Is Local Beautiful? Sara Hellmüller, Martina Santschi. 2013-12-17 Based on the swisspeace annual conference 2012, the publication examines the delicate balance between external interventions and locally-led initiatives. It addresses the question of what "local" means in the peacebuilding and development context; which actors on the ground actually represent the local level and how external actors choose their partners from amongst them. Moreover, it examines how local ownership - emerging as key criteria for any external intervention - is constituted: does this concept only imply local participation or is local control from the outset a must? Finally, it assesses the potential of locally-led initiatives and local conflict resolution mechanisms and their interaction with external interventions. Several authors provide insights on these questions and nuance our thinking about both local ownership and external interventions. As such, the publication aims to encourage critical reflections on this topical debate in peacebuilding and development.

Spatial Turns Jaimey Fisher, Barbara Caroline Mennel. 2010-01 The phrase "spatial turns" signals the growing importance of space as an analytical as well as representational category for culture. The volume addresses such emerging modes of inquiry by bringing together, for the first time, essays that engage with spatial turns, spatiality, and the theoretical implications of both in the context of German culture, history, and theory. Migrating from fields like geography, urban studies, and architecture, the new centrality of space has transformed social-science fields as diverse as sociology, philosophy, and psychology. In cultural studies, productive analyses of space increasingly cut across the studies of literature, film, popular culture, and the visual arts. *Spatial Turns* brings together essays that apply a spatial analysis to German literature and other media and engages with specifically German theorizations of space by such figures as Siegfried Kracauer and Walter Benjamin. The volume is organized in four sections: "Mapping Spaces" addresses cartography in all forms and in its intersection with culture; "Spaces of the Urban" takes up one of the key sites of spatial studies, the city; "Spaces of Encounter" considers how Germany has become a contact zone for multiple ethnicities; and "Visualized Spaces" concerns the theorization of space in film and new media studies.

The Development of Autobiographical Memory Hans J. Markowitsch, Harald Welzer. 2009-10-28 Autobiographical memory constitutes an essential part of our personality, giving us the ability to distinguish ourselves as an individual with a past, present and future. This book reveals how the development of a conscious self, an integrated personality and an autobiographical memory are all intertwined, highlighting the parallel development of the brain, memory and personality. Focusing strongly on developmental aspects of memory and integrating evolutionary and anthropological perspectives, areas of discussion include: why non-human animals lack autobiographical memory development of the speech areas in the brain prenatal and transnatal development of memory autobiographical memory in young children. This book offers a unique approach through combining both neuroscientific and social scientific viewpoints, and as such will be of great interest to all those wanting to broaden their knowledge of the development and acquisition of memory and the conscious self.

Mediated Scandals Mark Ludwig, Thomas Schierl, Christian von Sikorski. 2016-04-05 In jüngerer Zeit ist eine Zunahme der medialen Berichterstattung über Skandale zu beobachten. Die begleitenden zahlreichen, teilweise aufgeheizten Debatten um die Art und Weise der medialen Skandalberichterstattung - erinnert sei etwa an die Fälle Strauss-Kahn, Wulff, Kachelmann oder Hoeneß - haben gezeigt, dass Skandale ein gesellschaftlich virulentes, jedoch nicht einfach zu greifendes Phänomen darstellen. Skandalberichterstattung kann sich einerseits als gesellschaftlich hochrelevant erweisen, als mit ihr auf Missstände, Werte- oder Normverletzungen aufmerksam gemacht und Diskurse über grundlegende Werte und Normen in Gang gesetzt werden können. Andererseits kann eine Häufung von Skandalberichten sowie eine Zuspitzung und Personalisierung in der journalistischen Aufbereitung von Skandalen gleichfalls zu unerwünschten Auswirkungen auf Einzelpersonen (wie zum Beispiel nicht gerechtfertigte Reputationsschäden) und möglicherweise auch zu negativen gesellschaftlichen Effekten (wie zum Beispiel Vertrauensverluste in die Arbeit von Medien, Politik und anderer gesellschaftliche Teilbereiche) führen. Vor diesem Hintergrund werden im vorliegenden Themenband grundlegende Aspekte der Thematik sowie aktuelle Studien und Sichtaufweisen auf die Thematik aus kommunikationswissenschaftlicher Perspektive vorgestellt. Der Band setzt seinen Schwerpunkt auf die bisher in der Forschung eher wenig beachteten Effekte von Skandalberichterstattung sowie deren Gründe und Genese.

Epidemiology of Electromagnetic Fields Martin Roosli. 2014-06-03 Appeals to a Wide Audience Fueled by more than 30 years of intensive research and debate on the impact of electromagnetic fields (EMF) on everyday life—starting with residential exposure to magnetic fields and the development of childhood cancer in the 70s and continuing with risk of exposure via wireless communications in present day—*Epidemiology of Electromagnetic Fields* addresses ongoing public and scientific controversy surrounding the possible effects of electromagnetic fields (EMF) to human health, and provides an in-depth introduction into the methodology of environmental epidemiology that is appropriate for all levels, from student to practicing engineer. Exposure to EMF Focusing primarily on EMF examples, the author presents the general principles and methodological concepts in environmental epidemiology. Topics of importance in the first part of the book include epidemiological study designs, exposure assessment methods and implications for the study results, as well as selection bias, confounding, and other biases including reverse causality and ecological fallacy. The second part of the book covers environmental epidemiological methods in detail and outlines key examples such as childhood leukemia and exposure to extremely low-frequency magnetic fields, as well as examples that look at brain tumors and mobile phone use. The book also offers a detailed discussion on the range of EMF sources and exposures. In addition, it highlights the sophisticated assessment methods required to address exposure situations, and provides a historical perspective. The third part of the book examines how EMF exposure from the use of wireless communication techniques and other challenges affect risk assessment today and also details future developments. Explores environmental epidemiological methods in detail, while critically discussing epidemiological findings Provides a state-of-the-art overview of the scientific evidence of the health effects of EMF Considers how novelty, the steep increase of radiofrequency (RF) EMF exposure from wireless communications, and other challenges affect risk assessment today *Epidemiology of Electromagnetic Fields* provides a thorough overview of the subject, and evaluates the scientific evidence surrounding the possible health effects of EMFs.

Moll Flanders and Roxana Daniel Defoe.2017-10-07 *The Fortunes & Misfortunes of the Famous Moll Flanders* is a novel by Daniel Defoe, 1st published in 1722. It purports to be the true account of the life of the eponymous Moll, detailing her exploits from birth until old age. The novel's full title gives some insight into this & the outline of the plot: *The Fortunes & Misfortunes of the Famous Moll Flanders, &c. Who was Born in Newgate, & during a Life of continu'd Variety for Threescore Years, besides her Childhood, was Twelve Year a Whore, five times a Wife (whereof once to her own Brother), Twelve Year a Thief, Eight Year a Transported Felon in Virginia, at last grew Rich, liv'd Honest, & died a Penitent. Written from her own Memorandums.* *Roxana* (1724), Defoe's last and darkest novel, is the autobiography of a woman who has traded her virtue, at first for survival, and then for fame and fortune. Its narrator tells the story of her own 'wicked' life as the mistress of rich and powerful men. A resourceful adventuress, she is also an unforgiving analyst of her own susceptibilities, who tells us of the price she pays for her successes. Endowed with many seductive skills, she is herself seduced: by money, by dreams of rank, and by the illusion that she can escape her own past. Unlike Defoe's other penitent anti-heroes, however, she fails to triumph over these weaknesses. *Roxana's* fame lies not only in the heroine's 'vast variety of fortunes', but in her attempts to understand the sometimes bitter lessons of her life as a 'Fortunate Mistress'. Defoe's achievement was to invent, in '*Roxana*', a gripping story-teller as well as a gripping story.

Sport im Film Robert Gugutzer,Barbara Englert.2014-10-01 Lange Zeit von den Sozial- und Kulturwissenschaften ignoriert und als bloße Mainstream-Unterhaltung stigmatisiert, erlangt der Sportfilm zunehmend wissenschaftliche Aufmerksamkeit. Der interdisziplinär angelegte Band verdeutlicht das vielfältige und vielschichtige, gleichwohl noch nicht annähernd ausgeschöpfte wissenschaftliche Analyse- und Reflexionspotenzial des Sportfilms. Die Beiträge der national und international renommierten Autorinnen und Autoren fokussieren im Besonderen den Sportspielfilm mit seinen zahlreichen Subgenres wie Football-, Basketball-, Box-, Olympia- und Kampfsportfilm. Das steigende Interesse am Sportfilm resultiert aus der wachsenden Einsicht, dass es sich hierbei um ein Genre handelt, das pointiert gesellschaftliche Zustände, kulturelle Ideologien sowie politisch-ökonomische Strukturen reflektiert und kritisiert. Der Sportfilm thematisiert historische Ereignisse, gesellschaftliche Entwicklungen wie auch individuelle und kollektive (Anti-)Helden. Er gibt Aufschluss über kulturspezifische Besonderheiten des Sports und dessen Verflechtung mit anderen gesellschaftlichen Handlungsfeldern. Darüber hinaus inszeniert er zeitgeisttypische und zugleich allgemeingültige (Körper-)Ideale, Werte, Konflikt- und Handlungsmuster. Der Sportfilm reproduziert damit nicht nur gesellschaftliche und sportliche Wirklichkeit, sondern konstruiert sie im Medium einer emotional wirkmächtigen Bildsprache gleichermaßen mit.

An Imaginative Approach to Teaching Kieran Egan.2005-02-04 In this book, award-winning educator Kieran Egan shows how we can transform the experience of K-12 students and help them become more knowledgeable and more creative in their thinking. At the core of this transformative process is imagination which can become the heart of effective learning if it is tied to education's central tasks. *An Imaginative Approach to Teaching* is a groundbreaking book that offers an understanding of how students' imaginations work in learning and shows how the acquisition of cognitive tools drives students' educational development. This approach is unique in that it engages both the imagination and emotions. The author clearly demonstrates how knowledge comes to life in students' minds if it is introduced in the context of human hopes, fears, and passions. To facilitate this new educational approach, the book includes a wide variety of effective teaching tools - such as story, rhythm, play, opposition, agency, and meta-narrative understanding - that value and build upon the way children understand their experiences. Most important, Egan provides frameworks for lesson planning and more than a dozen sample lessons to show how teachers can use these tools to awaken intelligence and imagination in the classroom.

Chronophobia Pamela M. Lee.2006-02-17 An examination of the pervasive anxiety about and fixation with time seen in 1960s art. In the 1960s art fell out of time; both artists and critics lost their temporal bearings in response to what E. M. Cioran called not being entitled to time. This anxiety and uneasiness about time, which Pamela Lee calls chronophobia, cut across movements, media, and genres, and was figured in works ranging from kinetic sculptures to Andy Warhol films. Despite its pervasiveness, the subject of time and 1960s art has gone largely unexamined in historical accounts of the period. *Chronophobia* is the first critical attempt to define this obsession and analyze it in relation to art and technology. Lee discusses the chronophobia of art relative to the emergence of the Information Age in postwar culture. The accompanying rapid technological transformations, including the advent of computers and automation processes, produced for many an acute sense of historical unknowing; the seemingly accelerated pace of life began to outstrip any attempts to make sense of the present. Lee sees the attitude of 1960s art to time as a historical prelude to our current fixation on time and speed within digital culture. Reflecting upon the 1960s cultural anxiety about temporality, she argues, helps us historicize our current relation to technology and time. After an introductory framing of terms, Lee discusses such topics as presentness with respect to the interest in systems theory in 1960s art; kinetic sculpture and new forms of global media; the temporality of the body and the spatialization of the visual image in the paintings of Bridget Riley and the performance art of Carolee Schneemann; Robert Smithson's interest in seriality and futurity, considered in light of his reading of George Kubler's important work *The Shape of Time: Remarks on the History of Things* and Norbert Wiener's discussion of cybernetics; and the endless belaboring of the present in sixties art, as seen in Warhol's *Empire* and the work of On Kawara.

Coaching Soccer Like Guardiola and Mourinho Timo Jankowski. 2016-08-29 A soccer player is more than the sum of his parts: endurance, speed, shooting technique, passing technique, and many more. All of these factors need to be turned into one system to create good players. Traditional training theory doesn't achieve that because each skill is trained individually. This is why the concept of Tactical Periodization has become the preferred training theory for many of the current most successful soccer coaches: Pep Guardiola, José Mourinho, Diego Simeone, André Villas-Boas, and many others train according to these principles. By creating match-like situations in practice, players learn to link their technical, tactical, and athletic abilities to match intelligence. They will learn to transfer their skills to soccer matches and they can improve endurance, technique, and tactics all at the same time while enjoying the practice sessions more. For this book, the author has evaluated and analyzed hundreds of training sessions and has tailored exercises to specific demands. All exercises are performed with a ball so that players learn to apply each skill to the game. Every coach will find numerous exercises in this book to help them create better and more efficient practice sessions so they can improve their players' and the team's performance. With Tactical Periodization, your team will become better and be successful on the next match day!

Early Modern Humans at the Moravian Gate Maria Teschler-Nicola. 2007-07-28 The Upper Paleolithic fossils of the Mladec caves, South Moravia, excavated at the end of the 19th century, hold a key position in the current discussion on modern human emergence within Europe and the fate of the Neanderthals. Although undoubtedly early modern humans - recently radio carbon dated to 31.000 years BP - their morphological variability and the presence of archaic features are indicative to some degree of regional Neanderthal ancestry. The beautifully illustrated monograph addresses - for the first time - the complete assemblage of the finds, including the human cranial, post cranial, teeth and jaw fragments of several individuals (most of them stored at the Natural History Museum Vienna) as well as the faunal remains and the archaeological objects. Leading scientists present their results, obtained with innovative techniques such as DNA analysis, 3D-morphometry and isotope analysis, which are of great importance for further discussions on both human evolution and archaeological issues.

Parkour and the Art Du Déplacement Vincent Thibault. 2013 Parkour, the art of displacement, or freerunning--whatever the name, this new discipline born in the Paris suburbs is rapidly being adopted by people throughout the world. Not satisfied to suffer through urban life, these athletic artists or artistic athletes want to thrive in it, all the while earning dignity by daringly reappropriating three fundamental motor skills: running, jumping, and climbing. Vincent Thibault explores the philosophical and spiritual aspects of the art of movement and offers ideas on health, sports, urban living, and the relationship between the body and the environment. Reflecting on the culture of effort, he also avoids the misguided notion that depicts parkour as just another of those elitist extreme sports, instead providing a thoughtful, lyrical adventure into martial arts and chivalry in an urban setting.

The Past is the Present; It's the Future Too Christine Ross. 2012-06-28 The term 'temporality' often refers to the traditional mode of the way time is: a linear procession of past, present and future. As philosophers will note, this is not always the case. Christine Ross builds on current philosophical and theoretical examinations of time and applies them to the field of contemporary art: films, video installations, sculpture and performance works. Ross first provides an interdisciplinary overview of contemporary studies on time, focusing on findings in philosophy, psychology, sociology, communications, history, postcolonial studies, and ecology. She then illustrates how contemporary artistic practices play around with what we consider linear time. Engaging the work of artists such as Guido van der Werve, Melik Ohanian, Harun Farocki, and Stan Douglas, allows investigation through the art, as opposed to having art taking an ancillary role. *The Past is the Present; It's the Future Too* forces the reader to understand the complexities of the significance of temporal development in new artistic practices.

Contesting Identities Aaron Baker. 2003 Publisher's description: Since the earliest days of the silent era, American filmmakers have been drawn to the visual spectacles of sports and their compelling narratives of conflict, triumph, and individual achievement. In *Contesting Identities* Aaron Baker examines how these cinematic representations of sports and athletes have evolved over time--from *The Pinch Hitter* and *Buster Keaton's College* to *White Men Can't Jump*, *Jerry Maguire*, and *Girlfight*. He focuses on how identities have been constructed and transcended in American society since the early twentieth century. Whether depicting team or individual sports, these films return to that most American of themes, the master narrative of self-reliance. Baker shows that even as sports films tackle socially constructed identities such as class, race, ethnicity, sexuality, and gender, they ultimately underscore transcendence of these identities through self-reliance. In addition to discussing the genre's recurring dramatic tropes, from

the populist prizefighter to the hot-headed rebel to the manly female athlete, Baker also looks at the social and cinematic impacts of real-life sports figures from Jackie Robinson and Babe Didrikson Zaharias to Muhammad Ali and Michael Jordan.

The Sports Film Bruce Babington.2014-03-14 After covering the genre's early history and theorizing its general characteristics, this volume then focuses on specific instances of sports films, such as the biopic, the sports history film, the documentary, the fan film, the boxing film, and explores issues such as gender, race, spectacle and silent comedy. Four major films are then closely analysed - Chariots of Fire, Field of Dreams, the Indian cricket epic Lagaan, and Oliver Stone's Any Given Sunday. While recording American film's importance to the genre, the book resists the conventional over-concentration on American cinema and sports by its attention to other cinemas, for example the British, Indian, Australian, South Korean, Thai, German, New Zealand, Spanish, and so on, with the many different sports they depict.
