That Will Never Work Marc Randolph.2019-09-17 In the tradition of Phil Knight's Shoe Dog comes the incredible untold story of how Netflix went from concept to company—all revealed by co-founder and first CEO Marc Randolph. Once upon a time, brick-and-mortar video stores were king. Late fees were ubiquitous, video-streaming unheard of, and widespread DVD adoption seemed about as imminent as flying cars. Indeed, these were the widely accepted laws of the land in 1997, when Marc Randolph had an idea. It was a simple thought—leveraging the internet to rent movies—and was just one of many more and far worse proposals, like personalized baseball bats and a shampoo delivery service, that Randolph would pitch to his business partner, Reed Hastings, on their commute to work each morning. But Hastings was intrigued, and the pair—with Hastings as the primary investor and Randolph as the CEO—founded a company. Now with over 150 million subscribers, Netflix's triumph feels inevitable, but the twenty-first century's most disruptive start-up began with few believers and calamity at every turn. From having to pitch his own mother on being an early investor, to the motel conference room that served as a first office, to server crashes on launch day, to the now-infamous meeting when Netflix brass pitched Blockbuster to acquire them, Marc Randolph's transformational journey exemplifies how anyone with grit, gut instincts, and determination can change the world—even with an idea that many think will never work. What emerges, though, isn't just the inside story of one of the world's most iconic companies. Full of counter-intuitive concepts and written in binge-worthy prose, it answers some of our most fundamental questions about

taking that leap of faith in business or in life: How do you begin? How do you weather disappointment and failure? How do you deal with success? What even is success? From idea generation to team building to knowing when it's time to let go, *That Will Never Work* is not only the ultimate follow-your-dreams parable, but also one of the most dramatic and insightful entrepreneurial stories of our time.

keeper! -Lisa Jackson, New York Times bestselling author Hot Comb Ebony Flowers.2020-10-14 AN AUSPICIOUS DEBUT EXAMINING THE CULTURE OF HAIR FROM THE RONA JAFFE FOUNDATION AWARD-WINNING CARTOONIST Hot Comb offers a poignant glimpse into Black women's lives and coming of age stories as seen across a crowded, ammonia-scented hair salon while ladies gossip and bond over the burn. The titular story "Hot Comb" is about a young girl's first perm—a doomed ploy to look cool and to stop seeming "too white" in the all-black neighborhood her family has just moved to. In "Virgin Hair" taunts of "tender-headed" sting as much as the perm itself. It's a scenario that repeats fifteen years later as an adult when, tired of the maintenance, Flowers shaves her head only to be hurled new put-downs. The story "My Lil Sister Lena" traces the stress resulting from being the only black player on a white softball team. Her hair is the team curio, an object to be touched, a subject to be discussed and debated at the will of her teammates, leading Lena to develop an anxiety disorder of pulling her own hair out. Among the series of cultural touchpoints that make you both laugh and cry, Flowers recreates classic magazine ads idealizing women's needs for hair relaxers and product. "Change your hair form to fit your life form" and "Kinks and Koils Forever" call customers from the page. Realizations about race, class, and the imperfections of identity swirl through Flowers' stories and ads, which are by turns sweet, insightful, and heartbreaking. Flowers began drawing comics while earning her PhD, and her early mastery of sequential storytelling is nothing short of sublime. Hot Comb is a propitious display of talent from a new cartoonist who has already made her mark.

Dark State—as stakes escalate in a conflict that could spell extermination for humanity across all known timelines. An inter-timeline coup d'état gone awry. A renegade British monarch on the run through the streets of Berlin. And robotic alien invaders from a distant timeline flood through a wormhole, wreaking havoc in the USA. Can disgraced worldwalker Rita and her intertemporal extraordinaire agent of a mother neutralize the livewire contention before it's too late? Buried Indians Laurie Hovell McMillin.2006 In *Buried Indians*, Laurie Hovell McMillin presents the struggle of her hometown, Trempealeau, Wisconsin, to determine whether platform mounds atop Trempealeau Mountain constitute authentic Indian mounds. This dispute, as McMillin subtly demonstrates, reveals much about the attitude and interaction-past and present-between the white and Indian inhabitants of this Midwestern town. McMillin's account, rich in detail and sensitive to current political issues of American Indian interactions with the dominant European American culture, locates two opposing views: one that denies a Native American presence outright and one that asserts its long history and ruthless destruction. The highly reflective oral histories McMillin includes turn *Buried Indians* into an accessible, readable portrait of a uniquely American culture clash and a dramatic narrative grounded in people's genuine perceptions of what the platform mounds mean.

Possible Minds John Brockman.2019-02-19 Science world luminary John Brockman assembles twenty-five of the most important scientific minds, people who have been thinking about the field artificial intelligence for most of their careers, for an unparalleled round-table examination about mind, thinking, intelligence and what it means to be human. Artificial intelligence is today's story--the story behind all other stories. It is the Second Coming and the Apocalypse at the same time: Good AI versus evil

AI. --John Brockman More than sixty years ago, mathematician-philosopher Norbert Wiener published a book on the place of machines in society that ended with a warning: we shall never receive the right answers to our questions unless we ask the right questions.... The hour is very late, and the choice of good and evil knocks at our door. In the wake of advances in unsupervised, self-improving machine learning, a small but influential community of thinkers is considering Wiener's words again. In *Possible Minds*, John Brockman gathers their disparate visions of where AI might be taking us. The fruit of the long history of Brockman's profound engagement with the most important scientific minds who have been thinking about AI--from Alison Gopnik and David Deutsch to Frank Wilczek and Stephen Wolfram--*Possible Minds* is an ideal introduction to the landscape of crucial issues AI presents. The collision between opposing perspectives is salutary and exhilarating; some of these figures, such as computer scientist Stuart Russell, Skype co-founder Jaan Tallinn, and physicist Max Tegmark, are deeply concerned with the threat of AI, including the existential one, while others, notably robotics entrepreneur Rodney Brooks, philosopher Daniel Dennett, and bestselling author Steven Pinker, have a very different view. Serious, searching and authoritative, *Possible Minds* lays out the intellectual landscape of one of the most important topics of our time.

Vagabond, Vol. 5 Takehiko Inoue.2003-03-05 Continues the adventures of the Japanese swordsman Miyamoto Musashi.

The Man in My Basement Walter Mosley.2004-01-05 Hailed as a masterpiece -- the finest work yet by an American novelist of the first rank -- this is the mysterious story of a young black man who agrees to an unusual bargain to save the home that has belonged to his family for generations. The man at Charles Blakey's door has a proposition almost too strange for words. The stranger offers him \$50,000 in cash to spend the summer in Charles's basement, and Charles cannot even begin to guess why. The beautiful house has been in the Blakey family for generations, but Charles has just lost his job and is behind on his mortgage payments. The money would be welcome. But Charles Blakey is black and Anniston Bennet is white, and it is clear that the stranger wants more than a basement view. There is something deeper and darker about his request, and Charles does not need any more trouble. But financial necessity leaves him no choice. Once Anniston Bennet is installed in his basement, Charles is cast into a role he never dreamed of. Anniston has some very particular requests for his landlord, and try as he might, Charles cannot avoid being lured into Bennet's strange world. At first he resists, but soon he is tempted -- tempted to understand a set of codes that has always eluded him, tempted by the opportunity to understand the secret ways of white folks. Charles's summer with a man in his basement turns into an exploration of inconceivable worlds of power and manipulation, and unimagined realms of humanity. Walter Mosley pierces long-hidden veins of justice and morality with startling insight into the deepest mysteries of human nature.

With tenderness and incisive insight, Leavitt spotlights a woman's unexpected journey towards her art.” —Madeline

Miller, author of *Circe* A Best Book of the Month: Bustle *
PopSugar New York Times bestselling author Caroline Leavitt writes novels that expertly explore the struggles and conflicts that people face in their search for happiness. For the characters in *With or Without You*, it seems at first that such happiness can come only at someone else's expense. Stella is a nurse who has long suppressed her own needs and desires to nurture the dreams of her partner, Simon, the bass player for a rock band that has started to lose its edge. But when Stella gets unexpectedly ill and falls into a coma just as Simon is preparing to fly with his band to Los Angeles for a gig that could revive his career, Simon must learn the meaning of sacrifice, while Stella's best friend, Libby, a doctor who treats Stella, must also make a difficult choice as the coma wears on. When Stella at last awakes from her two-month sleep, she emerges into a striking new reality where Simon and Libby have formed an intense bond, and where she discovers that she has acquired a startling artistic talent of her own: the ability to draw portraits of people in which she captures their innermost feelings and desires. Stella's whole identity, but also her role in her relationships, has been scrambled, and she has the chance to form a new life, one she hadn't even realized she wanted. A story of love, loyalty, loss, and resilience, *With or Without You* is a page-turner that asks the question, What do we owe the other people in our lives, and when does the cost become too great?

More from Less Andrew McAfee.2020-10-13 From the coauthor of the New York Times bestseller *The Second Machine Age*, a paradigm-shifting argument “full of fascinating information and provocative insights” (Publishers Weekly, starred review)—demonstrating that we are increasing prosperity while using fewer natural resources. Throughout history, the only way for humanity to grow was by degrading the Earth: chopping down forests, polluting the air and water, and endlessly using up resources. Since the first Earth Day in 1970, the focus has been on radically changing course: reducing our consumption, tightening our belts, and learning to share and reuse. Is that argument correct? Absolutely not. In *More from Less*, McAfee argues that to solve our ecological problems we should do the opposite of what a decade of conventional wisdom suggests. Rather than reduce and conserve, we should rely on the cost-consciousness built into capitalism and the streamlining miracles of technology to create a more efficient world. America—a large,

high-tech country that accounts for about 25% of the global economy—is now generally using less of most resources year after year, even as its economy and population continue to grow. What’s more, the US is polluting the air and water less, emitting fewer greenhouse gases, and replenishing endangered animal populations. And, as McAfee shows, America is not alone. Other countries are also transforming themselves in fundamental ways. What has made this turnabout possible? One thing, primarily: the collaboration between technology and capitalism, although good governance and public awareness have also been critical. McAfee does warn of issues that haven’t been solved, like global warming, overfishing, and communities left behind as capitalism and tech progress race forward. But overall, *More from Less* is a revelatory and “deeply engaging” (Booklist) account of how we’ve stumbled into an unexpectedly better balance with nature—one that holds out the promise of more abundant and greener centuries ahead.

[Last Girl Standing](#) Trina Robbins. 2017-08-16 Born on the cusp of WWII in 1938, at a time when other little girls dreamed of being nurses and secretaries, Trina Robbins’s ambition was to be a bohemian; and indeed she did. She chronicles a life of sex, drugs, rock ‘n’ roll — and comics — in *Last Girl Standing*. Robbins describes her upbringing in Queens, New York, reading comics through her childhood in the 1940s; visiting the EC offices and becoming part of SF fandom (dating Harlan Ellison at age 16); and posing nude for men’s magazines in the 1950s; living in the Village, over her own boutique where she made clothes for and interacted with rock royalty like David Crosby, Donovan, Cass Elliot; her close relationship with Paul Williams; entering the orbit of underground cartoonists like Art Spiegelman, R. Crumb, Vaughn Bodé, and Bill Griffith, when she started contributing comics to *The East Village Other*; and, in the ‘70s, moving to San Francisco, contending with the phallogocentric underground scene, marrying Kim Deitch, co-founding *Wimmen’s Comix*, and being invited into *Felch Comics* (she declined); her work for the

National Lampoon, Marvel Comics, and Eclipse in the 1980s; and her crisis as a cartoonist and transformation into an historian and lecturer in the '90s and 2000s. From science fiction to the Sunset Strip, from New York's underground newspapers to San Francisco's underground comix: Trina Robbins broke the rules and broke the law. From dressing Mama Cass to being pelted with jelly babies as she helped photograph the Rolling Stones's first US tour, from drunken New York nights spent with Jim Morrison to producing the very first all-woman comic book, this former Lady of the Canyon takes no prisoners in this heavily illustrated memoir.

CinemaTexas Notes Louis Black,Collins Swords.2018-02-26

Austin's thriving film culture, renowned for international events such as SXSW and the Austin Film Festival, extends back to the early 1970s when students in the Department of Radio-Television-Film at the University of Texas at Austin ran a film programming unit that screened movies for students and the public. Dubbed CinemaTexas, the program offered viewers a wide variety of films—old and new, mainstream, classic, and cult—at a time when finding and watching films after their first run was very difficult and prohibitively expensive. For each film, RTF graduate students wrote program notes that included production details, a sampling of critical reactions, and an original essay that placed the film and its director within context and explained the movie's historical significance. Over time, CinemaTexas Program Notes became more ambitious and were distributed around the world, including to luminaries such as film critic Pauline Kael. This anthology

gathers a sampling of CinemaTexas Program Notes, organized into four sections: “USA Film History,” “Hollywood Auteurs,” “Cinema-Fist: Renegade Talents,” and “America’s Shadow Cinema.” Many of the note writers have become prominent film studies scholars, as well as leading figures in the film, TV, music, and video game industries. As a collection, CinemaTexas Notes strongly contradicts the notion of an effortlessly formed American film canon, showing instead how local film cultures—whether in Austin, New York, or Europe—have forwarded the development of film studies as a discipline.

Exploring Science Through Science Fiction Barry B. Luukkala. 2013-10-23 The material in this book forms the basis of

an interdisciplinary, college-level course, which uses science fiction film as a vehicle for exploring science concepts. Unlike traditional introductory-level courses, the science content is arranged according to major themes in science fiction, with a deliberate progression from the highly objective and discipline-specific (e.g. Reference Frames; Physics of Space Travel and Time Travel) to the very multi-disciplinary and thought-provoking (e.g. Human Teleportation; Science and Society). Over 100 references to science fiction films and television episodes are included, spanning more than 100 years of cinematic history. Some of these are conducive to calculations (solutions included).

Our Final Hour Martin Rees. 2009-03-17 A scientist known for unraveling the complexities of the universe over millions of years, Sir Martin Rees now warns that humankind is potentially the maker of its own demise -- and that of the cosmos. Though the twenty-first century could be the critical era in which life on Earth spreads beyond our solar system, it is just as likely that we have endangered the future of the entire universe. With clarity and precision, Rees maps out the ways technology could destroy our species and thereby foreclose the potential of a living universe whose evolution has just begun. Rees boldly forecasts the startling risks that stem from our accelerating rate of technological advances. We could be wiped out by lethal engineered airborne viruses, or by rogue nano-machines that replicate catastrophically. Experiments that crash together atomic nuclei could start a chain reaction that erodes all atoms of Earth, or could even tear the fabric of space itself. Through malign intent or by mistake, a single event could trigger global disaster. Though we can never completely safeguard our future, increased regulation and inspection can help us to prevent catastrophe. Rees's vision of the infinite future that we have put at risk -- a cosmos more vast and diverse than any of us has ever imagined -- is both a work of stunning scientific originality and a humanistic clarion call on behalf of the future of life.
