*America's Favorite Homes* Robert Schweitzer,Michael W. R. Davis.1990 During the first four decades of the twentieth century, prefabricated and catalogue homes grew in popularity and number. Built and occupied by farmers, merchants, the new armies of factory workers and other lower- and middle-class families, these are the modest homes that today line American streets. Using mail-order house catalogues from the time, Robert Schweitzer and Michael W. R. Davis chart the development of catalogue houses and their variations and include floor plans for many models. Students of architecture, whether amateur or professional, preservationists and academics will find in America's Favorite Homes a handy reference to those homes that soon will be eligible for historic designation.

100 Small Houses of the Thirties Brown-Blodgett Company.2012-08-21 Brown-Blodgett Company, a St. Paul, Minnesota-based home construction service, published a detailed plan book to help prospective homeowners of the 1930s choose architectural designs. This complete republication of the now-rare volume includes exterior photographs and floor plans for 100 of these charming structures. Floor plans, photographs, and line illustrations depict such classics as a two-story, six-room frame home with sun porch; a handsome brick residence with low sweeping gables, a fireplace, and vestibule; and a charming seven-room house with a tall, massive chimney balanced by a gabled entrance. Illustrations of each model are accompanied by text describing interiors, color schemes, closet space, and other amenities. An entertaining and valuable reference for restorers of older homes, this volume will delight devotees of American domestic architecture.

American Builder .1914

Houses from Books Daniel D. Reiff.2010-11-01 Many homes across America have designs based on plans taken from pattern books or mail-order catalogs. In Houses from Books, Daniel D. Reiff traces the history of published plans and offers the first comprehensive survey of their influence on the structure and the style of American houses from 1738 to 1950. Houses from Books shows that architectural publications, from Palladio's I Quattro Libri to Aladdin's Read-Cut Homes, played a decisive role in every aspect of American domestic building. Reiff discusses the people and the firms who produced the books as well as the ways in

which builders and architects adapted the designs in communities throughout the country. His book also offers a wide-ranging analysis of the economic and social conditions shaping American building practices. As architectural publication developed and grew more sophisticated, it played an increasingly prominent part in the design and the construction of domestic buildings. In villages and small towns, which often did not have professional architects, the publications became basic resources for carpenters and builders at all levels of expertise. Through the use of published designs, they were able to choose among a variety of plans, styles, and individual motifs and engage in a fruitful dialogue with past and present architects. Houses from Books reconstructs this dialogue by examining the links between the published designs and the houses themselves. Reiff's book will be indispensable to architectural historians, architects, preservationists, and regional historians. Realtors and homeowners will also find it of great interest. A catalog at the end of the book can function as a guide for those attempting to locate a model and a date for a particular design. Houses from Books contains a wealth of photographs, many by the author, that enhance its importance as a history and guide.

*The American Builder's Companion* Asher Benjamin.2012-12-13 There is scarcely a New England town which does not contain houses, church spires, or ornamental interior details derived from the Late Colonial architectural designs of Asher Benjamin (1773-1845). Benjamin disseminated his ideas chiefly through his publications, of which this book is the most important. Books such as *The American Builder's Companion* were written for local carpenters to be used as manuals and guides. They made it possible for small-town carpenters, who were already skilled in rudimentary carpentry and house construction, to give their buildings sophistication and style. There were instructions for raising and supporting several types of roofs, constructing winding stairs, spacing fluting evenly on columns, modeling and mounting friezes, etc. Carpenters were thus able to plan, build, and decorate complex, ornate structures. *The American Builder's Companion* includes rules and definitions of practical geometry and discussion of methods for drawing basic shapes and cutting them out of solids. There are designs for interior ornament — patterns for decorative cornices, moldings, banisters, stucco ceiling ornaments, mantels, etc., as well as designs for doorways and windows. Benjamin also deals with problematic structural elements, and finally provides full plans and elevations for private houses, wooden churches, and a court house. Important as one of the single, major disseminators of a style which became almost ubiquitous in the Northeast, Benjamin's book also contains a rich store of evidence on problems and achievements of early American builders. Direct references to tools, materials, common practices and processes, and unconscious indication of taste and aesthetic values of the time will be invaluable to students of architecture, experts in restoration, and readers interested in American history and culture. New introduction by William Morgan. 70 plates.

**Living Treasures** Lindal Cedar Homes (Firm).1990

**At Home in New England** Richard Wills.2013-12-06 The now venerable firm of Royal Barry Wills was founded in a one-room office on Boston's Beacon Street in 1925. Initially fueled by word of mouth and occasional newspaper exposure, the firm gained admiration for Wills's fresh take on various New England styles, including Georgian, Tudor, French Provincial, and Colonial American. Driven by the country's desire for both aesthetic appeal and practicality, the firm's popularity increased dramatically with its focus on the creation of modern homes inspired by the one-and-a-half-story Cape Cod houses, which perfectly balanced the classic and the new. Now run by his son, Richard Wills, the firm has been designing elegant private homes in the classically inspired Colonial New England tradition for more than eighty-five years. As time has passed, their Cape Cod-style homes have proven remarkably adaptable to the demands of contemporary life, while staying true to Wills's original flair for intermingling past and present. This book features examples of the firm's work from its founding to the present, with an emphasis on more recent houses that have been built throughout New England.

**Inexpensive Homes of Individuality** Henry Hodgman Saylor.1912

**The Bungalow Book** Henry L. Wilson.2012-03-08 Cozy, charming, and distinctly Californian, the bungalow is an enduring architectural icon. Originally designed to survive earthquakes, the low, rambling structures combined grace, beauty, and comfort at minimum cost. Early in the twentieth century, Los Angeles architect Henry Wilson, who called himself *The Bungalow Man*, compiled 112 of the most popular and economic bungalow blueprints of his time in a catalog for would-be homeowners. Complementing each set of prints was an illustration or photograph of the completed house, which most frequently contained two or three bedrooms with closet space, living and dining rooms, a kitchen with pantry, and a bath. An ideal reference for preservationists and restorers, this reprint of Wilson's rare catalog represents a wonderful time capsule and invaluable guide to a popular style of American domestic architecture.

**Houses by Mail** Katherine Cole Stevenson,H. Ward Jandl.1995-07-19 It was the American Dream by Mail Order --Smithsonian Americans have ordered from Sears, Roebuck just about everything they have needed for their homes for 100 years--but from 1908 to 1940, some 100,000 people also purchased their houses from this mail-order wizard. Sears ready-to-assemble houses were ordered by mail and shipped by rail wherever a boxcar or two could pull in to unload the meticulously precut lumber and all the materials needed to build an exceptionally sturdy and well-designed house. From Philadelphia, Pa., to Coldwater, Kans., and Cowley, Wyo., Sears put its guarantee on quality bungalows, colonials and Cape Cods, all with the latest modern conveniences--such as indoor plumbing. *Houses by Mail* tells the story of these precut houses and provides for the first time an incomparable guide to identifying Sears houses across the country. Arranged for easy identification in 15 sections by roof type, the book features nearly 450 house models with more than 800 illustrations, including drawings of the houses and floor plans. Because the Sears houses were built to last, thousands remain today to be discovered and restored. *Houses by Mail* shows how to return them to their original charm while it documents a highly successful business enterprise that embodied the spirit and domestic design of its time. After decades of obscurity, Sears houses have become chic. --Wall Street Journal These were . spacious, solidly built homes. --Parade Don't be surprised if your own cozy bungalow turns up [in the book].--Philadelphia Inquirer A nostalgic and informative look at the tastes of Americans in the years before World War II.--Publishers Weekly The bible to researchers of Sears' ready-cut homes.--Saturday Evening Post
