The Geopolitics of Regional Power Sören Scholvin.2016-03-09 In the last two decades, various states from the Global South have emerged as important players in international relations. Most popular among them is China. Brazil, India and South Africa have also taken essential roles in global and regional politics. Compared to traditional great powers, they can be labelled 'regional great powers' or 'regional powers' because their influence is - with the exception of China - concentrated

on their neighbourhood. The impact of regions, meaning the impact of geography, on the economics and politics of regional powers is surprisingly understudied. This book analyses how geographical conditions influence the regional economics and politics of South Africa, allowing the author to delineate its region of influence.

English as a Language of Teaching and Learning for Community Secondary Schools in Tanzania Elia Shabani Mligo, Mikael Mwashilindi. 2017-08-07 This book examines the challenges posed by English, a foreign language, as a language of teaching and learning for community secondary schools in Tanzania in terms of academic performance. The book probes the necessity for having two languages of instruction in the Tanzanian educational system. While Kiswahili, the native language, is predominantly understood by the majority of people, the discussion in this book indicates that most students in community secondary schools in Tanzania are incompetent in understanding, writing, listening, reading, and speaking English, a language they use in learning and doing their examinations, especially in the early stages of their secondary studies. The incompetence in the above-mentioned skills is mostly caused by their inability to cope with the abrupt transition in the languages of instruction from their pre-primary and primary school study [Kiswahili] to secondary school study [English]. Moreover, most teachers are unable to use the English language as a means to impart knowledge or facilitate learning to their students, leading them to code-switching and code-mixing. This book poses a challenge to countries whose students pass through a transition from one language of instruction to another in their educational systems, helping them to make appropriate decisions in regard to the appropriate language of teaching and learning.

Language of Instruction in Tanzania and South Africa - Highlights from a Project

.2010-01-01 This book is based on chapters in a series of four books from the first five years (2002-2006) of the Language of Instruction in Tanzania and South Africa (LOITASA) project. LOITASA is a NUFU-funded (Norwegian University Fund) project which began in January 2002 and will continue through to the end of 2011. The chapters reflect the state of the research at the end of the first five years of LOITASA in 2006 and were selected by reviewers independent of the project.

The Structure of Political Geography Julian Minghi.2017-09-04 This volume seeks to provide a sense of purpose and order to the study of political geography. The editors devise a conceptual structure for the field, bringing political geography into line with trends in contemporary geography as a

whole and with other social sciences. Not only do the selections contain a wide variety of contributions from other fields, but the introductory essays and annotated bibliographies suggest related research. The structure of the book enjoys close parallels in other social sciences. The organization of the book reflects the editors' definitions and structuring of political geography. Part I, Heritage, includes works that have contributed to the theoretical development of the field. Part II, Structure, comprises the concern to which political geographers have devoted most of their past attention. Parts III and IV, Process and Behavior, form the subject where much future theoretical and practical effort is needed. Part V, Environment, provides the context in which spatial structure, process, and behavior occur. The Structure of Political Geography includes selections from sociobiology, history, international relations, political economy, political science, social psychology, and sociology. The classics in the field are an essential inclusion since the book would be incomplete without them. The selections in the volume, originally published in 1971, remain useful and pertinent to political geographers of diverse persuasion and to social scientists interested in geographical approaches. The fact that there is a clear focus and conceptual interdependence in political geography is the volume's greatest contribution.

GIS in Sustainable Urban Planning and Management Martin van Maarseveen, Javier Martinez, Johannes Flacke. 2018-12-07 The Open Access version of this book, available at <http://www.tandfebooks.com/doi/view/10.1201/9781315146638>, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 3.0 license. GIS is used today to better understand and solve urban problems. GIS in Sustainable Urban Planning and Management: A Global Perspective, explores and illustrates the capacity that geo-information and GIS have to inform practitioners and other participants in the processes of the planning and management of

urban regions. The first part of the book addresses the concept of sustainable urban development, its different frameworks, the many ways of measuring sustainability, and its value in the urban policy arena. The second part discusses how urban planning can shape our cities, examines various spatial configurations of cities, the spread of activities, and the demands placed on different functions to achieve strategic objective. It further focuses on the recognition that urban dwellers are increasingly under threat from natural hazards and climate change. Written by authors with expertise on the applications of geo-information in urban management, this book showcases the importance of GIS in better understanding current urban challenges and provides new insights on how to apply GIS in urban planning. It illustrates through real world cases the use of GIS in analyzing and evaluating the position of disadvantaged groups and areas in cities and provides clear examples of applied GIS in urban sustainability and urban resilience. The idea of sustainable development is still very much central in the new development agenda of the United Nations, and in that sense, it is of particular importance for students from both the Global South and Global North. Professionals, researchers, and students alike will find this book to be an invaluable resource for understanding and solving problems relating to sustainable urban planning and management.

Development of Education in Tanzania, Prof. Philemon A.K. Mushi, examines the historical development of education in Tanzania, from the pre-colonial to post-independence periods, delineating the economic and social context which shaped and helped to define the origins of various education reforms in formal and non-formal education and their developments in Tanzania beyond 1990. The book has attempted to uncover the underlying context with which the various education reforms were conceived and originated. At the same time, analysis of the current provision of education has been made to determine the challenges facing education provision in the country.

A Son of Two Countries M. Rubagumya.2018-09-26 *A Son of Two Countries* is a story of struggle for education. Born in 1946 in Rwanda under Belgian colonial rule, the author recounts his early education in Rwanda and later as a refugee in Tanzania. He was naturalized as a Tanzanian citizen in 1980 while doing his undergraduate studies at the University of Dar es Salaam. As he struggled to get education, the author was also grappling with his refugee status, with all the challenges that it entailed. The book gives insights into the contradictions of colonial and post-colonial education, as well as the authors reflections on education in Tanzania, given his long experience in the education sector in that country. Finally, we get some glimpses into the dual identity of the author as a Tanzanian citizen of Rwandan origin and how this shaped his relationship with the two countries he calls home. As he aptly puts it, Rwanda gave me my heart; Tanzania gave me my brain. I find it difficult to choose between my heart and my brain.
