**Sustainable Luxury and Social Entrepreneurship** Miguel

Angel Gardetti,María Eugenia Girón.2017-09-08 Luxury products are now seen by a growing number of global consumers as an important and more widely available way of expressing personal aspirations and values. Most consumers of luxury products and services use them as status symbols and symbols of success.

However, the definition of success - and the way it is perceived by others - is changing. Many of these successful consumers now want the brands they use to reflect their concerns and aspirations. Such products come with a heavy social and

environmental cost. Sustainable luxury is about rediscovering the old meaning of luxury - a considered purchase of a beautifully crafted object with built-in social and environmental value.The

social entrepreneurs documented in this book highlight the relationship between personal values and sustainability, entrepreneurship and innovation in developing and marketing luxury products. The pioneers outline how they have developed inclusive supply chains with poor and vulnerable communities. Their stories prove that luxury need not be a destructive force.

Instead, this book opens a window on a world where

entrepreneurial pioneers can change the rules of the game.

### **Ärztlich assistierter Suizid und organisierte Sterbehilfe**

Kallia Gavela.2013-04-19 Das deutsche Strafgesetzbuch kennt keinen Sondertatbestand der Suizidbeteiligung. Rechtliche Konstruktionen und Wertungen insbesondere höchstrichterlicher Herkunft füllen diese Lücke. Die sich daraus vor allem für behandelnde Ärzte ergebenden Probleme drängen sich bei unheilbar kranken, dem Tode geweihten Patienten geradezu auf. Das Werk behandelt diese Fragen im Spannungsverhältnis von Strafrecht, Medizinrecht und Ethik. Die Autorin zeigt die Grenzen auf, innerhalb derer die ärztliche Beteiligung am Patientensuizid rechtlich zulässig und ethisch vertretbar ist. Die Arbeit behandelt außerdem die Probleme, die aus der Einführung einer strafrechtlichen Regelung gegen „suspekte“ organisierte Suizidhilfeangebote erwachsen, deckt Defizite der jüngst vorgeschlagenen Lösungsansätze auf und gibt Anstöße für Wissenschaft, Praxis und Kriminalpolitik. Ein Blick auf ausländische Rechtsordnungen, Entscheidungen und Tendenzen rundet das Bild ab.

**Shaking Hands with Death** Terry Pratchett.2015-10-27 Why we all deserve a life worth living and a death worth dying for 'Most men don't fear death. They fear those things - the knife, the shipwreck, the illness, the bomb - which precede, by microseconds if you're lucky, and many years if you're not, the moment of death.' When Terry Pratchett was diagnosed with Alzheimer's in his fifties he was angry - not with death but with the disease that would take him there, and with the suffering disease can cause when we are not allowed to put an end to it. In this essay, broadcast to millions as the BBC Richard Dimbleby Lecture 2010 and previously only available as part of A Slip of the Keyboard, he argues for our right to choose - our right to a good life, and a good death too.

*THEORIES OF SUICIDE* John F. Gunn, David Lester. 2015-06-01

Some researchers in the field of suicidology think that the old theories of suicide are too constraining and impede advances in the understanding of suicide. However the book's authors are not quite so critical of past theories. In the book they review the classic theories of suicide, both psychological and sociological, because they are the foundation of our current theories and also propose the skeletons of possible future theories. The goal of the text is to present researchers with theories to guide their research, encourage them to modify these theories, perhaps meld them together in some cases, and think how they might propose new theories. Presented in three sections, the first reviews significant psychological theories including: Suicide as Escape; Interpersonal-Psychological theory; The Role of Defeat and Entrapment in Suicidal Behavior; Suicide, Ethology and Sociobiology; Stress-Diatheses; Cognitive Theories; Learning Perspective on Suicide; Theories of Personality and Suicide; Typological Theories; and the Pathophysiology of Suicide. The second section of the text addresses Sociological and Economic Theories including: Suicide as Deviance, Naroll's Thwarting Disorientation Theory, three classic sociological theories as well as several minor theories. A comprehensive chapter on economic theories is offered by Bijou Yang. The final section concentrates on Critical Thoughts About Theories of Suicide, a new and growing influence in academia and scholarship.

**Assistierter Suizid für psychisch Erkrankte** André Böhning. 2021-01-25 Selbsttötungsgedanken sind häufige Begleitphänomene schwerer, unheilbarer körperlicher und psychischer Erkrankungen. Die Mehrheit der Suizide wird von Menschen mit psychischen Erkrankungen vollzogen. Während es bei unheilbaren körperlichen Erkrankungen heute einen breiten Zuspruch gibt, wenn das Prinzip Leidverminderung durch Lebensverkürzung in Form des künstlich herbeigeführten Todes zur Anwendung kommt, ist dies bei psychischen Erkrankungen

umstritten. Der Wunsch nach assistiertem Suizid von psychisch Erkrankten scheint schwerer greifbar. Er kann Ausdruck einer akuten psychischen Leidensphase sein, die jedoch medikamentös überwindbar ist. Er kann aber auch Ausdruck eines Wunsches sein, der auf Erfahrung durch wiederkehrende psychische Belastungsphasen beruht. Aber ist es nicht diskriminierend, wenn man den einen dies ermöglicht, den anderen nicht? Dieses Fachbuch greift dazu die Herausforderungen und Kontroversen der Debatte auf. Dazu werden in diesem Band die interdisziplinären relevanten Fragestellungen aus Medizin inklusive der Palliativmedizin, Psychologie, Ethik, Theologie sowie die aktuellen rechtlichen Rahmenbedingungen für Deutschland und die Schweiz beschrieben und diskutiert. Aus jedem Fachgebiet werden mit anschaulichen Beispielen aus der Praxis hinreichend Qualitätsmerkmale für den Umgang mit dem Wunsch nach dem assistierten Suizid von psychisch Kranken benannt, damit letztlich der Leser seine eigene Haltung dazu reflektieren und entwickeln kann.

**The Politics of Intimacy** Anna Durnová. 2018-07-23 Debates on the end-of-life controversy are complex because they seem to hijack national and cultural traditions. Where previous books have focused on ideological grounds, *The Politics of Intimacy* explores dying as the site where policies are negotiated and implemented. Intimacy comprises the emotional experience of the end of life and how we acknowledge it—or not—through institutions. This process shows that end-of-life controversy relies on the conflict between the individual and these institutions, a relationship that is the cornerstone of Western liberal democracies. Through interviews with mourners, stakeholders, and medical professionals, examination of media debates in France and the Czech Republic, Durnová shows that liberal institutions, in their attempts to accommodate the emotional experience at the end of life, ultimately fail. She describes this deadlock as the “politics of intimacy,” revealing that political

institutions deploy power through collective acknowledgment of individual emotions but fail to maintain this recognition because of this same experience.

**The Business Affairs of Mr Julius Caesar** Bertolt

Brecht.2016-01-28 Bertolt Brecht's extraordinary historical novel presents an aspiring scholar's efforts to write an idealized life of Julius Caesar twenty years after his death. But the historian abandons his planned biography, confronted by a baffling range of contradictory views. Was Caesar an opportunist, a permanently bankrupt businessman who became too big for the banks to allow him to fail - as his former banker claims? Did he stumble into power while trying to make money, as suggested by the diary of his former slave? Across these different versions of Caesar's career in the political and economic life of Rome, Brecht wryly contrasts the narratives of imperial progress with the reality of grasping self-interest, in a sly allegory that points to the Weimar Republic and perhaps even to our own times. Brecht reminds his readers of the need for constant vigilance and critical suspicion towards the great figures of the past. In an echo of his dramatic theories, the audience is confronted with its own task of active interpretation rather than passive acceptance -- we have to work out our own views about Mr Julius Caesar. This edition is translated by Charles Osborne and features an introduction and editorial notes by Anthony Phelan and Tom Kuhn.

**Jean's Way** Derek Humphry,Ann Wickett.2003-01-06

*Der sanfte Tod* 2019/2020 Peter Puppe.2019-08-17 In diesem Büchlein finden leidende Menschen Informationen über Wege zum selbstbestimmten Sterben. Persönliche, menschliche Hilfe ist durch das menschenverachtende Gesetz § 217 StGB im Dezember 2015 unmöglich gemacht worden. Sterbehelfer und Mediziner werden seitdem mit drei Jahren Gefängnis bedroht. Die betroffenen, schwer leidenden Menschen wurden in ihrer zutiefst inhumanen, menschenunwürdigen und hoffnungslosen Leidenssituation skrupellos zurückgelassen. Ihr Menschenrecht

auf selbstbestimmtes Leben und auf selbstbestimmtes Sterben bei unerträglichem Leiden wird durch das neue Gesetz § 217 StGB mit Füßen getreten. Was in Deutschland (noch?) straffrei bleibt, ist die detaillierte Sterbeberatung.

*Selbstbestimmt Sterben - Handreichung Für Einen Rationalen*

*Suizid* Jessica Düber.2017-01-29 Selbstbestimmung am

Lebensende ist für viele Menschen ein elementarer Wunsch, der individuell ganz unterschiedlichen Ausdruck erfahren kann. Für einige Menschen bedeutet dies, dass sie Ihren Tod und dessen Zeitpunkt selbst bestimmen möchten. Politisch scheinen wir uns derzeit jedoch eher weg von einer Respektierung der Selbstbestimmung und hin zu einer stärkeren Kontrolle zu orientieren - obwohl laut einer Umfrage von Gallup International nahezu 90% der Deutschen geäußert haben, dass jeder Einzelne grundsätzlich selbst entscheiden können sollte, wann und wie er sterben möchte. Das Leben des Menschen ist ein hohes Gut; der Schutz dieses Gutes darf aber nicht mit einer allgemeinen Einschränkung von Freiheit und Selbstbestimmung einhergehen. In diesem Buch werden daher konkrete Methoden eines friedlichen, selbstbestimmten Sterbens (inkl. detaillierte Aufführung von Substanzen mit expliziten Mengenangaben und Einnahmeverfahren) auf Basis einer umfassenden Literaturrecherche vorgestellt. Weiterhin wird das Thema Beschaffung geeigneter Substanzen eingehend untersucht. Es geht in diesem Buch nicht um eine philosophische oder politische Betrachtung des Suizids, sondern um konkrete Anleitungen zum Sterben. Anne Waak beschreibt auf unterhaltsame und profunde Weise, wie und warum Menschen in Gegenwart und Vergangenheit den Tod suchten ein lebensbejahendes Buch über das Sterben. So divers die Umstände jedes einzelnen Falls sind und so sehr sich die Selbstmordraten je nach Kulturraum und Epoche unterscheiden, so eingeschrieben scheint der Suizid in die Geschichte der Menschheit. Und dennoch Er ist die Absage an die Gemeinschaft, eine Beleidigung derer, die zurückbleiben, und immer eine Tragödie. **Suicide through a Peacebuilding Lens** Katerina

Standish.2019-07-24 This book, as the first exploration of suicide in Peace and Conflict Studies (PACS), illustrates the scarcity of suicide research in the discipline and argues that the leading cause of violent death worldwide is a multifaceted phenomenon that needs to be fully comprehended as a significant and often preventable form of world-wide violence. The author supplies a theoretical framework for assessing suicide as medical or instrumental, posits interdisciplinary complementarity and offers

future lines of inquiry that challenge established notions of prevention. The book presents a PACS meta-theory termed 'encounter theory' and supplies a suicidal peacebuilding platform via relationship. This book questions why more PACS scholars aren't turning their attention to suicide when more people die by suicide than ethnic, religious or 'terroristic' violence combined.

**Marijuana and Madness** David Castle, Robin Murray. 2004-05-27

This book provides a comprehensive overview of the psychiatry and neuroscience of Cannabis sativa (marijuana), with particular emphasis on psychotic disorders. It outlines developments in our understanding of the human cannabinoid system, and links this knowledge to clinical and epidemiological facts about the impact of cannabis on mental health. Clinically focused chapters review not only the direct psychomimetic properties of cannabis, but also the impact consumption has on the courses of evolving or established mental illness such as schizophrenia. A number of controversial issues are critically explored, including whether a discrete 'cannabis psychosis' exists, and whether cannabis can actually cause schizophrenia. Effects of cannabis on mood, notably depression, are reviewed, as are its effects on cognition. This book will be of interest to all members of the mental health team, as well as to neuroscientists and those involved in drug and alcohol research.

**Vorsorgevollmacht in theologischer Perspektive** Helena Kohlberger.2016-10-17 Wie kann die Vorsorgevollmacht als Instrument und in ihrem Umgang angemessen verstanden und so mit ihr verantwortungsvoll gehandelt werden? Um sich dieser Frage zu nähern, nimmt die Studie sowohl die Praxis als auch eine höhere theoretische Reflexionsebene in den Blick. Die Vorsorgevollmacht reagiert einerseits auf ein Verständnis des Menschen als Beziehungswesen, andererseits geht ihr dieses Verständnis bereits voraus. Immer und zugleich liegen dabei die Wahrung und die Gewährung von Autonomie und Fürsorge zugrunde und können so als besondere Kennzeichen der Vorsorgevollmacht skizziert werden. Die Vorsorgevollmacht zeigt sich als theologisch zu würdigendes, praxistaugliches Instrumentarium zur Sorge für- und miteinander.

*The Last Self-Help Book You'll Ever Need* Paul

Pearsall.2009-03-17 Although the tenets of self-help have been attacked before, Pearsall is the first psychologist to expose these deeply entrenched ideas to scientific scrutiny. And unlike other debunking books, *The Last Self-Help Book You'll Ever Need* goes beyond skepticism to propose a set of life-affirming (and refreshingly contrarian) axioms that can help anyone lead the Good Life.

**Self-determined Dying - Method "Plastic Bag and Sleeping Pills"** Jessica Düber.2020-04-15 The use of plastic bags in combination with sleeping pills for self-determined dying is a method that has been known and used for a long time, but has fallen somewhat into oblivion due to the increasing popularity of the so-called helium method. The method plastic bag and sleeping pills is comparatively easy to carry out and does not require much effort to obtain the necessary equipment. Nevertheless, there are frequent reports of failed attempts and sometimes incorrect reports regarding the way it works. There are some details which

are of great importance for a successful implementation. This publication provides a comprehensive description of the underlying principle and shows which points should be remembered for the success of self-determined dying with the plastic bag and sleeping pills method.

Hohenstein.2022-12-06 This updated edition of Vitra's 2017

publication presents recent developments in robotics and digitization This volume investigates how robotics has become an integral part of life: in industry, in the military and in everyday settings; at nurseries and retirement homes; in our bodies; when shopping and when having sex; in video games and in films and in literature. In a series of in-depth essays and interviews, experts including science-fiction author Bruce Sterling and the design duo Dunne & Raby explore what an increasingly digital environment means for us humans. They highlight our often-ambivalent relationship to new technologies and discuss the opportunities and challenges they pose for us as individuals and as a society. *Hello, Robot* broadens the scope of debate to include the ethical and political questions arising from technological advances in robotics today, and confronts us with the contradictions that often underpin the answers to these questions.

Last Wish Betty Rollin.2008-08-04 At a time when tempers flare over the Oregon assisted suicide law and Jack Kevorkian's physician-aid-in-dying, Last Wish, Betty Rollin's groundbreaking New York Times bestseller, is due for a rereading. Last Wish is an intimate, fiercely honest memoir of a daughter's struggle to come to terms with her terminally ill mother's decision to die. More than an examination of the ethical, spiritual, and technical aspects of assisted suicide, Last Wish is also a celebration of Rollin's imperfect family, a passionate testament to her mother's character and courage, and a compelling argument for the right of the terminally ill to a humane and dignified death. The PublicAffairs paperback edition includes a new foreword, questions for thought and discussion, and a helpful resource guide.

are tips on obtaining all the items needed (a buyers guide is included) and detailed information about the technical construction will be given. It is an updated and expanded edition of the chapter Helium of the 2017 published manual *Self-determined Dying - Manual for a Rational Suicide* by J. Dueber [Spiritualities of Life](#) Paul Heelas.2009-01-21 This insightful and provocative journey through spiritual landscapes explores the ways in which spiritualities of life have been experienced and understood in Western society, and argues that today's myriad forms of holistic spirituality are helping us to find balance in face of the stifling demands of twenty-first century living. An enlightening book which explores the ways in which spirituality has been experienced and valued in Western society Traces the development of modern spirituality, from the origins of Romanticism in the eighteenth century, through to the counter-cultural sixties and on to the wellbeing culture of today Explores the belief that modern spirituality is merely an extension of capitalism in which people consume spirituality without giving anything back Contends that much of the wide range of popular mind-body-spirit practices are really an ethically charged force for the 'good life', helping us to find balance in the demands of twenty-first century living Written by an acknowledged world-leader working in the field Completes a trilogy of books including *The Spiritual Revolution* (2005, with Linda Woodhead) and *The New Age Movement* (1996), charting the rise and influence of spirituality today.

**Self-determined Dying - The Method "Carotid Artery"** Jessica Düber.2020-04-13 Recently, I have received more frequent inquiries regarding the correct execution of a suicide by means of compression of the carotid arteries. While looking through the available literature on this method, I came across not only quite comprehensive explanations, but also instructions that propagate the method without going into the underlying pathophysiological aspects and the resulting necessities for practical

implementation. For some people this might be enough - I want to express this without criticism, because it is my concern not to complicate methods for rational suicide by unnecessary theoretical explanations. However, I believe that more comprehensive information on the basics and on the practical implementation is needed to seriously address the question of whether interrupting the oxygen supply by compressing the carotid arteries is a suitable method for a painless and peaceful, self-determined death. This little book is therefore intended to provide interested parties with an opportunity to gain an overview of the Carotid Artery method, as I would like to call it here. The paper contains basic information on the principle of the method and its practical implementation, deals with possible sources of error and presents some options that could make the method safer and more reliable.

*Neuromarketing in Sports* Martin Fett.2012-05-29 Master's Thesis from the year 2011 in the subject Business economics - Offline Marketing and Online Marketing, grade: 1,0, University of Lugano, course: Sponsorship and Partnership Management - Corporate Communication, language: English, abstract: Until now, economic theory has not systematically integrated the impact of emotions on brand perception. Evidence from the evolving discipline of neuroscience suggests that decision-making is dependent on emotional processing. Interdisciplinary research under the label of "neuromarketing" arose. The key idea of this approach is to employ recent neuroscientific methods in order to analyze economically relevant brain processes. This thesis offers an overview of the current state of neuroeconomic research by defining the concept of neuromarketing, explaining methods that are widely used and describing current studies in this new research area. The study which was conducted within this master thesis finally provides guidance for future research. Several studies found that there are no separated ways for cognition and emotion in a human being's brain. Emotions are deeply connected

with cognitive processing and thus, even are a crucial part of human decision making. Since more and more companies want to enhance their brands, products, and services with emotions, they are trying to use this important precondition and are engaging in sports sponsorships, because sports as such is considered the biggest and most emotional power in entertainment business. Several authors claim that in addition there has rarely been coherent research for sponsorship in general – and if at all, then only regarding the awareness of the sponsoring brands. Also, companies are not really aware if they seize the high potential of their sponsorship activities. About 21% of companies that apply sponsorship strategies into practice do not even conduct a controlling phase. They are not measuring the achievement of their sponsorship objectives. Hence, they do not even know the success (or failure) of their strategies. Does sponsorship in sports have significant effects at all? Does it help to increase a brand's image? Only explicit measuring is very common in controlling the effects of sponsorship activities. The probands are being asked whether they remember one brand or another and how they rate it. Too often, however, the results are biased by many wrong preconditions, for example the Social Desirability Bias or that the sponsors only want to hear what they want to hear.[...]

Shelters, Shacks and Shanties Daniel Carter Beard.2015-09-11  
If my present reader happens to be a Boy Scout or a scoutmaster who wants the scouts to build a tower for exhibition purposes, he can do so by following the directions here given, but if there is real necessity for haste in the erection of this tower, of course we cannot build one as tall as we might where we have more time. With a small tower all the joints may be quickly lashed together with strong, heavy twine, rope, or even wire; and in the wilderness it will probably be necessary to bind the joints with

pliable roots, or cordage made of bark or withes; but as this is not a book on woodcraft we will suppose that the reader has secured the proper material for fastening the joints of the frame of this signal-tower and he must now shoulder his axe and go to the woods in order to secure the necessary timber. First let him cut eight straight poles—that is, as straight as he can find them. These poles should be about four and one half inches in diameter at their base and sixteen and one half feet long. After all the branches are trimmed off the poles, cut four more sticks each nine feet long and two and a half or three inches in diameter at the base; when these are trimmed into shape one will need twenty six or seven more stout sticks each four and one half feet long for braces and for flooring for the platform.

*Progress and Visions in Quantum Theory in View of Gravity* Felix Finster, Domenico Giulini, Johannes Kleiner, Jürgen

Tolksdorf. 2020-04-09 This book focuses on a critical discussion of the status and prospects of current approaches in quantum mechanics and quantum field theory, in particular concerning gravity. It contains a carefully selected cross-section of lectures and discussions at the seventh conference "Progress and Visions in Quantum Theory in View of Gravity" which took place in fall 2018 at the Max Planck Institute for Mathematics in the Sciences in Leipzig. In contrast to usual proceeding volumes, instead of reporting on the most recent technical results, contributors were asked to discuss visions and new ideas in foundational physics, in particular concerning foundations of quantum field theory. A special focus has been put on the question of which physical principles of quantum (field) theory can be considered fundamental in view of gravity. The book is mainly addressed to mathematicians and physicists who are interested in fundamental questions of mathematical physics. It allows the reader to obtain a broad and up-to-date overview of a fascinating active research area.
