The Online Advertising Playbook Joe Plummer, Stephen D. Rappaport, Taddy Hall, Robert Barocci. 2007-07-20 Praise for The Online Advertising Playbook Finally, someone has documented all we know about online advertising and how to do it right. As much as this confirms that online advertising really works, we know that marketers don't always get it right. The ARF's The Online Advertising Playbook provides critical insight on what sticks and what doesn't in online advertising and marketing. —Greg Stuart, CEO and President, Interactive Advertising Bureau and coauthor of What Sticks The Online Advertising Playbook's principles, case studies, and strategic insights equip marketers with the best knowledge available. It will help your online advertising achieve the full range of marketing objectives, from lead generation and customer acquisition to driving trial and loyalty. —Tim Kopp, Vice President, Global Interactive Marketing, The Coca-Cola Company To grow interactive marketing from here we need to institutionalize our wisdom and experience about what works. This book explains, in a disciplined way, what marketers have learned from a decade of massive change. —Ted McConnell, Interactive Innovation Director, Procter & Gamble The Online Advertising Playbook is a milestone in the maturation of interactive advertising, but also an invaluable go-to guide for managers trying to make smart decisions with their advertising budgets. —Van Riley, Vice President of Research, AOL The best marketing communication is spawned from what I call 'informed intuition.' After reading The Online Advertising Playbook, I am far better informed on how to optimize the online channel in our advertising and promotional programs. It's a perfect blend of case studies and research-backed learning. —Rod DeVar, Manager, Advertising and Promotion, United States Postal Service Savvy marketers should take advantage of The Online Advertising Playbook's findings and principles to get real results. —Chris Theodoros, Director of Industry Relations, Google A work of wisdom and rigor in the digital space that is as relevant for the newbie as it is for the digerati. —Mike Donahue, Executive Vice President, American Association of Advertising Agencies This is a must-read for any marketing executive involved in online advertising. It's high time that a book looks at online advertising in the context of an integrative promotional strategy, one meant to set objectives, establish creative strategies, and measure results. The book nicely ties the various components of online advertising to relevant case studies, and the emphasis on measurement and results is refreshing. Not only is it relevant for marketing executives, it would also be a good basic text for any Internet advertising course and a good adjunct to any Internet marketing course. —Henry Assael, Professor of Marketing, Stern School of Business, New York University

It Still Takes A Candidate Jennifer L. Lawless, Richard L. Fox. 2010-06-21 It Still Takes A Candidate serves as the only systematic, nationwide empirical account of the manner in which gender affects political ambition. Based on data from the Citizen Political Ambition Panel Study, a national survey conducted of almost 3,800 'potential candidates' in 2001 and a second survey of more than 2,000 of these same individuals in 2008, Jennifer L. Lawless and Richard L. Fox find that women, even in the highest tiers of professional accomplishment, are substantially less likely than men to demonstrate ambition to seek elective office. Women are less likely than men to be recruited to run for office. They are less likely than men to think they are qualified to run for office. And they are less likely than men to express a willingness to run for office in the future. This gender gap in political ambition persists across generations and over time.

Surveillance Valley Yasha Levine. 2018-02-06 The internet is the most effective weapon the government has ever built. In this fascinating book, investigative reporter Yasha Levine uncovers the secret origins of the internet, tracing it back to a Pentagon counterinsurgency surveillance project. A visionary intelligence officer, William Godel, realized that the key to winning the war in Vietnam was not outgunning the enemy, but using new information technology to understand their motives and anticipate their movements. This idea -- using computers to spy on people and groups perceived as a threat, both at home and abroad -- drove ARPA to develop the internet in the 1960s, and continues to be at the heart of the modern internet we all know and use today. As Levine shows, surveillance wasn't something that suddenly appeared on the internet; it was woven into the fabric of the technology. But this isn't just a story about the NSA or other domestic programs run by the government. As the book spins forward in time, Levine examines the private surveillance business that powers tech-industry giants like Google, Facebook, and Amazon, revealing how these companies spy on their users for profit, all while doing double duty as military and intelligence contractors. Levine shows that the military and Silicon Valley are effectively inseparable: a military-digital complex that permeates everything connected to the internet, even coopting and weaponizing the antigovernment privacy movement that sprang up in the wake of Edward Snowden. With deep research, skilled storytelling, and provocative arguments, Surveillance Valley will change the way you think about the news -- and the device on which you read it.

Red Hot Lies Christopher C. Horner. 2008-11-11 Liars--Al Gore, the United Nations, the New York Times. The global warming lobby, relentless in its push for bigger government, more spending, and more regulation, will use any means necessary to scare you out of your wits--as well as your tax dollars and your liberties--with threats of rising oceans, deadly droughts, and unspeakable future consequences of climate change. In pursuing their anti-energy, anti-capitalist, and pro-government agenda, the global warming alarmists--and unscrupulous scientists who see this scare as their gravy train to federal grants and foundation money--resort to dirty tricks, smear campaigns, and outright lies, abandoning scientific standards, journalistic integrity, and the old-fashioned notions of free speech and open debate. In Red Hot Lies, bestselling author Christopher Horner--himself the target of Greenpeace dirty tricks and alarmist smears--exposes the dark underbelly of the environmental movement. Power-hungry politicians blacklist scientists who reject global warming alarmism. U.S. senators threaten companies that fund climate change dissenters. Mainstream media outlets openly reject the notion of balance. The occasional unguarded scientist candidly admits the need to twist the facts to paint an uglier picture in order to keep the faucet of government money flowing. In the name of saving the planet, anything goes. But why the nasty tactics? Why the cover ups, lies, and intimidation? Because Al Gore and his ilk want to use big government at the local, state, federal, and global level to run your life, and they can brook no opposition. But the actual facts, as Red Hot Lies makes clear, aren't nearly as scary as their fiction.

Breakcore Andrew Whelan. 2009-05-27 Peer-to-peer music exchange, sampling, and digital distribution have garnered much attention in recent years, notably in debates about authorship, intellectual property, media control, and 'Web 2'. However, empirical scholarship on how these technologies are used creatively by musicians and fans is still sparse. In this interdisciplinary ethnography of 'bedroom producer' culture, Andrew Whelan examines interaction and exchange within a specific online milieu: peer-to-peer chatrooms dedicated to electronic music, focusing on a genre known as 'breakcore'. The author draws on semantic anthropology, ethnomethodology, sociolinguistics, and critical musicology to explore the activity afforded by this controversial and criminalised environment. Through in-depth analysis of often ritually vituperative text-based interaction, discussions of music, and the samples used in that music, Whelan describes the cultural politics and aesthetics of bedroom producer identity, highlighting the roles gender and ethnicity play in the constitution of subcultural authenticity. Empirically driven throughout, this book also engages with a spectrum of social theory; in doing so, it highlights the intersections between gender, interaction, technology and music. This book will prove valuable for students and scholars with interests in gender and language use, computer-mediated communication, online subcultures and virtual community, and the evolution, production and distribution of electronic music.

The End of Love Eva Illouz.2021-09-15 Western culture has endlessly represented the ways in which love miraculously erupts in people's lives, the mythical moment in which one knows someone is destined for us, the feverish waiting for a phone call or an email, the thrill that runs down our spine at the mere thought of him or her. Yet, a culture that has so much to say about love is virtually silent on the no less mysterious moments when we avoid falling in love, where we fall out of love, when the one who kept us awake at night now leaves us indifferent, or when we hurry away from those who excited us a few months or even a few hours before. In *The End of Love*, Eva Illouz documents the multifarious ways in which relationships end. She argues that if modern love was once marked by the freedom to enter sexual and emotional bonds according to one's will and choice, contemporary love has now become characterized by practices of non-choice, the freedom to withdraw from relationships. Illouz dubs this process by which relationships fade, evaporate, dissolve, and break down "unloving." While sociology has classically focused on the formation of social bonds, *The End of Love* makes a powerful case for studying why and how social bonds collapse and dissolve. Particularly striking is the role that capitalism plays in practices of non-choice and "unloving." The unmaking of social bonds, she argues, is connected to contemporary capitalism which is characterized by practices of non-commitment and non-choice, practices that enable the quick withdrawal from a transaction and the quick realignment of prices and the breaking of loyalties. Unloving and non-choice have in turn a profound impact on society and economics as they explain why people may be having fewer children, increasingly living alone, and having less sex. *The End of Love* presents a profound and original analysis of the effects of capitalism and consumer culture on personal relationships and of what the dissolution of personal relationships means for capitalism.

Corrupt Capital Kenneth Sebastian León.2020-09-22 This book offers a deep dive into the social, political, and economic forces that make white-collar crime and corruption a staple feature of the nightlife economy. The author, a former bouncer-turned-bartender of party bars and nightclubs in a large U.S. city, draws from an auto-ethnographic case study to describe and explain the routine and embedded nature of corruption and deviance among the regulators and the regulated in the nightlife environment. This text offers a contemporary and incisive theoretical framework on the criminogenic features and structural contradictions of capitalism. The author both describes and explains how the dominant political economy is rife with structural contradictions that, in turn, generate various manifestations of white-collar crime, organizational deviance, and public corruption. The author uses the bar and nightlife environment to empirically anchor these claims. Methodologically, the research is innovative in advancing inquiry into ethically and logistically challenging environments. The style of writing and framing of the text is one that punches upward and avoids the voyeuristic and reductionist tropes historically associated with dangerous fieldwork. Through a range of disciplinary perspectives, *Corrupt Capital* offers both scholarly rigor and inviting prose to advance our understanding of crimes of the relatively powerful and powerless alike. An accessible and compelling text, this book will appeal to readers in criminology, sociology, law and society, political science, and all those interested in learning about the relationship between power, law, and routinized corruption in the nightlife economy.

The Twittering Machine Richard Seymour.2020-09-22 A brilliant probe into the political and psychological effects of our changing relationship with social media Former social media executives tell us that the system is an addiction-machine. We are users, waiting for our next hit as we like, comment and share. We write to the machine as individuals, but it responds by aggregating our fantasies, desires and frailties into data, and returning them to us as a commodity experience. *The Twittering Machine* is an unflinching view into the calamities of digital life: the circus of online trolling, flourishing alt-right subcultures, pervasive corporate surveillance, and the virtual data mines of Facebook and Google where we spend considerable portions of our free time. In this polemical tour de force, Richard Seymour shows how the digital world is changing the ways we speak, write, and think. Through journalism, psychoanalytic reflection and insights from users, developers, security experts and others, Seymour probes the human side of the machine, asking what we're getting out of it, and what we're getting into. Social media held out the promise that we could make our own history—to what extent did we choose the nightmare that it has become?

Autonomous Vehicle Technology James M. Anderson,Kalra Nidhi,Karlyn D. Stanley,Paul Sorensen,Constantine Samaras,Oluwatobi A. Oluwatola.2014-01-10 The automotive industry appears close to substantial change engendered by "self-driving" technologies. Facebook Nation Newton Lee.2014-10-16 Facebook's psychological experiments and Edward Snowden's NSA leaks epitomize a world of increasing information awareness in the social media ecosystem. With over a billion monthly active users, Facebook as a nation is overtaking China as the largest country in the world. President Barack Obama, in his 2011 State of the Union Address, called America "the nation of Edison and the Wright brothers" and "of Google and Facebook." U.S. Chief Information Officer Steven VanRoekel opines that America has become a "Facebook nation" that demands increased transparency and interactivity from the federal government. Ubiquitous social networks such as Facebook, Google+, Twitter, and YouTube are creating the technologies, infrastructures, and big data necessary for Total Information Awareness - a controversial surveillance program proposed by DARPA after the 9/11 attacks. NSA's secret PRISM program has reinvigorated WikiLeaks founder Julian Assange's accusation that "Facebook is the most appalling spying machine that has ever been invented." Facebook CEO Mark Zuckerberg once said, "We exist at the intersection of technology and social issues." This book offers discourse and practical advice on the privacy issue in the age of big data, business intelligence in social media, e-government and e-activism, as well as personal total information awareness. This expanded edition also includes insights from Wikipedian Emily Temple-Wood and Facebook ROI experts Dennis Yu and Alex Houg.

Curriculum 21 Heidi Hayes Jacobs. 2010-01-05 What year are you preparing your students for? 1973? 1995? Can you honestly say that your school's curriculum and the program you use are preparing your students for 2015 or 2020? Are you even preparing them for today? With those provocative questions, author and educator Heidi Hayes Jacobs launches a powerful case for overhauling, updating, and injecting life into the K-12 curriculum. Sharing her expertise as a world-renowned curriculum designer and calling upon the collective wisdom of 10 education thought leaders, Jacobs provides insight and inspiration in the following key areas: * Content and assessment: How to identify what to keep, what to cut, and what to create, and where portfolios and other new kinds of assessment fit into the picture. * Program structures: How to improve our use of time and space and groupings of students and staff. * Technology: How it's transforming teaching, and how to take advantage of students' natural facility with technology. * Media literacy: The essential issues to address, and the best resources for helping students become informed users of multiple forms of media. * Globalization: What steps to take to help students gain a global perspective. * Sustainability: How to instill enduring values and beliefs that will lead to healthier local, national, and global communities. * Habits of mind: The thinking habits that students, teachers, and administrators need to develop and practice to succeed in school, work, and life. The answers to these questions and many more make Curriculum 21 the ideal guide for transforming our schools into what they must become: learning organizations that match the times in which we live.

Population Control Jim Marrs. 2015-06-23 From the food we eat, the water we drink to the air we breathe, everything these days seems capable of killing us. Recently we have seen an unprecedented number of deaths due to medications for diseases that may not even exist, obscure cancers caused by our modern devices, and brutal police tactics. All a coincidence? Think again. In Population Control, acclaimed journalist Jim Marrs lays out a stunning case for his most audacious conspiracy yet: the scheme concocted by a handful of global elites to reduce the world's population to 500 million by whatever means necessary and make a profit from it. Marrs, the bestselling author of Rule by Secrecy and The Trillion Dollar Conspiracy, pulls no punches in exposing this evil and chillingly effective plan. He explains how a small group of tremendously wealthy and powerful people control virtually every important industry - guns, oil, pharmaceuticals, food, and of course the media - and how it uses this vast network of conglomerates to take actions that lead to the deaths of men and women all over the world. In the explosive Population Control, Marrs lays bare the damning truths corporate owners don't want you to discover: how they've spied on private citizens, intentionally spread disease, and destroyed the planet chasing profits, all to improve the lives of a privileged few while eliminating everyone else. Finally, he offers a citizen's blueprint for fighting back.
