Financial Management: Principles and Applications J William Petty, Sheridan Titman, Arthur J Keown, Peter Martin, John D Martin, Michael Burrow. 2015-05-20 The sixth edition of Financial Management provides students with an overview of financial management suited to the first course in finance. The focus of the text is on the big picture, providing an introduction to financial decision making grounded in current financial theory and the current state of world economic conditions. Attention is paid to both valuation and capital markets, as well as their influence on corporate financial decisions. The 10 basic principles of finance are introduced in the first chapter and woven throughout the text, to give students a solid foundation from which to build their knowledge of finance. The goal of this text is to go beyond teaching the tools of a discipline or a trade and help students gain a complete understanding of the subject. This will give them the ability to apply what they have learnt to new and as yet unforeseen problems—in short, to educate students in finance.

Investment Banking Workbook Joshua Rosenbaum, Joshua Pearl, Joseph Gasparro. 2021-02-17 This workbook is designed for use both as a companion to our book, *Investment Banking: Valuation, LBOs, M&A, and IPOs*, Third Edition, as well as on a standalone basis. Investment Banking focuses on the primary valuation methodologies currently used on Wall Street—namely, comparable companies analysis, precedent transactions analysis, discounted cash flow (DCF) analysis, leveraged buyout (LBO) analysis, mergers & acquisitions (M&A) analysis, and initial public offering (IPO) valuation from both a sell-side and buy-side perspective. Our workbook seeks to help solidify knowledge of these core financial topics as true mastery must be tested, honed, and retested over time. We envision the workbook being used as a self-help tool for students, job seekers, and existing finance professionals, as well as in formal classroom and training settings--

Creating Financial Value Malcolm Allitt. 2016-01-28 How many senior executives and managers are able to reach the top with little or no financial training? They may have been appointed to the executive board as a result of their expertise in marketing, HR, sales or IT, yet every board member has a responsibility to make informed decisions on proposed financial actions - decisions which inevitably affect the value of their business. Offering straightforward and practical advice, *Creating Financial Value* will equip those who are not financial specialists with the necessary knowledge not only to contribute fully to important discussions on policy and strategy, but also to develop sound business proposals, or to competently cross-examine the proposals of others. Through examples from a range of business disciplines, the book explains in simple, digestible terms how a business

creates financial value, and how a non-financial manager can confidently take an active role in the process. Once read, the book will provide an essential resource that can be referenced time and again. Malcolm Allitt punctures the myths surrounding 'shareholder value' and looks behind the finance jargon to define the boundaries between what a non-specialist should know and when it is good practice to seek the advice of financial specialists. This book is key reading for anyone from a non-financial background who wants to execute their increasingly broad responsibilities competently and confidently, without the need to become experts themselves.
