**Traditional Bowyer's Handbook** Clay C. Hayes. 2017-11-11 I can't really explain my attraction to the bow and arrow. I can't explain the pull of a camp fire either, or the ocean, or the open hills where you can see forever. It's just there. These things are in all of us I think, some vestige of our primitive past buried so deep in our genome as to be inseparable from what it is to be human. What we think of as civilization is a new experiment in the eyes of Father Time. Experts say that humans have been around for some fifty thousand years. We've been carrying the bow for maybe five

thousand (atlatls and spears before that), and pushing the plow for maybe two thousand. We have been hunters forever. We are built to run, to pursue big game on the open savannas, to kill and eat them. With the dwindling of the Pleistocene mega fauna, mammoths and such, the bow became more important and indeed helped to make us who we are today. It still holds that attraction, same as the hearth. When I was a kid I would make crude bows from green plum branches, big at one end and small at the other. A discarded hay string would serve as a bowstring. My arrows were fat and unfletched and would scarcely fly more than a few yards, usually tumbling over in midair. The small creatures around our home were plenty safe. When I was about 12 or so my brother brought me two old Ben Person recurves he'd found at a yard sale. One was a short bow, probably no more than 48 inches and the other was more of a standard size. They both drew about 50 lbs if I recall. That fall happened to be a good year for cottontails around our little farm and I spent countless hours walking the fields and shooting at them as they busted from underfoot. Although I'd get several shots a day I never did hit one on the fly but I remember that fall fondly nonetheless. The pleasure of jumping rabbits and seeing the feathered shaft streaking toward them was a thrill I've never forgotten. I made my first real bow when I was in high school, after getting a copy of the Traditional Bowyers Bible in the mail (more on this in a moment). My first bow, a decrowned mulberry flatbow, broke within about 10 shots. The second held together quite well and is probably still around somewhere and capable of shooting an arrow, though it would probably draw about 70lbs. When I first started making bows I used the woods I had close at hand; mulberry, common persimmon, red maple, white cedar, etc. I'd probably made more than a dozen bows of various woods before I ever saw a piece of Osage. People often ask me where they can find a bow stave and, invariably, I tell them to use what they have close by. No matter where you live, you'll have something near that will make a bow. Go

cut it down and get started. This book is an attempt to share some of what I've learned over my years of bow making. The Traditional Bowyers Bible series, as mentioned earlier, is still a great source of information. Why write another book on making wood bows you might ask? The simple answer is that there are so many ways of doing and explaining things. There are still unanswered questions and we'll cover many of them here. We will cover all of the most frequently asked questions, and lay out a simple plan that should guide you through the entire process, from finding a stave to stringing your bow and shooting your first arrow. Some of what you'll find here, you'll find nowhere else.

*The Impossible Bow* Nicholas Tomihama.2011-09 Archery is almost as old as mankind itself, manifesting in almost every culture and on almost every continent. It is in many ways our link to the past and the stepping stone into another age. It is one of the few ancient pastimes that are still relevant today. Yet nowadays, getting into the ancient sport of archery can be daunting for the average person with no experience or previous exposure to the subject. For many, the hefty price tags on modern bows or the seemingly impossible task of building a bow can be a surefire deterrent. Many do not want to pay the price of a decent bow to try their hand at the bow and arrow, simply to see if they enjoy it or not. If only there was a way to make a bow good enough for a beginner without expending or gambling an immense amount of time or money on it. What if you were told that there

was such a bow? That hidden in the ground, in the heart of buildings, on the shelves of most hardware stores, and perhaps even in your home, there was a material that made it all possible? Would you believe it? Well it is true, and that material is PVC pipe, the white or gray plastic pipe that can be found virtually everywhere. It is possible with only a minimal investment and an hour of labor to make a fine bow for target archery that performs just as well as bows worth more than ten times as much. A bow that, if given a little more time and effort, can be made into an efficient hunting tool or serious target shooter. The Impossible Bow shows you how to construct your own PVC pipe bow, with bows ranging from the incredibly simple to the incredibly complex. Learn to build simple bows that require a minimum of tools and little time, more complex bows that can be modified to fit the target archer as well as the experienced hunter looking for more of a challenge, and finally a bow that accurately replicates the weapons of war of the steppe nomads. The best part is that even the most complex bow should cost no more than 10 dollars and be completed in a day, yet can hold up to the rigors of daily use. Don't let anything hold you back from enjoying one of man's oldest and most noble of sports. Join the backyard archery revolution with your very own bow that will defy everything you know and will baffle anyone who sees it. Join me in building an impossible bow. Author's Notes: The bows in this book are great for kids of all ages, from the young to the young at heart. Because of the ability of these bows to mimic many historical bow designs, this book is great for re-enactment archery as well as for the target archer. If made well, one design in particular works well for hunting, and can be modified to work just as well as many primitive hunting bows. This book covers how to make the generic PVC pipe bow that has been the mainstay of do-it-yourself archery for some time now, as well as a couple designs which bring out the hidden performance of PVC as a bow material. These bows also work well for survival situations and can be

made small and can be kept virtually anywhere out of the sun. In the trunk of a car, in a boat, in a hunting cabin, your basement, your attic, the list goes on and on. This book goes over how to make smooth shooting bows from 30 to 70 pounds of pull that can perform well if taken care of. While they aren't top performing bows, they can certainly be used for hunting, fishing, and target archery.

The Way of Archery Jie Tian,Justin Ma.2015-02-28 The Way of Archery provides a detailed introduction to practicing archery in the traditional Chinese military style. It explains the basics of how to shoot using the Asian thumb ring: proper posture, training regimen, equipment, and avoiding pitfalls in shooting. The thorough translation and commentary (with original and new illustrations) provide a fresh and practical perspective on Gao Ying's 1637 archery treatise (which, itself, influenced generations of archers in East Asia). The authors themselves are active practitioners of Chinese archery, having spent an endless amount of time and effort vetting their understanding of this old manual and putting its ideas into practice. Through this process, the authors have been able to make this archery text accessible to modern readers. Not only will the reader come to understand the technical side of the Way of Archery, but will connect with the philosophy and spirit of the ancient Chinese warriors.

*The Writer's Guide to Weapons* Benjamin Sobieck.2015-07-09 When it comes to writing weapons, most authors shoot from the hip--and miss. The Writer's Guide to Weapons will help you hit your target every time. Firearms and knives have starring roles in a wide range of genres--crime, thriller, war, mystery, Western, and more. Unfortunately, many depictions of weapons in novels and film are pure fiction. Knowing the difference between a shotshell and a slug, a pistol and a revolver, or a

switchblade and a butterfly knife is essential for imbuing your story with authenticity--and gaining popularity with discerning readers. Inside you'll find:

- An in-depth look at the basics of firearms and knives: how they work, why they work, what they look like, and how to depict them accurately in your stories.
- The biggest weapons myths in fiction, TV, and film.
- A surefire guide for choosing the correct weapon for your characters, no matter their skill level, strength, or background.
- A review of major gun and knife laws, weapons safety tips, and common police tactics.
- The Hit List, showcasing the most popular weapons for spies, detectives, gunslingers, gangsters, military characters, and more.
- Examples highlighting inaccurate vs. accurate weapons depictions.
- An insightful foreword by David Morrell, the award-winning creator of Rambo.

Equal parts accessible, humorous, and practical, *The Writer's Guide to Weapons* is the one resource you need to incorporate firearms and knives into your fiction like a seasoned professional.

How do I shape it? ...This book will take you from the first idea of building a bow, wood selection, pulling weight, drying and curving wood, and encompass the British Long Bow, Recurve bow, cross bow, and stick bow. In the book you will find step by step instructions on how to build your own bow, make arrows, how to select the ideal piece of wood to give you a bow you will be proud to build, display, and shoot. This guide explains how to tiller a bow, when to use a fiberglass to reinforce your bow, as well as how to

determine and adjust the pull weight. How Do I become a Sharp Shooter? Arthur Connelly has created a comprehensive book to guide you through each of the steps in archery. He will explain how to stand, orient and aim your self at the target. It is not guaranteed that you will be shooting an arrow into another arrow. However, this book will help you stand a good chance on your shooting competition or a hunting trip. In his book, author discusses the different types of bows, including the Long-Bow, Self-Bow, Compound, and the traditional Recurve Bow. The Recurve Bow is the one that most new archers string backwards due to the shape of the bow which often leads to breaking. Arthur Connelly tries to ensure that all Recurve Bows are marked appropriately, and have included a great deal of information in this book, to hopefully answer any questions you have.

*The Lincoln Highway* Amor Towles.2021-10-05 #1 NEW YORK TIMES BESTSELLER More than ONE MILLION copies sold A TODAY Show Read with Jenna Book Club Pick A New York Times Notable Book, and Chosen by Oprah Daily, Time, NPR, The Washington Post, Bill Gates and Barack Obama as a Best Book of the Year “Wise and wildly entertaining . . . permeated with light, wit, youth.” —The New York Times Book Review “A classic that we will read for years to come.” —Jenna Bush Hager, Read with Jenna book club “Fantastic. Set in 1954, Towles uses the story of two brothers to show that our personal journeys are never as linear or predictable as we might hope.” —Bill Gates “A real

joyride . . . elegantly constructed and compulsively readable.” —NPR The bestselling author of *A Gentleman in Moscow* and *Rules of Civility* and master of absorbing, sophisticated fiction returns with a stylish and propulsive novel set in 1950s America. In June, 1954, eighteen-year-old Emmett Watson is driven home to Nebraska by the warden of the juvenile work farm where he has just served fifteen months for involuntary manslaughter. His mother long gone, his father recently deceased, and the family farm foreclosed upon by the bank, Emmett's intention is to pick up his eight-year-old brother, Billy, and head to California where they can start their lives anew. But when the warden drives away, Emmett discovers that two friends from the work farm have hidden themselves in the trunk of the warden's car. Together, they have hatched an altogether different plan for Emmett's future, one that will take them all on a fateful journey in the opposite direction—to the City of New York. Spanning just ten days and told from multiple points of view, Towles's third novel will satisfy fans of his multi-layered literary styling while providing them an array of new and richly imagined settings, characters, and themes. “Once again, I was wowed by Towles’s writing—especially because *The Lincoln Highway* is so different from *A Gentleman in Moscow* in terms of setting, plot, and themes. Towles is not a one-trick pony. Like all the best storytellers, he has range. He takes inspiration from famous hero’s journeys, including *The Iliad*, *The Odyssey*, *Hamlet*, *Huckleberry Finn*, and *Of Mice and Men*. He seems to be saying that our personal journeys are never as linear or predictable as an interstate highway. But, he suggests, when something (or someone) tries to steer us off course, it is possible to take the wheel.” – Bill Gates
