Cases in European Competition Policy Bruce Lyons.2009-08-27 Competition between firms is usually the most effective way of delivering economic efficiency and what consumers want. However, there is a balance to be struck. Firms must not be over-regulated and so hampered in their development of innovative products and new strategies to compete for customers. Nor must they be completely free to satisfy a natural preference for monopoly, which would give them higher profits and a quieter life. The economic role of competition policy (control of anticompetitive agreements, mergers and abusive practices) is to maintain this balance, and an effective policy requires a nuanced understanding of the economics of industrial organization. Cases in European Competition Policy demonstrates how economics is used (and sometimes abused) in competition cases in practical competition policy across Europe. Each chapter summarizes a real case investigated by the European Commission or a national authority, and provides a critique of key aspects of the economic analysis.

The Global Horseracing Industry Phil McManus, Glenn Albrecht, Raewyn Graham.2013 Horseracing, thoroughbred breeding and gambling on racing are global industries worth several hundred billion dollars. They are also industries facing serious challenges, from the rise of alternative forms of leisure gambling to concerns about the ethical treatment of animals in all equestrian sports. This book offers a broad-ranging examination of the contemporary horseracing industry, from geographical, economic, social, ethical and environmental perspectives. The book draws on in-depth, mixed-method research into the racing and breeding industries in the US, Australia, the UK, Canada and New Zealand, and includes comparative material on other key racing centres, such as Ireland, Singapore and Hong Kong. It explores the economic structure of the global racing business, including comparisons with other major international sport businesses and other equestrian sports. It examines the social and cultural roots of the sport through its association with, and impact on, rural places, communities and environments from Kentucky to Newmarket - highlighting racing's particular blend of tradition and scientific and technological innovation. The book also explores the ethical issues at the heart of horseracing, from reproduction to the use of the whip, and the inescapable tension between the horse as an instrumentally valuable commodity and the horse as an intrinsically valuable animal with needs and interests. The *Global Horseracing Industry* concludes by considering alternative futures for this major international sports business. The book is illuminating reading for anybody with an interest in sport, business, cultural geography, animal studies, or environmental studies.

The British Horseracing Film Stephen Glynn.2019-01-16 This book constitutes the first full volume dedicated to an academic analysis of horseracing in British cinema. Through comprehensive contextual histories of

film production and reception, together with detailed textual analysis, this book explores the aesthetic and emotive power of the enduringly popular horseracing genre, its ideologically-inflected landscape and the ways in which horse owners and riders, bookmakers and punters have been represented on British screen. The films discussed span from the 1890s to the present day and include silent shorts, quota quickies and big-budget biopics. A work of social and film history, *The British Horseracing Film* demonstrates how the so-called “sport of kings” functions as an accessible institutional structure through which to explore cinematic discussions about the British nation—but also, and equally, national approaches to British cinema.

Footprints of Feist in European Database Directive Indranath Gupta.2017-05-23 Connected to the jurisprudence surrounding the copyrightability of a factual compilation, this book locates the footprints of the standard envisaged in a US Supreme court decision (Feist) in Europe. In particular, it observes the extent of similarity of such jurisprudence to the standard adopted and deliberated in the European Union. Many a times the reasons behind law making goes unnoticed. The compelling situations and the history existing prior to an enactment helps in understanding the balance that exists in a particular legislation. While looking at the process of enacting the Database Directive (96/9/EC), this book reflects upon the concern that was expressed with the outcome of Feist decision in Europe.

Horse-racing in France Robert Black.1886

The Turf Wary Vamplew.2016-05-12 This is the second edition of the classic on the history of British horse racing. It provides a detailed and far-ranging social and economic analysis of the major changes in British flat racing, in particular in the period between 1830 and 1939. Four major themes are explored. Firstly, the changing character and structure of the sport. Secondly, the morality of racing, which was a corrupt sport par excellence for much of the nineteenth century. Thirdly, on four categories of participants in racing jockeys, trainers, owners and breeders. Here, the author assesses whether or not these could make money out of racing. Fourthly, the book examines gambling and its important symbiotic relationship with racing. The televised, sponsored, carefully governed sport today is a vastly different affair from that of the 18th century. Then racing was a free, social event, the highlight of the entertainment calendar for the bulk of the local community. By the late 19th century most race meetings were highly commercial enterprises, requiring payment from all spectators, many of whom had travelled some distance to attend. The excitement and historical interest of these meetings is well captured here.

Functionality, Information Works, and Copyright Dana Beldiman.2008 It has become the practice to claim copyright protection for virtually every piece of 'writing' or its electronic equivalent, created by knowledge professionals - from business plans for a start-up company to the instruction manual for use of a motorized saw and to specifications for pipeline tenders. This paper posits that the legal doctrine of copyright was never intended, and is not equipped, to regulate the very building block of our society-information. When used to protect utilitarian information products (UIW) en masse, copyright can impede the flow of information necessary for innovation, foster waste in the form of redundant creation and adversely impact competition in the market.

Horseracing and the British, 1919-39 Mike Huggins.2013-07-19 This electronic version has been made available under a Creative Commons (BY-NC-ND) open access license. This book provides a detailed consideration of the history of racing in British culture and society, and explores the cultural world of racing during the interwar years. The book shows how racing gave pleasure even to the supposedly respectable middle classes and gave some working-class groups hope and consolation during economically difficult times. Regular attendance and increased spending on betting were found across class and generation, and women too were keen participants. Enjoyed by the royal family and controlled by the Jockey Club and National Hunt Committee, racing's visible emphasis on rank and status helped defend hierarchy and gentlemanly amateurism, and provided support for more conservative British attitudes. The mass media provided a cumulative cultural validation of racing, helping define national and regional identity, and encouraging the affluent consumption of sporting experience and a frank enjoyment of betting. The broader cultural approach of the first half of the book is followed by an exploration if the internal culture of racing itself.

Animal Breeding, Welfare and Society Jacky Turner.2010 The determination of when, how, how often and with whom an animal breeds is moving rapidly away from evolutionary pressures and towards human purposes: these include the breeding of around 50 billion mammals and birds for food production annually, the breeding of pedigree dogs and cats, racing dogs and horses, specialised laboratory animal strains and the use of reproductive science to conserve endangered species or breeds and to limit unwanted populations of pests and non-native species. But the ethics and sustainability of this takeover of animals' reproductive lives have been insufficiently examined by either professionals or the public. This book discusses the methods, the motivations and the consequences of human intervention in animal breeding in terms of animal health, behaviour and well-being. It explores where we are now and the choices ahead, and looks to a future where we have more respect for animals as sentient beings and where we could loosen the reins of reproductive control.

This was a time when, despite the opposition of a respectable minority, attendance at horse races, betting on horses, or reading about racing increasingly became central leisure activities of much of British society.

The Sure Thing Nick Townsend.2014-02-27 _____ The bookies always win. But one man has been proving them wrong for four decades. In the summer of 1975 Barney Curley, a fearless and renowned gambler, masterminded one of the most spectacular gambles of all time with a racehorse called Yellow Sam. With a meticulous, entirely legal plan involving dozens of people, perfectly timed phone calls, sealed orders

and months of preparation, Curley and Yellow Sam beat the bookmakers and cost them millions. They said that it could never happen again. But in May 2010, thirty-five years after his first coup, Curley staged the ultimate multi-million-pound-winning sequel. The Sure Thing tells the complete story of how he managed to organise the biggest gamble in racing history - and how he then followed up with yet another audacious scheme in January 2014.

History of the British Turf, from the Earliest Times to the Present Day James Rice.1879

The Racing Tribe Kate Fox.2017-09-08 It is generally assumed that anthropologists do their research in remote and uncomfortable parts of the world--places with monsoons, mud huts, and malaria. In this volume, social anthropologist Kate Fox has taken on an altogether more enjoyable assignment, the study of the arcane world of British horseracing. For Fox, field research meant wandering around racetracks in a pink hat and high heels (standard tribal costume) rather than braving killer insects and primitive sanitation. Instead of an amorphous racing crowd, the author finds a complete subculture with its own distinctive customs, rituals, language and etiquette. Among the spectators, she identifies Horseys, Addicts, Anoraks, Pair-Bonders, Day-Outers, Suits, and Be-Seens--all united by remarkable friendliness and courtesy. Among the racing professionals, the tribal structure includes Warriors (jockeys), Shamans (trainers), Scribes (journalists), Elders (officials and stewards) and Sin-Eaters (bookies). Fox includes witty and incisive descriptions of the many strange ceremonies and rituals observed by racegoers--the Circuit Ritual, Ritual Conversations (What do you fancy in the next?) , Celebration Rituals, the Catwalk Ritual, and Post-Mortem Rituals (naturally, a horse never loses a race because it's too slow)--and their special codes of behavior such as the Modesty Rule, the Collective Amnesia Rule, and the Code of Chivalry. The Racing Tribe is also a refreshingly candid account of anthropological fieldwork, including all the embarrassing mistakes, hiccups, short-cuts and guesswork that most social scientists keep very quiet about.

Courses for Horses Nicholas Clee.2023-05-25 In parks, on downlands and heaths, by motorways, overlooking firths: the racecourses of Britain and Ireland are as various as the people you meet there. Some - Newmarket, Epsom, the Curragh - are rich in history, and among the most celebrated sporting venues in the world; others - Fakenham, Bangor-on-Dee, Perth - offer more modest but no less enjoyable spectacles. Journeying round these courses, Nicholas Clee meets the people who bring them to life: from those in the spotlight, including a Grand National-winning jockey, Derby-winning owner and top TV commentator; to many others with key roles in the sport - bookmakers, form experts, racecourse managers and more. From them, he learns about the bravery, dedication, skill and expertise that make racing one of our most popular spectator sports. Whether basking in sunshine or sheltering from a hurricane, sampling a variety of pies or recoiling from the world's worst curry, losing his money with the bookies or at the Tote windows, Clee soaks up the atmosphere, delves into racing business, and marvels at the uniqueness of each course and its people. Written with a keen eye, gentle humour and a deep love for the sport, Courses for Horses take us behind the scenes at that grand outing: a day at the races.
