Analyzing Language in Restricted Domains Ralph Grishman,Richard Kittredge.2014-04-08 First published in 1986. For most of the authors represented in this collection, the term 'Sublanguage' suggests a subsystem of language that behaves essentially like the whole language, while being limited in reference to a specific subject domain. Argued throughout this title, even if sublanguage grammars can be related to the grammar of the full standard language, sublanguages behave in many ways like autonomous systems. This volume will illustrate that, as such, they take on theoretical interest as microcosms of the whole language. The papers collected in this volume were presented at the Workshop on Sublanguage, held at New York University on January 19-20, 1984.

EBOOK: Children's Literature and Computer Based Teaching Len Unsworth,Angela Thomas,Alyson Simpson,Jennifer Asha.2005-06-16 "This stellar book extends teachers' thinking well beyond 'book spaces' and into 'digital spaces' by offering theorized approaches to analyzing children's literature across media, and careful descriptions of effective learning activities that are rich in detail and practical advice. This book (and its digital spaces) is an indispensable guide to engaging with children's literature and new digital media." Michele Knobel, Montclair State University, USA. "The book overall is exciting, informative and practical, outlining important theoretical perspectives and ideas while also providing much wisdom and advice to teachers about how to transform their literary programs." Frances Christie, Emeritus Professor of Language and Literacy Education, University of Melbourne and Honorary Professor of Education, University of Sydney, Australia. This book connects classroom teaching of children's literature with the digital age. It celebrates the charm of children's literature and its role in literacy development, as well as the appeal of information and communications technology (ICT) to students and its capacity to enrich students' learning and enjoyment of literary texts. The authors outline the ways in which children's literature is developing new dimensions, for example: The re-publication of children's books on CD ROM and the world wide web Web resources for working with literary texts, including e-mail discussion groups Children's participation in the collaborative construction of online narratives The book provides practical guidance for teachers who are inexperienced with ICT. It describes and discusses implementation of activities that extend traditional approaches to literary texts and take advantage of available technology.

Teacher Training for English-Medium Instruction in Higher Education Sánchez-Pérez, Maria del Mar.2020-02-07 English-medium instruction (EMI) has become a pervasive teaching model in recent higher education. The implementation of EMI programs requires changes in university teaching methods since most lecturers need to adapt their contents and the way they teach them to successfully work in foreign language environments. The rapid proliferation of such programs has resulted in concern among teaching staff, who have felt pushed towards teaching their subject content through a non-native language with little or no previous training. As a result, many recent studies have highlighted the importance and urgency to train teaching staff in terms of language proficiency and the appropriate teaching methods, techniques, and strategies to be applied in EMI lessons. *Teacher Training for English-Medium Instruction in Higher Education* is an academic research publication that provides comprehensive research on effective approaches and experiences in teacher training for EMI at universities both in terms of language skills and teaching methodologies and that analyzes the design and development of comprehensive teacher training programs that successfully engage these EMI programs. It has profound implications for the development of the international profile of higher education institutions as it provides information on how to train highly-qualified lecturers to successfully teach students from different nationalities. Featuring a wide range of topics such as assessment, curriculum design, and learning styles, this book is ideal for pre- and in-service teachers, language specialists, content specialists, administrators, deans, higher education faculty, researchers, practitioners, curriculum designers, policymakers, academicians, and students.

A comparative study of elite English-medium schools, public schools, and Islamic madaris in contemporary Pakistan Akhtar Hassan Malik. 2015-05-28 This ethnographic study examines the role of differing school knowledge in reproducing various social classes in the society. It was observed that an unequal availability of capital resources, agents' class habitus, and the type of their cultural currency act as selection mechanisms that clearly favour some social groups over others. The ruling classes ensure the transfer of their power and privilege to their children by providing them with quality education in elite schools. The disadvantaged classes are excluded from these unique institutions by both social and economic sanctions. They have no other option than to educate their children either in public schools or Islamic madaris. As a result, inequitable educational opportunities consolidate the existing social-class hierarchy.

New Technological Applications for Foreign and Second Language Learning and Teaching Kruk, Mariusz, Peterson, Mark. 2020-03-13 Population diversity is becoming more prevalent globally with increasing immigration, emigration, and refugee placement. These circumstances increase the likelihood that a child will be raised speaking a different language in the home than the common language used in each country. This necessitates the development of comprehensive strategies that promote second language learning through the adoption of new technological advancements. *New Technological Applications for Foreign and Second Language Learning and Teaching* is a scholarly publication that explores how the latest technologies have the potential to engage foreign and second language learners both within and outside the language classroom and to facilitate language learning and teaching in the target language. Highlighting a range of topics such as learning analytics, digital games, and telecollaboration, this book is ideal for teachers, instructional designers, curriculum developers, IT consultants, educational software developers, language learning specialists, academicians, administrators, professionals, researchers, and students.

Controversies in Medium of Instruction Reform Shek Kam Tse, Wing Wah Ki, Mark Shiu Kee Shum. 2021-10-25 The book is an in-depth and comprehensive analysis of the case of language in education reform and language policy controversies of Hong Kong over the initial two decades after 1997. It is a scholarly monograph of conscientious educators and researchers who have been active during the education reform, collaborating with different parties on school development and classroom teaching experiments. This book provides a multiple-perspective investigation into the education and language matters. Besides socio-political perspectives, this book also emphasizes the frontline educational and practical perspectives. The book explores the benefits and effective methods of mother-tongue and multi-lingual teaching that have emerged in the period. Based on the problematic experience of language purism and bifurcation in the reform, the book argues for an inclusive multilingual education policy with mother-tongue as the core. This book provides potential solutions and good practices to tackle the complex issues brought about by medium of instruction policy reforms in post-colonial times.

Society in Focus William E. Thompson, Joseph V. Hickey, Mica L. Thompson. 2016-04-20 Examining the role of mass media and information technology in contemporary society, *Society In Focus*, Eighth Edition, emphasizes the increasing diversity and globalization of societies everywhere. It is designed to help students think clearly and critically about sociological issues, concepts, and methods. Questioning is at the heart of this approach, and as students read this book they are encouraged to become part of the sociological enterprise—rather than remain passive observers. Every element of the text is designed to challenge students to evaluate social issues and, guided by the sociological imagination, to clearly formulate their own positions. By asking questions that demand sociological and creative thought, students are reminded that their conclusions and decisions, as well as their non-decisions and inaction, may have important social consequences. New to this edition: • New coauthor Mica Thompson, an experienced teacher of introduction to sociology, brings a fresh new perspective as well as a wide array of different life experiences to this edition of *Society in Focus*. • An expanded critical analysis in Chapter 1 introduces all forms of media and technology, and every chapter examines an aspect of their powerful social influence. • Chapters 9, 16, and 17 have been updated to include the most recent worldwide financial and economic developments, to help explain globalization and cultural diversity. • Expanded application of feminist theory in every chapter to help students recognize the importance of gender diversity and the contributions of that theoretical perspective in sociology. • Updated and brand new boxes throughout encourage students to take a closer look at society and selected social issues.

Policies, Politics, and Ideologies of English-Medium Instruction in Asian Universities Pramod K. Sah, Fan Fang. 2023-06-29 Against the backdrop of uncritical promotions of English-medium instruction (EMI) in higher education globally, this edited volume maps out the political, ideological, and policy-related issues of EMI programs in multilingual and multicultural universities in Asia. In this volume, EMI researchers and practitioners involved in different Asian countries and regions have collaboratively unpacked the critical dimensions of EMI programs in higher education, with a goal to provide must-needed resources for researchers, graduate students, higher education leaders, and policymakers. This volume is the first of its kind in that it provides an exclusive and critical tapestry of EMI at multilingual universities from all parts of Asia, including Central Asia (Kazakhstan), East Asia (Mainland China, Korea, Japan, and Taiwan), South Asia (Bangladesh and Nepal), Southeast Asia (Brunei, Malaysia, Philippines, Thailand, and Vietnam), and Western Asia (United Arab Emirates). The key takeaway for the reader is to not only understand the current phenomenon of EMI in Asian universities but to also learn the dark side of its policies, programs, and practices that have led to unequal teaching and learning spaces in diverse societies. This collection will be of interest to scholars and policymakers in English-medium instruction, English language teaching, TESOL, and applied linguistics.
