Consuming Passions Philippa Pullar.1970 In this age of  
convenience food, one may look back on the past with envy. The  
luxury of the Romans, for whom eating and sex (often conducted  
simultaneously) allayed life's boredom; the sumptuous variety of  
the Middle Ages; the glittering dining tables of wealthy Victorians  
and Edwardians: was their cuisine really better, or simply more  
self-indulgent? In *Consuming Passions*, Philippa Pullar gives us an  
absorbing and often hilarious history of English appetite. From  
Roman orgies to Puritanism, from the great class divide of the  
19th century to the egalitarian seventies, she explores English  
eating habits in all their diversity, demonstrating the surprising  
parallels between food, religion, and sex. Originally published in

1970, *Consuming Passions* now features a new afterword by acclaimed food writer Paul Levy, bringing the story right up the 21st century.

*Mapping the Deep: The Extraordinary Story of Ocean Science*

Robert Kunzig. 2000-10-17 A vivid, up-to-date tour of the Earth's last frontier, a remote and mysterious realm that nonetheless lies close to the heart of even the most land-locked reader. The sea covers seven-tenths of the Earth, but we have mapped only a small percentage of it. The sea contains millions of species of animals and plants, but we have identified only a few thousand of them. The sea controls our planet's climate, but we do not really understand how. The sea is still the frontier, and yet it seems so familiar that we sometimes forget how little we know about it.

Just as we are poised on the verge of exploiting the sea on an unprecedented scale—mining it, fertilizing it, fishing it out—this book reminds us of how much we have yet to learn. More than that, it chronicles the knowledge explosion that has transformed our view of the sea in just the past few decades, and made it a far more interesting and accessible place. From the Big Bang to that far-off future time, two billion years from now, when our planet will be a waterless rock; from the lush crowds of life at seafloor hot springs to the invisible, jewel-like plants that float at the sea surface; from the restless shifting of the tectonic plates to the majestic sweep of the ocean currents, Kunzig's clear and lyrical prose transports us to the ends of the Earth. Originally published in hardcover as *The Restless Sea*. Robert Kunzig is a creator of what oceanographer Harry Hess once referred to as 'geopoetry.' He covers vast tracts of time and space and makes his subjects electrifying.—Richard Ellis, *The Times* [London] *The Restless Sea* immediately surfaces at the top of the list of journalistic treatments of oceanography. . . . The book opened my eyes to numerous wonders.—Richard Strickland, *American Scientist* When you head for the coast this summer, leave that trashy beach novel at home. Instead, pack Robert Kunzig's book. Because just

beyond your rental cottage lies the restless sea, where three-mile-tall mountain ranges criss-cross the ocean floor, and deep trenches harbor mysterious creatures. . . . The book is easy to read, and will bring you up to date on the startling discoveries oceanographers have made during the past few decades.—Phillip Manning, *The News and Observer* [Raleigh, North Carolina] ] Anyone who loves the sea should read this book.—Sebastian Junger

**Hatchepsut** Joyce Tyldesley.1998-01-29 Queen - or, as she would prefer to be remembered King - Hatchepsut was an astonishing woman. Brilliantly defying tradition she became the female embodiment of a male role, dressing in men's clothes and even wearing a false beard. Forgotten until Egptologists deciphered hieroglyphics in the 1820's, she has since been subject to intense speculation about her actions and motivations. Combining archaeological and historical evidence from a wide range of sources, Joyce Tyldesley's dazzling piece of detection strips away the myths and misconceptions and finally restores the female pharaoh to her rightful place.

Raleigh Tony Hadland. 2011 The aim of this book is simple yet ambitious: to produce, in a single volume, a detailed and complete history of the Raleigh cycle company of Nottingham, from its founding to the present. It covers not only bicycles but also motorcycles, cars, vans, munitions, motorcycle engines, and bicycle and motorcycle gears. The story of Raleigh is fascinating in many different respects - the people, the products, the production methods, and more. The personalities involved were many and various, ranging from the founder's ambition to make the best bicycles money could buy to anonymous suits almost running the company into the ground from fancy offices in New York. But Raleigh also deeply touched the lives of tens of thousands of other people who depended on it, directly or indirectly, particularly in and around the city of Nottingham.

These encompass the first half of the twentieth century, a period in which, thanks to the ever cheaper medium of photography, 'ordinary' people could afford to own their portraits. Bicycles documents the great age of the safety bicycle which was the instrument of emancipation for women and freedom for men. Also

we see competitive racers and pedalling toddlers. Each book contains 200 images chosen with the eye of a leading artist from a visually rich vein of social history.
