Permanent Present Tense Suzanne Corkin.2013-05-15 In Permanent Present Tense Suzanne Corkin tells the incredible story of the amnesiac Henry Gustave Molaison - known only as H.M. until his death in 2008 - and what he taught medical science, neuroscience and the world. In 1953, at the age of twenty-seven, Molaison underwent an experimental psychosurgical procedure intended to alleviate his debilitating epilepsy. The outcome was devastating - when Molaison awoke he was unable to form new memories and for the rest of his life would be trapped in the moment. But Molaison's tragedy would prove a gift to humanity, illuminating functions and structures of the brain and revolutionizing the neuroscience of memory. His amnesia became a touchstone for memory impairment in other patients. For nearly five decades, distinguished neuroscientist Suzanne Corkin studied Molaison and oversaw his care. Her account of his life and legacy in Permanent Present Tense reveals an intelligent man who, despite his profound amnesia, was altruistic, friendly, open, and humorous. She explores how his case transformed an entire field, helping to address eternal questions. How do we store and retrieve memories? How do we know that there are different kinds of memory, controlled by different brain circuits? Is our identity bound up with remembering? If you can recall people or events for only a few seconds and cannot learn from the past or plan the future, can you still live a meaningful life? Permanent Present explores the astonishing complexity of the

human brain with great clarity, sensitivity, and grace, showing how one man's story challenged our very notions of who we are. Suzanne Corkin is Professor of Behavioral Neuroscience and head of the Corkin Lab at MIT. The author of nine books, Corkin lives in Charlestown, Massachusetts. 'A fascinating account of perhaps the most important case study in the history of neuroscience, rich with implications for our understanding of the brain, our experience, and what it means to be human' Steven Pinker, author of 'How the Mind Works' and 'The Stuff of Thought' 'The best way to understand memory is to witness the ways it can disassemble. In this remarkable book, Suzanne Corkin gifts us with a rare insider's view, revealing how a man who could not remember his immediate past so profoundly influenced science's future' David Eagleman, neuroscientist and New York Times-bestselling author of 'Incognito: The Secret Lives of the Brain' 'Suzanne Corkin has written an enjoyable and sensitive story of H.M.'s life and what it has taught us about memory. Millions of patients have been the source of advances in science but few are celebrated as individuals. We learn through H.M. that 'Our brains are like hotels with eclectic arrays of guests-homes to different kinds of memory, each of which occupies its own suite of rooms' Philip A. Sharp, Institute Professor, Massachusetts Institute of Technology, and winner of the Nobel Prize in Physiology or Medicine 'Drawing on her unique investigations over more than four decades, neuroscientist Suzanne Corkin relates the fascinating story of how one severely amnesic man transformed our understanding of mind, brain, and memory' Howard Gardner, author of 'Multiple Intelligences'

DEC Is Dead, Long Live DEC Edgar H. Schein,Paul J. Kampas,Peter S. DeLisi,Michael M.

Sonduck.2004-08-15 From an insider, the forty-year saga of the rise and fall of Digital Equipment Corporation, one of the pioneering companies of the computer age. Digital Equipment Corporation

created the minicomputer, networking, the concept of distributed computing, speech recognition, and other major innovations. It was the number-two computer maker behind IBM. Yet it ultimately failed as a business and was sold to Compaq Corporation. What happened? Edgar Schein consulted to DEC throughout its history and so had unparalleled access to all the major players, and an inside view of all the major events. He shows how the unique organizational culture established by DEC's founder, Ken Olsen, gave the company important competitive advantages in its early years, but later became a hindrance and ultimately led to its downfall. Coauthors Schein, Kampas, DeLisi, and Sonduck explain in detail how a particular culture can become so embedded that an organization is unable to adapt to changing circumstances even though it sees the need very clearly. The essential elements of DEC's culture are still visible in many other organizations today, and most former employees are so positive about their days at DEC that they attempt to reproduce its culture in their current work situations. In the era of post-dotcom meltdown, raging debate about companies "built to last" vs. "built to sell," and more entrepreneurial startups than ever, the rise and fall of DEC is the ultimate case study.

Thabo Mbeki Mark Gevisser. 2022-05-06 Hailed in the Times Literary Supplement as 'probably the finest piece of non-fiction to come out of South Africa since the end of apartheid', *The Dream Deferred* is back in print and updated with a brilliant new epilogue. The prosperous Mbeki clan lost everything to apartheid. Yet the family saw its favourite son, Thabo, rise to become president of South Africa in 1999. A decade later, Mbeki was ousted by his own party and his legacy is bitterly contested - particularly over his handling of the AIDS epidemic and the crisis in Zimbabwe. Through the story of the Mbeki family, award-winning journalist Mark Gevisser tells the gripping tale of the last tumultuous century of South Africa life, following the family's path to make sense of the

liberation struggle and the future that South Africa has inherited. At the centre of the story is Mbeki, a visionary yet tragic figure who led South Africa to freedom but was not able to overcome the difficulties of his own dislocated life. It is 15 years since Mbeki was unceremoniously dumped by the ANC, giving rise to the wasted years under Jacob Zuma. With the benefit of hindsight, and as Mbeki reaches the age of 80, Gevisser examines the legacy of the man who succeeded Mandela. '...essential reading for anyone intrigued by South Africa's complex philosopher-king.' - The Economist

Information Gathering in Classical Greece Frank Santi Russell. 1999 Information Gathering in Classical Greece opens with chapters on tactical, strategic, and covert agents. Methods of communication are explored, from fire-signals to dead-letter drops. Frank Russell categorizes and defines the collectors and sources of information according to their era, methods, and spheres of operation, and he also provides evidence from ancient authors on interrogation and the handling and weighing of information. Counterintelligence is also explored, together with disinformation through leaks and agents. The author concludes this fascinating study with observations on the role that intelligence-gathering has in the kind of democratic society for which Greece has always been famous--Publisher description.

A Princeton Companion Alexander Leitch. 2015-02-16 In this unusual and unique volume, Alexander Leitch provides a warm, often witty, and always informative reference book on Princeton University. The collection of approximately 400 articles, alphabetically arranged and written by some seventy faculty members and alumni in addition to the author, covers all aspects of Princeton life in the past as well as in the present. Of special interest are the biographies of eminent Princetonians, including the University's presidents, well-known trustees, distinguished deans, famous alumni, and some of Princeton's most prominent and popular professors. Other articles in the book embrace a wide range of topics: histories of academic departments, programs, and research units; descriptions of the honor system, the preceptorial method, the four-course plan, and coeducation; a historical survey of the University's acquisition of land and the development of its campus, together with articles on its principal buildings; pieces on student activities; accounts of alumni activities; articles on athletics; portraits of notable personalities; and commentaries on a host of lighter topics such as the cane spree, beer jackets, the Faculty Song, the proctors, and Veterans of Future Wars. Among the most important articles are one summarizing Woodrow Wilson's Sesquicentennial address, Princeton in the Nation's Service, and a dozen others recording faculty and alumni achievements toward the goal encompassed by that phrase. Originally published in 1978. Rearming the French Marcel Vigneras. 2016-11-29 In October 1942 Maj. Gen. Mark W. Clark, representing the U.S. Army, and Brig. Gen. Charles Mast, spokesman for General Henri Giraud, met secretly in Cherchel, seventy-five miles west of Algiers. The subject of their conversations was a momentous one—the imminent re-entry of French North Africa into the war. General Clark, acting on instructions from President Roosevelt, gave positive assurances to General Mast that the United States would furnish the equipment necessary to outfit the North African forces. Clark's commitment was timely, for Anglo-American forces were about to land in northwest Africa. More important, it heralded an event of great significance: the forthcoming assumption, by the United States, of direct responsibility for reequipping the French armed forces. The British had been discharging this responsibility by maintaining the small band of Frenchmen stubbornly fighting on their side and under their control since mid-1940. Before World War II had ended, the Americans had fully equipped and trained eight French divisions in North Africa, partially outfitted and trained three more in France, furnished equipment for nineteen air squadrons, and carried out an extensive rehabilitation program for the French Navy. They had supplied some 1,400 aircraft, 160,000 rifles and carbines, 30,000 machine guns, 3,000 artillery guns, 5,000 tanks and These instructions were relayed in Msg R-2080, Gen George C. Marshall to Lt Gen Dwight D. Eisenhower, 17 Oct 42, CM-OUT 5682. (See Bibliographical Note.) Clark . . . should state . . . the U.S. will furnish equipment for French Forces which will operate against the Axis. self-propelled weapons, and 51,000,000 rounds of ammunition. An occurrence of historic import was thus re-enacted in reverse. Twice France had similarly undertaken to assist an unprepared America at war. In 1781, in addition to sending an expeditionary corps to help the young colonies in their fight for independence, France supplied

weapons and materiel to the infant Continental Army. Much later, in World War I. France, herself at war with Germany, again provided materiel to the American Expeditionary Forces (A.E.F.) sent to the European continent. In that second episode, the nature and extent of the help rendered were vastly different from what they were to be in World War II. Yet the parallel is striking enough to warrant, for the sake of historical comparison, a brief account of the aid extended by the French to the American forces in 1917-18.

Capital's Utopia Anne E. Mosher.2004 In the 1890s the Apollo Iron and Steel Company ended a bitterly contested labor dispute by hiring replacement workers from the surrounding countryside. To avoid future unrest, however, the company sought to gain tighter control over its workers not only at the factory but also in their homes. Drawing upon a philosophy of reform movements in Europe and the United States, the firm decided that providing workers with good housing and a good urban environment would make them more loyal and productive. In 1895, Apollo Iron and Steel built a new, integrated, non-unionized steelworks and hired the nation's preeminent landscape architectural firm (Olmsted, Olmsted, and Eliot) to design the model industrial town: Vandergrift. In *Capital's Utopia: Vandergrift, Pennsylvania, 1855-1916*, Anne E. Mosher offers the first comprehensive geographical overview of the industrial restructuring of an American steelworks and its workforce in the late nineteenth-century. In addition, by offering a thorough analysis of the Olmsted plan, Mosher integrates historical geography and labor history with landscape architectural history and urban studies. As a result, this book is far more than a case study. It is a window into an important period of industrial development and its consequences on communities and environments in the world-famous steel country of southwestern Pennsylvania.

The Economic Emergence of Women B. Bergmann. 2005-09-16 This new edition of a classic feminist

book explains how one of the great historical revolutions - the ongoing movement toward equality between the sexes - has come about. Its origins are to be found, not in changing ideas, but in the economic developments that have made women's labour too valuable to be spent exclusively in domestic pursuits. The revolution is unfinished; new arrangements are needed to fight still-prevalent discrimination in the workplace, to achieve a more just sharing of housework and childcare between women and men, and, with the weakening of the institution of marriage, to re-erect a firm economic basis for the raising of children.

The Doll's Alphabet Camilla Grudova.2017-10-17 This doll's eye view is a total delight and surveys a world awash with shadowy wit and exquisite collisions of beauty and the grotesque. —Helen Oyeyemi, author of *Boy, Snow, Bird* Down to its most particular details, *The Doll's Alphabet* creates an individual world—a landscape I have never encountered before, which now feels like it was been waiting to be captured, and waiting to captivate, all along. —Sheila Heti, author of *How Should a Person Be* Marvellous. Grudova understands that the best writing has to pull off the hardest aesthetic trick—it has to be both memorable and fleeting. —Deborah Levy, author of *Hot Milk Dolls*, sewing machines, tinned foods, mirrors, malfunctioning bodies—by constantly reinventing ways to engage with her obsessions and motifs, Camilla Grudova has built a universe that's highly imaginative, incredibly original, and absolutely discomfiting. The stories in *The Doll's Alphabet* are by turns child-like and naive, grotesque and very dark: the marriage of Margaret Atwood and Angela Carter. Camilla Grudova lives in Toronto. She holds a degree in Art History and German from McGill University, Montreal. Her fiction has appeared in *The White Review* and *Granta*.

A Framework for Assessing Effects of the Food System National Research Council, Institute of Medicine, Board on Agriculture and Natural Resources, Food and Nutrition Board, Committee on a Framework for Assessing the Health, Environmental, and Social Effects of the Food System.2015-06-17 How we produce and consume food has a bigger impact on Americans' well-

being than any other human activity. The food industry is the largest sector of our economy; food touches everything from our health to the environment, climate change, economic inequality, and the federal budget. From the earliest developments of agriculture, a major goal has been to attain sufficient foods that provide the energy and the nutrients needed for a healthy, active life. Over time, food production, processing, marketing, and consumption have evolved and become highly complex. The challenges of improving the food system in the 21st century will require systemic approaches that take full account of social, economic, ecological, and evolutionary factors. Policy or business interventions involving a segment of the food system often have consequences beyond the original issue the intervention was meant to address. A Framework for Assessing Effects of the Food System develops an analytical framework for assessing effects associated with the ways in which food is grown, processed, distributed, marketed, retailed, and consumed in the United States. The framework will allow users to recognize effects across the full food system, consider all domains and dimensions of effects, account for systems dynamics and complexities, and choose appropriate methods for analysis. This report provides example applications of the framework based on complex questions that are currently under debate: consumption of a healthy and safe diet, food security, animal welfare, and preserving the environment and its resources. A Framework for Assessing Effects of the Food System describes the U.S. food system and provides a brief history of its evolution into the current system. This report identifies some of the real and potential implications of the current system in terms of its health, environmental, and socioeconomic effects along with a sense for the complexities of the system, potential metrics, and some of the data needs that are required to assess the effects. The overview of the food system and the framework described in this report will be an essential resource for decision makers, researchers, and others to examine the

possible impacts of alternative policies or agricultural or food processing practices.
