Education for Global Leadership Committee for Economic Development. Research and Policy Committee, Committee for Economic Development. 2006 To confront the twenty-first century challenges to our economy and national security, our education system must be strengthened to increase the foreign language skills and cultural awareness of our students. America's continued global leadership will depend on our students' abilities to interact with the world community both inside and outside our borders. This report warns that the U.S. will become less competitive in the global economy because of declining quality foreign language education at the college and high school level. Additionally, the American public's deficiency in foreign languages and cultures is hampering efforts to counter terrorist threats. To have a citizenry that is knowledgeable of world regions, global issues, and foreign cultures, as well as conversant in other languages, we will need to strengthen the curriculum of the K-12 education system as well as that of our colleges, universities, and professional schools. Although there is much that can be done by states, governors, business leaders, and others, leadership by the Federal government will be crucial in jump-starting this effort. This report recommends (1) teaching international content across the curriculum and at all levels of learning to expand American students' knowledge of other countries and cultures; (2) expanding the training pipeline at every level of education to address the paucity of Americans fluent in foreign languages, especially critical, less-commonly taught languages, such as Arabic, Chinese, Hindi, Japanese, Korean, Persian/Farsi, Russian, and Turkish; and (3) national leaders--political leaders as

well as the business and philanthropic communities and the media--should educate the public about the importance of improving education in languages other than English and in international studies. Appended are: (1) A Timeline of Important Developments in International Studies and Foreign Language Education; and (2) Major Federal Legislation Pertaining to International Studies and Foreign Language Education. (Contains 167 endnotes.) [This report represents a statement by the Research and Policy Committee of the Committee for Economic Development. For the Executive Summary of this report, see ED502295.]

Violence against Kosovar Albanians, NATO's intervention 1998-1999 Laurence Binet.2016-05-18 The 'Violence against Kosovar Albanians NATO's intervention 1998-1999' case study describes the constraints and dilemmas facing Médecins Sans Frontières teams that witnessed a process of terror and expulsion which they described as the 'deportation' of Kosovar Albanians by Serb forces. It also described MSF's reaction to NATO aerial bombings and the control exercised over the refugee camps by this party to the conflict. Should MSF denounce the violence being committed against Kosovars at the risk of being excluded from access to these people and of encouraging the NATO intervention? Should MSF take a stance on the NATO intervention? What sort of relationship should be established with countries that were committed either militarily (such as NATO members) or politically (Greece) in the conflict and their civil societies? Should MSF raise the alarm about the absence of the UNHCR in the management of the refugee camps, at the risk of reinforcing this marginalization? Is it justifiable to carry out an assessment mission that sacrifices the principle of operational independence, by invoking an interpretation of the principle of impartiality that implies a responsibility to assist victims on both sides of a conflict?

Quantum Philosophy Roland Omnès.2002-02-25 In this magisterial work, Roland Omnès takes us

from the academies of ancient Greece to the laboratories of modern science as he seeks to do no less than rebuild the foundations of the philosophy of knowledge. One of the world's leading quantum physicists, Omnès reviews the history and recent development of mathematics, logic, and the physical sciences to show that current work in quantum theory offers new answers to questions that have puzzled philosophers for centuries: Is the world ultimately intelligible? Are all events caused? Do objects have definitive locations? Omnès addresses these profound questions with vigorous arguments and clear, colorful writing, aiming not just to advance scholarship but to enlighten readers with no background in science or philosophy. The book opens with an insightful and sweeping account of the main developments in science and the philosophy of knowledge from the pre-Socratic era to the nineteenth century. Omnès then traces the emergence in modern thought of a fracture between our intuitive, commonsense views of the world and the abstract and--for most people--incomprehensible world portrayed by advanced physics, math, and logic. He argues that the fracture appeared because the insights of Einstein and Bohr, the logical advances of Frege, Russell, and Gödel, and the necessary mathematics of infinity of Cantor and Hilbert cannot be fully expressed by words or images only. Quantum mechanics played an important role in this development, as it seemed to undermine intuitive notions of intelligibility, locality, and causality. However, Omnès argues that common sense and quantum mechanics are not as incompatible as many have thought. In fact, he makes the provocative argument that the consistent-histories approach to quantum mechanics, developed over the past fifteen years, places common sense (slightly reappraised and circumscribed) on a firm scientific and philosophical footing for the first time. In doing so, it provides what philosophers have sought through the ages: a sure foundation for human knowledge. Quantum Philosophy is a profound work of contemporary science and philosophy and an eloquent

history of the long struggle to understand the nature of the world and of knowledge itself.

Corey Toni Griffin,Erika O. Williams.2015-02-10 Corey Jones has always maintained he didn't want a mate. After falling for his college professor and having his heart broken, he vowed to never go there again. Now, his decision to remain single is put to the test when he meets his Alpha's new personal assistant, Ethan Davies, and discovers the man is his mate. After growing up in the foster care system all Ethan ever wanted was a home and someone to love him. He's overjoyed that his recent move has brought him to his mate. Ethan's happiness soon turns to devastation when Corey walks away from him and their bond. Ethan is forced to walk a fine line between respecting his mate's wishes and refusing to give up on the one thing he's wanted his entire life. With Ethan's determination, an interfering brother, and pack members too interested in his personal life, Corey may not stand a chance. Please Note: Corey has been re-edited, and expanded by ~13 K.

The World's Water Volume 8 Pacific Institute,Newsha Ajami.2014-01-16 Produced biennially, The World's Water is the most comprehensive and up-to-to date source of information and analysis on freshwater resources. Each new volume examines critical global trends and offers the best data available on a variety of topics related to water. Volume 8 features chapters on hydraulic fracturing (fracking), water footprints, sustainable water jobs, and desalination financing, among other timely issues. Water briefs provide concise updates on topics including the Dead-Sea and the role of water in the Syrian conflict. The World's Water is coauthored by MacArthur genius Peter H. Gleick and his colleagues at the world-renowned Pacific Institute. Since the first volume was published in 1998, the series has become an indispensable resource for professionals in government agencies and nongovernmental organizations, researchers, students, and anyone concerned with water and its use.

War crimes and politics of terror in Chechnya 1994-2004 Laurence Binet.2016-06-02 The 'War crimes and politics of terror in Chechnya 1994-2004' case study describes the constraints, questions and dilemmas experienced by MSF while speaking out during the two Russian-Chechen wars and the following years of 'normalization'. Was speaking out the right thing to do with regard to Russia, a power with a veto at the UN Security Council and a tradition of propaganda control of the public

arena? Was it realistic to rely on raising the awareness of other UN member states via their public's opinion? In a context of terror, when dealing with a regime in denial of the reality of a conflict, was it useful and was it up to MSF to call for having this situation qualified as 'war'? Should MSF take into account the possibility of a casual link between instances of its public speaking out and the security incidents involving its staff? When one of its staff members was taken hostage, should MSF speak out in the media to create visibility that affords him/her some protection, or conversely remain as discrete as possible so as to avoid a rise in his/her 'market value?' Should MSF publically point out responsibilities, negligence, or even complicity of the government on which soil the kidnapping had occurred, thereby taking active steps to secure the hostage's release or should it refrain from such a discourse so as to avoid the opposite effect? Should MSF continue to publically denounce the violence inflicted on people in the region, at the risk of radicalising those parties to the conflict responsible for the kidnapping, and place the hostage's life in danger?

Famine and forced relocations in Ethiopia 1984-1986 Laurence Binet. 2013-11-08 The "Famine and Forced Relocations in Ethiopia 1984-1986" case study is describing the difficulties and dilemmas met by Médecins Sans Frontières (MSF) during the famine that decimated the Ethiopian population in 1984-1985. This famine triggered an unprecedented humanitarian mobilisation and huge media attention. But the Ethiopian regime at the time also used the international aid as a bait to attract the populations and forcibly resettle them in appalling conditions. In this context: what should have been done when it appeared that aid was being used against the population for whom it

was intended? Could MSF's denunciation have endangered international aid operations in Ethiopia? By taking such positions, could MSF put its own existence and, thus, its other activities at risk?

Sea-Level Rise and Coastal Subsidence: Causes, Consequences, and Strategies J.D. Milliman,B.U. Haq.1996-02-29 Greenhouse-induced climate warming increasingly appears to be a reality, and the warming climate will be accompanied by an accelerated sea level rise - as much as 60-100 cm over the next century. What is commonly absent in the discussion of rising sea level, however, is the role played by the subsidence of low-lying coastal areas, which can have a far greater local effect than the eustatic rise of the sea. The combined sea-level rise and land subsidence will almost certainly make the greatest impact on coastal societies in the densely populated regions of southern Asia, but its effects will be felt globally. This volume explores the concepts of sea-level rise and coastal subsidence, both natural and anthropogenically accelerated, in the form of a series of case studies in such diverse locations as Bangkok, Bangladesh, Venice, and the Niger and Mississippi deltas, as well as a discussion of the economic, engineering and policy responses that must be considered if the effects of local sea-level rise are to be mitigated.

The violence of the new Rwandan regime 1994-1995 Laurence Binet.2016-06-02 The 'Violence of the new Rwandan regime' case study is describing the difficulties and dilemmas that Médecins Sans Frontières faced in 1994 and 1995 when confronted with the abuses and crimes of the new regime that had taken over in Rwanda in July 1994: Was it acceptable for MSF, having denounced the génocidaires' control over the Rwandan refugees in Zaire and Tanzania, to encourage the return of these refugees to Rwanda, given the insecurity that potentially awaited them? Did MSF have a

responsibility to alert them to what was occurring in Rwanda? Could MSF – after having issued a call for an international armed intervention to put an end to the genocide – now criticise the regime that had effectively done so, thereby risking accusations of favouring the génocidaires and supporting the revisionists? Should MSF keep silent in order to continue caring for detainees who might otherwise die in the appalling prison conditions?

World Economic Outlook, April 2014 International Monetary Fund. Research Dept..2014-04-08
Global activity has broadly strengthened and is expected to improve further in 2014-15, according to the April 2014 WEO, with much of the impetus for growth coming from advanced economies. Although downside risks have diminished overall, lower-than-expected inflation poses risks for advanced economies, there is increased financial volatility in emerging market economies, and increases in the cost of capital will likely dampen investment and weigh on growth. Advanced economy policymakers need to avoid a premature withdrawal of monetary accommodation. Emerging market economy policymakers must adopt measures to changing fundamentals, facilitate external adjustment, further monetary policy tightening, and carry out structural reforms. The report includes a chapter that analyzes the causes of worldwide decreases in real interest rates since the 1980s and concludes that global rates can be expected to rise in the medium term, but only moderately. Another chapter examines factors behind the fluctuations in emerging market economies' growth and concludes that strong growth in China played a key role in buffering the effects of the global financial crisis in these economies.

Understanding and Defending Against Russia's Malign and Subversive Information Efforts in Europe

Miriam Matthews,Alyssa Demus,Elina Treyger.2021-10-15 The increasing frequency and intensity of information aggression targeting the United States and its European allies demands more thorough consideration of concepts and practices for protecting against, resisting, and mitigating the effects of psychological manipulation and influence. Russia, in particular, often appears to use messaging and intimidation as part of its efforts to influence multiple actors and countries, including the United States and its European allies. Unfortunately, however, concepts and practices for understanding and resisting the potential effects of efforts conducted by Russia and its agents are few. To address this, United States European Command (USEUCOM) asked the RAND Corporation to identify strategies for defending against the effects of Russia's efforts to manipulate and inappropriately influence troops, government decisionmaking, and civilians. In this report, RAND researchers describe apparent efforts conducted by Russia and its agents involving the use of information to shape Russia's operating environment, focusing on the European context; review and apply existing research on influence and manipulation to these efforts; and draw from existing practice to describe

possible defensive approaches that USEUCOM and its various partners can consider using when defending against these actions. The framework they use offers a way to conceptualize the objectives, tactics, and tools of Russian information efforts in Europe.

Rural Tourism in Europe World Tourism Organization.2004 With an expected growth rate of around 6 per cent rural tourism is developing faster than the overall growth rate for international tourism arrivals. Due to its special importance for the European region, three seminars were held in Belgrade (Serbia), Kielce (Poland) and Yaremcha (Ukraine) to focus on three major issues: to contribute to a better understanding of rural tourism and to offer additional tools for planning and execution of initiatives; to enhance the importance of rural tourism in the agendas of governments and international organizations; to generate political and financial support for the development of rural tourism. The Interpretation of Quantum Mechanics Roland Omnès.2018-06-05 The interpretation of quantum

mechanics has been controversial since the introduction of quantum theory in the 1920s. Although the Copenhagen interpretation is commonly accepted, its usual formulation suffers from some serious drawbacks. Based mainly on Bohr's concepts, the formulation assumes an independent and essential validity of classical concepts running in parallel with quantum ones, and leaves open the possibility of their ultimate conflict. In this book, Roland Omnès examines a number of recent advances, which, combined, lead to a consistent revision of the Copenhagen interpretation. His aim is to show how this interpretation can fit all present experiments, to weed out unnecessary or questionable assumptions, and to assess the domain of validity where the older statements apply. Drawing on the new contributions, *The Interpretation of Quantum Mechanics* offers a complete and self-contained treatment of interpretation (in nonrelativistic physics) in a manner accessible to both physicists and students. Although some hard results are included, the concepts and mathematical developments are maintained at an undergraduate level. This book enables readers to check every step, apply the techniques to new problems, and make sure that no paradox or obscurity can arise in the theory. In the conclusion, the author discusses various philosophical implications pertinent to the study of quantum mechanics.

Identifying Changes Bettina Fischer.2003 This large volume publishes the Proceedings of the International Workshop Identifying Changes held in Istanbul in 2002 and includes 25 papers which approach the Bronze to Iron Age transition primarily from an Anatolian perspective. Drawing on

archaeological material from Anatolian sites, compared and contrasted with that of neighbouring areas such as Cyprus, Crete, Greece and the Pontic and Caucasus, the contributors assess the nature and chronology of 2nd millennium BC cultural change. The papers reflect the major contribution that the natural sciences can make to this question, the need for more research into regional peculiarities and interactions, the need to track population movements and migrations, to investigate the pace of change and evidence for continuity from one artificially labelled period to another.
