Automotive Audio Systems Homer L. Davidson.2001 High-powered car audio systems are very popular with today's under-30 generation. These top-end systems are merely a component within the vehicle's audio system, much as your stereo receiver is a component of your home audio and theater system. Little has been written about the troubleshooting and repair of these very expensive automotive audio systems. Homer Davidson takes his decades of experience as an electronics repair technician and demonstrates the ins-and-outs of these very high-tech components.

Forward Drive Jim Motavalli.2014-10-14 This comprehensive account of the past, present and future of the automobile examines the key trends, key technologies and key players involved in the race to develop clean, environmentally friendly vehicles that are affordable and that do not compromise on safety or design. Undertaking a rigorous interrogation of our global dependency on oil, the author demonstrates just how unwise and unnecessary this is in light of current developments such as the fuel cell revolution and the increasing viability of hybrid cars, which use both petrol and electricity - innovations that could signal a new era of clean, sustainable energy. The arguments put forward draw on support from an eclectic range of sources - including industry insiders, scientists, economists and environmentalists - to make for an enlightening read.

Soy-Based Bioplastics Vijay Kumar Thakur. 2017-11-01 Soy and its coproducts are rapidly emerging as one of the most prominent sustainable plastics of the 21st century. The relative abundance of soy and its functional and thermoplastic properties, low cost, and biodegradable characteristics have made it a material of great interest for widespread use in the plastics industry. As most of the functional properties of the final products are directly related to the physico-chemical properties of the raw material, a detailed knowledge of the inherent characteristics of soy-based materials is essential for understanding and manipulating their properties for better end-user applications. This book summarises in a most comprehensive manner the recent technical research accomplishments in the area of soy-based bioplastics. The prime aim and focus of this book is to present recent advances in the processing and applications of soy-based biopolymers as potential bioplastics. It reflects recent theoretical advances and experimental results, and opens new avenues for researchers as well as readers working in the field of plastics and sustainable materials. The different topics covered in this book include: structural analysis of soy-based materials; soy/biopolymer blends; films, fibres, foams, and composites; and different advanced applications. In addition, several critical issues and suggestions for future work are comprehensively discussed in the hope that the book will provide a deep insight into the state of the art of soy-based bioplastics. The book is unique, with contributions from leading experts in the bioplastics research area, and is a useful reference for scientists, academics, research scholars, and technologists.

Twelve Years a Slave Solomon Northup.2024-01-04 Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Nortup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

Chemical and Electrical Hypersensitivity Jerry Evans.2014-01-10 Electrical and multiple chemical sensitivities are disabling illnesses, yet many doctors know little of these conditions, or worse, dismiss them. This timely memoir recounts one man's affliction. The onset of the diseases is explored, as is his struggle with the medical establishment, largely hostile to his diagnosis. When the symptoms became unbearable, he was forced to leave home and seek a more healthful environment where he could begin his recovery. This is an inspirational text for those living with electrical or multiple chemical sensitivity and an educational one for those first learning about these conditions.

The Pre-Programming B.l.a..2018-10-31 [The crippled god of metallurgy, fire, and alchemy has many names and many faces -- sometimes Hephaestus, Ptah, or Vulcan. He changes to suit his needs. And just like his names, his creations have gone through countless revisions. This time, he's finally onto something -- his Automata have turned the heads of other gods. They've noticed their pre-programmed potential. There's a reason Vulcan didn't scrap the Automata -- a reason he left them in the care of humans all this time. They were just the beta testers for his most intricate windup toy yet?Vulcan's ancient Automata find their purpose rebooted in the second installment of the CIRCO DEL HERRERO/THE BLACKSMITH'S CIRCUS series. Their immortal human Masters will drop like flies -- superfluous in the next round as the gods shuffle in a new deck of fateful cards. The Masters can choose how and when, but they will all die to free the Automata of their earthly chains. Odys and his Automaton, Maud, struggle to

protect his twin sister from the plotting of his dual-bodied adversaries. But his sister, Odissa, finds herself a willing participant in The Blacksmith's latest exhibition -- could she be the missing cog to the god's tightly wound machine all along? In this thrilling sequel to THE AUTOMATION, the Narrator and Editor drag readers deeper into the dark history and even darker future of the Automata. When the subterranean god emerges with his postlapsarian blueprint, so will the truth about B.L.A. and G.B. Gabbler. THE PRE-PROGRAMMING is a literary outrage that dares you to keep reading between the lines and the footnotes.]
