*Astrobiology: Future Perspectives* P. Ehrenfreund,W.M. Irvine,T. Owen,Luann Becker,Jen Blank,J.R. Brucato,Luigi Colangeli,Sylvie Derenne,Anne Dutrey,Didier Despois,Antonio Lazcano,Francois

Robert.2006-03-05 Astrobiology, a new exciting interdisciplinary research field, seeks to unravel the origin and evolution of life wherever it might exist in the Universe. The current view of the origin of life on Earth is that it is strongly connected to the origin and evolution of our planet and, indeed, of the Universe as a whole. We are fortunate to be living in an era where centuries of speculation about the two ancient and fundamental problems: the origin of life and its prevalence in the Universe are being replaced by experimental science. The subject of Astrobiology can be approached from many different perspectives. This book is focused on abiogenic organic matter from the viewpoint of astronomy and planetary science and considers its potential relevance to the origins of life on Earth and elsewhere. Guided by the review papers in this book, the concluding chapter aims to identify key questions to motivate future research and stimulate astrobiological applications of current and future research facilities and space missions. Today's rich array of new spacecraft, telescopes and dedicated scientists promises a steady flow of discoveries and insights that will ultimately lead us to the answers we seek.

*Hiroshima* Andrew J. Rotter.2008-02-28 The US decision to drop an atomic bomb on the Japanese city of Hiroshima on 6 August 1945 remains one of the most controversial events of the twentieth century. However, the controversy over the rights and wrongs of dropping the bomb has tended to obscure a number of fundamental and sobering truths about the development of this fearsome weapon. The principle of killing thousands of enemy civilians from the air was already well

established by 1945 and had been practised on numerous occasions by both sides during the Second World War. Moreover, the bomb dropped on Hiroshima was conceived and built by an international community of scientists, not just by the Americans. Other nations (including Japan and Germany) were also developing atomic bombs in the first half of the 1940s, albeit haphazardly. Indeed, it is difficult to imagine any combatant nation foregoing the use of the bomb during the war had it been able to obtain one. The international team of scientists organized by the Americans just got there first. As this fascinating new history shows, the bomb dropped by a US pilot that hot August morning in 1945 was in many ways the world's offspring, in both a technological and a moral sense. And it was the world that would have to face its consequences, strategically, diplomatically, and culturally, in the years ahead.

**The Measure of America, 2010-2011** Kristen Lewis, Sarah Burd-Sharps.2010-11-01 The Measure of America, 2010-2011, is the definitive report on the overall well-being of all Americans. How are Americans doing—compared to one another and compared to the rest of the world? This important, easy-to-understand guide will provide all of the essential information on the current state of America. This fully illustrated report, with over 130 color images, is based on the groundbreaking American Human Development Index, which provides a single measure of the well-being for all Americans, disaggregated by state and congressional district, as well as by race, gender, and ethnicity. The Index rankings of the 50 states and 435 congressional districts reveal huge disparities in the health, education, and living standards of different groups. For example, overall, Connecticut ranked first among states on the 2008-2009 Index, and Mississippi ranked last, suggesting that there is a 30-year gap in human development between the two states. Further, among congressional districts, New York's 14th District, in Manhattan, ranked first, and California's 20th District, near Fresno, ranked last. The average resident of New York's 14th District earned over three times as much as the average resident of California's 20th District, lived over four years longer, and was ten times as likely to have a college degree. The second in the American Human Development Report series, the 2010-2011 edition features a completely updated Index, new findings on the well-being of different racial and ethnic groups from state to state, and a closer look at disparities within major metro areas. It also shines a spotlight on threats to progress and opportunity for some Americans as well as highlighting tested approaches to fostering resilience among different groups. Using a revelatory framework for explaining the very nature of human progress, this report can be used not only as a way to measure America but also to build upon past policy successes, protect the progress made over the last half century from new risks, and create an infrastructure of opportunity that can serve a new generation of Americans. Beautifully illustrated with stunning four-color graphics that allow for a quick visual understanding of often complex but important issues, The Measure of America is essential reading for all Americans, especially for social scientists, policy makers, and pundits who want to understand where Americans stand today.

*Foundations of Sensation and Perception* George Mather.2016-08-12 Do you wonder how movies – sequences of static frames – appear to move, or why 3-D films look different from traditional movies? Why does ventriloquism work, and why can airliner flights make you feel disoriented? The answers to these and other questions about the human senses can be found within the pages of *Foundations of Sensation and Perception*. This distinctive feature introduces areas of the subject which are rarely included in student texts, but are crucial for establishing a firm foundation of knowledge. Some tutorials are devoted to more advanced and technical topics (optics, light measurement, Bayesian inference), but treated in an accessible manner, while others cover topics a little outside of the mainstream (music perception, consciousness, visual art).
