic Plants: Expanding Their Horizons through Omics* ensures readers have the background knowledge to put the necessary methodologies into practice themselves. Includes in-depth analysis of Omics technologies for the enhancement of MAPs Discusses applications of MAPs including their role in human health Written by world-wide leading experts in the field
