God's Little Soldier Kiran Nagarkar. 2014-09-15 God's Little Soldier From the backstreets of Bombay to the hallowed halls of Cambridge, from the mountains of Afghanistan to a monastery in California, the story of Zia Khan is an extraordinary rollercoaster; a compelling cliffhanger of a spiritual quest, about a good man gone bad and the brutalization of his soul. Growing up in a well-to-do, cultured Muslim family in Bombay, Zia, a gifted young mathematician, is torn between the unquestioning certainties of his aunt's faith and the tolerant, easy-going views of his parents. At Cambridge University, his beliefs crystallize into a fervent orthodoxy, which ultimately leads him to a terrorist training camp in Afghanistan. The burden of endemic violence and killings, however, takes its toll on Zia. Tormented by his need for forgiveness, he is then drawn reluctantly to Christ. But peace continues to elude him, and Zia is once again driven to seek out causes to defend and fight for, whatever be the sacrifices involved. Posed against Zia is his brother, Amanat, a writer whose life is severely constrained by sickness, even as his mind is liberated by doubt. There is a relationship that is as much a blood bond as it is an opaque wall of incomprehension. Weaving together the narratives of the extremist and the liberal,

God's Little Soldier underscores the incoherent ambiguities of good and evil, and the tragic conflicts that have riven people and nations.

Storm Still Peter Handke. 2014 Peter Handke, a giant of Austrian literature, has produced decades of fiction, poetry, and drama informed by some of the most tumultuous events in modern history. But even as these events shaped his work, the presence of his mother--a woman whose life spanned the Weimar Republic, both world wars, and the postwar consumer economy--loomed even larger. In *Storm Still*, Handke's most recent work, he returns to the land of his birth, the Austrian province of Carinthia. There on the Jaunfeld, the plain at the center of Austria's Slovenian settlement, the dead and the living of a family meet and talk. Composed as a series of monologues, *Storm Still* chronicles both the battle of the Slovene minority against Nazism and their love of the land. Presenting a panorama that extends back to the author's bitter roots in the region, *Storm Still* blends penetrating prose and poetic drama to explore Handke's personal history, taking up themes from his earlier books and revisiting some of their characters. In this book, the times of conflict and peace, war and prewar, and even the seasons themselves shift and overlap. And the fate of an orchard comes to stand for the fate of a people. Numerous pleasures await the reader who delves into the fabric of Peter Handke's prose. . . A subtle writer of unostentatious delicacy, Handke excels at fiction that, as it grows, coils around itself like wisteria. . . This is where the French New Novel might have gone if pushed.--Paul West, Washington Post Book World

Language Engineering and Translation Juan C. Sager. 1994-04-22 At a time when information technology has become a regular tool of specialised translators in all aspects of their work, it is useful to place the activity of technical translation into its appropriate environment and to describe it from the point of view of its role in the broader context of communication in which it occurs. The advent of automated alternatives to human translation has fundamentally affected the profession, its products and the relationship between translators and their clients. This book presents and discusses the process of translation against this background. The context in which translation is normally studied is widened in order to re-examine the process of translation as part of interlingual text production and to analyse the manner in which the new tools affect the product of translation. This book is of particular relevance in modern translator training courses. Contents 1. The language industry and translation, 2. Aspects of language, 3. Elements of communication theory, 4. A theory of text types and messages, 5. The nature of translation, 6. Specifications: Factors influencing the translation, 7. Preparation for translation, 8. Steps in translation, 9. Human and Machine Translation, 10 Pragmatic circumstances of automation, 11. Translation in an information technology environment. Bibliography + Index.

Graph Directed Markov Systems R. Daniel Mauldin, Mariusz Urbanski. 2003-08-07 The main focus of this book is the exploration of the geometric and dynamic properties of a far reaching generalization of a conformal iterated function system - a Graph Directed Markov System. These systems are very robust in that they apply to many settings that do not fit into the scheme of conformal iterated systems. The basic theory is laid out here and the authors have touched on many natural questions arising in its context. However, they also emphasise the many issues and current research topics which can be found in original papers. For example the detailed analysis of the structure of harmonic measures of limit sets, the examination of the doubling property of conformal measures, the extensive study of generalized polynomial like mapping or multifractal analysis of geometrically finite Kleinian groups. This book leads readers onto frontier research in the field, making it ideal for both established researchers and graduate students.

Teaching Translation and Interpreting 2 Cay Dollerup, Annette Lindegaard. 1994-07-01 Selected papers from this second conference on Translator and Interpreter Training. With contributions from five continents, the articles deal with global challenges, taking into account the role of the translator in societies knit together by one tongue and those in which languages are the repositories of national cultures, such as India. The main merit of this volume is that it shows how translator training is tackled in the main translator training courses around the world, what requirements are made on the students and what solutions are given. The various approaches provide a wealth of translator training ideas. Complementing the first volume of papers from the Language International conference, this second volume deals with a wide variety of aspects in this interdisciplinary field of study: dubbing, subtitling, simultaneous/consecutive interpreting, court interpreter training, linguistic features, cognitive aspects, cultural aspects, terminology and specialisation, computeraided translation in practice, translation procedures at the European Commission, etc.
