Aufklärung bis zum Himmel Friedemann Stengel.2011 English summary: In Immanuel Kant's *Dreams of a Spirit-Seer*, Swedenborg is seen as a candidate for the hospital and at the same time is said to be an arch-hallucinator. This hard verdict may have contributed considerably to the fact that Swedenborg's name has virtually disappeared from official historiography, although the works of Swedenborg, who was a natural philosopher and a theologian, were read by many of his contemporaries. In view of Swedenborg's surprising sources in particular, Friedemann Stengel reconstructs his comprehensive works, which were based on mechanistic natural philosophy, contemporary soul and brain research, Leibniz-Wolff rationalism and Lutheran theology. The origins, and mainly Swedenborg's striking reception, open up an unexpected perspective on the Enlightenment. German description: In den Traumen eines Geistersehers (1766) ist Swedenborg von Immanuel Kant ins aHospital verbannt und zugleich zum aErzphantasten erklärt worden. Dieses scharfe Verdikt durfte erheblichen Anteil daran gehabt haben, dass der Name Swedenborgs aus der offiziellen Geschichtsschreibung weitestgehend verschwunden ist, obwohl die Schriften des Naturphilosophen und Theologen Swedenborg von vielen Zeitgenossen gelesen worden sind. Sein umfangreiches Werk, das aus der mechanistischen Naturphilosophie, aus der zeitgenössischen Seelen- und Hirnforschung, aus dem Leibniz-Wolffschen Rationalismus und vor dem Hintergrund der lutherischen Theologie konstruiert worden ist, stellt Friedemann Stengel im Hinblick gerade auf seine überraschenden Quellen dar. Der Entstehungshintergrund, vor allem aber Swedenborgs wirkungsvolle Rezeption eröffnet eine unerwartete Perspektive auf die Aufklärung.

Becoming Alcoholic David R. Rudy.1986 Affiliation with Alcoholics Anonymous parallels religious conversion, according to David R. Rudy in this timely study of the most famous self-help organization in the world. Drinkers who commit themselves to Alcoholics Anonymous embrace the radically different life-style, the altered world of the convert. To understand this conversion and, more important, to get a grip on the even deeper mystery of alcoholism itself, Rudy sought to answer these three questions: What processes are involved in becoming alcoholic? How does the alcoholic affiliate with, and become committed to, A. A.'s belief system? What is the relationship between the world of A. A. members and that constructed by alcoholologists? Rudy establishes the history and structure of A. A. and examines the organization's relationship to dominant sociological models, theories, and definitions of alcoholism.

Literature as Cultural Ecology Hubert Zapf.2016-04-21 This book is available as open access through the Bloomsbury Open Access programme and is available on www.bloomsburycollections.com. Drawing on the latest debates in ecocritical theory and sustainability studies, *Literature as Cultural Ecology: Sustainable Texts* outlines a new approach to the reading of literary texts. Hubert Zapf considers the ways in which literature operates as a form of cultural ecology, using language, imagination and critique to challenge and transform cultural narratives of humanity's relationship to nature. In this way, the book demonstrates the important role that literature plays in creating a more sustainable way of life. Applying this approach to works by writers such as Emily Dickinson, Edgar Allan Poe, Herman Melville, William Faulkner, Toni Morrison, Zakes Mda, and Amitav Ghosh, *Literature as Cultural Ecology* is an essential contribution to the contemporary environmental humanities.

The Communicative Construction of Reality Hubert Knoblauch.2019-12-06 This volume advocates a shift from the social constructivism found in the work of Thomas Luckmann and Peter Berger, to a communicative constructivism that acknowledges communication as an embodied form of action in its own right, according to which social actors, in engaging in communicative action, construct a material social reality that guides, delimits, and enables actions. A study of the importance of understanding the role of communication in an age in which digitization and mediatization have extended the reach of communication to a global level and brought about the emergence of the communication society, *The Communicative Construction of Reality* shows how communication society does not merely replace modern society and its hierarchical institutions, but complements it in a manner that continually results in conflicts leading to the refiguration of society. As such, it will appeal to scholars of sociology with interests in the sociology of knowledge, communication, and social theory.

Ecopolitics Verena Andermatt Conley.2006-07-13 Ecopolitics is a study of environmental awareness - or non-awareness - in contemporary French theory. Arguing that it is now impossible not to think in an ecological way, Verena Andermatt Conley traces the roots of today's concern for the environment back to the intellectual climate of the late 50s and 60s. The author considers key texts by influential figures such as Michael Serres, Paul Virilio, Gilles Deleuze and Felix Guattari, Michel de Certeau, Hélène Cixous and Luce Irigaray. Ecopolitics rehabilitates some ecological components of French intellectual thought of the past thirty years, and reassesses French poststructural thinkers who explicitly deal with ecology in their work.

The Acquisition of German Anne Vainikka, Martha Young-Scholten. 2011-10-27 The Acquisition of German: Introducing Organic Grammar brings together work on the acquisition of German from over four decades of child L1 and immigrant L2 learner studies. The book's major feature is new longitudinal data from three secondary school students who began an exchange year in Germany with no German knowledge and attained fluency. Their naturalistic acquisition process — with a succession of stages described for the first time in L2 acquisition — is highly similar to that of younger learners. This has important implications for German teaching and for the theory of Universal Grammar and acquisition. Organic Grammar, a variant of generative syntax, is offered as a practical alternative to Chomsky's Minimalism. The analysis focuses on extensive monthly samples of the three students' German development in an input-rich environment. Similar to previous studies, the teenagers build syntactic structure from the bottom up. Two acquired correct word order by the end of the year, the third, who had greater conscious awareness of German grammar, had a divergent route of development, suggesting that language awareness can alter a natural developmental path. The results are addressed in light of recent debates in

child-adult differences.

Swordsmen of the Screen Jeffrey Richards.2014-03-26 This fascinating study of the genre of swashbuckling films received wide critical acclaim when it was first published in 1977. Jeffrey Richards assesses the contributions to the genre of directors, designers and fencing masters, as well as of the stars themselves, and devotes several chapters to the principal subjects if the swashbucklers – pirates, highwaymen, cavaliers and knights. The result is to recall, however fleetingly, the golden days of the silver screen. Reviews of the original edition: ‘An intelligent, scholarly, well-written account of adventure films, this work is sensitive both to cinema history and to the literary origins of the swashbuckler...Essential for any library with books on film, it may very well be the definitive book on its subject.’ – Library Journal

Germania Semitica Theo Vennemann gen. Nierfeld.2012-12-06 *Germania Semitica* explores prehistoric language contact in general, and attempts to identify the languages involved in shaping Germanic in particular. The book deals with a topic outside the scope of other disciplines concerned with prehistory, such as archaeology and genetics, drawing its conclusions from the linguistic evidence alone, relying on language typology and areal probability. The data for reconstruction comes from Germanic syntax, phonology, etymology, religious loan names, and the writing system, more

precisely from word order, syntactic constructions, word formation, irregularities in phonological form, lexical peculiarities, and the structure and rules of the Germanic runic alphabet. It is demonstrated that common descent is neither a necessary nor a sufficient condition for reconstruction. Instead, lexical and structural parallels between Germanic and Semitic languages are explored and interpreted in the framework of modern language contact theory.

Towards a General Theory of Translational Action Katharina Reiss, Hans J Vermeer. 2014-04-08 This is the first English translation of the seminal book by Katharina Reiß and Hans Vermeer, *Grundlegung einer allgemeinen Translationstheorie*, first published in 1984. The first part of the book was written by Vermeer and explains the theoretical foundations and basic principles of skopos theory as a general theory of translation and interpreting or 'translational action', whereas the second part, penned by Katharina Reiß, seeks to integrate her text-typological approach, first presented in 1971, as a 'specific theory' that focuses on those cases in which the skopos requires equivalence of functions between the source and target texts. Almost 30 years after it first appeared, this key publication is now finally accessible to the next generations of translation scholars. In her translation, Christiane Nord attempts to put skopos theory and her own concept of 'function plus loyalty' to the test, by producing a comprehensible, acceptable text for a rather heterogeneous audience of English-speaking students and scholars all over the world, at the same time as acting as a loyal intermediary for the authors, to whom she feels deeply indebted as a former student and colleague.
