The Little Book of Dragons Christine Arana Fader.2015-09-15 When you are touched by a dragon, you feel the depth of its love... This incomparable energy allows us to find the place in life that is meant for us, as Christine Arana Fader, the 'dragon woman', powerfully shows with these entrancing stories from her daily life. Granting us a glimpse of the mystical world of dragons, she will help us to get to know our own dragon, a close personal companion who will share its invincibility, its wisdom and its magic with us. ...and you will grow as a person and find your own path.

Pattern Recognition Jürgen Beyerer,Matthias Richter,Matthias Nagel.2017-12-04 The book offers a thorough introduction to Pattern Recognition aimed at master and advanced bachelor students of engineering and the natural sciences. Besides classification - the heart of Pattern Recognition - special emphasis is put on features, their typology, their properties and their systematic construction. Additionally, general principles that govern Pattern Recognition are illustrated and explained in a comprehensible way. Rather than presenting a complete overview over the rapidly evolving field, the book is to clarify the concepts so that the reader can easily understand the underlying ideas and the rationale behind the methods. For this purpose, the mathematical treatment of Pattern Recognition is pushed so far that the mechanisms of action become clear and visible, but not farther. Therefore, not all derivations are driven into the last mathematical detail, as a mathematician would expect it. Ideas of proofs are presented instead of complete proofs. From the authors' point of view, this concept allows to teach the essential ideas of Pattern Recognition with sufficient depth within a relatively lean book. Mathematical methods explained thoroughly Extremely practical approach with many examples Based on over ten years lecture at Karlsruhe Institute of Technology For students but also for practitioners

Digital Papyrology I Nicola Reggiani.2017-09-11 Since the very beginnings of the digital humanities, Papyrology has been in the vanguard of the application of information technologies to its own scientific purposes, for both theoretical and practical reasons (the strong awareness towards the problems of human memory and the material ways of preserving it; the need to work with a multifarious and overwhelming amount of different data). After more than thirty years of development, we have now at our disposal the most advanced tools to make papyrological studies more and more effective, and even to create a new conception of papyrology and a new model of edition of the ancient documents. At this turning point, it is important to build an epistemological framework including all the different expressions of Digital Papyrology, to trace a historical sketch setting the background of the contemporary tools, and to provide a clear overview of the current theoretical and technological trends, so that all the possibilities currently available can be exploited following uniform pathways. The volume represents an innovative attempt to deal with such topics, usually relegated into very quick and general treatments within journal articles or papyrological handbooks.

Keto Cycling Dr Bruce Fife.2019 Keto cycling is the most powerful, most effective, and most efficient tool for overcoming chronic disease and restoring health. Keto cycling is a method of going in and out of ketosis—a metabolic state in which the body runs on fat. It is absolutely the easiest and most efficient method of losing excess body fat and achieving your optimal weight. Low-fat, calorie-restricted diets are gruelingly difficult because you feel continually hungry and deprived; the keto approach is comparatively easy. The food is delicious and your hunger is depressed, so you can eat to your satisfaction and still lose the weight without the pain. All of the common health markers that doctors measure when evaluating a patient's health, such as blood pressure, blood sugar, triglycerides, HDL, and systemic inflammation, are improved when a person goes keto. It is like hitting the reset button on your computer—all of the garbage is deleted and you are returned to the original properly working starting position before the errors began to creep in. Health problems are wiped away and you get a fresh start. Hormones are rebalanced, proper digestion is restored, energy levels improve, and blood chemistry improves; you sleep better, think better, and function better. It is literally an anti-aging diet. All of these results have been documented in published medical and nutritional studies. Unfortunately, information about how to do the ketogenic diet is awash in myths, misinformation, and misconceptions that are perpetuated on the internet, in books, and in the news media. Many people are confused, and consequently, do not follow the diet properly, leading to unsatisfactory results. This book exposes common errors that can sabotage the ketogenic diet and reveals how you can greatly enhance the health-promoting effects of the diet through keto cycling.

Finite but Unbounded: New Approaches in Philosophical Anthropology Kevin M. Cahill,Martin Gustafsson,Thomas Schwarz Wentzer.2017-05-22 World-leading anthropologists and philosophers pursue the perplexing question fundamental to both disciplines: What is it to think of ourselves as human? A common theme is the open-ended and context-dependent nature of our notion of the human, one upshot of which is that perplexities over that notion can only be dealt with in a piecemeal fashion, and in relation to concrete real-life circumstances. Philosophical anthropology, understood as the exploration of such perplexities, will thus be both recognizably philosophical in character and inextricably bound up with anthropological fieldwork. The volume is put together accordingly: Precisely by mixing ostensibly philosophical papers with papers that engage in close anthropological study of concrete issues, it is meant to reflect the vital tie between these two aspects of the overall philosophical-anthropological enterprise. The collection will be of great interest to philosophers and anthropologists alike, and essential reading for anyone interested in the interconnections between the two disciplines.

Postmetaphysical Thinking II Jürgen Habermas.2017-06-16 'There is no alternative to postmetaphysical thinking': this statement, made by Jürgen Habermas in 1988, has lost none of its relevance. Postmetaphysical thinking is, in the first place, the historical answer to the crisis of metaphysics following Hegel, when the central metaphysical figures of thought began to totter under the pressure exerted by social developments and by developments within science. As a result, philosophy's epistemological privilege was shaken to its core, its basic concepts were de-transcendentalized, and the primacy of theory over practice was opened to question. For good reasons, philosophy 'lost its extraordinary status', but as a result it also courted new problems. In *Postmetaphysical Thinking II*, the sequel to the 1988 volume that bears the same title (English translation, Polity 1992), Habermas addresses some of these problems. The first section of the book deals with the shift in perspective from metaphysical worldviews to the lifeworld, the unarticulated meanings and assumptions that accompany everyday thought and action in the mode of 'background knowledge'. Habermas analyses the lifeworld as a 'space of reasons' - even where language is not (yet) involved, such as, for example, in gestural communication and rituals. In the second section, the uneasy relationship between religion and postmetaphysical thinking takes centre stage. Habermas picks up where he left off in 1988, when he made the far-sighted observation that 'philosophy, even in its postmetaphysical form, will be able neither to replace nor to repress religion', and explores philosophy's new-found interest in religion, among other topics. The final section includes essays on the role of religion in the political context of a post-secular, liberal society. This volume will be of great interest to students and scholars in philosophy, religion and the social sciences and humanities generally.

Revisiting New Public Management and its Effects Abbas Strømme-Bakhtiar,Konstantin Timoshenko.2021 Although, over time, numerous articles and books have been published on New Public Management (NPM), it is still being investigated with a sense of great urgency, as its effects, whether positive or negative, have not yet been fully gauged and comprehended. Given the rather controversial nature of the phenomenon of interest, the purpose of this edited volume is to re-invigorate and revisit the ongoing debate on NPM by providing a fresh perspective and novel insights into how NPM-driven changes have been approached and, more importantly, the effects they have produced in the context of Norway. The current volume comprises seven contributions penned by scholars and experts from all over Norway with a keen interest in NPM. Five of them are geared towards assessing the effects of NPM-style reforms on the Norwegian public healthcare sector in general and nursing in particular, one deals with the impacts of NPM on Norwegian primary and lower secondary education, and one traces the relationship between NPM and the most influential management accounting innovations of the last few decades. It is our profound hope that the book will trigger fruitful discussions and broaden our understanding of NPM and its effects by providing lessons from the empirical evidence presented in the different chapters. Captivating and instructive, it will be of great interest for all readers keeping an eye on NPM, including but not limited to students and scholars of public

administration, practitioners and policymakers.

Pedagogy of Life Rosa Hong Chen.2018 Pedagogy of Life takes its readers through the echoing stories of the half-century, historical Cultural Revolution of China to the literate lifeworld today. Rosa Hong Chen offers a gripping array of personal and kindred stories woven into the power of words and empathy of art through the volutes of writing and dancing for life, expressing genera of warm melancholy, weighty sensations, compulsive sobs, and refrained elation. It is for the existential history of individual lives and communal sharing that life creates a pedagogical condition of possible experiences. Life itself forms a historical and social path of human growth and maturation. In a philosophical and educational autoethnographical inquiry, the author examines the nature of literacy for those marginalized and oppressed; Chen explores how one's name and the ways in which that name is used affect a person's self-knowing and knowing of the world. This book exemplifies the idea that individuals' autobiographical stories are importantly connected to wider cultural, political, and social meaning and understanding. Pedagogy of Life echoes readers' musings, affects, relations, imagination, choice, learning, teaching, and much more, because we, each and all, have our own names, ways of uttering, writing, and dancing, and, ultimately, our own ways of living, knowing, and becoming.

Tetralogue Timothy Williamson.2015 For those new to philosophy, 'Tetralogue' is a marvellous way into the subject. For those who are old hands, it neatly poses serious questions about truth and falsity, relativism and dogma.--Dust jacket flap.

Spirit in Philosophy Catarina Belo.2019-04-30 Catarina Belo explores the question of spirit in the history of philosophy and in various philosophical disciplines, highlighting its meaning and significance for Thomas Aquinas, George Berkeley, and Georg Wilhelm Friedrich Hegel, among other major figures. Belo argues that some of the traditional arguments concerning God, reason, and our knowledge of the world are shared by these philosophers, culminating but not ending in Hegel. In addition, she defends a kind of idealism that is not incompatible with realism. The book assumes the form a lively dialogue between a student and a teacher—following the literary tradition in philosophy that begins with Plato. The question of the spirit and its varied meanings are examined philosophically from a historical and a conceptual perspective.

Nietzsche's "Ecce Homo" Nicholas Martin,Duncan Large.2020-12-16 Friedrich Nietzsche's intellectual autobiography Ecce Homo has always been a controversial book. Nietzsche prepared it for publication just before he became incurably insane in early 1889, but it was held back until after his death, and finally appeared only in 1908. For much of the first century of its reception, Ecce Homo met with a sceptical response and was viewed as merely a testament to its author's incipient madness. This was hardly surprising, since he is deliberately outrageous with the 'megalomaniacal' self-advertisement of his chapter titles, and brazenly claims 'I am not a man, I am dynamite' as he attempts to explode one preconception after another in the Western philosophical tradition. In recent decades there has been increased interest in the work, especially in the English-speaking world, but the present volume is the first collection of essays in any language devoted to the work. Most of the essays are selected from the proceedings of an international conference held in London to mark the centenary of the first publication of Ecce Homo in 2008. They are supplemented by a number of specially commissioned essays. Contributors include established and emerging Nietzsche scholars from the UK and USA, Germany and France, Portugal, Sweden and the Netherlands.

Ancient and Medieval Greek Etymology Arnaud Zucker,Claire Le Feuvre.2021-01-18 This volume on Greek synchronic etymology offers a set of papers evidencing the cultural significance of etymological commitment in ancient and medieval literature. The four sections illustrate the variety of approaches of the same object, which for Greek writers was much more than a technical way of studying language. Contributions focus on the functions of etymology as they were intended by the authors according to their own aims. (1) "Philosophical issues" addresses the theory of etymology and its explanatory power, especially in Plato and in Neoplatonism. (2) "Linguistic issues" discusses various etymologizing techniques and the status of etymology, which was criticized and openly rejected by some authors. (3) "Poetical practices of etymology" investigates the ubiquitous presence of etymological reflections in learned poetry, whatever the genre, didactic, aetiological or epic. (4) "Etymology and word-plays" addresses the vexed question of the limit between a mere pun and a real etymological explanation, which is more than once difficult to establish. The wide range of genres and authors and the interplay between theoretical reflection and applied practice shows clearly the importance of etymology in Greek thought.

Prognostication in the Medieval World Matthias Heiduk, Klaus Herbers, Hans-Christian Lehner. 2020-11-09 Two opposing views of the future in the Middle Ages dominate recent historical scholarship. According to one opinion, medieval societies were expecting the near end of the world and therefore had no concept of the future. According to the other opinion, the expectation of the near end created a drive to change the world for the better and thus for innovation. Close inspection of the history of prognostication reveals the continuous attempts and multifold methods to recognize and interpret God's will, the prodigies of nature, and the patterns of time. That proves, on the one hand, the constant human uncertainty facing the contingencies of the future. On the other hand, it demonstrates the firm belief during the Middle Ages in a future which could be shaped and even manipulated. The handbook provides the first overview of current historical research on medieval prognostication. It considers the entangled influences and transmissions between Christian, Jewish, Islamic, and non-monotheistic societies during the period from a wide range of perspectives. An international team of 63 renowned authors from about a dozen different academic disciplines contributed to this comprehensive overview.

Brokenness and Reconciliation Christian Danz, Marc Dumas, Werner Schüßler, Bryan Wagoner. 2020-09-07 Too often we see reality in black and white, overlooking nuances that require the discernment of tensions between the brokenness of our world and our desires for reconciliation. Yet the gap between wounding words and actions and the hope for acts of reconciliation can lead to even more violence and despair. The authors of this volume explore these tensions and the valences of 'brokenness' and 'reconciliation' in Paul Tillich's thought. Together, they contribute to a richer understanding of the thought of the German American theologian and philosopher, his commitments, and the constructive interpretations his work can induce for us today. Think of the ruptures and efforts of dialogue among divided Christian churches, or the commitment of the social worker; reflect on how love as agape, or the courage to be, can be at the heart of this constructive work; or consider the reconciliation processes of peoples torn apart by violence, to mention a few contributions from this volume. Collectively, these contributions raise the hope of a Tillichian creative justice, a hope that can stimulate a broad audience to go beyond the superficiality and instantaneity of social media to something deeper, more enduring, and transformative.

Ruling the Spirit Claire Taylor Jones. 2018 In *Ruling the Spirit*, Claire Taylor Jones revises the narrative of women's involvement in the German Dominican order, arguing that Dominican women did not lose their piety and literacy in the fifteenth century as is commonly believed, but instead were encouraged to reframe their practice around the observance of the Divine Office.

The Relationship Hermeneutics in the Context of Pastoral and Catechesis - Locus for Dialogue with Culture in the Missio Ecclesiae Kingsley Anagolu. 2019-04 The authority-oriented pastoral/catechetical planning method, which characterizes the African mission transmission, has been problematic as it subtly neglects in its pedagogy the culture and daily life of the subject. Hence, the people operate a Christian/cultural double standard. This book proffers an alternative as the author makes the concept of the relationship hermeneutics model to a creative writing that aims towards an empirical application in the theology of inculturation, which is a subject-oriented and dialogical method that draws its strength from the incarnation prototype.

Autism from the Inside Out Emer Ring, Patricia Daly, Eugene Wall. 2018 This is the first book focused on providing Irish parents and early years, primary, post-primary and special school teachers with effective strategies for supporting children with autism spectrum difference. It rejects «disorder» in favour of «difference», emphasising the importance of a child-centred approach and the dangers of overgeneralising.

Rethinking German Idealism S.J. McGrath, Joseph Carew. 2016-06-27 The 'death' of German Idealism has been decried innumerable times since its revolutionary inception, whether it be by the 19th-century critique of Western metaphysics, phenomenology, contemporary French philosophy, or analytic philosophy. Yet in the face of two hundred years of sustained, extremely rigorous attempts to leave behind its legacy, German Idealism has resisted its philosophical death sentence. For this exact reason it is timely ask: What remains of German Idealism? In what ways does its fundamental concepts and texts still speak to us? Drawing together new and established voices from scholars in Kant, Fichte, Hegel, and Schelling, this volume offers a fresh look on this time-honoured tradition. It uses myriad of recently developed conceptual tools to present new and challenging theories of its now canonical figures.

Knowledge, Stakes and Error Alexander Dinges. 2019 The term know is one of the ten most common verbs in English, and yet a central aspect of its usage remains mysterious. Our willingness to ascribe knowledge depends not just on epistemic factors such as the quality of our evidence. It also depends on seemingly non-epistemic factors. For instance, we become less inclined to ascribe knowledge when it's important to be right, or once our attention is drawn to possible sources of error. Accounts of this phenomenon proliferate, but no consensus has been achieved, decades of research notwithstanding. The author offers a fresh examination of this ongoing debate. After reviewing and complementing relevant data from both armchair and experimental philosophy, he assesses extant accounts of this data including semantic, metaphysical, pragmatic, doxastic as well as more recent psychological accounts. Against this background, he offers a novel psychological account based on the idea that non-epistemic factors affect estimates of probability.

Things That Bother Me Galen Strawson. 2018-03-13 An original collection of lauded philosopher Galen Strawson's writings on the self and consciousness, naturalism and pan-psychism. Galen Strawson might be described as the Montaigne of modern philosophers, endlessly curious, enormously erudite, unafraid of strange, difficult, and provocative propositions, and able to describe them clearly—in other words, he is a true essayist. Strawson also shares with Montaigne a particular fascination with the elastic and elusive nature of the self and of consciousness. Of the essays collected here, "A Fallacy of Our Age" (an inspiration for Vendela Vida's novel *Let the Northern Lights Erase Your Name*) takes issue with the commencement-address cliché that life is a story. Strawson questions whether it is desirable or even meaningful to think about life that way. "The Sense of the Self" offers an alternative account, in part personal, of how a distinct sense of self is not at all incompatible with a sense of the self as discontinuous, leading Strawson to a position that he sees as in some ways Buddhist. "Real Naturalism" argues that a fully naturalist account of consciousness supports a belief in the immanence of consciousness in nature as a whole (also known as panpsychism), while in the final essay Strawson offers a vivid account of coming of age in the 1960s. Drawing on literature and life as much as on philosophy, this is a book that prompts both argument and wonder.

Digital Papyrology II Nicola Reggiani. 2018-05-07 The ongoing digitisation of the literary papyri (and related technical texts like the medical papyri) is leading to new thoughts on the concept and shape of the digital critical edition of ancient documents. First of all, there is the need of representing any textual and paratextual feature as much as possible, and of encoding them in a semantic markup that is very different from a traditional critical edition, based on the mere display of information. Moreover, several new tools allow us to reconsider not only the linguistic dimension of the ancient texts (from exploiting the potentialities of linguistic annotation to a full consideration of language variation as a key to socio-cultural analysis), but also the very concept of philological variation (replacing the mono-authorial view of an reconstructed archetype with a dynamic multitextual model closer to the fluid aspect of the textual transmission). The contributors, experts in the application of digital strategies to the papyrological research, face these issues from their own viewpoints, not without glimpses on parallel fields like Egyptology and Near Eastern studies. The result is a new, original and cross-disciplinary overview of a key issue in the digital humanities.

Freud at Work Ulrike May. 2018-07-11 Presenting a new frame of reference, the author argues that Freud's theories are not the result of his genius alone but were developed in exchange with colleagues and students, which is not always apparent at first glance. Replete with examples, the author reconstructs who the theories were addressed to and the discursive context they originally belonged to, thus presenting fresh and surprising readings of Freud's oeuvre. The book also offers a glimpse into Freud's practice. For the first time, Freud's patient record books which he kept for ten years, are being reviewed, offering readers the hard facts about the length and frequency of Freud's analyses.

Hegel and Scepticism Jannis Kozatsas, Georges Faraklas, Stella Synegianni, Klaus Vieweg. 2017-05-22 "Hegel and scepticism" remains an intriguing topic directly concerning the logical and methodological core of Hegel's system. A series of contributions is unfolding around a keynote paper by Klaus Vieweg, which tries to understand and restate the limits and the content of the relationship between Hegel's philosophy and scepticism. Various Hegel readers with different concerns are dealing with Hegel's strategy in a large range of theoretical areas.

Experiments in Ethics Kwame Anthony Appiah. 2010-03-30 In the past few decades, scientists of human nature—including experimental and cognitive psychologists, neuroscientists, evolutionary theorists, and behavioral economists—have explored the way we arrive at moral judgments. They have called into question commonplaces about character and offered troubling explanations for various moral intuitions. Research like this may help explain what, in fact, we do and feel. But can it tell us what we ought to do or feel? In *Experiments in Ethics*, the philosopher Kwame Anthony Appiah explores how the new empirical moral psychology relates to the age-old project of philosophical ethics. Some moral theorists hold that the realm of morality must be autonomous of the sciences; others maintain that science undermines the authority of moral reasons. Appiah elaborates a vision of naturalism that resists both temptations. He traces an intellectual genealogy of the burgeoning discipline of experimental philosophy, provides a balanced, lucid account of the work being done in this controversial and increasingly influential field, and offers a fresh way of thinking about ethics in the classical tradition. Appiah urges that the relation between empirical research and morality, now so often antagonistic, should be seen in terms of dialogue, not contest. And he shows how experimental philosophy, far from being something new, is actually as old as philosophy itself. Beyond illuminating debates about the connection between psychology and ethics, intuition and theory, his book helps us to rethink the very nature of the philosophical enterprise.

Heidegger on Literature, Poetry, and Education after the "Turn" James M. Magrini, Elias Schwieler. 2017-08-07 Offering new and original readings of literature, poetry, and education as interpreted through the conceptual lens of Heidegger's later philosophy of the Turn, this book helps readers understand Heidegger's later thought and presents new takes on how to engage the themes that emerged from his later writing. Suggesting novel ways to consider Heidegger's ideas on literature, poetry, and education, Magrini and Schwieler provide a deep understanding of the Turn, a topic not often explored in contemporary Heideggerian scholarship. Their inter- and extra-disciplinary postmodern approaches offer a nuanced examination, taking into account Heidegger's controversial place in history, and filling a gap in educational research.

Art as a Language for Autism Jane Ferris Richardson. 2022-07-01 *Art as a Language for Autism* addresses the clinical challenges that are common in working with autistic spectrum disorder by exploring how artistic expression can provide a communicative language for younger clients who are set in their thought processes and preferences. Exploring how both art and play-based approaches can be effective tools for engaging therapeutic work, this book introduces strategies to help young clients find expressive languages that can fully support communication, expression, and empathic understanding, as well as build skills for relaxation, calming, and coping. Building from a foundation of a client's individual strengths and interests, this playful and integrative approach is informed by an awareness of the individual sensory profiles and the developmental needs of children and adolescents with autism. Through a greater awareness of these materials and processes for therapy, the reader will be able to create a space for their young clients to share what they know and care about. This exciting new book is essential reading for clinicians working with children and adolescents on the autism spectrum.

Oxford Encyclopedia of Martin Luther Paul R. Hinlicky, Derek R. Nelson. 2017 This encyclopedia is a collaboration of the leading scholars in the field of Reformation research and the thought, life, and legacy of influence - for good and for ill - of Martin Luther. In 2017 the world marks 500 years since the beginning of the public work of Luther, whose protest against corrupt practices and the way theology was taught captured Europe's attention from 1517 onward. Comprising 125 extensive articles, the *Oxford Encyclopedia of Martin Luther* examines: * the contexts that shaped his social and intellectual world, such as previous theological and institutional developments * the genres in which he worked, including some he essentially created * the theological and ethical writings that make up the lion's share of his massive intellectual output * the complicated and contested history of his reception across the globe and across a span of disciplines This indispensable work seeks both to answer perennial questions as well as to raise new ones. Intentionally forward-looking in approach, the ORE of Martin Luther provides a reliable survey to such issues as, for instance, how did Luther understand God? What did he mean by his notion of vocation? How did he make use of, but also transform, medieval thought patterns and traditions? How did Luther and the Reformation re-shape Europe and launch modernity? What were his thoughts about Islam and Judaism, and how did the history of the effects of those writings unfold? Scholars from a variety of disciplines - economic history, systematic theology, gender and cultural studies, philosophy, and many more - propose an agenda for examining future research questions prompted by the harvest of decades of intense historical scrutiny and theological inquiry.
