Ss. Vincenzo E Anastasio at Tre Fontane Near Rome Joan Barclay Lloyd.2006 The long and fascinating history of the abbey of SS. Vincenzo e Anastasio at Tre Fontane Near Rome reached back into roman antiquity. An ancient martyrdom marked the spot where the apostle Paul was believed to have been beheaded and three fountains said to have sprung up as his head hit the ground were places of pilgrimage and monastic habitation. Around 1140 Pope Innocent II invited Bernard of Clairvaux to establish a Cistercian monastery on the site. Its first abbot later became pope as Eugene III, for whom Bernard wrote his Five Books on Consideration advising him how a pope much involved in business could, and must, maintain a contemplative life. Today, following nineteenth-century suppression and refoundation, it is once again a Cistercian abbey. Working with architectural, archaeological, epigraphic and documentary evidence Joan Barclay Lloyd traces the vicissitudes of this historic monastery. As she untangles pious tradition from historical fact she also decodes the architectural influences of Rome and Burgundy, and traces the alterations wrought over centuries of habitation.

Chapters end with significant primary documents from the period.

Cistercian Abbeys Jean-François Leroux-Dhuys.1998 The nature of the Cistercian movement resulted in a uniform style of architecture across Europe, noted for its lack of decoration and poetic atmosphere. *Cistercian Abbeys* traces the chronological development of this movement and depicts its major monasteries in France, England, Ireland, Germany, the Czech Republic, Spain and Portugal. A typical Konemann publication: massive in size, superb in illustration.

Le Corbusier Flora Samuel.2004-04-02 This is a revealing book which, for the first time, investigates the central influence of feminism in the work of Le Corbusier; one of the most important and revered architects of all time. The text covers Le Corbusier's upbringing and training and sets this in the context of the cultural atmosphere of his time, covering issues of gender and religion. It reveals aspects of his private life such as personal relationships, which have barely been explored before as no biography currently exists. Furthermore, the author reveals, for the first time in print, a previously undiscovered and unpublished Le Corbusier building, making this book an incredibly significant addition to existing literature on the great man. In short, the new evidence and theories contained in this volume amount to major revelations about this hugely revered and central architectural figure of the 20th Century.

Introduction of Gothic Architecture Into Italy by the French Cistercian Monks Arthur Lincoln Frothingham.1890

Architecture of Truth François Cali,Lucien Hervé.1957 Publisher's description: Le Thoronet Abbey, one of the wonders of twelfth-century Cistercian architecture and still revered by architects today, nestles in a wooded valley in Provence, south of France. This book is a pictorial appreciation of the abbey, photographed by Lucien Herve in the mid-1950s and introduced by Le Corbusier. 'The pictures in this book are witnesses to the truth', is how he describes Herve's photographs of the Romanesque abbey. Herve's exquisite study presents the building throughout the course of a day, depicting the changing play of light and shadow on its stone vaulted exterior and interior. Highly textured and almost abstract in quality, his photographs reveal how the abbey is defined as much by light as by the conventions of Romanesque architecture, as well as conveying the intense spirituality of the Cistercian monastic order. Arranged according to the canonical hours of prayer, Herve's photographs are complemented by quotations from the psalms and the saints. An essay by Father Samuel of the Abbey of Notre-Dame de Sept-Fons provides an insight into the Cistercian monastic order, while architect John Pawson contributes a personal appreciation of this fine example of Cistercian architecture.

Architecture of Solitude: Cistercian Abbeys in Twelfth-century England Peter Fergusson.1984 From their arrival in England in 1128 to the end of the twelfth century, the Cistercians established fifty monasteries, including some of the largest and most famous abbeys in the country. The author traces the evolution of Cistercian architecture in England during the this period and explains it as a manifestation both of the order's spiritual aims and of the manifestation of Gothic architecture in France. He shows how the founding houses in France influenced Cistercian architecture in England and how the order's spiritual commitments to poverty and solitude isolated its building from English architectural tradition.--Publisher description
Revival After the Great War Luc Verpoest,Leen Engelen,Rajesh Heynickx,Jan Schmidt,Pieter Uyttenhove,Pieter Verstraete.2020-12-08 The challenges of post-war recovery from social and political reform to architectural design In the months and years immediately following the First World War, the many (European) countries that had formed its battleground were confronted with daunting challenges. These challenges varied according to the countries' earlier role and degree of involvement in the war but were without exception enormous. The contributors to this book analyse how this was not only a matter of rebuilding ravaged cities and destroyed infrastructure, but also of repairing people's damaged bodies and upended daily lives, and rethinking and reforming societal, economic and political structures. These processes took place against the backdrop of mass mourning and remembrance, political violence and economic crisis. At the same time, the post-war tabula rasa offered many opportunities for innovation in various areas of society, from social and political reform to architectural design. The wide scope of post-war recovery and revival is reflected in the different sections of this book: rebuild, remember, repair, and reform. It offers insights into post-war revival in Western European countries such as Belgium, France, the United Kingdom, Germany, Portugal, Spain, and Italy, as well as into how their efforts were perceived outside of Europe, for instance in Argentina and the United States.

The Spirit of Simplicity Jean-Baptiste Chautard.2017-11-10 Few people have ever seen or heard of *The Spirit of Simplicity*: it has been hidden for almost seventy years after quietly being published by the Abbey of Gethsemani in 1948. Anonymously translated and annotated by a young monk named Thomas Merton, the book's author—who also is not mentioned by name in the original edition—is Jean-Baptiste Chautard, the famous French Cistercian whose only other book, *The Soul of the Apostolate*, has been a favorite of modern saints and popes, including Pope Emeritus Benedict XVI. Every generation struggles with the question of simplicity. In the history of our faith, there have been no more eloquent voices calling us back to simplicity than the monks of the Cistercian Order, from Bernard of Clairvaux to Chautard to Merton—all of whom contribute to this powerful book.

Merton surrounds Chautard's text with his own remarks on simplicity, translations of classic texts by St. Bernard of Clairvaux, and commentary that allows readers to pursue the themes of simplicity in their own lives. Only a very inadequate idea of exterior simplicity can be arrived at if we do not trace it back to its true source: interior simplicity. Without this, our resolution to practice exterior simplicity would be without light, without love ... , Chautard wrote at the beginning of the book. He is writing to his fellow Cistercians, but he might as well be speaking to twenty-first century Christians. He goes on to lay out the best disciplines that a monk—or anyone—might practice to find the elusive simplicity, with quotations from St. Benedict, St. Bernard, and other pillars of monastic life and spirituality. A dozen photographs of Cistercian architecture illustrate how principles of simplicity are incorporated into Cistercian daily life. In Part 2, Merton opens up the teachings of St. Bernard, a great mystic and doctor of the Church, offering excerpts from St. Bernard's writings on the original simplicity in the Garden of Eden, the difficulty of intellectual simplicity, the simplicity of the will (obedience), and other kindred topics. Merton also offers personal reflections from the perspective of one who had recently exchanged an active life in pursuit of worldly things for the solitude of a monk.

The Cistercians Stephen Tobin.1996 Throughout Europe, some of the most arresting sites are Cistercian monasteries, where even the most jaded travelers are bewitched by their breathtaking beauty and simplicity. This stunningly photographed architectural study is the most complete visual record available. The feeling of serenity this architecture evokes pervades every cloister, refectory and chapter house with an almost magical sense of harmony. Stephen Tobin gives a detailed and insightful account of the founding and development of the Cistercian Order, which swept across Europe in the twelfth century. His discussion of architectural practice and the precepts of design behind these enduring monasteries is invaluable; maps covering all of Europe, instructive tables and over too magnificent photographs detail all the male abbeys founded during the Middle Ages, highlighting their style and accessibility. An appendix provides useful information on those converted into hotels, guest houses or restaurants.--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. All Rights Reserved

Cistercian Architecture and Medieval Society Maximilian Sternberg.2013-08-15 In Cistercian Architecture and Medieval Society Max Sternberg offers an account of the social functions of the built environment in medieval monasticism, focusing in particular on the white order of the Languedoc in the 13th century.

Cistercian Europe Terryl Nancy Kinder.2002 There is a renaissance of interest in Cistercian architecture. The simplicity, harmonious proportions, and excellent construction of these abbeys -- many still situated in the wooded intimacy of Europe's rural valleys -- today attract thousands of visitors who come to experience the buildings and to learn more about the medieval men and women who lived there. Cistercian Europe: Architecture of Contemplation offers a lavishly illustrated journey through Europe's magnificent Cistercian abbeys. A leading expert in medieval architecture, Terryl Kinder brings these famous monasteries to life, showing not only where monks lived, worked, and prayed but also how the exquisite architecture of these buildings reflects the spiritual transformation to which their residents aspired.

Architecture of Silence Terryl Kinder.2000-10-01 THE EARLY CISTERCIAN ABBEYS of France have long been revered for their exquisitely proportioned spaces and ethereal acoustics. Together with the great cathedrals, these remarkable medieval buildings embody the profound mastery of architecture that blossomed in twelfth- and thirteenth-century Europe. Built by the Cistercian order of monks nearly 900 years ago, these structures are renowned among contemporary architects and artists for the austere, almost minimal nature of their design and construction. Cistercian architecture draws together the fundamentals of masonry and geometry to create a harmony of stone and light, of uncluttered interior volumes and modest external masses. The buildings and ruins that remain today are immensely, almost unspeakably refined. Upon entering le Thoronet or Senanque, Fontenay or Silvacane, one is deeply touched by the quality of the silence and the light. Free by design of distracting details, these are places of recollection, of concentration, of serenity. Every force evolves a form, wrote the American Shakers, who mirrored the original Cistercian impulse in both their values and their refined craftsmanship. If the first force that shaped Cistercian architecture was a quest for the spiritual life through simplicity, the second was the constructive genius of architects and masons who perceived in that simplicity an occasion to practice their art with astonishing intelligence and sensitivity. David Heald's luminous photographs provide an extraordinary record of exploration through more than a decade of periodic visits to Cistercian places throughout France. He puts before us not just views but moments -- moments when light enters a space or falls on an exterior in ways that illuminate and reveal. His evocative photographs offer loving witness to the bare brilliance, power, and subtlety of early Cistercian architecture. The text by Terryl N. Kinder offers a concise introduction to the history and milieu of the early Cistercians and the forces that brought forth the architecture. Her discussion of the Rule of Saint Benedict and its meaning for the Cistercians, both ancient and contemporary, provides a foundation for understanding these buildings that is informed by the most recent scholarship and archeological research.

Life Inside the Cloister Thomas Coomans.2018-05-17 Sacred architecture as reality and metaphor in secularised Western society Christian monasteries and convents, built throughout Europe for the best part of 1,500 years, are now at a crossroads. This study attempts to understand the sacred architecture of monasteries as a process of the tangible and symbolic organisation of space and time for religious communities. Despite the weight of seemingly immutable monastic tradition, architecture has contributed to developing specific religious identities and played a fundamental part in the reformation of different forms of religious life according to the changing needs of society. The cloister is the focal point of this book because it is both architecture, a physically built reality, and a metaphor for the religious life that takes place within it. Life Inside the Cloister also addresses the afterlife and heritagisation of monastic architecture in secularised Western society.

Sacred Concrete Flora Samuel,Inge Linder-Gaillard.2013 Le Corbusier not only designed and built churches; he was also intensely interested in religion and faith. His work deeply influenced church architecture in the twentieth century. This book examines Le Corbusier's relationship with religion in two introductory chapters, presents his four designs for La Sainte-Baume, the Chapel of Notre Dame du Haut de Ronchamp, the Cloister of La Tourette, and the Church of St. Pierre, and, in the final chapter, examines his influence on church architecture in Europe in the twentieth century. Examples include the Jubilee Church near Rome by Richard Meier, the Chapel of Saint Ignatius in Seattle by Steven Holl, the Santa Maria Church in Porto by Ivaro Siza, Tadao Ando's Meditation Space in Paris, as well as the Kapelle der Vershnung (Church of Reconciliation) in Berlin by Reitermann & Sassenroth. Flora Samuel holds a PhD in architecture and teaches design and architecture history at the University of Bath, UK, and is the author of numerous publications. Inge Linder-Gaillard also holds a PhD in architecture and has researched and written about Le Corbusier's work in numerous essays.

[Monastic Spaces and Their Meanings](#) Megan Cassidy-Welch.2001 Medieval Cistercians distinguished between material and imagined space, while the landscapes in which they lived were perceived as both physical sites and abstract topographies. Ostensibly, Cistercians lived in intensely regulated and confined physical circumstances in accordance with ideals of enclosure articulated in the Regula S. Benedicti. However, Cistercian representations of space also express ideas of transcendence and freedom. This monograph focuses on the abbeys of northern England during the period 1132-1400 (Fountains, Rievaulx, Jervaulx, Meaux, Sawley, Roche, Byland and Kirkstall) to facilitate a microhistory of cultural, textual, personnel and architectural comparisons. Post-twelfth century Cistercian history has been understudied, in comparison with research into the

euphoria of the order's foundation, and has tended to focus on 'ideals' versus 'reality', whereas this study considers Cistercian houses in terms of contingency, singularity and specificity. The author engages with the work of theorists such as Michel Foucault, Pierre Bourdieu and Henri Lefebvre, all of whom have explored the cultural production of space and the meanings attributed to certain spaces by abstract reference, performative practice and institutional direction. The study is richly illustrated with 45 images of the landscape and space of these houses and enables the reader to see how one monastic order positioned itself in relation to geography, architecture, institution, community and cosmos, and dealt with the dialectic between regulation and imagination, freedom and enclosure. Patrick Geary (UCLA) commends this study as being 'based on a wide reading of Cistercian texts and blends solid text-critical historical scholarship with more conceptual approaches in a most convincing way'.
