Ahab Agonistes Lester L. Grabbe.2007-04-28 The European Seminar in Historical Methodology is committed to debating issues surrounding the history of ancient Israel and Judah with the aim of developing methodological principles for writing a history of the period. In this particular session the topic chosen was the Omride dynasty-its rise and fall-and the subsequent Jehu dynasty, down to the fall of Samaria to the Assyrians. Participants discuss such topics as the dating of prophetic texts, the house of Ahab in Chronicles, the Tel Dan inscription, the Mesha inscription, the Jezebel tradition, the archaeology of Iron IIB, the relationship between the biblical text and contemporary sources, and the nature of the Omride state. The volume incidentally gives a reasonably comprehensive treatment of the main sources, issues, debates, and secondary literature on this period of Israel's history. An introductory chapter summarizes the individual papers and also the relevant section of Mario Liverani's recent history of the period. A concluding 'Reflections on the Debate' summarizes the issues raised in the papers and provides a perspective on the discussion. LHB/OTS volume 421 - ESHM volume 6

**Elements of Chemical Reaction Engineering** H. Scott Fogler.1999 The fourth edition of *Elements of Chemical Reaction Engineering* is a completely revised version of the book. It combines authoritative coverage of the principles of chemical reaction engineering with an unsurpassed focus on critical thinking and creative problem solving, employing open-ended questions and stressing the Socratic method. Seeber.2012-12-06 This volume constitutes the Proceedings of the joint meeting of GLIM89 and the 4th International Workshop on statistical Modelling, held in Trento, Italy, from 17 to 21 July 1989. The meeting aimed to bring together researchers interested in the development and application of generalized linear modelling in GLIM and those interested in statistical modelling in its widest sense. This joint meeting built upon the success of previous workshops held in Innsbruck, Perugia and Vienna, and upon the two previous GLIM conferences, GLIM82 and GLIM85. The Proceedings of the latter two being available as numbers 14 and 32 in the Springer Verlag series of Lecture Notes in Statistics). Much statistical modelling is carried out using GLIM, as is apparent from many of the papers in these Proceedings; however, the Programme Committee were also keen on encouraging papers which discussed more general modelling techniques. Thus about a third of the papers in this volume are outside the GLIM framework. The Programme Committee specifically requested non-theoretical papers in addition to considering theoretical contributions. Thus there are papers in a wide range of practical areas, such as radio spectral occupancy, comparison of birthweights, intervals between births, accidents of railway workers, genetics, demography, medical trials, the social sciences and insurance. A wide range of theoretical developments are discussed, for example, overdispersion, non-exponential family modelling, novel approaches to analysing contingency tables, random effects models, Kalman Filtering, model checking and extensions of Wedderburn's theoretical underpinning of GLMs.

**Light Alloys** Robert John Hussey,Josephine Wilson.2013-04-17 *Light Alloys Directory and Databook* is a world-wide directory of the properties and suppliers of light alloys used in, or proposed for, numerous engineering applications. Alloys covered will include aluminium alloys, magnesium alloys,

titanium alloys, beryllium. For the metals considered each section will consist of: a short introduction; a table comparing basic data and a series of comparison sheets. The book will adopt standardised data in order to help the reader in finding and comparing different materials and identifying the required information. All comparison sheets are cross-referenced, so that the user will be able to locate data on a specific product or compare properties easily. The book is designed to complement the existing publications on high performance materials.

*Mass Transfer* Diran Basmadjian.2003-12-15 In recent years, the subject of mass transfer has been treated as a minor player in the larger field of transport phenomena and taken a back seat to its more mature brother, heat transfer. Yet mass transfer is sufficiently mature as a discipline and sufficiently distinct from other transport processes to merit a separate treatment, particularly one that does not overwhelm readers with an abundance of high-level mathematics. *Mass Transfer: Principles and Applications* takes an integrated approach that uses a wealth of real-world examples, organizes the material according to mode of operation, and highlights the importance of modeling. The author begins by introducing diffusion rates, Fick's Law, film theory, and mass transfer coefficients, then develops these concepts in complementary stages. The treatment of phase equilibria covers topics generally not addressed in thermodynamics courses, and these concepts are then used to analyze compartmental models and staged processes as well as continuous contact operations. The final chapter offers a concise survey of simultaneous mass and heat transfer. Throughout the book, discussions transition smoothly between theory and practice and clearly reflect the author's many years of engineering experience and the breadth of mass transfer applications. *Mass Transfer: Principles and Applications* is a unique and accessible treatment of this relatively complicated topic that will fill a significant gap as both a textbook and professional reference.

The present methods of analysis include the use of gas chromatography and gas chromatography-mass spectrometry, techniques which are well established and used by crime laboratories throughout the world. However, despite their universality, this is the first comprehensive resource that addresses their application to fire debris analysis. *Fire Debris Analysis* covers topics such as the physics and chemistry of fire and liquid fuels, the interpretation of data obtained from fire debris, and the future of the subject. Its cutting-edge material and experienced author team distinguishes this book as a quality reference that should be on the shelves of all crime laboratories. Serves as a comprehensive guide to the science of fire debris analysis Presents both basic and advanced concepts in an easily readable, logical sequence Includes a full-color insert with figures that illustrate key concepts discussed in the text

*The Early Neolithic of the Eastern Fertile Crescent* Roger Matthews,Wendy Matthews,Kamal Rasheed Raheem,Amy Richardson.2020-07-31 The Eastern Fertile Crescent region of western Iran and eastern Iraq hosted major developments in the transition from hunter-forager to farmer-herder lifestyles through the Early Neolithic period, 10,000-7000 BC. Within the scope of the Central Zagros Archaeological Project, excavations have been conducted since 2012 at two Early Neolithic sites in the Kurdistan region of Iraq: Bestansur and Shimshara. Bestansur represents an early stage in the transition to sedentary, farming life, where the inhabitants pursued a mixed strategy of hunting, foraging, herding and cultivating, maximising the new opportunities afforded by the

warmer, wetter climate of the Early Holocene. They also constructed substantial buildings of mudbrick, including a major building with a minimum of 65 human individuals, mainly infants, buried under its floor in association with hundreds of beads. These human remains provide new insights into mortuary practices, demography, diet and disease during the early stages of sedentarisation. The material culture of Bestansur and Shimshara is rich in imported items such as obsidian, carnelian and sea-shells, indicating the extent to which Early Neolithic communities were networked across the Eastern Fertile Crescent and beyond. This volume includes final reports by a large-scale interdisciplinary team on all aspects of the results from excavations at Bestansur and Shimshara, through application of state-of-the-art scientific techniques, methods and analyses. The net result is to re-emphasise the enormous significance of the Eastern Fertile Crescent in one of the most important episodes in human history: the Neolithic transition.

**Family-centered Care for Children Needing Specialized Health and Developmental Services**

Terri L. Shelton, Jennifer Smith Stepanek.1994 This monograph articulates eight key elements of a family-centered approach to policy and practice for children needing specialized health and developmental services. An introductory section reviews the development of the first edition of the monograph in 1987 and its widespread dissemination and acceptance since that time. Each of the following eight chapters then addresses one of the following elements: (1) recognition that the family is the constant in the child's life, while the service systems and support personnel within those systems fluctuate; (2) facilitation of family/professional collaboration at all levels of hospital, home, and community care; (3) exchange of complete and unbiased information between families and professionals in a supportive manner; (4) respect for cultural diversity within and across all families including ethnic, racial, spiritual, social, economic, educational, and geographic diversity; (5) recognition of different methods of coping and promotion of programs providing developmental, educational, emotional, environmental, and financial supports to families; (6) encouragement of family-to-family support and networking; (7) provision of hospital, home, and community service and support systems that are flexible, accessible, and comprehensive in meeting family-identified needs; and (8) appreciation of families as families, recognizing their wide range of strengths, concerns, emotions, and aspirations beyond their need for specialized health and developmental services and support. Checklists for evaluating these elements are attached. (Contains 160 references.) (DB)

**The Cordillera Del Cóndor Region of Ecuador and Peru** Thomas S. Schulenberg.1997-01 In 1993 and 1994, two Rapid Assessment Program teams conducted biological surveys in the Cordillera del Cóndor between Ecuador and Peru, one of the largest intact regions of Andean lower montane forest. This book presents the results of their surveys. The great topographic and geological complexity of this region, combined with a climate of year-round high humidity, have resulted in very high plant species diversity. This diversity of habitats and species with restricted distributions makes the Cóndor an important refuge for many taxa.

**Bridge Scour and Stream Instability Countermeasures** U. S. Department of Transportation.2015-10-27 The purpose of this document is to identify and provide design guidelines for bridge scour and stream instability countermeasures that have been implemented by various State departments of transportation (DOTs) in the United States. Countermeasure experience, selection, and design guidance are consolidated from other FHWA publications in this document to support a comprehensive analysis of scour and stream instability problems and provide a range of solutions to those problems. The results of recently completed National Cooperative Highway Research Program (NCHRP) projects are incorporated in the design guidance, including: countermeasures to protect bridge piers and abutments from scour; riprap design criteria, specifications, and quality control, and environmentally sensitive channel and bank protection

measures. Selected innovative countermeasure concepts and guidance derived from practice outside the United States are introduced. In addition, guidance for the preparation of Plans of Action ...

*Explorations in Automatic Thesaurus Discovery* Gregory Grefenstette. 2012-12-06 Explorations in Automatic Thesaurus Discovery presents an automated method for creating a first-draft thesaurus from raw text. It describes natural processing steps of tokenization, surface syntactic analysis, and syntactic attribute extraction. From these attributes, word and term similarity is calculated and a thesaurus is created showing important common terms and their relation to each other, common verb-noun pairings, common expressions, and word family members. The techniques are tested on twenty different corpora ranging from baseball newsgroups, assassination archives, medical X-ray reports, abstracts on AIDS, to encyclopedia articles on animals, even on the text of the book itself. The corpora range from 40,000 to 6 million characters of text, and results are presented for each in the Appendix. The methods described in the book have undergone extensive evaluation. Their time and space complexity are shown to be modest. The results are shown to converge to a stable state as the corpus grows. The similarities calculated are compared to those produced by psychological testing. A method of evaluation using Artificial Synonyms is tested. Gold Standards evaluation show that techniques significantly outperform non-linguistic-based techniques for the most important words in corpora. Explorations in Automatic Thesaurus Discovery includes applications to the fields of information retrieval using established testbeds, existing thesaural enrichment, semantic analysis. Also included are applications showing how to create, implement, and test a first-draft thesaurus.

Entrepreneurial Ecosystem Mathew J Manimala,Kishinchand Poornima Wasdani.2015-02-09

Economic development is a priority for all nation-states, whether developing or developed. In recent times, a few among the developing nations – often referred to as the emerging economies – have attracted the world's attention because of their fast pace of economic growth. While the similarities among these nations (for example the BRICS) in the pattern of their economic growth are highlighted and discussed, the differences are often glossed over. This book, therefore, attempts to present the diverse ways in which entrepreneurship is facilitated in emerging economies, through a compilation of research papers from six different countries (India, China, Singapore, Hong Kong, Nigeria and New Zealand) belonging to the class of emerging economies. The papers included in this book cover a variety of topics related to the creation and management of an entrepreneurial ecosystem, such as intercultural interactions, IPR issues, government policies for SMEs, social entrepreneurship, opportunity identification, green entrepreneurship, employee entrepreneurship, symbiotic ventures and social capital, social fluidity mapping for reducing failure stigma, green awareness in the corporate world and among entrepreneurs, venture capital for growth, immigrant entrepreneurs, entrepreneurial success and life satisfaction, among others. The contributions are supported by an introductory chapter that provides an integrative framework by unifying the diverse patterns of economic development in the different countries under various institutional inadequacies as a process of “muddling-through to development”, necessitated by the non-systematic development of the ecosystem for new venture creation. This book is indeed a must-read for those interested in

understanding the process of entrepreneurship and economic development in emerging economies. **Modern Trends in Activation Analysis** Institute for Materials Research (U.S.). Analytical Chemistry Division.1969
