Media Law in Ireland Marie McGonagle, Sharon McLaughlin, Tarlach McGonagle.2018-04-19 Derived from the renowned multi-volume International Encyclopaedia of Laws, this analysis of media law in Ireland surveys the massively altered and enlarged legal landscape traditionally encompassed in laws pertaining to freedom of expression and regulation of communications. Everywhere, a shift from mass media to mass self-communication has put enormous pressure on traditional law models. An introduction describing the main actors and salient aspects of media markets is followed by in-depth analyses of print media, radio and television broadcasting, the Internet, commercial communications, political advertising, concentration in media markets, and media regulation. Among the topics that arise for discussion are privacy, cultural policy, protection of minors, competition policy, access to digital gateways, protection of journalists' sources, standardization and interoperability, and liability of intermediaries. Relevant case law is considered throughout, as are various ethical codes. A clear, comprehensive overview of media legislation, case law, and doctrine, presented from the practitioner's point of view, this book is a valuable time-saving resource for all concerned with media and communication freedom. Lawyers representing parties with interests in Ireland will welcome this very useful guide, and academics and researchers will appreciate its value in the study of comparative media law.

Creating Powerful Radio Valerie Geller.1996 A handbook of sound byte advice on making talk radio a success written by Rush Limbaugh's consultant--a dubious distinction depending on one's point of view. As Geller points out in her preface, this is her STUFF, and she regales the reader with often repetitive and unoriginal advice on how to handle the talent, avoid burnout, interviews, news programming, and promotion. The scanty text is beefed up with vignettes on popular radio personalities from the reputable Mervin Block (former CBS news writer) to the more disreputable Danny Bonaduce (of Partridge Family fame). Not surprisingly, lacks a bibliography although there's a recommended reading list which includes Men are from Mars, Women are from Venus for effective communication strategies. Introduction to Journalism and Mass Communication Finlay Webb.2018-11-20 Mass communication is an inter-disciplined domain. It can't understand as stand alone subject, because it deals with society and culture at one hand and technology at the other. Thus this book was needed that could give a comprehensive explanation of terms, concepts, theories and principles at one place. In recent times mass media has grown as a widespread industry which is working all over the world. Here in this book it is the sincere effort of the author to put the matter and facts, myths and realities all in a lucid manner. This book is designed keeping in view the average reader and beginners as well. This book will quench the thirst of knowledge in this field and it is the sincere hope of the author. If it proves to be of little value to the readers, all efforts and hardships of the author will amply be awarded. This book is created for the needs of students relating to the area of journalism and mass communication. As social contexts and milieus undergo changes and get increasingly complex, journalism too undergoes transformations, and gets ever more crucial to the running of a society. In such a scenario, it becomes imperative that one considers the import journalism carries, and how the issues and problems in it are central to how we perceive the world.

Broadcasting Pluralism and Diversity Lesley Hitchens. 2006-10-31 Broadcasting Pluralism and Diversity is a study of the policy and regulatory measures relating to the promotion of media diversity in three jurisdictions: the United Kingdom, the United States, and Australia. A central focus of the book is regulation of media ownership and control, and, taking an historical approach, the book argues that early policy and regulatory decisions continue to have a significant influence on current reforms. Whilst policy and reform debates focus on ownership and control measures, the book also argues that such measures can not be considered in isolation from other regulatory instruments, and that a holistic regulatory approach is required. As such, content regulation and competition regulation are also considered. Underlying the study is the contention that much of the policy informing pluralism and diversity regulation, although making reference to the importance of the media's role in the democratic process, has also been skewed by a futile focus on the different regulatory treatment of the press and broadcasting, which is adversely influencing current policy debates. The book argues that a different approach, using the public sphere concept, needs to be adopted and used as a measure against which regulatory reform in the changing media environment can be assessed.

The Radio Handbook Pete Wilby, Andy Conroy. 1994 This is a comprehensive guide to the theory, history and practice of radio broadcasting. The authors consider the rationale behind radio production; the organization of the radio station and the scope of its technology; and the ways in which the radio text connects with the cultural experience of its listeners. The handbook offers in-depth practical advice on many aspects: on learning about radio; style; the layout of a radio station; the tools of broadcasting; the importance of the voice in broadcasting; production techniques; and finally the programme itself, including outside broadcasts and coverage of elections and sport.

Programme Making for Radio Jim Beaman. 2006-09-27 Programme Making for Radio offers trainee radio broadcasters and their instructors focused practical guidelines to the professional techniques applied to the making of radio shows, explaining how specific radio programmes are made and the conventions and techniques required to produce them. This book describes how and why these methods are applied through the use of a behind-the-scenes glimpse at working practices and procedures used in the industry. It considers the constraints and incentives that limit or stimulate creativity and innovation within programme production. Programme Making for Radio examines the individual roles and responsibilities of the whole production team and the importance of team-working skills. Chapters focus on the specific requirements of specialist programmes and offer advice from a range of programme makers working in local and national broadcasting. There is a case study example that follows the progress of a feature programme from pitching the original

idea, through assembling material to final transmission. Programme Making for Radio includes: a clear description of the role of each member of the programme making team, their duties and responsibilities practical tips on interviewing, mixing and presenting explanations of the key elements that make up a radio programme such as clips, wraps, packages, features and interviews with a full glossary of technical terms. This book is informative, accessible and comprehensive, covering the whole range of skills needed by the radio professional in the studio and on location.
