Queering Translation, Translating the Queer Brian James Baer, Klaus Kaindl. 2017-09-22 This groundbreaking work is the first full book-length publication to critically engage in the emerging field of research on the queer aspects of translation and interpreting studies. The volume presents a variety of theoretical and disciplinary perspectives through fifteen contributions from both established and up-and-coming scholars in the field to demonstrate the interconnectedness between translation and queer aspects of sex, gender, and identity. The book begins with the editors' introduction to the state of the field, providing an overview of both current and developing lines of research, and builds on this foundation to look at this research more closely, grouped around three different sections: Queer Theorizing of Translation; Case Studies of Queer Translations and Translators; and Queer Activism and Translation. This interdisciplinary approach seeks to not only shed light on this promising field of research but also to promote cross fertilization between these disciplines towards further exploring the intersections between queer studies and translation studies, making this volume key reading for students and scholars interested in translation studies, queer studies, politics, and activism, and gender and sexuality studies.

The Venice Lagoon Ecosystem: Inputs and Interactions Between Land and Sea P. Lasserre, A. Marzollo. 2000-04-15 Coastal lagoons comprise 13% of the world's coastline and are found from tropical zones to the poles. They are enriched by oceanic and continental inputs and are among the world's most productive ecosystems. In many parts of the world, lagoons have long been closely interlinked with human societies - nowhere more so than in the Lagoon of Venice, where the mingling of human actions and ecological process has been so enduring, complete, complex, and profound. A one-of-a-kind scientific reference text *The Venice Lagoon Ecosystem: Inputs and Interactions Between Land and Sea* covers research on the flooding and biological damage from pollution and dredging to Venice. The research integrated in situ and experimental studies and modeling to create a key multidisciplinary and synthesized contribution to understanding the complex interactions between man-induced perturbations and natural biological phenomena to better understand their reciprocal effects. Topics include: the role of colloidal material in biogeochemical cycling of organic carbon and trace metals, the interactions between lagoon sediments and degradation of organic matter, the processes which regulate the coupling of nutrient dynamics, oxygen and metal concentrations, and the effects of contaminants on macroalgae, molluscs, fish, and other biota. The volume includes bibliographic references and index. The scientific results found in this volume represent a distinctive contribution to the understanding of one of the world's most renowned coastal lagoon ecosystems, as well as to decisions on the future development of Venice and its lagoon. What's more, the lessons learned and approach taken in *The Venice Lagoon Ecosystem: Inputs and Interactions Between Land and Sea* are applicable to other coastal lagoon ecosystems around the world.

Lies Like Truth Arthur F. Kinney. 2001 What was it like to be in the audience of the Globe Theater in 1606? By demonstrating fundamental connections between audience reaction then and the use of computers today, Renaissance scholar Arthur Kinney explores the cultural moment of one of Shakespeare's most popular tragedies.

Three Things About Elsie Joanna Cannon. 2019-07-02 The bestselling author of *The Trouble with Goats and Sheep* delivers a suspenseful and emotionally satisfying novel "infused with warmth and humor" (People) about a lifelong friendship, a devastating secret, and the small acts of kindness that bring people together. There are three things you should know about Elsie. The first thing is that she's my best friend. The second is that she always knows what to say to make me feel better. And

the third thing...might take a bit more explaining. Eighty-four-year-old Florence has fallen in her flat at Cherry Tree Home for the Elderly. As she waits to be rescued, she thinks about her friend Elsie and wonders if a terrible secret from their past is about to come to light. If the charming new resident is who he claims to be, why does he look exactly like a man who died sixty years ago? From the acclaimed, bestselling author of *The Trouble with Goats and Sheep*, *Three Things About Elsie* “breathes with suspense, providing along the way piercing, poetic descriptions, countless tiny mysteries, and breathtaking little reveals...a rich portrait of old age and friendship stretched over a fascinating frame” (Kirkus Reviews, starred review). This is an “amusing and heartbreaking” (Publishers Weekly) story about forever friends on the twisting path of life who come to understand how the fine threads of humanity connect us all.

Notes on Chopin André Gide.2012-02-14 DIVAn inspiring discourse on the power of music from one of the twentieth century’s most important figures, André Gide/divDIV /divDIVAndré Gide, one of the great intellectuals of the twentieth century and a devoted pianist, invites readers to reevaluate Frédéric Chopin as a composer “betrayed . . . deeply, intimately, totally violated” by a music community that had fundamentally misinterpreted his work. As a profound admirer of Chopin’s “promenade of discoveries,” Gide intersperses musical notation throughout the text to illuminate his arguments, but most moving is Gide’s own poetic expression for the music he so loved./divDIV /divDIVThis edition includes rare pages and fragments from Gide’s journals, which relate to Chopin and music./div

Guide to Ministering to Alzheimer's Patients and Their Families Pat Otwell.2008-05-19 Learn how to develop an effective Alzheimer’s ministry. The *Guide to Ministering to Alzheimer's Patients and Their Families* examines the importance of spirituality in dealing with the everyday challenges of this mysterious disease. Not a “how-to” manual with step-by-step instructions or tried and true formulas, this unique book instead examines the essential elements of ministering to dementia patients based on the first-hand accounts of family members living through pain and uncertainty. The book explores the stages of Alzheimer's, grief and guilt, available resources, and implications of spiritual care for patients and families. It is equally useful as a textbook for graduate and undergraduate work, a reference for study groups and seminars, and a primer for those with limited knowledge of the illness. Ministers sometimes neglect Alzheimer’s patients and their families because they feel they don’t know what to say or do even though they want to be obedient and faithful servants in this specialized ministry. The *Guide to Ministering to Alzheimer’s Patients and Their Families* communicates the thoughts, feelings, and needs of those affected by the disease to help ministers feel more comfortable, confident, and competent as they develop a theological understanding of God, Alzheimer’s patients, and their role in ministry. The book also provides models for ministry; role-play scenarios; a sample text for a care facility worship service, a care facility memorial service, and a funeral service for a Christian and a non-Christian as well as a sample clergy seminar program on Alzheimer’s ministry. The *Guide to Ministering to Alzheimer’s Patients and Their Families* examines: common characteristics of early, mild, moderate, and severe Alzheimer’s general information about Alzheimer’s ethical decision-making support group ministry respite care religious rites faith issues heredity hospitalization of Alzheimer’s patients long-distance caregiving working with other clergy The *Guide to Ministering to Alzheimer’s Patients and Their Families* also includes a special appendix of selections from the Scriptures. This book is a unique resource for all Christians who desire to minister to those affected by Alzheimer’s—especially pastors, priests, chaplains, pastoral counselors, church leaders, healthcare professionals, and seminary students.

Van Eyck Till-Holger Borchert,Jan Dumolyn.2020-05-05 This stunning compilation of the work of Jan van Eyck, the master Flemish painter, is being published to coincide with a once-in-a-lifetime exhibition in Ghent. Flemish painter Jan van Eyck (1390-1441) towered above his contemporaries. With his unprecedented technique, scientific knowledge, and unparalleled powers of observation, Van Eyck lifted oil painting to previously unknown heights and helped determine the course of

Western art. In 2020, the Museum of Fine Arts in Ghent will host the largest ever exhibition of Van Eyck's work. *Van Eyck: An Optical Revolution* includes artwork by Van Eyck, several pieces from his studio, and international masterpieces from the late Middle Ages while making the world of Van Eyck more tangible than ever. This tie-in exhibition catalog unravels some of the myths that surround Van Eyck and his techniques, while showing his complete oeuvre and influence in a new perspective. Including essays by leading experts from around the world, Van Eyck will prove to be an indispensable resource for Van Eyck fans and scholars alike.

Complexity of Constraints Nadia Creignou, Phokion G. Kolaitis, Heribert Vollmer. 2008-12-23
Nowadays constraint satisfaction problems (CSPs) are ubiquitous in many different areas of computer science, from artificial intelligence and database systems to circuit design, network optimization, and theory of programming languages. Consequently, it is important to analyze and pinpoint the computational complexity of certain algorithmic tasks related to constraint satisfaction. The complexity-theoretic results of these tasks may have a direct impact on, for instance, the design and processing of database query languages, or strategies in data-mining, or the design and implementation of planners. This state-of-the-art survey contains the papers that were invited by the organizers after conclusion of an International Dagstuhl-Seminar on Complexity of Constraints, held in Dagstuhl Castle, Germany, in October 2006. A number of speakers were solicited to write surveys presenting the state of the art in their area of expertise. These contributions were peer-reviewed by experts in the field and revised before they were collated to the 9 papers of this volume. In addition, the volume contains a reprint of a survey by Kolaitis and Vardi on the logical approach to constraint satisfaction that first appeared in 'Finite Model Theory and its Applications', published by Springer in 2007.

For Europe Guy Verhofstadt, Daniel Cohn-Bendit. 2012-09-20 Europe is in crisis. How did we get here? What didn't work? Faced with such an emergency, are the euro zone states not creating an undemocratic monster? Is euroscepticism not reactionary? Could a federation of 27 actually work? This book is a call. A wake up call directed to every citizen. It is an exercise in lucidity that encourages reflection. And it is also an alarm bell. The tone is frank, passionate. The arguments hard hitting: Europe must once and for all get rid of the navel gazing of its nation-states. A radical revolution is needed. A large European revolution. And a European federal Union must emerge. A Union that enables Europe to participate in the postnational world of tomorrow. By laziness, cowardice and lack of vision, too many of our Heads of State and Government prefer not to see what is at stake. Let's wake them up. Let's confront them with their impotence. And give them no respite until they have taken the European way, the way to a Europe of the future, towards a Europe for Europeans. The era of empty summits and statements is over. Now is the time for action.

An Ideal Presence Eduardo Berti. 2021-09-07 In 2015, Eduardo Berti spent several weeks in residence at the University Hospital Centre in Rouen, France, observing and conversing with the staff of its palliative care department. From that experience he created this series of lightly fictionalized testimonials from nurses, nursing aides, doctors, administrators, social workers, volunteers, and the other people who make the unit tick. The result is a distinctly intimate and often poignant portrait of sickness and care, an unflinching look at death through the eyes of the people who work with it every day - but also a profound reflection on what it means to be alive.

Crop Wild Relative Conservation and Use .2008 Crop wild relatives (CWR) are species closely related to crop plants which can contribute beneficial traits such as pest or disease resistance and yield improvement. Through an examination of national, regional and global context of CWR, this text presents methodologies and case studies that provide recommendations for global conservation and use.

Echolalias Daniel Heller-Roazen.2005 A far-reaching philosophical investigation into the persistence and disappearance of speech, in individuals and in linguistic communities. Just as speech can be acquired, so can it be lost. Speakers can forget words, phrases, even entire languages they once knew; over the course of time peoples, too, let go of the tongues that were once theirs, as languages disappear and give way to the others that follow them. In *Echolalias*, Daniel Heller-Roazen reflects on the many forms of linguistic forgetfulness, offering a far-reaching philosophical investigation into the persistence and disappearance of speech. In twenty-one brief chapters, he moves among classical, medieval, and modern culture, exploring the interrelations of speech, writing, memory, and oblivion. Drawing his examples from literature, philosophy, linguistics, theology, and psychoanalysis, Heller-Roazen examines the points at which the transience of speech has become a question in the arts, disciplines, and sciences in which language plays a prominent role. Whether the subject is Ovid, Dante, or modern fiction, classical Arabic literature or the birth of the French language, structuralist linguistics or Freud's writings on aphasia, Heller-Roazen considers with clarity, precision, and insight the forms, the effects, and the ultimate consequences of the forgetting of language. In speech, he argues, destruction and construction often prove inseparable. Among peoples, the disappearance of one language can mark the emergence of another; among individuals, the experience of the passing of speech can lie at the origin of literary, philosophical, and artistic creation. From the infant's prattle to the legacy of Babel, from the holy tongues of Judaism and Islam to the concept of the dead language and the political significance of exiled and endangered languages today, *Echolalias* traces an elegant, erudite, and original philosophical itinerary, inviting us to reflect in a new way on the nature of the speaking animal who forgets.

Players Don DeLillo.2012-03-28 In *Players* DeLillo explores the dark side of contemporary affluence and its discontents. Pammy and Lyle Wynant are an attractive, modern couple who seem to have it all. Yet behind their ideal life is a lingering boredom and quiet desperation: their talk is mostly chatter, their sex life more a matter of obligatory satisfaction than pleasure. Then Lyle sees a man killed on the floor of the Stock Exchange and becomes involved with the terrorists responsible; Pammy leaves for Maine with a homosexual couple.... And still they remain untouched, players indifferent to the violence that surrounds them, and that they have helped to create. Originally published in 1977 (before his National Book Award-winning *White Noise* and the recent blockbuster *Underworld*), *Players* is a fast-moving yet starkly drawn socially critical drama that demonstrates the razor-sharp prose and thematic density for which DeLillo is renowned today. The wit, elegance and economy of Don DeLillo's art are equal to the bitter clarity of his perceptions.--New York Times Book Review

Atlas of Poetic Botany Francis Halle.2018-11-27 Botanical encounters in the rainforest: trees that walk, a leaf as big as an awning, a plant that dances. This Atlas invites the reader to tour the farthest reaches of the rainforest in search of exotic—poetic—plant life. Guided in these botanical encounters by Francis Hallé, who has spent forty years in pursuit of the strange and beautiful plant specimens of the rainforest, the reader discovers a plant with just one solitary, monumental leaf; an invasive hyacinth; a tree that walks; a parasitic laurel; and a dancing vine. Further explorations reveal the *Rafflesia arnoldii*, the biggest flower in the world, with a crown of stamens and pistils the color of rotten meat that exude the stench of garbage in the summer sun; underground trees with leaves that form a carpet on the ground above them; and the biggest tree in Africa, which can reach seventy

meters (more than 200 feet) in height, with a four-meter (about 13 feet) diameter. Hallé's drawings, many in color, provide a witty accompaniment. Like any good tour guide, Hallé tells stories to illustrate his facts. Readers learn about, among other things, Queen Victoria's rubber tree; legends of the moabi tree (for example, that powder from the bark confers invisibility); a flower that absorbs energy from a tree; plants that imitate other plants; a tree that rains; and a fern that clones itself. Hallé's drawings represent an investment in time that returns a dividend of wonder more satisfying than the ephemeral thrill afforded by the photograph. The Atlas of Poetic Botany allows us to be amazed by forms of life that seem as strange as visitors from another planet.

Passenger Rail Franchising Great Britain. Parliament. House of Commons. Transport Committee. 2006 It is thirteen years since the Railways Act 1993 started the process of privatising British Rail, replacing it with one company owning and managing the infrastructure, an open-access system for freight services and a series of twenty-five passenger franchises let to private companies for a specified period of time. This period has seen almost continuous change, and there is now a new 'triumvirate' framework with the Department for Transport, the Office of Rail Regulation and Network Rail in place, with the third generation of franchises in the process of being let and the number being reduced to nineteen. The Committee's report examines the current franchising system, focusing on the coherence of its objectives, the effectiveness of the process for awarding franchises and the management of franchise agreements, and whether more competition and vertical integration is needed. Findings include that the current system represents a policy muddle which lacks a coherent framework for the development of good services and delivery of value for money for passengers and taxpayers. The only way the Government can increase capacity and improve services for the long-term is to drop the dogmatic pursuit of competition in its decision-making as to what the private and public sectors can and should do in future. The Government's forthcoming long-term strategy for the railways will need to address these issues, and to set out a structure and a strategy capable of securing quality passenger rail services to meet demand over the next half a century.

Spartakus Furio Jesi. 2024-01-05 A crucial text at the intersection of history and philosophy in twentieth-century Italy. On December 29, 1918, the Spartakus League, a Marxist revolutionary movement, rose up in Germany calling for an end to class rule by the bourgeoisie. Massive demonstrations followed and more than 500,000 Berliners took to the streets in January--only to be crushed by police and anticommunist paramilitary troops. Several leaders of the Spartakus League were killed and the revolt was quashed. Through a detailed reconstruction of the events of that bloody winter, historian and critic Furio Jesi recasts our understanding of a foundational political difference--revolt or revolution? Drawing on a deep reserve of literary sources like Brecht, Eliade, Dostoyevsky, and Mann, Jesi outlines a uniquely incisive phenomenology of revolt that distinguishes between the purposeful historical temporality of revolution and the suspension of time that marks a revolt. This edition also includes an essay on the politics of time and revolution by Rosa Luxemburg,

a founding leader of the Spartakus League.

Remaking Eden Lee M. Silver. 1999 Could a child have two genetic mothers? Will parents someday soon be able to choose not only the physical characteristics of their children-to-be, but their personalities and talents as well? Will genetic enhancement ultimately lead to a split in the human species? In this brilliant, provocative, and necessary book, Lee M. Silver takes a cautiously optimistic look at the scientific advances that will allow us to engineer life in ways that were unimaginable just a few short years ago--indeed, in ways that go far beyond cloning. In clear, engaging, and accessible prose, Silver demystifies the science behind a myriad of thrilling and frightening new possibilities, in a book that is essential reading for anyone who wants to understand the hopes and dilemmas of the American family in the twenty-first century.

Ghost Letters Baba Badji. 2021-01-01 In *Ghost Letters*, one emigrates to America again, and again, and again, though one also never leaves Senegal, the country of one's birth; one grows up in America, and attends university in America, though one also never leaves Senegal, the country of one's birth; one wrestles with one's American blackness in ways not possible in Senegal, though one never leaves Senegal, the country of one's birth; and one sees more deeply into Americanness than any native-born American could. *Ghost Letters* is a 21st century Notebook of a Return to the Native Land, though it is a notebook of arrival and being in America. It is a major achievement. —Shane McCrae

The Rejection of Consequentialism Samuel Scheffler. 1994-08-11 In contemporary philosophy, substantive moral theories are typically classified as either consequentialist or deontological. Standard consequentialist theories insist, roughly, that agents must always act so as to produce the best available outcomes overall. Standard deontological theories, by contrast, maintain that there are some circumstances where one is permitted but not required to produce the best overall results, and still other circumstances in which one is positively forbidden to do so. Classical utilitarianism is the most familiar consequentialist view, but it is widely regarded as an inadequate account of morality. Although Professor Scheffler agrees with this assessment, he also believes that consequentialism seems initially plausible, and that there is a persistent air of paradox surrounding typical deontological views. In this book, therefore, he undertakes to reconsider the rejection of consequentialism. He argues that it is possible to provide a rationale for the view that agents need not always produce the best possible overall outcomes, and this motivates one departure from consequentialism; but he shows that it is surprisingly difficult to provide a satisfactory rationale for the view that there are times when agents must not produce the best possible overall outcomes. He goes on to argue for a hitherto neglected type of moral conception, according to which agents are always permitted, but not always required, to produce the best outcomes.

The Apple Grower Michael Phillips. 2005 For decades fruit growers have sprayed their trees with toxic chemicals in an attempt to control a range of insect and fungal pests. Yet it is possible to grow apples responsibly, by applying the intuitive knowledge of our great-grandparents with the fruits of modern scientific research and innovation. Since *The Apple Grower* first appeared in 1998, orchardist Michael Phillips has continued his research with apples, which have been called organic's final frontier. In this new edition of his widely acclaimed work, Phillips delves even deeper into the mysteries of growing good fruit with minimal inputs. Some of the cutting-edge topics he explores include: The use of kaolin clay as an effective strategy against curculio and borers, as well as its limitations Creating a diverse, healthy orchard ecosystem through understory management of plants, nutrients, and beneficial microorganisms How to make a small apple business viable by

focusing on heritage and regional varieties, value-added products, and the community orchard model. The author's personal voice and clear-eyed advice have already made *The Apple Grower* a classic among small-scale growers and home orchardists. In fact, anyone serious about succeeding with apples needs to have this updated edition on their bookshelf.
