**Market-Driven Thinking** Arch G. Woodside. 2012-06-25 Market-Driven Thinking provides a useful mental model and tools for learning about how executives and customers think within marketplace contexts. When the need to learn about how executives and customer think is recognized, a solution is usually implemented automatically, with no thought given to the relative worth of alternative methods to learn fill the need. Thus, the dominant logics (most often implemented methods) to learn about thinking are written surveys and focus group interviews--two research methods that that almost always fail to provide valid and useful answers on how and why executives and customers think the way they do. Through descriptive research, MDT examines the actual thinking and actions

by executives and customers related to making marketplace decisions. The book aims to achieve three objectives: \* Increase the reader's knowledge of the unconscious and conscious thinking processes of participants marketplace contexts \* Provide research tools useful for revealing the unconscious and conscious thinking processes of executives and customers \* Provide in-depth examples of these research tools in both business-to-business and business-to-consumer contexts This book asks how we actually go about thinking, examining this process and its influences within the context of B2B and B2C marketplaces in developed nations.

**Brand Sense** Martin Lindstrom. 2010-02-02 The definitive book on sensory branding, shows how companies appeal to consumers' five senses to sell products. Did you know that the gratifying smell that accompanies the purchase of a new automobile actually comes from a factory-installed aerosol can containing "new car" aroma? Or that Kellogg's trademarked "crunch" is generated in sound laboratories? Or that the distinctive click of a just-opened jar of Nescafé freeze-dried coffee, as well as the aroma of the crystals, has been developed in factories over the past decades? Or that many adolescents recognize a pair of Abercrombie & Fitch jeans not by their look or cut but by their fragrance? In perhaps the most creative and authoritative book on how our senses affect our everyday purchasing decisions, global branding guru Martin Lindstrom reveals how the world's most successful companies and products integrate touch, taste, smell, sight, and sound with startling and sometimes even shocking results. In conjunction with renowned research institution Millward

Brown, Lindstrom's innovative worldwide study unveils how all of us are slaves to our senses—and how, after reading this book, we'll never be able to see, hear, or touch anything from our running shoes to our own car doors the same way again. An expert on consumer shopping behavior, Lindstrom has helped transform the face of global marketing with more than twenty years of hands-on experience. Firmly grounded in science, and disclosing the secrets of all our favorite brands, Brand Sense shows how we consumers are unwittingly seduced by touch, smell, sound, and more.

*Marketing Strategy In The Digital Age: Applying Kotler's Strategies To Digital Marketing* Milton Kotler, Tiger Cao, Sam Wang, Collen Qiao. 2020-08-26 The market changes faster than marketing. In essence, marketing strategy has undergone only two eras, the entity era and the bit era, also known as the industrial age and the digital age. In the age of digital society, all CEOs, CMOs and senior marketing executives must consider how to change their strategies, improve the role of marketing and adopt emerging technological and data tools to integrate with the Internet. The goal of digital marketing strategy is not to disrupt existing marketing strategies, but to complement, integrate and develop the two at the same time. In this book, the authors provide detailed discussion and practical analysis on the relationship between marketing and digital technologies and propose a marketing implementation framework for digital strategy platforms. Standing for Recognize, Reach, Relationship and Return, the 4R system is a powerful strategic trading tool for digital implementation, especially for CEOs and CMOs. All other tools, such as data platforms, content marketing, DSP digital advertising and digital marketing ROI design essentially serve the 4R system. As such, the authors advocate for firms to restructure their digital marketing strategy around the 4R system.

**Lateral Marketing** Philip Kotler, Fernando Trias De Bes. 2003-09-08 A revolutionary new system for generating the next big marketing ideas and opportunities According to Philip Kotler, the widely acknowledged father of modern marketing, and Fernando Trias de Bes the marketing techniques pioneered in the 1960s and '70s have worked too well. Fierce competition among products with little or nothing to distinguish one from another, along with modern product positioning and targeted marketing techniques, have led to increasing market segmentation. If the trend continues, individual market segments soon will be too small to be profitable. In Lateral Marketing, Kotler and Trias de Bes unveil a revolutionary new model to help readers expand beyond vertical segmentation and generate fresh marketing ideas and opportunities. Philip Kotler (Chicago, IL) is the S. C. Johnson & Son Distinguished Professor of International Marketing at Northwestern University's Kellogg School of Management.
