**Advances in Multimedia Information Processing — PCM 2001** Heung-Yeung Shum, Hong-Yuan Mark Liao, Shih-Fu Chang. 2003-06-30 Welcome to the second IEEE Pacific Rim Conference on Multimedia (IEEE PCM 2001) held in Zhongguanchun, Beijing, China, October 22-24, 2001. Building upon the success of the inaugural IEEE PCM 2000 in Sydney in December 2000, the second PCM again brought together the researchers, developers, practitioners, and educators of multimedia in the Pacific area. Theoretical breakthroughs and practical systems were presented at this conference, thanks to the sponsorship by the IEEE Circuit and Systems Society, IEEE Signal Processing Society, China Computer Foundation, China Society of Image and Graphics, National Natural Science Foundation of China, Tsinghua University, and Microsoft Research, China. IEEE PCM 2001 featured a comprehensive program including keynote talks, regular paper presentations, posters, demos, and special sessions. We received 244 papers and accepted only 104 of them as regular papers, and 53 as poster papers. Our special session chairs, Shin'ichi Satoh and Mohan Kankanhalli, organized 6 special sessions. We acknowledge the great contribution from our program committee members and paper reviewers who spent many hours reviewing submitted papers and providing valuable comments for the authors. The conference would not have been successful without the help of so many people. We greatly appreciated the support of our honorary chairs: Prof. Sun Yuan Kung of Princeton University, Dr. Ya Qin Zhang of Microsoft Research China, and Prof. The Psychologist .2000

This book addresses current challenges and changes in science and technology libraries—and shows how librarians are handling them in difficult financial times. It examines issues related to closing and merging libraries, online collections maintenance and costs, assistance/outreach geared toward specific groups of library patrons, and the gathering of usage statistics in the electronic environment. You'll also find specific descriptions—and a general overview—of new technologies and case studies of the impact of new technologies on sci-tech library management. Handy tables and figures make the information easy to access and understand. Presenting a wide variety of problems and solutions, *Information Practice in Science and Technology* will help you understand the needs of users regarding current information technologies and how to meet them. From the editor: “Among the critical challenges facing sci-tech libraries (and actually all libraries) are the need to perform detailed collection assessment and evaluation, particularly in regard to e-resource collections; the need to examine and provide appropriate public services; and the need to develop strategies for the adoption of new information technologies. This book addresses these key issues and attempts to provide both perspective and insight into these problems.” *Information Practice in Science and Technology* examines: how merging academic departmental libraries can both improve services and

**Public Employment Services and European Law** Mark Freedland FBA,Paul Craig QC FBA,Catherine Jacqueson,Nicola Kountouris.2007-09-27 How can the EU's community of welfare states adapt their public policies to economic globalization? What happens when the economic and social aims of the EU come into conflict? This book examines the developing legal regimes and regulation of public services in the UK and other European countries. Public services are examined through a case-study of the complex area of public employment services. These are job-placement and vocational training services which aim to maximize employment and minimize unemployment within EU member States' Active Labour Market policies. Employment services are at the centre of a complex web of rules in both hard and soft forms of law deriving from the EU, national public law and from private, and at times contractual, agreements. They also lie at the crossroads of a series of

trends in regulation, and priorities have been inspired by an array of conflicting policy rationales. These policy rationales include the establishment of an open and competitive European internal market, the establishment of an efficient welfare state, the scaling down of state administrative machinery, the fulfilment of core public service responsibilities, and the creation of public-private partnerships. Public employment services provide a highly informative and novel case study of the interaction and conflict between the economic and social aims of the EU and between regulation at national and supranational levels, and the changing forms which this regulation has taken.

Ubiquitous Intelligence and Computing Frode Eika Sandnes, Yan Zhang, Chunming Rong, Laurence Tianruo Yang. 2008-06-20 This volume contains the proceedings of UIC 2008, the 5th International Conference on Ubiquitous Intelligence and Computing: Building Smart Worlds in Real and Cyber Spaces. The conference was held in Oslo, Norway, during June 23–25, 2008. The event was the 5th meeting of this conference series. USW 2005 (First International Workshop on Ubiquitous Smart World), held in March 2005 in Taiwan, was the 1st event in the series. This event was followed by UISW 2005 (Second International Symposium on Ubiquitous Intelligence and Smart Worlds) held in December 2005 in Japan, by UIC 2006 (Third International Conference on Ubiquitous Intelligence and Computing: Building Smart Worlds in Real and Cyber Spaces) held in September 2006 in Wuhan and Three Gorges, China, and by UIC 2007 held in July 2007 in Hong Kong. Ubiquitous computers, networks and information are paving the road to a smart world in which computational intelligence is distributed throughout the physical environment to provide trustworthy and relevant services to people.

*Quality of Future Internet Services* Mikhail I. Smirnov, Jon Crowcroft, James Roberts, Fernando Boavida. 2003-06-30 The 2001 International Workshop on Quality of future Internet Services (QofIS 2001) held in Coimbra, Portugal, organized by COST Action 263, is the second of what we expect will become a series of successful QofIS workshops. The previous workshop was held in Berlin in the year 2000. The areas of interest of QofIS cover the design, implementation and provision of Quality of Service, spanning key issues of current and emerging communication systems such as packet-level issues, flow-level issues, network-level issues, architectural issues, and applications. The emphasis of the QofIS2001 workshop is on horizontal (end-to-end) as well as vertical (top-down) provision of quality of services, covering all components of end systems and networks, with the aim of identifying solutions enabling feasible and coherent QoS provision. The QofIS2001 call for papers attracted 87 submissions from 23 Asian, Australian, European, North American, and South American countries. These were subject to thorough review work by the Programme Committee members and additional reviewers who carried out their work using a specially built conference system, WebChairing, developed in Coimbra by Flor de Utopia, that allowed full control of the submission and reviewing processes. Based on the comments and recommendations of the reviews, the final programme was defined in a Programme Committee meeting held at the University of Karlsruhe on June 5, 2001.

**The A to Z of Australian Radio and Television** Albert Moran, Chris Keating. 2009-08-04  
Australians have become increasingly visible outside of the country as speakers and actors in radio and television, their media moguls have frequently bought up foreign companies, and people around the world have been able to enjoy such Australian productions as *The Flying Doctors*, *Neighbours*, and *Kath and Kim*. The origins, early development, and later adaptations of radio and television

show how Australia has gone from being a minor and rather parochial player to being a significant part of the international scene. The A to Z of Australian Radio and Television provides essential facts and information concerning the Australian radio and television industry. This is accomplished through the use of a chronology, an introductory essay, a bibliography, and hundreds of cross-referenced dictionary entries on directors, producers, writers, actors, television and radio series, and television and radio stations.

*Software Radio* Enrico Del Re. 2012-12-06 Next-generation mobile communications are likely to employ different techniques and standards. The implementation in software of as many receiver functionalities as possible appears to be the most effective solution for coping with the multiplicity of communications alternatives. The concept of software radio, dating back to 1991, originally attracted commercial interest owing to the possibility that transmission layer functions could be fully software-defined. The same approach can be extended to protocols of the higher layers too, thus conceiving a programmable hardware to implement the functionalities of several layers of protocols by resident software or software downloaded from the network. Consisting of selected technical contributions to the Workshop on Software Radio, this volume deals with state-of-the-art surveys of the enabling technologies and the prospective services of software radio implementations for future mobile communications. Original and state-of-the-art research and development is presented in fields such as: - Software radio for universal wireless internet access - Software radio for multimedia

communications - Software radio architecture - Network architecture, protocols and services - Software radio technology towards pervasive appliance. This volume on software radio is a valuable reference for both researchers and telecommunications professionals.

**Legal Pluralism in Indonesia** Ratno Lukito. 2013 With the revival of Islamic law and adat (customary) law in the country, this book investigates the history and phenomenon of legal pluralism in Indonesia. It looks at how the ideal of modernity in Indonesia has been characterized by a state-driven effort in the post-colonial era to make the institution of law an inseparable part of national development. Focusing on the aspects of political and 'conflictual' domains of legal pluralism in Indonesia, the book discusses the understanding of the state's attitude and behaviour towards the three largest legal traditions currently operative in the society: adat law, Islamic law and civil law. The first aspect is addressed by looking at how the state specifically deals with Islamic law and adat

law, while the second is analysed in terms of actual cases of private interpersonal law, such as interfaith marriage, interfaith inheritance and gendered inheritance. The book goes on to look at how socio-political factors have influenced the relations between state and non-state laws, and how the state's strategy of accommodation of legal pluralism has in fact largely depended on the extent to which those legal traditions have been able to conform to national ideology. It is a useful contribution for students and scholars of Asian Studies and Law.

Eurasian security governance has received increasing attention since 1989. The North Atlantic Treaty Organisation, the institution that best served the security interests of the West in its competition with the Soviet Union, is now relatively ill-equipped resolve the threats emanating from

Eurasia to the Atlantic system of security governance. This book investigates the important role played by identity politics in the shaping of the Eurasian security environment. It investigates both the state in post-Soviet Eurasia as the primary site of institutionalisation and the state's concerted international action in the sphere of security. This investigation requires a major caveat: state-centric approaches to security impose analytical costs by obscuring substate and transnational actors and processes. The terrorist attacks on the World Trade Center and the Pentagon marked the maturation of what had been described as the 'new terrorism'. Jervis has argued that the western system of security governance produced a security community that was contingent upon five necessary and sufficient conditions. The United States has made an effort to integrate China, Russia into the Atlantic security system via the Partnership for Peace (PfP) programme and the Euro-Atlantic Partnership Council. The Black Sea Economic Cooperation has become engaged in disseminating security concerns in fields such as environment, energy and economy. If the end of the Cold War left America triumphant, Russia's new geopolitical hand seemed a terrible demotion. Successfully rebalancing the West and building a collaborative system with Russia, China, Europe and America probably requires more wisdom and skill from the world's leaders.

You can go to its “Books” section and select the “Free” option to access free books from the huge collection that features hundreds of classics, contemporary bestsellers and much more. There are tons of genres and formats (ePUB, PDF, etc.) to choose from accompanied with reader reviews and ratings. It’s easy to search Wikibooks by topic, and there are separate sections for recipes and childrens’ textbooks. You can download any page as a PDF using a link provided in the left-hand menu, but unfortunately there’s no support for other formats. There’s also Collection Creator – a handy tool that lets you collate several pages, organize them, and export them together (again, in PDF format). It’s a nice feature that enables

you to customize your reading material, but it’s a bit of a hassle, and is really designed for readers who want printouts. The easiest way to read Wikibooks is simply to open them in your web browser.
