Leonardo Pisano (Fibonacci) L. E. Sigler. 2014-06-28 The Book of Squares by Fibonacci is a gem in the mathematical literature and one of the most important mathematical treatises written in the Middle Ages. It is a collection of theorems on indeterminate analysis and equations of second degree which yield, among other results, a solution to a problem proposed by Master John of Palermo to Leonardo at the Court of Frederick II. The book was dedicated and presented to the Emperor at Pisa in 1225. Dating back to the 13th century the book exhibits the early and continued fascination of men with our number system and the relationship among numbers with special properties such as prime numbers, squares, and odd numbers. The faithful translation into modern English and the commentary by the translator make this book accessible to professional mathematicians and amateurs who have always been intrigued by the lure of our number system.

EU Missions and Peacebuilding Vladimir Kmec. 2021-12-24 This book analyses the European Union's (EU) approach to peacebuilding in its Common Security and Defence Policy (CSDP) missions, and explores how this approach impacts the EU's role in international conflict management.

Peacebuilding carried out through CSDP instruments has become central to the self-conception of the EU as an actor in international conflict management. EU missions and operations have, for the most part, been deployed to promote peacebuilding efforts in post-conflict situations, in particular through capacity-building, reforms and rebuilding of state structures. This book focuses explicitly on the peacebuilding dimension of the CSDP while exploring why and how the EU has adopted peacebuilding in its CSDP actions as a norm and a practice. It analyses how peacebuilding in EU missions is conceptualised, designed, governed and implemented. The book examines the extent to which EU missions and operations reflect a normative and practical commitment of the EU to peacebuilding - that is to say, the extent to which CSDP instruments have been shaped by international peacebuilding norms and EU foreign policy. Drawing on empirical insights from decision- and policymaking processes in Brussels as well as from missions in Mali and in Bosnia and Herzegovina, this book offers critical perspectives on the EU's role as an international peacebuilding actor. This book will be of much interest to students of European security, EU policy, peace and conflict studies, security studies and international relations.
