

Paper 2 2013 English Home Language

The languages of Malta Albert Gatt. The purpose of this volume is to present a snapshot of the state of the art of research on the languages of the Maltese islands, which include spoken Maltese, Maltese English and Maltese Sign Language. Malta is a tiny, but densely populated country, with over 422,000 inhabitants spread over only 316 square kilometers. It is a bilingual country, with Maltese and English enjoying the status of official languages. Maltese is a descendant of Arabic, but due to the history of the island, it has borrowed extensively from Sicilian, Italian and English. Furthermore, local dialects still coexist alongside the official standard language. The status of English as a second language dates back to British colonial rule, and just as in other former British colonies, a characteristic Maltese variety of English has developed. To these languages must be added Maltese Sign Language, which is the language of the Maltese Deaf community. This was recently recognised as Malta's third official language by an act of Parliament in 2016. While a volume such as the present one can hardly do justice to all aspects of a diverse and complex linguistic situation, even in a small community like that of Malta, our aim in editing this book was to shed light on the main strands of research being undertaken in the Maltese linguistic context. Six of the contributions in this book focus on Maltese and explore a broad range of topics including: historical changes in the Maltese sound system; syllabification strategies; the interaction of prosody and gesture; the constraints regulating /t/-insertion; the productivity of derivational suffixes; and raising phenomena. The study of Maltese English, especially with the purpose of establishing the

defining characteristics of this variety of English, is a relatively new area of research. Three of the papers in this volume deal with Maltese English, which is explored from the different perspectives of rhythm, the syntax of nominal phrases, and lexical choice. The last contribution discusses the way in which Maltese Sign Language (LSM) has evolved alongside developments in LSM research. In summary, we believe the present volume has the potential to present a unique snapshot of a complex linguistic situation in a geographically restricted area. Given the nature and range of topics proposed, the volume will likely be of interest to researchers in both theoretical and comparative linguistics, as well as those working with experimental and corpus-based methodologies. Our hope is that the studies presented here will also serve to pave the way for further research on the languages of Malta, encouraging researchers to also take new directions, including the exploration of variation and sociolinguistic factors which, while often raised as explanatory constructs in the papers presented here, remain under-researched.

Heritage Language Policies around the World Corinne A. Seals,Sheena Shah.2017-09-18 Heritage language policies define the context in which heritage languages are maintained or abandoned by communities, and this volume describes and analyzes international policy strategies, as well as the implications for the actual heritage language speakers. This volume brings together heritage language policy case studies from around the world, foregrounding globalization by covering five regions: the Americas, Europe, Africa, Asia, and Australasia. The countries profiled include the United States, Canada, Argentina, Norway, Sweden, Ireland, Uganda, Namibia, Morocco, Japan, South Korea, Singapore, New Zealand, Australia, and Fiji. This volume also highlights an expanded definition of 'heritage language', choosing to focus on individual and community identities, and therefore including both Indigenous and immigrant languages. Focusing specifically on language policy relating to heritage languages, the chapters address key questions such as Are heritage languages included or excluded from the national language policy discourse? What are the successes and shortcomings of efforts to establish heritage language policies? What is the definition of 'heritage language' in official usage by the local/regional government and stakeholders? How are these

Effective Educational Programs, Practices, and Policies for

English Learners Liliana Minaya-Rowe. 2014-10-01

The central issue of this volume is how to meet the linguistic and academic needs of the increasing numbers of English learners (ELs). At the center of educational turns is the role of school professionals in this Common Core Standards era. Teacher education programs and professional development, or pre-service and in-service programs for teachers of ELs, are currently being reframed to reflect the new demands placed on all teachers in light of the new standards. The expectation is that ELs can learn, and their teachers possess the expertise to teach, both discipline content and academic English at the same time. The large numbers of ELs across the country have created a wide gap between what teachers have been trained to do and the skills they need to teach and reach them effectively. This practical handbook brings together research, policy and practice on teacher effectiveness, pre-service and in-service programs in the context of student linguistic and cultural diversity. Key features include: • Clearly articulated teacher training and professional development programs; • Coverage of Common Core curriculum and a variety of instructional programs and practices with research-based tools to implement them; and, • Policies to equitably and effectively

Refugee Learner Experiences. A Case Study of Zimbabwean Refugee Children Lawrence Meda.2017-09

This study is a presentation of Zimbabwean refugee learner experiences. Children escaped political persecution and economic problems which affected Zimbabwe in the year 2008. Many of these children were abused and witnessed traumatic experiences, their close relatives and neighbours being executed in cold blood. This study was guided by three critical questions: i) who are the Zimbabwean refugee learners? ii) what were Zimbabwean refugee learners' migration experiences? and iii) what were Zimbabwean refugee learners' school experiences? The study employed Bronfenbrenner's Social Ecological Model as its overarching theoretical framework. Each stage of the refugee experience was described at each point in time.

Multicultural America Carlos E. Cortés.2013-08-15 This comprehensive title is among the first to extensively use newly released 2010 U.S. Census data to examine multiculturalism today and tomorrow in America. This distinction is important considering the following NPR report by Eyder Peralta: "Based on the first national numbers released by the Census Bureau, the AP reports that minorities account for 90 percent of the total U.S. growth since 2000, due to immigration and higher birth rates for Latinos." According to John Logan, a Brown University sociologist who has analyzed most of the census figures, "The futures of most metropolitan areas in the country are contingent on how attractive they are to Hispanic and Asian populations." Both non-Hispanic whites and blacks are getting older as a group. "These groups are tending to fade out," he added. Another demographer, William H. Frey with the Brookings Institution, told The Washington Post that this has been a pivotal decade. "We're pivoting from a white-black-dominated American population to one that is multiracial and multicultural." Multicultural America: A Multimedia Encyclopedia explores this pivotal moment and its

Pedagogical elements include an introduction, a thematic reader's guide, a chronology of multicultural milestones, a glossary, a resource guide to key books, journals, and Internet sites, and an appendix of 2010 U.S. Census Data. Finally, the electronic version will be the only reference work on this topic to augment written entries with multimedia for today's students, with 100 videos (with transcripts) from Getty Images and Video Vault, the Agence France Press, and Sky News, as reviewed by the media librarian of the Rutgers University Libraries, working in concert with the title's editors.

Language, Education, and Identity Chaise LaDousa, Christina P. Davis. 2021-07-08 This book examines medium of instruction in education and studies its social, economic, and political significance in the lives of people living in South Asia. It provides insight into the meaning of medium and what makes it so important to identity, aspiration, and inequality. It questions the ideologized associations between education and social and spatial mobility and discusses the gender- and class-based marginalization that comes with vernacular-medium education. The volume also considers how policy measures, such as the Right to Education (RTE) Act in India, have failed to address the inequalities brought by medium in schools, and investigates questions on language access, inclusion, and rights. Drawing on extensive fieldwork and in-depth interviews, the book will be

Enhancing Student Education Transitions and

Employability Thanh Pham, Behnam Soltani. 2021-04-08 This book explores student education transition and employability negotiation experiences in various contexts. It explores determinants of student transitions at three levels including macro, meso and micro but focuses on exploring affordances, constraints and strategies at the micro level. The framework underpinning the explorations at the micro level covers a range of different forms of capital including human, culture, social, identity, psychological and agentic. The book is unique in three ways. First, it consists of chapters about critical discussion,

empirical research and practical guidance about student transition experiences. The critical discussion and empirical research chapters explore and obtain insights about the complexity of student transitions and develop conceptual frameworks that guide the development of applicable practices. The book is, therefore, a useful resource for policy makers, institutions, academics, professionals and students. Second, it provides insights about how student transitions are determined by a range of factors at different levels. These insights extend discussions about student transitions in the current literature which have mainly explored impacts of policies, institutional programmes and human capital. Finally, it is international in focus because it draws on research with different cohorts of students and graduates in different contexts. Insights provided in the book are, therefore, rich, diverse and comparative.

Handbook of Early Language Education Mila

Schwartz.2022-03-30 This is the first international and interdisciplinary handbook to offer a comprehensive and an in-depth overview of findings from contemporary research, theory, and practice in early childhood language education in various parts of the world and with different populations. The contributions by leading scholars and practitioners are structured to give a survey of the topic, highlight its importance, and provide a critical stance. The book covers preschool ages, and looks at children belonging to diverse ethno-linguistic groups and experiencing different histories and pathways of their socio-linguistic and socio-cultural development and early education. The languages under the scope of this handbook are identified by the contributors as immigrant languages, indigenous, endangered, heritage, regional, minority, majority, and marginalized, as well as foreign and second languages, all of which are discussed in relation to early language education as the key concept of the handbook. In this volume, “early language education” will refer to any kind of setting, both formal and

informal (e.g. nursery, kindergarten, early childhood education centers, complementary early schooling etc.) in which language learning within a context of children's sociolinguistic diversity takes place before elementary school.

These studies include several underrepresented contexts across the globe, providing a broad view of how translanguaging in EMI is understood in these educational settings. Furthermore, this book addresses the complexities of translanguaging through a discussion of the affordances and constraints associated with the use of multiple linguistic resources in the EMI classroom.

Handbook of Home Language Maintenance and Development Andrea C. Schalley, Susana A.

Eisenclas.2020-06-22 Even a cursory look at conference programs and proceedings reveals a burgeoning interest in the field of social and affective factors in home language maintenance and development. To date, however, research on this topic has been published in piecemeal fashion, subsumed under the more general umbrella of 'bilingualism'. Within bilingualism research, there has been an extensive exploration of linguistic and psycholinguistic perspectives on the one hand, and educational practices and outcomes on the other. In comparison, social and affective factors - which lead people to either maintain or shift the language - have been under-researched. This is the first volume that brings together the different strands in research on social and affective factors in home language maintenance and development, ranging from the micro-level (family language policies and practices), to the meso-level (community initiatives) and the macro-level (mainstream educational policies and their implementation). The volume showcases a wide distribution across contexts and populations explored. Contributors from around the world represent different research paradigms and perspectives, providing a rounded overview of the state-of-the-art in this flourishing field.

interdisciplinary cooperation between Translation Studies and Educational Linguistics. By adopting a transdisciplinary perspective, the handbook will bring together the various fields of scholarly enquiry and practice that make a valuable contribution to enlarging the notion of translation and diversifying its uses in education. Each contribution provides an overview of the historical background to a given educational setting. Focusing on current research approaches and empirical findings, this volume outlines the development of pedagogical approaches, methods, assessment and curriculum design. The handbook also examines examples of pedagogies that integrate translation in the curriculum, the teaching method's approach, design and procedure as well as assessment. Based on a multilingual and applied-oriented approach, the handbook is essential reading for postgraduate students, researchers and advanced undergraduate students of Translation Studies, and educationalists and educators in the 21st century post-global era. Family Language Policies in a Multilingual World John Macalister, Seyed Hadi Mirvahedi.2016-12-19 Through case studies from around the world, this book illustrates the opportunities and challenges facing families negotiating the

issues of language maintenance and language learning in the home. Every family living in a bi/multilingual environment faces the question of what language(s) to speak with their children and must make a decision, consciously or otherwise, about these issues. Exploring links between language policy in the home and wider society in a range of diverse settings, the contributors utilize various research tools, including interviews, questionnaires, observations, and archival document analysis, to explore linguistic ideologies and practices of family members in the home, illuminating how these are shaped by macro-level societal processes.

Blended learning environments to foster self-directed learning Christo van der Westhuizen, Mncedisi C.

Maphalala, Roxanne Bailey. 2023-03-31 This book on blended learning environments to foster self-directed learning highlights the focus on research conducted in several teaching and learning contexts where blended learning had been implemented and focused on the fostering of self-directed learning. Several authors have contributed to the book, and each chapter provides a unique perspective on blended learning and self-directed learning research. From each chapter, it becomes evident that coherence on the topics mentioned is established. One of the main aspects drawn in this book, and addressed by several authors in the book, is the use of the Community of Inquiry (CoI) framework when implementing teaching and learning strategies in blended learning environments to foster self-directed learning. This notion of focusing on the CoI framework is particularly evident in both theoretical and empirical dissemination presented in this book. What makes this book unique is the fact that researchers and peers in varied fields would benefit from the findings presented by each chapter, albeit theoretical, methodological or empirical in nature - this, in turn, provides opportunities for future research endeavours to further the narrative of how blended learning environments can be used to foster self-directed learning.

research in home language use in the classroom, there are still classrooms worldwide where learners are deprived of the opportunity of building their self-esteem, confidence, and autonomy by communicating with their native language. The global nature of communication requires speakers to use all the languages in their repertoire effectively, thus reinforcing the need to encourage home language use in classrooms.

Transformative Pedagogical Perspectives on Home Language Use in Classrooms is a cutting-edge research publication on the effective use of home language in the classroom that emphasizes the significance of this activity to the success of the overall language development of the learner. Particular attention is given to transformative pedagogy and the provision of valuable insights into how the teacher can guide and assist learners in the development of critical thinking skills. In addition, the book provides content that enables practitioners in language education and parents to explore their roles in assisting children in breaking down the language and cultural barriers that hinder the growth of their self-identity and national identity. Highlighting topics such as engineering education, cultural responsiveness, and transformative pedagogy, this book is essential for linguists, academicians, education professionals, curriculum designers, policymakers, administrators, instructional designers, researchers, and students.
