*Light and Lighting in People and Portrait Photography* Friedrun Reinhold.2011 Light and lighting are essential for a well taken photograph. This may sound simple, but it's what the true art of photography is all about. A photographer's skill in handling the light and getting stunning results is especially important when it comes to people and portrait photography.

**Lighting & Design for Portrait Photography** .2014-11-17 Some photographers make portraits that we can't take our eyes off of. These images create mood, evoke emotion, and pique our curiosity. They have that certain something that other portraits seem to lack. These rare images are memorable—the kind of shots that clients want and photographers strive to emulate. These portraits are technically precise and have style. Neil van Niekerk is a big name in the portrait and wedding photography industry. His masterful photographs get a reaction, and he's devoted to helping others create compelling portraits for their clients. In this book, van Niekerk shows readers strategies for creating a wide range of portrait looks (romantic, fun, sweet, dramatic, glamorous, or moody) in lackluster, middle-of-nowhere locales, small home studios, big expanses, and even on rooftops. Starting with traditional lighting and posing strategies and moving through "spicier" varieties, he shows readers how integrating specialized lighting (rim lighting, backlighting, flare, and low-key lighting—using natural light and artificial sources) and compositional approaches (shallow depth of field, lens compression, and unorthodox perspectives) into their creative approach can allow them to take full creative control over their portrait-taking process so that they're able to deliver incredible shots of their clients in any photographic conditions.

**Run and Gun Lighting Resource** Nick Fancher.2014-03-21 In *Run and Gun: One-Light Solutions for Commercial and Portrait Photographers*, photographer Nick Fancher discusses more than 20 one-light photo scenarios and setups for both portraits and product/commercial work, showing finished images as well lighting diagrams as he discusses each photograph. This ebook was written for the photographer who has just picked up a flash and has the ability to trigger it from somewhere other than the top of their camera. It does not cover the buttons and dials of your camera or flash, but instead Nick quickly and efficiently discusses different kinds of photographs you can accomplish with your newly acquired flash—images such as a portraits and product shots created with soft light, hard light, with a colored (gelled) fill light, and much more. Additionally, he covers using your flash to overpower the sun, as well as how to creatively use a slower shutter speed to create powerful aesthetic effects in your images. Finally, Nick shares a series of product shots he created as a self-assignment to further develop his own lighting, editing, and styling skills. After reading and working through *Run and Gun*, you'll be armed with ideas and techniques to head out and create similar images with your newly acquired flash.

*Picture Perfect Flash* Roberto Valenzuela.2024-01-22 Conquer portable strobes and hot shoe flash to create extraordinary portraits! Whether you use small, portable strobes or hot shoe flash, flash photography has always been daunting for most photographers. Without a system and workflow for thinking about and working with flash, you can easily end up feeling stuck, or you end up flailing—randomly changing settings, positions, and modifiers—and hoping for the best. It's not surprising that this leads to failure and frustration. Enter bestselling author Roberto Valenzuela and the *Picture Perfect Flash System*, which he created to empower you to finally conquer your flash and create photographs that fulfill your intention and vision. There are two key components to this system, which Roberto calls *FACES* and *NAME*. The *FACES* component provides a framework for thinking about how you want or need to use flash in a particular scene: • **Fix the Light:** Do you need to fix a low light problem, an unwanted color cast, or a situation with poor quality of light? • **Add Light:** Do you need to add more light to boost or enhance the available light or create separation? • **Create a Mood:** Are you using light to create a desired mood for a location or subject? • **Effects with Flash:** Are you using flash for creative visual effect? • **Sculpt the Light:** Do you need to sculpt the light to add drama, shape, and contouring? Once you've found your purpose for the light, the *NAME* component provides an essential workflow for carrying out your flash photography in a methodical way so that you get consistent and predictable results: • **Number of Flashes:** How many flashes do you need? • **Angle of Flashes:** Where do the flashes need to be positioned? • **Modifiers for Flashes:** How do you need to modify your flashes? • **Energy of Flashes:** What power do the flashes need to be? The *Picture Perfect Flash System* is covered in *Part One: The Flash Advantage*, which is the core framework of the book. In *Part Two: Flash Basics Explained*, Roberto covers the flash features you need to know: TTL, Manual, 1st and 2nd Curtain Sync, High Speed Sync, and Channels and Groups. Finally, in *Part Three: Dynamic Flash Exercises*, Roberto gives you a dozen lighting exercises that will substantially hone and advance your skills. With *Picture Perfect Flash*, you'll finally be able to conquer your flash...and make the kind of portraits you've always wanted to create. **TABLE OF CONTENTS** Foreword by Miss Universe, R'Bonney Nola Gabriel Introduction **PART ONE: The Flash Advantage** Chapter 1: The *Picture Perfect Flash System* Chapter 2: Fix the Light Chapter 3: Add Light Chapter 4: Create a Mood Chapter 5: Effects with Flash Chapter 6: Sculpt the Light Chapter 7: *NAME: Your Game Plan* **PART TWO: Flash Basics Explained** Chapter 8: TTL: Let the Flash Decide Chapter 9: Manual Mode Chapter 10: 1st Curtain Sync, 2nd Curtain Sync, and High Speed Sync Chapter 11: Channels and Groups **PART THREE: Dynamic Flash Exercises** Chapter 12: Lighting Exercises

Sketching Light Joe McNally.2011-12-06 Following up on the great success of *The Moment It Clicks* and *The Hot Shoe Diaries: Big Light from Small Flashes*, legendary magazine photographer Joe McNally takes us on another memorable ride with *Sketching Light*, another trip into the land of light—but this time running the gamut from small flash to big flash, and everywhere in between. Of course, Joe includes coverage of Nikon Speedlights, but he also covers big flash, as well as in-between lights as the Elinchrom Quadra. The exploration of new technology, as well as the explanation of older technology. No matter what equipment Joe uses and discusses, the most important element of Joe's instruction is that it is straightforward, complete, and honest. No secrets are held back, and the principles he talks about apply generally to the shaping and quality of light, not just to an individual model or brand of flash. He tells readers what works and what doesn't via his let's-see-what-happens approach, he shows how he sets up his shots with plentiful sketches and behind-the-scenes production shots, and he does it all with the intelligence, clarity, and wisdom that can only come from shooting in the field for 30 years for the likes of National Geographic, Time, Life, and Sports Illustrated—not to mention the wit and humor of a clearly warped (if gifted) mind.
