Animals Emma Jane Unsworth.2015-10-06 It is the moment every twenty-something must confront: the time to grow up. Adulthood looms, with all its numbing tranquility and stifling complacency. The end of prolonged adolescence is near. Laura and Tyler are two women whose twenties have been a blur of overstayed parties, a fondness for drugs that has shifted from cautious experimentation to catholic indulgence, and hangovers that don't relent until Monday morning. They've been best friends, partners in excess, for the last ten years. But things are changing: Laura is engaged to Jim, a classical pianist who has long since given up the carousing lifestyle. He disapproves of Tyler's reckless ways and of what he perceives to be her bad influence on Laura. Jim pulls Laura toward adulthood and responsibility, toward what society says she should be, but Tyler isn't ready to let her go. But what does Laura want for herself? And how can she choose between Tyler and Jim, between one life she loves and another she's supposed to love? Raw, uproarious, and deeply affecting, *Animals* speaks to an entire generation caught between late-adolescence and adulthood wondering what exactly they'll have to give up in order to grow up.

An Immense World Ed Yong.2022-06-21 NEW YORK TIMES BESTSELLER • A “thrilling” (The New York Times), “dazzling” (The Wall Street Journal) tour of the radically different ways that animals perceive the world that will fill you with wonder and forever alter your perspective, by Pulitzer Prize-winning science journalist Ed Yong “One of this year’s finest works of narrative nonfiction.”—Oprah Daily ONE OF THE TEN BEST BOOKS OF THE YEAR: The Wall Street Journal, The New York Times, Time, People, The Philadelphia Inquirer, Slate, Reader’s Digest, Chicago Public Library, Outside, Publishers Weekly, BookPage ONE OF THE BEST BOOKS OF THE YEAR: Oprah Daily, The New Yorker, The Washington Post, The Guardian, The Economist, Smithsonian Magazine, Prospect (UK), Globe & Mail, Esquire, Mental Floss, Marginalian, She Reads, Kirkus Reviews, Library Journal The Earth teems with sights and textures, sounds and vibrations, smells and tastes, electric and magnetic fields. But every kind of animal, including humans, is enclosed within its own unique sensory bubble, perceiving but a tiny sliver of our immense world. In *An Immense World*, Ed Yong coaxes us beyond the confines of our own senses, allowing us to perceive the skeins of scent, waves of electromagnetism, and pulses of pressure that surround us. We encounter beetles that are drawn to fires, turtles that can track the Earth’s magnetic fields, fish that fill rivers with electrical messages, and even humans who wield sonar like bats. We discover that a crocodile’s scaly face is as sensitive as a lover’s fingertips, that the eyes of a giant squid evolved to see sparkling whales, that plants thrum with the inaudible songs of courting bugs, and that even simple scallops have complex vision. We learn what bees see in flowers, what songbirds hear in their tunes, and what dogs smell on the street. We listen to stories of pivotal discoveries in the field, while looking ahead at the many mysteries that remain unsolved. Funny, rigorous, and suffused with the joy of discovery, *An Immense World* takes us on what Marcel Proust called “the only true voyage . . . not to visit strange lands, but to possess other eyes.” WINNER OF THE ANDREW CARNEGIE MEDAL • FINALIST FOR THE KIRKUS PRIZE • FINALIST FOR THE NATIONAL BOOK CRITICS CIRCLE AWARD • LONGLISTED FOR THE PEN/E.O. Cold Light Anita Sitariski.2007-10-01 Luminescence sheds light on the adventure of science. Scientists and many others have explored the science and wonder of cold light—the chemistry of animals and things that make light but not heat. A seventeenth-century alchemist tried to turn a stone into gold. He failed, but the stone glowed in the dark instead. The alchemist began to mold the first luminescent objects. A light also came on one night for the famous chemist Robert Boyle. After he saw a raw chicken glowing in his kitchen, he began his own research into luminescence. With light humor, Anita Sitariski brings the thrill of discovery to life as she recounts the stories of the alchemist, chemist Robert Boyle, the adventurers who first saw bizarre creatures glowing in the depths of the sea, and others. Awe-inspiring, full-color photographs accompany the compelling, fact-filled text in these scientific explorations.

How Alien Would Aliens Be? John Cramer.2001-07 How alien would aliens be? Would they look like us or perhaps more like an octopus? How would they communicate? Could we even hear their voices, assuming they have them? Like us, aliens would be constrained by the physical world.

Understanding how those physical constraints apply both to us and to aliens is the theme of this book. The constraints imply that they will not be all that different from us, perhaps half to twice as big as we are. They will depend on vision and hearing as we do and they will live on a planet much like ours. But where will they be? Do they even exist? The odds are not good. We may be the only intelligent life in the universe.

The Creature Department Robert Paul Weston.2013-11-05 Stunning. . . . a bit like if you took Charlie and the Chocolate Factory and Monsters Inc. and shoved them in a TARDIS.—Buzzfeed It's a tentacled, inventive, gooey, world in there. . . . Elliot Von Doppler and his friend Leslie think nothing ever happens in Bickleburgh, except inside the gleaming headquarters of DENKi-3000—the world's eighth-largest electronics factory. Beneath the glass towers and glittering skywalks, there's a rambling old mansion from which all the company's amazing inventions spring forth. And no one except Uncle Archie knows what's behind the second-to-last door at the end of the hall. Until Elliot and Leslie are invited to take a glimpse inside. They find stooped, troll-like creatures with jutting jaws and broken teeth. Tiny winged things that sparkle as they fly. And huge, hulking, hairy nonhumans (with horns). It is unlike anything they've ever seen. But when Chuck Brickweather threatens to shut down the DENKi-3000 factory if a

new product isn't presented soon, the creatures know they are in danger. And when Uncle Archie vanishes, it's up to Elliot, Leslie, and every one of the unusual, er, "employees" to create an invention so astonishing it will save the Creature Department.

Cosmic Citizens and Moonshot Thinking Rohan Roberts.2018-08-16 From award-winning educator, innovation expert, and Global Teacher Prize finalist, Rohan Roberts, comes a provocative look at why our current education system is not fit for purpose and why we need to overhaul it. *Cosmic Citizens and Moonshot Thinking: Education in an Age of Exponential Technologies* takes a fresh approach to what we need to do differently to prepare our children for a world of exponential technologies, disruptive innovations, and ubiquitous A.I. In this groundbreaking book, Roberts outlines the purpose of education in a world of increased outsourcing and automation and explains how we can future-proof our youth to survive and thrive in a world of accelerating change. Through interactions with corporate leaders, interviews with principals, meetings with parents, and surveys of students, this book considers how the best and brightest students would overhaul their education system. The book highlights the role of neuroscience in education and explores several fascinating concepts such as radical openness, abundance mindsets, the gig economy, the technological singularity, intelligent optimism, the age of imagination, humanics, transhumanism, and the importance of Enlightenment values as we advance into the 21st Century. Underpinning this book is a constant focus on the importance of bringing a sense of awe into education and fostering a sense of cosmic wonder when contemplating human purpose and human existence. Written in a style that is discursive, contemplative, and with a sense of urgency, this book will appeal to students, parents, teachers, school principals, and to anyone who recognises that the only real and long-lasting way to create a better society is to first fix our education system.

My Manager and Other Animals Richard Robinson.2014-04-17 Deep down, we're just like animals. Some of us are selfish like apes. Some are chaotic like ants. . . And somehow the two clash and coalesce in 'antagonistic harmony'. A fascinating look at the evolutionary psychology, instincts and tactics of the workplace. *My Manager & Other Animals* examines the evolutionary psychology of work, focusing on the office, workshop, corporation or government department, and the complex and fascinating evolutionary tactics that have developed to deal with working life. 37 years ago Richard Dawkins wrote *The Selfish Gene* and it didn't take long for the business community to latch on to the 'selfish' part and adopt it as an industry standard. After all, it fitted in with the notion that, since we are all descended from apes, we should be like them: selfish, aggressive and competitive. More recently, astounding discoveries in human and animal behaviour (particularly ants) have shown that, in all animals, cooperation and altruism is more common than we think and more useful than we could imagine. It seems we contain an inner ape and an inner ant. How confusing; they seem like opposites, because co-operation means helping others, competition means swatting them. What are we, ape or ant? This book shows that ant and ape are both important. Co-operation without leadership is random, leadership without co-operation is slavery. The result of these two colliding is the mad mad mad world of work and life, lovingly described in the book.

Fuel Heidi C. M. Scott.2018-07-12 This book is available as open access through the Bloomsbury Open Access programme and is available on www.bloomsburycollections.com. *Fuel: An Ecocritical History* is the first book to chart our changing attitudes to fuel and energy through the literature and culture of the modern era, focusing on the 18th-century to the present. Reading a wide range of writers from Blake, Austen and Dickens to Upton Sinclair and Edward Abbey, Heidi Scott explores how our move from a pre-industrial reliance on biomass and elemental energy sources to our current dependence on the fossil fuels of coal, oil and natural gas have fundamentally shaped human identity and culture. The book's Anthropocene perspective reshapes our view of energy history and climate change, and *Fuel* looks forward to ways in which we can reimagine our culture away from the fossil fuel paradigm towards a more sustainable energy future driven by renewable, elemental energy.

Eye of the Shoal Helen Scales.2018-05-03 'Scales's genuine appreciation and awe for fish are contagious.' - Science 'Delightful' - New Scientist Seventy per cent of the earth's surface is covered by water. This vast aquatic realm is inhabited by a multitude of strange creatures and reigning supreme among them are the fish. There are giants that live for centuries and thumb-sized tiddlers that survive only weeks; they can be pancake-flat or inflatable balloons; they can shout with colours or hide in plain sight, cheat and dance, remember and say sorry; some rarely budge while others travel the globe restlessly. And yet the mesmerising and complex lives of fish remain largely underrated and unseen, living hidden beneath the waterline, out of sight and out of mind. Helen Scales is our guide on an underwater journey, as we fathom the depths and watch these animals going about the glorious business of being fish. As well as the fish, we meet devoted fishwatchers past and present, from voodoo zombie potion hunters and scientists who taught fish how to walk to nonagenarian explorers of the deep sea. Woven throughout are vignettes of Helen's own aquatic explorations, from eerie nighttime dives with glowing fish and up-close encounters with giant manta rays, to floating in the middle of a swirling shoal being watched by thousands of inquisitive eyes. As well as being a rich and entertaining read, this book will inspire readers to think again about these animals and the seas they inhabit, and to go out and appreciate the wonders of fish, whether through the glass walls of an aquarium or, better still, by gazing into the fishes' wild world and swimming through it.
