World Social Science Report 2010 United Nations Educational, Scientific and Cultural Organization.2010-01-01 Social science from Western countries continues to have the greatest global influence, but the field is expanding rapidly in Asia and Latin America, particularly in China and Brazil. In sub-Saharan Africa, social scientists from South Africa, Nigeria and Kenya produce 75% of academic publications. In South Asia, barring some centres of excellence in India, social sciences as a whole have low priority. These are a few of the findings from World Social Science Report, 2010: Knowledge divides. Produced by the International Social Science Council (ISSC) and co-published with UNESCO, the Report is the first comprehensive overview of the field in over a decade. Hundreds of social scientists from around the world contributed their expertise to the publication. Gudmund Hernes, President of the ISSC, Adebayo Olukoshi, Director of the United Nations African Institute for Economic Development and Planning (IDEP), Hebe Vessuri, Director, Venezuelan Institute for Scientific Research (IVIC), and François Héran, Director of Research, National Institute for Demographic Studies (INED), France, are among the experts who presented the Report during its official launch at UNESCO Headquarters in Paris on 25 June 2010.

The Digital Social Alpha Possamai-Inesedy, Alan Nixon.2019-12-02 The edited volume aims to present a critical analysis of the current state of research on religion and belief systems in the realm of the 'Digital Social'. The rapid expansion and democratization of digital technologies in conjunction with the significant shifts taking place within the practices of religion and belief through digital technology demand a critical examination across the social sciences and humanities. These changes call for an overview of not only our current methodological tool box but also the epistemological and ethical considerations that researchers must contend with. The proposed volume provides a critical framework that recognizes that the social, and therefore the religious, cannot be fully understood without recognizing how the digital world actively constitutes notions such as identity, social networks, embodiment, and social institutions. While some specific methods will be discussed, the volume's emphasis remains on the critical epistemological and logistical considerations that are needed when undertaking this form of research.
