Designing Successful Transitions National Resource Center for the First-Year Experience & Students in Transition (University of South Carolina).2010 The 2010 edition of this monograph addresses many topics (e.g., administration of orientation programs, family involvement, student characteristics and needs, assessment, and orientation for specific student populations and institutional types) that were included in previous editions but approaches them with new information, updated data, and current theory. However, this edition also takes up new topics in response to the opportunities and concerns facing orientation, transition, and retention professionals such as collaborations among campus units in the development and delivery of orientation, the increase in nontraditional student populations, the need for effective crisis planning and management in orientation programs, new technologies, and even the challenge of making the case for orientation in an era of diminishing resources. The authors

have carefully penned chapters incorporating contemporary information, ideas, and concepts while being reflective of traditional practices. Following a preface by Margaret J. Barr and a foreword by Jennifer R. Keup and Craig E. Mack, chapters in this edition include: (1) Brief Overview of the Orientation, Transition, and Retention Field (Craig E. Mack); (2) Theoretical Perspectives on Orientation (Denise L. Rode and Tony W. Cawthon); (3) Making the Case for Orientation: Is It Worth It? (Bonita C. Jacobs); (4) Administration of a Comprehensive Orientation Program (April Mann, Charlie Andrews, and Norma Rodenburg); (5) Community College Orientation and Transition Programs (Cathy J. Cuevas and Christine Timmerman); (6) Channeling Parental Involvement to Support Student Success (Jeanine A. Ward-Roof, Laura A. Page, and Ryan Lombardi); (7) Extensions of Traditional Orientation Programs (Tracy L. Skipper, Jennifer A. Latino, Blaire Moody Rideout, and Dorothy Weigel); (8) Technology in Orientation (J.J. Brown and Cynthia L. Hernandez); (9) Incorporating Crisis Planning and Management Into Orientation Programs (Dian Squire, Victor Wilson, Joe Ritchie, and Abbey Wolfman); (10) Orientation and First-Year Programs: A Profile of Participating Students (Maureen E. Wilson and Michael Dannells); (11) Creating a Developmental Framework for New Student Orientation to Address the Needs of Diverse Populations (Archie P. Cubarrubia and Jennifer C. Engineering in K-12 Education National Research Council, National Academy of Engineering, Committee on K-12 Engineering Education. 2009-09-08 Engineering education in K-12 classrooms is a small but growing phenomenon that may have implications for engineering and also for the other STEM subjects—science, technology, and mathematics. Specifically, engineering education may improve student learning and achievement in science and mathematics, increase awareness of engineering and the work of engineers, boost youth interest in pursuing engineering as a career, and increase the technological literacy of all students. The teaching of STEM subjects in U.S. schools must be improved in order to retain U.S.

competitiveness in the global economy and to develop a workforce with the knowledge and skills to address technical and technological issues. Engineering in K-12 Education reviews the scope and impact of engineering education today and makes several recommendations to address curriculum, policy, and funding issues. The book also analyzes a number of K-12 engineering curricula in depth and discusses what is known from the cognitive sciences about how children learn engineering-related concepts and skills. Engineering in K-12 Education will serve as a reference for science, technology, engineering, and math educators, policy makers, employers, and others concerned about the development of the country's technical workforce. The book will also prove useful to educational researchers, cognitive scientists, advocates for greater public understanding of engineering, and those working to boost technological and scientific literacy.

Handbook of Work-Family Integration Karen Korabik, Donna S. Lero, Denise L. Whitehead. 2011-04-28 In today's industrialized societies, the majority

of parents work full time while caring for and raising their children and managing household upkeep, trying to keep a precarious balance of fulfilling multiple roles as parent, worker, friend, & child. Increasingly demands of the workplace such as early or late hours, travel, commute, relocation, etc. conflict with the needs of being a parent. At the same time, it is through work that people increasingly define their identity and self-worth, and which provides the opportunity for personal growth, interaction with friends and colleagues, and which provides the income and benefits on which the family subsists. The interface between work and family is an area of increasing research, in terms of understanding stress, job burn out, self-esteem, gender roles, parenting behaviors, and how each facet affects the others. The research in this area has been widely scattered in journals in psychology, family studies, business, sociology, health, and economics, and presented in diverse conferences (e.g., APA, SIOP, Academy of Management). It is difficult for experts in the field to keep up with everything they need to know, with the information dispersed. This Handbook will fill this gap by synthesizing theory, research, policy, and workplace practice/organizational policy issues in one place. The book will be useful as a reference for researchers in the area, as a guide to practitioners and policy makers, and as a resource for teaching in both undergraduate and graduate courses.
