Health Care Utilization in Germany Christian Janssen,Enno Swart,Thomas von Lengerke.2013-12-04 It is a societal given, borne out by the facts: the higher one's social status, the better health, and the longer life expectancy. As the situation persists, an important question demands attention, namely whether health care systems contribute to the inequity. Drawing accurate conclusions requires workable theory, reliable data collection instruments, and valid analytical methods. Using one representative country to typify the industrial world, Health Care Utilization in Germany studies its subject in terms of social determinants. This singular volume offers systematic guidelines for research into health care access based on an acclaimed behavioral model of care utilization. Contributors focus on specific social factors, medical conditions, and sectors of care to examine why differences exist, their implications, and how care providers can better match supply with demand. And many of the book's topics, such as obesity, dementia, preventive services, and immigrant health, are of global interest. Included in the coverage: Updating a classic behavioral model of health care access. Insights from qualitative research. The problem of repeated surveys: how comparable are their results? Gender and utilization of health care. Care utilization by dementia patients living at home. Social determinants of utilization of psychotherapy in Germany. A volume certain to spark discussion among researchers across the community, the findings and methods in Health Care Utilization in Germany will be analyzed by health psychologists, public health professionals, and epidemiologists.

Portugal International Monetary Fund.2011-09-13 Macroeconomic imbalances are large, and structural problems are deep-rooted in Portugal. The new government's strong commitment to program implementation is encouraging. Fiscal performance so far demonstrates the need to refocus the fiscal strategy on strong expenditure control, as envisaged under the program. To support activity, it is crucial to prevent an excessively rapid deleveraging of the banking sector. Ultimately, the success of the program hinges on opening up the economy and improving competitiveness. The European Council's renewed support enhances prospects for the program's success.

ASEAN and Regional Actors in the Indo-Pacific Sueo Sudo,Chosein Yamahata.2023-10-27 This book discusses the shifting regional geopolitical engagements and development of rearranged connections emerging among ASEAN and non-ASEAN actors. First, the book focuses on the crucial discourse surrounding the Indo-Pacific region, including its challenges, continuity, and relevance. The discussion highlights the growing influence of regional actors such as India, Thailand, Japan, and the US, particularly in the context of a pressing question of collaboration versus containment amidst China's rise. The book delves into various topics, such as geopolitical anxieties, economic strength, foreign policy, international relations, development, and security promotion in South and Southeast Asia, through the lenses of ASEAN centrality and the Indo-Pacific strategy. Second, the volume emphasizes on the escalating tensions and the worsening crises in the region that cause major anxieties and the subsequent realignment and new alignment of countries' relationships. Among several chapters of the volume, a large Indo-China state, Myanmar, takes a special place in the book's discussions as it has grown as an important ground for a resource/energy race among geopolitically strategic partners. Additionally, Myanmar has the potential to become a balancer in ASEAN. Therefore, any positive development and change in course of relations to Myanmar, particularly with its neighbors, Japan, and Russia, in both historical and contemporary contexts, can have a significant impact not only on Myanmar's course towards peace, democracy, and security, but also regional stability. The editors and contributors examine the unique position of ASEAN, with a focus on ASEAN centrality as a platform for addressing anxieties and building relationships to bridge the gap between world and regional players, including both friends and foes. Overall, the volume provides valuable insights into the Indo-Pacific region's complex dynamics, including cooperation and collaboration among regional actors for long-term stability and prosperity. The interdisciplinary composition of the book invites readers from various backgrounds to engage with constructive debates on general perception, contextual discussion, and the highlights of engaged research from local and international perspectives.

Integrating Immigrants in Europe Peter Scholten,Han Entzinger,Rinus Penninx,Stijn Verbeek.2015-06-02 This open access book explores how research and policymaking in the field of migrant integration have developed historically and how this interrelationship plays out in the strongly politicised climate of opinions on migration in Europe. It features interdisciplinary theoretical contributions as well as original empirical studies on research-policy dialogues at both the EU and country level. The chapters study not only how the dialogue between research and policy is structured (such as advisory bodies, research agencies, and ad-hoc committees), but also how these dialogues affect policymaking and the development of migrant integration research itself as well. The analysis reveals profound changes in the dialogue structures associated with the research-policy nexus in the domain of migrant integration. On the one hand, dialogue structures have become more ad-hoc, often established in response to distinct political events or to specific problems. On the other, politicisation has not thwarted all efforts to develop more institutionalised dialogue structures between producers and users of knowledge. In addition, research has contributed to policymaking in very different ways in various European countries. This edited volume is unique in this effort to reflect on the impact of research-policy dialogues both on the development of migrant integration policies as well as on migrant integration research. It will be of importance to scholars in this field as well as to policymakers and other stakeholders involved in migrant integration policymaking.

Sustainable Railway Futures Becky P.Y. Loo,Claude Comtois.2016-03-03 Revitalizing railways as a major sustainable transport mode in modern societies faces many issues and challenges. This in-depth overview places the importance of railways in the wider context of comprehensive sustainability, which encompasses sustainable development, social and economic equity and community livability. Some scholars have described the 21st century as a period of renaissance for railways and suggest this transport mode can fulfil people's desire for high mobility with low negative environmental, social, economic and financial impacts. In light of these new expectations for railways, in both passenger and freight transport worldwide, this book offers the latest research insights on the renewed interest about railway expansions and their wide-ranging environmental, socio-economic and even political implications.

Heuristics and Hyper-Heuristics Javier Del Ser Lorente.2017-08-30 In the last few years, the society is witnessing ever-growing levels of complexity in the optimization paradigms lying at the core of different applications and processes. This augmented complexity has motivated the adoption of heuristic methods as a means to balance the Pareto trade-off between computational efficiency and the quality of the produced solutions to the problem at hand. The momentum gained by heuristics in practical applications spans further towards hyper-heuristics, which allow constructing ensembles of simple heuristics to handle efficiently several problems of a single class. In this context, this short book compiles selected applications of heuristics and hyper-heuristics for combinatorial optimization problems, including scheduling and other assorted

application scenarios.

The Atlas of California Richard A. Walker, Suresh K. Lodha. 2016-05-04 California is at a crossroads. For decades a global leader, inspiring the hopes and dreams of millions, the state has recently faced double-digit unemployment, multi-billion dollar budget deficits and the loss of trillions in home values. This atlas brings together the latest research and statistics in a graphic form that gives shape and meaning to these numbers. It shows a new California in the making, as it maps the economic, social, and political trends of a state struggling to maintain its leadership and to continue to offer its citizens the promise of prosperity. Among the world's largest economies, California is the nation's agricultural powerhouse, high tech crucible and leader in renewable energy. The state is the most populous and most diverse state in the continental U.S. Yet its infrastructure is coming under increasing pressure. Water supply systems are strained, the legendary highways are over capacity, and the celebrated system of public schooling is unable to offer affordable quality education at all levels. Health and welfare services, particularly for the poor, needy, disabled, and seniors, are at great risk. This indispensable resource gives readers the tools they need to understand the transformation as California attempts to forge a new identity in the midst of unprecedented challenges.

From Migrant to Worker Michele Ford. 2019-04-15 What happens when local unions begin to advocate for the rights of temporary migrant workers, asks Michele Ford in her sweeping study of seven Asian countries? Until recently unions in Hong Kong, Japan, Malaysia, Singapore, South Korea, Taiwan, and Thailand were uniformly hostile towards foreign workers, but Ford deftly shows how times and attitudes have begun to change. Now, she argues, NGOs and the Global Union Federations are encouraging local unions to represent and advocate for these peripheral workers, and in some cases succeeding. *From Migrant to Worker* builds our understanding of the role the international labor movement and local unions have had in developing a movement for migrant workers' labor rights. Ford examines the relationship between different kinds of labor movement actors and the constraints imposed on those actors by resource flows, contingency, and local context. Her conclusions show that in countries—Hong Kong, Malaysia, and Thailand—where resource flows and local factors give the Global Union Federations more influence local unions have become much more engaged with migrant workers. But in countries—Japan and Taiwan, for example—where they have little effect there has been little progress. While much has changed, Ford forces us to see that labor migration in Asia is still fraught with complications and hardships, and that local unions are not always able or willing to act.

The Neural Circuit for Spatial Representation Yasser Roudi, Lisa M. Giocomo. 2012-10-12 How do we find our way? The discovery of medial entorhinal cortex grid cells in 2005 stimulated a wide variety of experimental, theoretical and computational work aimed at elucidating the neural circuit underlying spatial representations in the entorhinal cortex. However, grid cells act in concert with place cells, head direction cells and border cells, each playing a part in the spatial navigation circuit. The aim of this Research Topics is to solicit contributions from leading researchers in the field of spatial navigation and spatial memory to present new experimental data, computational modeling or discussion on mechanisms underlying the neural encoding of space in the parahippocampal cortices.

Freedom of Religion or Belief Heiner Bielefeldt. 2018-05-10 Since assuming his position as United Nations Special Rapporteur on freedom of religion or belief, Heiner Bielefeldt devotes each of his reports to a major topic, all of which are reprinted in this volume in full. He addresses important topics which are often bypassed due to their complexity or emotionality, addressing themes such as conversion or religious minorities. He also discusses supposed conflicts between different human rights, such as FORB and non-discrimination. He is convinced that human rights should never be understood as opposed to each other since ultimately the many rights go hand in hand. The topics he addresses are relevant for the whole range of institutions of society in their relation to FORB, including the state, schools, employers, and organized religion.
