The Sickness Called Man Ferdinando Camon.1992 Ostensibly a satirical look at psychoanalysis and its practitioners, this novel is also a serious social critique of modern man. From his depictions of pompous therapists to his analysis of the intersection of church and state, Camon's wit and wisdom shine in this remarkable novel.

When Fathers Ruled Steven Ozment.2009-07-01 Here is a lively study of marriage and the family during the Reformation, primarily in Germany and Switzerland, that dispels the commonly held notion of fathers as tyrannical and families as loveless. Did husbands and wives love one another in Reformation Europe? Did the home and family life matter to most people? In this wide-ranging work, Steven Ozment has gathered the answers of contemporaries to these questions. His subject is the patriarchal family in Germany and Switzerland, primarily among Protestants. But unlike modern scholars from Philippe Ariès to Lawrence Stone, Ozment finds the fathers of early modern Europe sympathetic and even admirable. They were not domineering or loveless men, nor were their homes the training ground for passive citizenry in an age of political absolutism. From prenatal care to graveside grief, they expressed deep love for their wives and children. Rather than a place where women and children were bullied by male chauvinists, the Protestant home was the center of a domestic reform movement against Renaissance antifeminism and was an attempt to resolve the crises of family life. Demanding proper marriages for all women, Martin Luther and his followers suppressed convents and cloisters as the chief institutions of womankind's sexual repression, cultural deprivation, and male clerical domination. Consent, companionship, and mutual respect became the watchwords of marriage. And because they did, genuine divorce and remarriage became possible among Christians for the first time. This graceful book restores humanity to the Reformation family and to family history.

Christian Homes Tine Van Osselaer,Patrick Pasture.2014-09-29 Christian ideas on family, religion, and the home in the nineteenth and twentieth centuries The cult of domesticity has often been linked to the privatization of religion and the idealisation of the motherly ideal of the 'angel in the house'. This book revisits the Christian home of the nineteenth and twentieth centuries and sheds new light on the stereotypical distinction between the private and public spheres and their inhabitants. Emphasizing the importance of patriarchal domesticity during the period and the frequent blurring of boundaries between the Christian home and modern society, the case studies included in this volume call for a more nuanced understanding of nineteenth- and twentieth-century Christian ideas on family, religion, and the home.

Neoendogenous Development in European Rural Areas Eugenio Cejudo,Francisco Navarro.2020-01-01 This book is one of the main outcomes of the projects "Development Programmes and Rural Change in the European Union: governance, results and lessons to share"and "Successes and failures in the practice of neoendogenous rural development in the European Union (1991-2013)", funded both of them by the Spanish Ministry of Economy and Competitiveness. This publication aims, on one side, to clarify and deepen the knowledge of the social, economic and territorial effects of the LEADER approach, and, on the other, to analyze the importance of the participation of several stakeholders (young people and women) as well as some traditional activities -agriculture- or modern ones (tourism) linked all of them to the rich cultural and natural heritage of these areas. It also provides an in-depth study of the causes that lead to the generation of successful projects in the practice of neoendogenous rural development and also explores the reasons that cause certain projects to fail in the path towards LEADER support so that they are finally not implemented. In addition, it is shown the problems, results and best practices that cause the neoendogenous rural development in different areas inside of the European Union: Austria, Finland, France, Germany, Italy, Spain and United Kingdom. Thereby it helps to improve the decision-making in rural development, both on a local and regional scale. The multidisciplinary and international character of the authors, as well as the specificity of the research trajectory of each of them, in the analysis of rural development, enriches the publication and facilitates the different and critical reflections on the contributions, errors and meaning of the neoendogenous local development. Researchers in this discipline and technicians working in the practice of rural development along the European Union are the main audience of the book.

The Decline of Christendom in Western Europe, 1750-2000 Hugh McLeod,Werner Ustorf.2003-07-17 Christendom lasted for over a thousand years in Western Europe, and we are still living in its shadow. For over two centuries this social and religious order has been in decline. Enforced religious unity has given way to increasing pluralism, and since 1960 this process has spectacularly accelerated. In this 2003 book, historians, sociologists and theologians from six countries answer two central questions: what is the religious condition of Western Europe at the start of the twenty-first century, and how and why did Christendom decline? Beginning by overviewing the more recent situation, the authors then go back into the past, tracing the course of events in England, Ireland, France, Germany and the Netherlands, and showing how the fate of Christendom is reflected in changing attitudes to death and to technology, and in the evolution of religious language. They reveal a pattern more complex and ambiguous than many of the conventional narratives will admit.

Exploring Food and Urbanism Susan Parham,Matthew Hardy.2021-09-09 Exploring Food and Urbanism looks at the ways food and cities interconnect in a diversity of places across the globe. The book's focus moves from transformations in feeding the city and its hinterland in Istanbul, Turkey, through neighbourhoods struggling with food access in Blantyre, Malawi, to the challenges in making convivial public food spaces in Cairo. It explores everyday buying practices in Islamabad

food markets that reflect wider changes in food cultures in Pakistan. The possibilities for growing food in suburban Cape Town in South Africa are tested, while possibilities for sharing meals using online methods to bring cooks and eaters together are considered across the Netherlands. This edited volume makes clear that globally food is critical to sustainable urbanism everywhere across cities from kitchens to gardens, food markets, food shops, streets, squares, neighbourhoods, cities, suburbs, and hinterlands. It shows how food cultures, practices, and economics are closely intertwined with how places are planned and designed even if this is not always fully recognised. The editors of the book conclude that food can and should contribute to responding to the challenges presented by the worsening climate emergency through a focus on sustainable urbanism. The chapters in this book were originally published as a special issue of the *Journal of Urbanism*.

Food and Urbanism Susan Parham.2015-02-26 Cities are home to over fifty percent of the world's population, a figure which is expected to increase enormously by 2050. Despite the growing demand on urban resources and infrastructure, food is still often overlooked as a key factor in planning and designing cities. Without incorporating food into the design process - how it is grown, transported, and bought, cooked, eaten and disposed of - it is impossible to create truly resilient and convivial urbanism. Moving from the table and home garden to the town, city, and suburbs, *Food and Urbanism* explores the connections between food and place in past and present design practices. The book also looks to future methods for extending the 'gastronomic' possibilities of urban space. Supported by examples from places across the world, including the UK, Norway, Germany, France, Spain, Portugal, Greece, Romania, Australia and the USA, the book offers insights into how the interplay of physical design and socio-spatial practices centred around food can help to maintain socially rich, productive and sustainable urban space. Susan Parham brings together the latest research from a number of disciplines - urban planning, food studies, sociology, geography, and design - with her own fieldwork on a range of foodscapes to highlight the fundamental role food has to play in shaping the urban future.

Urban Commons Christian Borch, Martin Kornberger.2015-04-10 This book rethinks the city by examining its various forms of collectivity - their atmospheres, modes of exclusion and self-organization, as well as how they are governed - on the basis of a critical discussion of the notion of urban commons. The idea of the commons has received surprisingly little attention in urban theory, although the city may well be conceived as a shared resource. *Urban Commons: Rethinking the City* offers an attempt to reconsider what a city might be by studying how the notion of the commons opens up new understandings of urban collectivities, addressing a range of questions about urban diversity, urban governance, urban belonging, urban sexuality, urban subcultures, and urban poverty; but also by discussing in more methodological terms how one might study the urban

commons. In these respects, the rethinking of the city undertaken in this book has a critical dimension, as the notion of the commons delivers new insights about how collective urban life is formed and governed.

Christianity and Sexuality in the Early Modern World Merry Wiesner-Hanks.2005-06-20

Christianity and Sexuality in the Early Modern World is the first global survey of such for the early modern period. Merry Wiesner-Hanks assesses the role of personal faith and the church itself in the control and expression of all aspects of sexuality. The book ranges over developments within Europe and beyond to the European colonies including Brazil, Mexico, South Africa and Goa, which were establishing themselves around the world. Christian missionaries and rituals and structures accompanied all of the imperial powers and the control of the sexuality of both indigenous peoples and colonists was an essential part of policy. The book is introduced with a clear, original and engaging account of the central concepts in the study of sexuality in Christianity, such as shame, sin, the body, marriage and gender. Drawing on diverse evidence including literary, medical and historical the following sections chart changes in Western Christianity in the Late Middle Ages, Protestantism and Catholicism in Europe, Orthodoxy in Eastern Europe and Russia, and finally the Spanish, Portuguese, English and Dutch Colonies. Merry Wiesner-Hanks exciting book covers both the ideas and effects in each period. Christianity and Sexuality in the early Modern World includes discursive bibliographies which discuss major books and articles at the end of each chapter.

Mixing Ovaries and Rosaries Marloes Marringje Schoonheim.2005 This book aims at disclosing the mechanism behind the influence of religion on Catholic fertility behavior in the Netherlands between 1870 and 1970. Schoonheim studies the relationship between faith and fertility on different levels of Dutch society. She explains the way religion, from the late nineteenth century onwards, came to constitute a nationwide social structure. Research on six Catholic municipalities points out how socio-economic and cultural circumstances stimulated or discouraged the introduction of family planning. On an individual level, letters by Catholic women show the different ways in which believers were confronted with doctrines that affected reproduction. Only in the nineteen sixties did

the relationship between Catholic religion and reproduction change dramatically on each of these levels. In less than a decade, fertility rates in Catholic regions tumbled to become the lowest of the Netherlands.--BOOK JACKET.

Pius XI and America David I. Kertzer, Charles R. Gallagher, Alberto Melloni. 2012 The Vatican's opening of its archives in 2006 for the period of the papacy of Pius XI (1922-1939) has prompted a burst of historical research which is not only shedding new light on the role of the Holy See and the Church in this period of extraordinary political and social turmoil, but also on some of the major world events of this period. In 2008, a number of institutions created a research network, bringing together scholars from different countries who are working in these archives and highlighting its emerging work to the broader scholarly community. This book represents the proceedings from a conference of this research network, held in Providence, Rhode Island, at the Brown University in October 2010. (Series: Christianity and History. Series of the John XXIII Foundation for Religious Studies in Bologna - Vol. 11) *** As the essays reveal, such a historic decision will impact the way that scholars interpret modern church history for years to come. Yet, as coeditor Charles Gallagher, S.J., reminds us in his introduction, the opening will also allow scholars 'to uncover a history which is not only papal, but political, cultural, economic, and global' (p. 17). - The Catholic Historical Review, Vol. 100, No. 2, Spring 2014

Lived Religion Meredith B McGuire. 2008-08-22 How can we grasp the complex religious lives of individuals such as Peter, an ordained Protestant minister who has little attachment to any church but centers his highly committed religious practice on peace-and-justice activism? Or Hannah, a devout Jew whose rich spiritual life revolves around her women's spirituality group and the daily practice of meditative dance? Or Laura, who identifies as Catholic but rarely attends Mass, and engages daily in Buddhist-style meditation at her home altar arranged with symbols of Mexican American popular religion? Diverse religious practices such as these have long baffled scholars, whose research often starts with the assumption that individuals commit, or refuse to commit, to an entire institutionally framed package of beliefs and practices. Meredith McGuire points the way

forward toward a new way of understanding religion. She argues that scholars must study religion not as it is defined by religious organizations, but as it is actually lived in people's everyday lives. Drawing on her own extensive fieldwork, as well as recent work by others, McGuire explores the many, seemingly mundane, ways that individuals practice their religions and develop their spiritual lives. By examining the many eclectic and creative practices -- of body, mind, emotion, and spirit -- that have been invisible to researchers, she offers a fuller and more nuanced understanding of contemporary religion.

Labour People Kenneth O. Morgan.2010-02 The author himself provides the best description. 'In this book I examine about thirty key personalities in the the history of the British Labour movement between 1900 and 1987. I also try to explore what kind of typology of leadership emerges. This is, inevitably, a highly personal selection, in part reflecting my own interests, outlook and background. . . I hope, nevertheless, that the main kinds of Labour leaders, parliamentary politicians, trade unionists, machine apparatchiks, intellectuals, journalists, prophets and others are truly represented. . .' Kenneth O. Morgan succeeds magnificently in his aim whether he is writing about Keir Hardie, The Webbs, Ellen Wilkinson, Herbert Morrison or Denis Healey: these portraits and all the others are illuminated with a sympathetic scholarship. 'Morgan can bring to the study of the Labour Party a knowledge that is second to none' Ben Pimlott, *New Society* 'It combines surveying the abundant recently published material on twentieth century British labour history with the integrating perspective of a sympathetic and very knowledgeable historian' Brian Harrison, *London Review of Books* 'matchless authority . . . both attractive and unique' J. M. Winter, *History* 'These Labour People are full of fascinating contradictions' John Mortimer, *Sunday Times* 'polished, yet sharp, moving easily through complexities yet often with a provocative comment' David Howell, *Welsh History Review*

A History of Virility Alain Corbin, Jean-Jacques Courtine, Georges Vigarello.2016 These original essays follow the socio-historical evolution of virility, as opposed to masculinity, to unsettle popular accounts of politics and culture. A major contribution to the nascent field of masculinity studies, this history consults painting, sculpture, literature, philosophy, film, and cultural and sociological critique. With the twentieth century delivering one blow after another to hegemonic virility, this book also explores where manliness might be headed next.

The Illuminated; Or the Precursors of Socialism Gerard De Nerval.2022-01-11 Poetical biographies of six radical thinkers from Cagliostro to Restif de la Bretonne, by the leading figure of French Romanticism First published in French in 1852, *The Illuminated* was the first of a string of Gérard de Nerval's late works that would culminate in his posthumous fantastical autobiography *Aurélia* in 1855. *The Illuminated* collects six portraits of men whom Nerval mysteriously dubbed precursors of socialism--visionaries who together formed an alternative history of France and a backdrop to a mystical form of madness that Nerval ultimately claimed for himself. Nerval here presents the reader with Raoul Spifame, a mad lawyer who imagined himself to be Henry II; the Abbé de Bucquoy, a man who opposed the monarchy and whose amazing escapes suggested the possession of magical powers; Nicolas Restif de la Bretonne, the 18th-century theosophist who defined God in human terms rather than spiritual; the Count Alessandro di Cagliostro, the famous magus and alchemist; Jacques Cazotte, author of *The Devil in Love*, who created a synthesis between hermetic ideas and Catholic thought; and Quintus Aucler, a lawyer who sought to revive paganism in the unstable world of French society in the immediate aftermath of the Revolution of 1789. An overlooked work by Nerval, *The Illuminated* brings together the picturesque and pathos, a peculiar gallery of portraits that blur the boundaries between mysticism and mystification. Gérard de Nerval (1808-55) was a writer, poet and translator who wedded French and German Romanticism and transformed his research into mystic thought and his bouts of mental illness into such visionary works as *Aurélia*.
