**Musical Composition in the Context of Globalization** Christian Utz.2021-03-31 Since the early transformation of European music practice and theory in the cultural centers of Asia, Latin America, and Africa around 1900, it has become necessary for music history to be conceived globally - a challenge that musicology has hardly faced yet. This book discusses the effects of cultural globalization on processes of composition and distribution of art music in the 20th and 21st century. Christian Utz provides the foundations of a global music historiography, building on new models such as transnationalism, entangled histories, and reflexive globalization. The relationship between music and broader changes in society forms the central focus and is treated as a pivotal music-historical dynamic.

Nineteenth-century Transcriptions of Works by Fryderyk Chopin Barbara Literska.2020 This book is the first monographic study of 19th-century transcriptions of Chopin's music. The study is based on the rich source material, which formed the basis for considerations from the perspective of social history, music analysis and aesthetics. This work reveals an important document of Chopin's music reception in the 19th century.

**Experimental Affinities in Music** Paulo de Assis .2016-03-21 Exploring experimental attitudes in music *Experimental Affinities in Music* brings together diverse artistic, musicological, historical, and philosophical essays, enhancing a broad discourse on artistic experimentation, and exploring various experimental attitudes in music composed between the thirteenth and twentieth centuries. The golden thread running through the different chapters is the quest for inherently experimental musical practices, a quest pursued from interrogating, descriptive, or challenging perspectives, and always in relation to concrete music examples. Experimental is taken as an adventurous compositional, interpretive, or performative attitude that can cut across different ages and styles. Affinities suggest connectors and connections, convergences, contiguities, and adjacencies that are found in and through a diversity of approaches and topics. The texts share a common genesis: the lectures of the International Orpheus Academies for Music and Theory convened by Luk Vaes (2011) and Paulo de Assis (2012, 2013). The affinities found in this volume include essays by Lydia Goehr, Felix Diergarten, Mark Lindley, Martin Kirnbauer, Edward Wickham, Lawrence Kramer, Hermann Danuser, and Thomas Christensen, as well as interviews with pianist Leon Fleisher, with pianist-

composer Frederic Rzewski, and with composer Helmut Lachenmann. Contributors Paulo de Assis (Orpheus Institute, Ghent), Thomas Christensen (University of Chicago), Hermann Danuser (Humboldt University), Felix Diergarten (Schola Cantorum Basiliensis), Leon Fleisher (pianist), Lydia Goehr (Columbia University), Martin Kirnbauer (University of Basel), Lawrence Kramer (Fordham University), Helmut Lachenmann (composer), Mark Lindley (University of Hyderabad), Frederic Rzewski (pianist-composer), Luk Vaes (Orpheus Institute, Ghent), Edward Wickham (St Catharine's College, Cambridge)
