The Journey of Man Spencer Wells.2017-03-28 Around 60,000 years ago, a man, genetically identical to us, lived in Africa. Every person alive today is descended from him. How did this real-life Adam wind up as the father of us all? What happened to the descendants of other men who lived at the same time? And why, if modern humans share a single prehistoric ancestor, do we come in so many sizes, shapes, and races? Examining the hidden secrets of human evolution in our genetic code, the author reveals how developments in the revolutionary science of population genetics have made it possible to create a family tree for the whole of humanity. Replete with marvelous anecdotes and remarkable information, from the truth about the real Adam and Eve to the way differing racial types emerged, this book is an enthralling, epic tour through the history and development of early humankind.

Researching Local History M. Williams.2014-05-12 This practical but inspiring book considers what local history is, why researching it is valuable and rewarding, and how we should go about it. Issues addressed include: getting oral and documentary evidence; keeping records; the nature of data, information and knowledge; and their use to create the different products of local history research. Michael Williams is both a professional scientist and a local historian of long standing, and he uses both sides of his experience in a text that is at once rigorous about the historical process, and also a fascinating - and often moving - account of his adventures into the past of his own family and community. He demonstrates local history methodology through his research into ancestry, migration, work, war and religion in the towns and villages of England and Wales. It is richly illustrated throughout.

*The Human Journey* Kevin Reilly.2018-05-04 The Human Journey offers a truly concise yet satisfyingly full history of the world from ancient times to the present. The book's scope, as the title implies, is the whole story of humanity, in planetary context. Its themes include not only the great questions of the humanities—nature versus nurture, the history and meaning of human variation, the sources of wealth and causes of revolution—but also the major transformations in human history: agriculture, cities, iron, writing, universal religions, global trade, industrialization, popular government, justice, and equality. In each conceptually rich chapter, leading historian Kevin Reilly concentrates on a single important period and theme, sustaining a focused narrative and analytical perspective. Chapter 2, for example, discusses the significance of bronze-age urbanization and the advent of the Iron Age. Chapter 3 examines the meaning and significance of the age of “classical” civilizations. Chapter 4 explains the spread of universal religions and new technologies in the postclassical age of Eurasian integration. But these examples also reveal a range of approaches to world history. The first chapter is an example of current “Big History,” the second of history as technological transformations, the third of comparative history, the fourth the history of connections that dominates, and thus narrows, so many texts. Free of either a confined, limiting focus or a mandatory laundry list of topics, this book begins with our most important questions and searches all of our past for answers. Well-grounded in the latest scholarship, this is not a fill-in-the-blanks text, but world history in a grand humanistic tradition.
