Making Civics Count David E. Campbell,Meira Levinson,Frederick M. Hess.2012 By nearly every measure, Americans are less engaged in their communities and political activity than generations past. So write the editors of this volume, who survey the current practices and history of citizenship education in the United States. They argue that the current period of creative destruction--when schools are closing and opening in response to reform mandates--is an ideal time to take an in-depth look at how successful strategies and programs promote civic education and good citizenship. Making Civics Count offers research-based insights into what diverse students and teachers know and do as civic actors, and proposes a blueprint for civic education for a new generation that is both practical and visionary. This collection of state-of-the-art essays advances the discussion of civics from noble aspiration to empirical evidence and pedagogical practice. The authors, all noted scholars, have shown us how to improve civic education and--in the process--how to strengthen our democracy. It's time for policymakers to pay attention. -- William A. Galston, Ezra Zilkha Chair in Governance Studies, The Brookings Institution Making Civics Count models a brilliant alternative to the ideological polarization and paralysis that dominates civic education discourse. Campbell, Levinson, Hess, and the other contributors to this volume hail from across the political spectrum but share a critical commitment to reinvigorate dialogue around civic education. They seek not consensus but spirited engagement--with ideas, with solid empirical data, and with visions for a more robust democracy. This is an important book for scholars, policymakers, and anyone interested in civic education's future. -- Joel Westheimer, university research chair, sociology of education, University of Ottawa This compelling and persuasive book shows that an open climate for discussion of current issues, teachers' preparation across subject areas, and the new digital media can help foster a vision of democracy and counter prevailing inequality. -- Judith Torney-Purta, professor of human development, University of Maryland David E. Campbell is professor of political science at the University of Notre Dame and founding director of the Rooney Center for the Study of American Democracy. Meira Levinson is an associate professor at the Harvard Graduate School of Education. Frederick M. Hess is resident scholar and director of education policy studies at the American Enterprise Institute.

Antifascisms David Ward.1996 This book is an in-depth analysis of three of the most crucial years in twentieth-century Italian history, the years 1943-46. After more than two decades of a Fascist regime and a disastrous war experience during which Italy changed sides, these years saw the laying of the political and cultural foundations for what has since become known as Italy's First Republic. Drawing on texts from the literature, film, journalism, and political debate of the period, Antifascisms offers a thorough survey of the personalities and positions that informed the decisions taken in this crucial phase of modern Italian history.

The pieces themselves range from narrative to abstract, bibliographical to fictionalized, allowing for a fuller range of expression and voice. What each piece carries is the idea of surviving the brutality of the world, others, and even one's self, in hopes of gaining insight and retaining one's compassion. Whether the piece is addressing the idea of finding one's own art at a junk store, or stumbling across a love note written before, but after, a lover has left them, or even watching a young midget be chased through the mall, the author never ceases to try and present the emotion and meaning at the core of each piece in a blatant yet subtle way.

Controversy in the Classroom Diana E. Hess.2009-05-26 In a conservative educational climate that is dominated by policies like No Child Left Behind, one of the most serious effects has been for educators to worry about the politics of what they are teaching and how they are teaching it. As a result, many dedicated teachers choose to avoid controversial issues altogether in preference for safe knowledge and safe teaching practices. Diana Hess interrupts this dangerous trend by providing readers a spirited and detailed argument for why curricula and teaching based on controversial issues are truly crucial at this time. Through rich empirical research from real classrooms throughout the nation, she demonstrates why schools have the potential to be particularly powerful sites for democratic education and why this form of education must include sustained attention to authentic and controversial political issues that animate political communities. The purposeful inclusion of controversial issues in the school curriculum, when done wisely and well, can communicate by example the essence of what makes communities democratic while simultaneously building the skills and dispositions that young people will need to live in and improve such communities.
