Dastaan `e` Zindagi Sonia Paruthi .2021-07-31 Life is an emotional rollercoaster is the cynosure of this pulchritudinous compilation named Dastaan_e_zindagi. Each day teaches us something new, To solve the problem with a golden view. Every day we get up with a new ray of hope. Life is as beautiful as the patterns of kaleidoscopes. We cannot understand its mystery. Everything has its own chemistry. Between two evils we pick the one we haven't tried, It doesn't matter if we cried. Failure gives us a tight slap, We learned a great lesson at each and every step. Tomorrow is not promised for anyone, One day we all will become a memory for someone. Let's do good and bring a smile to everybody's faces, Our goodness will be the left traces. Optimism is the key to overcoming any obstacle, Every problem we can easily tackle. Sometimes the wrong choices take us to the right place, Each day with a new pain strength we chase. A beautiful heart can win the whole world, Even if we do not speak a big word. In the end, we do get a sweet fruit, Although the pain might be its root. Every day does something good and doesn't be sad in your sorrow. One day this will turn into your greatest strengths of tomorrow. Do it now whatever, You wish to, later never. Life is not about finding yourself, Rather it's about writing your destiny yourself. It doesn't matter if you are different from others, You are unique, not a part of a swarm, not to bother. Let's do something, A moment that changes everything. Close your eyes, Look whether your heart cries? Put your hand on your heart, Let all the emotions be a part. Ask your soul did you hurt someone, Search any moment from day one. A time for introspection, The one you made cry learned a lesson. Imagine how difficult the journey would have been, When those little eyes betrayals were seen. God gifted you 86400 seconds today, Thank you or sorry? Use one to say. It takes a strong person to say sorry, Requires a stronger one to forgive, creates glory. A time to look inside the heart, Maybe there is someone breaking apart. Mend it soon before it's too late, No one waits when the demise gate opens.

Gaṇeśapurāṇa Greg Bailey.2008 This book offers a translation of the seven thousand verses of the second book of the medieval Hindu text, the Ganesa Purana, one of two Puranas dedicated to the important elephant-headed god. In this book the reader is given many narratives about Ganesa's ascent to earth in order to kill demonic figures who threaten to overthrow the correct world order. In addition, these narratives contain myths about Ganesa's birth and family as well as some extended and quite humorous myths about ideal devotees of the god. The translation is preceded by a long introduction offering a geographical and historical context for the Ganesa Purana. Following the translation are very extensive notes which bring our points of philological interest, but focus mainly on the literary structure of the text and the methods used to present the many myths and narratives in a coherent and fully integrated manner.

Mechanism Design Rakesh V. Vohra.2011-05-09 Mechanism design is an analytical framework for thinking clearly and carefully about what exactly a given institution can achieve when the information necessary to make decisions is dispersed and privately held. This analysis provides an account of the underlying mathematics of mechanism design based on linear programming. Three advantages characterize the approach. The first is simplicity: arguments based on linear programming are both elementary and transparent. The second is unity: the machinery of linear programming provides a way to unify results from disparate areas of mechanism design. The third is reach: the technique offers the ability to solve problems that appear to be beyond solutions offered by traditional methods. No claim is made that the approach advocated should supplant traditional mathematical machinery. Rather, the approach represents an addition to the tools of the economic theorist who proposes to understand economic phenomena through the lens of mechanism design.
