The Wellsprings of Music Curt Sachs.2012-12-06 Typical mild Sachsonian humor and illustrated with a wealth of examples and evidence. I doubt whether any other of us ethnomusicologists would have been capable of writing such a comprehensive study: Sachs had at his fingertips a phenomenal amount of factual information. Sometimes, under his wise guidance, complicated propositions become surprisingly simple. The reader will be as fascinated as I was by the originality of some of his conclusions, captivated by his penetrating comparisons, and charmed by his rich and expressive language. After having lived with this book for a period of some months, I realize all the more what the death of Curt Sachs means to the musicological world. The Wellsprings of Music forms a worthy close to that long series of publications his boundless energy and unsurpassed knowledge have given us I feel greatly indebted to Dr. Eric Werner, New York, for his decisive encouragement towards the publication of this work and for the active interest he took in it. I want also to express my gratitude to the musicologist Miss Marijke Charbon, The Hague, for having made an Index of Names and for some useful suggestions. Amsterdam, 15th February 1960 JAAP KUNST My dear friend Jaap Kunst did not live to see this book in print. I wish to express my deep gratitude to him, whose dedicated help and unfailing and devoted interest made its publication possible.

Fast Lane to Heaven Ned Dougherty.2005-09-01 My first experience with death happened on the night of July 2, 1984. Since then, books, movies, and television documentaries have popularized the term near-death experience to describe an event that has been experienced by millions of people who have been at death's door. But back in 1984 I was alone with my experience. I couldn't share it with anyone. From the book: Coming back from death is a powerful and life-changing experience. Before I came back from death, I was told that I was coming back with a mission in life. My mission was not clearly defined for me at first, but I now find that each and every day it is being defined for me more clearly. The experience has set me upon a path of self-discovery and spiritual enlightenment that continues to provide me with glimpses into the afterlife--glimpses that I would now like to share with you. Prior to finding myself at death's door, I was not by nature inclined to share anything with anybody, but now I believe it is important that I share my experiences with you.

Erasing Death Sam Parnia,Josh Young.2013-02-26 Erasing Death: The Science That Is Rewriting the Boundaries Between Life and Death reveals that death is not a moment in time. Death, rather, is a process—a process that can be interrupted well after it has begun. Innovative techniques have proven to be effective in revitalizing both the body and mind, but they are only employed in approximately half of the hospitals throughout the United States and Europe. Dr. Sam Parnia, Director of the AWARE Study (AWAREness during RESuscitation) and one of the world's leading experts on the scientific study of death and near-death experiences (NDE), presents cutting-edge research from the front lines of critical care and resuscitation medicine while also shedding light on the ultimate mystery: What happens to human consciousness during and after death? Dr. Parnia reveals how some form of “afterlife” may be uniquely ours, as evidenced by the continuation of the human mind and psyche after the brain stops functioning. With physicians such as Dr. Parnia at the forefront, we are on the verge of discovering a new universal science of consciousness that reveals the nature of mind and a future where death is not the final defeat, but is, in fact, reversible.

Folk Song Style and Culture Alan Lomax.2017-07-12 Song and dance style--viewed as nonverbal communications about culture--are here related to social structure and cultural history. Patterns of performance, theme, text and movement are analyzed in large samples of films and recordings from the whole range of human culture, according to the methods explained in this volume. Cantometrics, which means song as a measure of man, finds that traditions of singing trace the main historic distributions of human culture and that specific traits of performance are communications about identifiable aspects of society. The predictable and universal relations between expressive communication and social organization, here established for the first time, open up the possibility of a scientific aesthetics, useful to planners.

What Happens When We Die? Sam Parnia, M.D..2007-01-01 Dr. Sam Parnia faces death every day. Through his work as a critical-care doctor in a hospital emergency room, he became very interested in some of his patients' accounts of the experiences that they had while clinically dead. He started to collect these stories and read all the latest research on the subject, and then he conducted his own experiments. That work has culminated in this extraordinary book, which picks up where Raymond Moody's Life After Life left off. Written in a scientific, balanced, and engaging style, this is powerful and compelling reading. This fascinating and controversial book will change the way you look at death and dying.

The Medical Book Clifford A. Pickover.2014-03-01 The history of medicine is as old as the history of human civilization. In *The Medical Book*, popular science writer Clifford A. Pickover explores 250 milestone discoveries in medicine that span more than 12,000 years. Whether writing on 'hard science' topics such as DNA structure, reverse transcriptase and AIDS, polymerase chain reaction, and magnetic resonance imaging (MRI), or ideas from the medical fringe such as witch doctors, patent medicines, bloodletting, and near-death experiences, Pickover brings insight and acumen to the broad spectrum of medical studies and makes it understandable to all readers. This volume is abundantly illustrated in full colour with clinical and historical art.

Do They Sound Like Bells Or Like Howling Wolves? Gerald Florian Messner.2013 This study represents a thorough investigation of a polyphonic vocal village tradition in Bistritsa, Bulgaria. Outsiders describe the narrow intervals of these songs as being -maximally rough-, while the singers themselves experience their performance as smooth, beautiful and pleasant. Almost identical polyphonic traditions can be found in places sometimes thousands of kilometers apart. This inquiry is carried out within a very broad and comparative context, whereby historical sources, the origin of different constituents and etymologies as well as electronic sound analysis are taken into account. The results are stunning and ever more relevant - and not just for ethnomusicologists: The babi or grannies of Bistritsa and their songs have been inscribed on UNESCO's List of Intangible Cultural Heritage of Mankind in 2008.
