Women and Domestic Violence Law in India Shalu Nigam.2019-08-29 This book critically examines domestic violence law in India. It focuses on women's experiences and perspectives as victims and litigants, with regard to accessibility to law and justice. It also reflects on the manner in which the legal process reproduces gender hierarchies. This volume: Analyzes the legal framework from a gender perspective to pinpoint the inherent stereotypes, prejudices and discriminatory practices that come into play while interpreting the law; Includes in-depth interviews and case studies, and explores critical themes such as marriage, rights, family, violence, property and the state; Presents alternatives beyond the domain of law, such as qualitative medical care and legal aid facilities, shelter homes, short-stay homes, childcare facilities, and economic and social security provisions to survivors and their children. Drawing on extensive testimonies and ethnographic studies situated in a theoretical framework of law, this book will be of great interest to scholars and researchers of law, gender, human rights, women's studies, sociology and social anthropology, and South Asian studies.

The impact of disasters and crises on agriculture and food security: 2021 Food and Agriculture Organization of the United Nations .2021-03-17 On top of a decade of exacerbated disaster loss, exceptional global heat, retreating ice and rising sea levels, humanity and our food security face a range of new and unprecedented hazards, such as megafires, extreme weather events, desert locust swarms of magnitudes previously unseen, and the COVID-19 pandemic. Agriculture underpins the livelihoods of over 2.5 billion people - most of them in low-income developing countries - and remains a key driver of development. At no other point in history has agriculture been faced with such an array of familiar and unfamiliar risks, interacting in a hyperconnected world and a precipitously changing landscape. And agriculture continues to absorb a disproportionate share of the damage and loss wrought by disasters. Their growing frequency and intensity, along with the systemic nature of risk, are upending people's lives, devastating livelihoods, and jeopardizing our entire food system. This report makes a powerful case for investing in resilience and disaster risk reduction - especially data gathering and analysis for evidence informed action - to ensure agriculture's crucial role in achieving the future we want.

The Oxford Handbook of Criminal Law Markus D Dubber,Tatjana Hörnle.2014-11-27 The Oxford Handbook of Criminal Law reflects the continued transformation of criminal law into a global discipline, providing scholars with a comprehensive international resource, a common point of entry into cutting edge contemporary research and a snapshot of the state and scope of the field. To this end, the Handbook takes a broad approach to its subject matter, disciplinarily, geographically, and systematically. Its contributors include current and future research leaders representing a variety of legal systems, methodologies, areas of expertise, and research agendas. The Handbook is divided into four parts: Approaches & Methods (I), Systems & Methods (II), Aspects & Issues (III), and Contexts & Comparisons (IV). Part I includes essays exploring various methodological approaches to criminal law (such as criminology, feminist studies, and history). Part II provides an overview of systems or models of criminal law, laying the foundation for further inquiry into specific conceptions of criminal law as well as for comparative analysis (such as Islamic, Marxist, and military law). Part III covers the three aspects of the penal process: the definition of norms and principles of liability (substantive criminal law), along with a less detailed treatment of the imposition of norms (criminal procedure) and the infliction of sanctions (prison or corrections law). Contributors consider the basic topics traditionally addressed in scholarship on the general and special parts of the substantive criminal law (such as jurisdiction, mens rea, justifications, and excuses). Part IV places criminal law in context, both domestically and transnationally, by exploring the contrasts between criminal law and other species of law and state power and by investigating criminal law's place in the projects of comparative law, transnational, and

international law.
