Many Ways to Learn Sharon Roop,Kristen Watson,Kelly Caldwell.2001-01-01 Ten theme-based units suggest creative activities based on the theory of multiple intelligences. The monthly themes kick off the school year with my favorites (favorite books, people, colors, etc.), then move on to apples and pumpkins, harvest, stories about runaways, hot soup (for January), authors, weather (for March), ecology, and careers, closing out the year with a June unit on friendship. Units offer key questions, a framework addressing each of eight learning styles, a one-week sample lesson plan, lists of related children's literature, and reproducible handouts to ease implementation. Grades K-2.

From Crystals to Kites Ron Kremer. 1995 Students build, explore, and evaluate 3-D structures in these well-planned solid geometry projects. Sequential investigations build on previous experience as students explore crystals, build and compare straw models, investigate polyhedra, build tetrahedral kites, and find the volume of prisms and pyramids. Projects encourage students to problem solve, find patterns, and communicate about what they discover. Teacher notes, blackline masters, and patterns included.

Constructing 3D Uniform Polyhedra ETC Montessori. 2022-12-07 A uniform polyhedron is a polyhedron which has regular polygons as faces and is transitive on its vertices. Since all vertices are congruent, these types of polyhedrons are ideal for studying reflectional and rotational symmetry. If you are talking about symmetry with your students and want to give them work that

will reinforce these concepts, then working on these 3D constructions is an option. Some of these constructions take time to make, however, there is a great amount of geometry that can be discovered by constructing these shapes. This set of blackline masters contains 3 of these solids: Small Ditrigonal Icosidodecahedron; Small Rhombidodecahedron; Small Rhombihexahedron. All black line masters come in two formats. The black and white models allow your students to color them. The colored model of each solid is pre-colored by us and is ready to cut out and glue together. discussions.

Math and Literature Marilyn Burns, Stephanie Sheffield. 2004 Annotation This series helps teachers use the imaginative ideas in children's books for math lessons. Organized into four grade-level collections to respond to teachers' specific classroom needs, this series includes favorite lessons based on a wide variety of children's books. Teachers will appreciate these books for the enjoyment and excitement they bring to math instruction. With introductions by Marilyn Burns, these books include vignettes of lessons and samples of student work. These lessons, based on popular children's books, address major mathematical topics such as addition, subtraction, multiplication, geometry, algebraic thinking, number sense, and place value.

Solid Geometry Percival Frost. 1875

Guide to Math Materials Phyllis J. Perry. 1997-02-15 Now it's easy to locate the materials you need to implement the new NCTM math standards. Organized by such math topics as problem solving, estimation, number sense and numeration, and geometry and spatial relationships, this book shows users where to find manipulatives and materials, such as attribute blocks, pattern blocks, clocks, scales, multilink cubes and prisms, calculators, and sorting toys. It also lists specialized math books,

computer software, and a host of other learning materials (e.g., activity cards, puzzles, posters, games, reproducibles). The author briefly describes each product, cites grade level when given, and explains possible applications. Products of exceptional quality and value are highlighted, and the addresses of publishers and suppliers are given. A real time-saver! Grades K-4.

Geometry, Grade 4 Jennifer Lawson.2008-07-31 In this module, students explore two- and three-dimensional shapes, their makeup, their properties, and their relationships to each other. The principal goal is to enhance students' understanding of geometric concepts and the roles they play in our lives. Also included: materials lists activity descriptions questioning techniques problem-solving examples activity centre and extension ideas assessment suggestions activity sheets and visuals All modules include a list of children's books and websites related to the mathematics topics introduced, a detailed introduction to the Hands-On Mathematics program (guiding principles, implementation guidelines, an overview of the skills that students use and develop during mathematics inquiry), and a classroom assessment plan and record-keeping templates.
