The Book of Salt Monique Truong. 2004-06-15 A novel of Paris in the 1930s from the eyes of the Vietnamese cook employed by Gertrude Stein and Alice B. Toklas, by the author of *The Sweetest Fruits*. Viewing his famous mesdames and their entourage from the kitchen of their rue de Fleurus home, Binh observes their domestic entanglements while seeking his own place in the world. In a mesmerizing tale of yearning and betrayal, Monique Truong explores Paris from the salons of its artists to the dark nightlife of its outsiders and exiles. She takes us back to Binh's youthful servitude in Saigon under colonial rule, to his life as a galley hand at sea, to his brief, fateful encounters in Paris with Paul Robeson and the young Ho Chi Minh. This vital volume should not be missed by economists, as well as those interested in imperial history.

How Asia Works Joe Studwell. 2013-07-02 "A good read for anyone who wants to understand what actually determines whether a developing economy will succeed." —Bill Gates, "Top 5 Books of the Year" An Economist Best Book of the Year from a reporter who has spent two decades in the region, and who the Financial Times said "should be named chief myth-buster for Asian business." In *How Asia Works*, Joe Studwell distills his extensive research into the economies of nine countries—Japan, South Korea, Taiwan, Indonesia, Malaysia, Thailand, the Philippines, Vietnam, and China—into an accessible, readable narrative that debunks Western misconceptions, shows what really happened in Asia and why, and for once makes clear why some countries have boomed while others have languished. Studwell's in-depth analysis focuses on three main areas: land policy, manufacturing, and finance. Land reform has been essential to the success of Asian economies, giving a kick-start to development by utilizing a large workforce and providing capital for growth. With manufacturing, industrial development alone is not sufficient, Studwell argues. Instead, countries need "export discipline," a government that forces companies to compete on the global scale. And in finance, effective regulation is essential for fostering, and sustaining growth. To explore all of these subjects, Studwell journeys far and wide, drawing on fascinating examples from a Philippine sugar baron's stifling of reform to the explosive growth at a Korean steel mill. "Provocative . . . How Asia Works is a striking and enlightening book . . . A lively mix of scholarship, reporting and polemic." —The Economist

She introduces nine individuals from Taiwan's three major ethnic groups to tell the stories of their lives in their own words. *The Politics of Consumption* Alan Bradshaw, Norah Campbell, Stephen Dunne. 2013-05 This age of austerity comes on the back of a lengthened period of apparently rampant consumer excess: that was a party for which we are all now having to pay. A spectacular period of unsustainably funded over-indulgence, it seems, has now given rise to a sobering period of barely fundable mere-subsistence. Consumption, narrated along such lines, is a sin which has to be paid for. Beyond the deceptive theology of consumption, however, lies actual politics. In May 2012, we hosted a conference at Dublin's Royal Society of the Antiquaries of Ireland in order to analyse and debate the politics of consumption. This special issue is the outcome of the discussions which took place during that event. It features conceptual and empirical investigations into the politics of consumption, a head-to-head debate on the idea of consumer citizenship, a series of notes on the relationship between art, politics, and consumption, and reviews of two recent books. Taken together, these diverse pieces underline the need for a politically-oriented analysis of consumption, not only for the sake of informing academic debates but also for the sake of informing contemporary consumption practices. Consumption, we argue, is political: to approach it otherwise is to dogmatically seek refuge in a world of fantasy. Issue editors: Alan Bradshaw, Norah Campbell and Stephen Dunne. Contributors: Ben Fine, Kate Soper, Peter Armstrong, Matthias Zick Varul, Eleftheria Lekakis, Isleide Fontenelle, Adam Arvidsson, Detlev Zwick, Olga Kravets, Stevphen Shukaitis, David Mabb, Antigoni Memou, Femke Kaulingfreks, Ruud Kaulingfreks, Andreas Chatzidakis, Georgios Patsiaouras, Gavin Brown and Angus Cameron.

*World Heritage Angkor and Beyond* Brigitta Hauser-Schäublin. 2011 Angkor, the temple and palace complex of the ancient Khmer capital in Cambodia is one of the world's most famous monuments. Hundreds of thousands of tourists from all over the globe visit Angkor Park, one of the finest UNESCO World Heritage Sites, every year. Since its UNESCO listing in 1992, the Angkor region has experienced an overwhelming mushrooming of hotels and restaurants; the infrastructure has been hardly able to cope with the rapid growth of mass tourism and its needs. This applies to the access and use of monument sites as well. The authors of this book critically describe and analyse the heritage nomination processes in Cambodia, especially in the case of Angkor and the temple of Preah Vihear on the Cambodian/Thai border. They examine the implications the UNESCO listings have had with regard to the management of Angkor Park and its inhabitants on the one hand, and to the Cambodian/Thai relationships on the other. Furthermore, they address issues of development through tourism that UNESCO has recognised as a welcome side-effect of heritage listings. They raise the question whether development through tourism deepens already existing inequalities rather than contributing to the promotion of the poor-- Publisher's description.

**Land Rights of the Indigenous Peoples of the Chittagong Hill Tracts, Bangladesh** Rajkumari Chandra Kalindi Roy.2000 Little is know about the Chittagong Hill Tracts of Bangladesh (CHT), an area of approximately 5,089 square miles in southeastern Bangladesh. It is inhabited by indigenous peoples, including the Bawm, Sak, Chakma, Khumi Khyang, Marma, Mru, Lushai, Uchay (also called Mrung, Brong, Hill Tripura), Pankho, Tanchangya and Tripura (Tipra), numbering over half a million. Originally inhabited exclusively by indigenous peoples, the Hill Tracts has been impacted by national projects and programs with dire consequences. This book describes the struggle of the indigenous peoples of the Chittagong Hill Tracts region to regain control over their ancestral land and resource rights. From sovereign nations to the limited autonomy of today, the report details the legal basis of the land rights of the indigenous peoples and the different tools employed by successive administrations to exploit their resources and divest them of their ancestral lands and territories. The book argues that development programs need to be implemented in a culturally appropriate manner to be truly sustainable, and with the consent and participation of the peoples concerned. Otherwise, they only serve to push an already vulnerable people into greater impoverishment and hardship. The devastation wrought by large-scale dams and forestry policies cloaked as development programs is succinctly described in this report, as is the population transfer and militarization. The interaction of all these factors in the process of assimilation and integration is the background for this book, analyzed within the perspective of indigenous and national law, and complemented by international legal approaches. The book concludes with an update on the developments since the signing of the Peace Accord between the Government of Bangladesh and the Jana Sanghati Samiti (JSS) on December 2, 1997.

**Cultural Values and Human Ecology in Southeast Asia** Karl L. Hutterer, A. Terry Rambo, George Lovelace.1985-01-01 Ecologists have long based their conceptual frameworks in the natural sciences. Recently, however, they have acknowledged that ecosystems cannot be understood without taking into account human interventions that may have taken place for thousands of years. And for their part, social scientists have recognized that human behavior must be understood in the environment in which it is acted out. Researchers have thus begun to develop the area of "human ecology." Yet human ecology needs suitable conceptual frameworks to tie the human and natural together. In response, Cultural Values and Human Ecology uses the framework of cultural values to collect a set of highly diverse contributions to the field of human ecology. Values represent an important and essential aspect of the intellectual organization of a society, integrated into and ordained by the over-arching cosmological system, and constituting the meaningful basis for action, in terms of concreteness and abstraction of content as well as mutability and permanence. Because of this balance, values lend themselves to the kinds of analyses of ecological relationships conducted here, those that demand a reasonable amount of specificity as well as historical stability. The contributions to Cultural Values and Human Ecology are exceedingly diverse. They include abstract theoretical discussions and specific case studies, ranging across the landscape of Southeast Asia from the islands to southern China. They deal with hunting-gathering populations as well as peasants operating within contemporary nation-states, and they are the work of natural scientists, social scientists, and humanists of Western and Asian origin. Diversity in the backgrounds of the authors contributes most to the varied approaches to the theme of this volume, because differences in cultural background and academic tradition will lead to different research interests and to differences in the empirical approaches chosen to pursue given problems.

**Asian Godfathers** Joe Studwell.2010-09-03 40 or 50 families control the economies of Hong Kong, Singapore, Thailand, the Philippines and Indonesia. Their interests range from banking to property, from shipping to sugar, from vice to gambling. 13 of the 50 richest families in the world are in South East Asia yet they are largely unknown outside confined business circles. Often this is because they control the press and television as well as everything else. How do they do it? What are their secrets? And is it good news or bad for the places where they operate? Joe Studwell explosively lifts the lid on a world of staggering secrecy and shows that the little most people know is almost entirely wrong.

**Outliers** Malcolm Gladwell.2008-11-18 From the bestselling author of Blink and The Tipping Point, Malcolm Gladwell's Outliers: The Story of Success overturns conventional wisdom about genius to show us what makes an ordinary person an extreme overachiever. Why do some people achieve so much more than others? Can they lie so far out of the ordinary? In this provocative and inspiring book, Malcolm Gladwell looks at everyone from rock stars to professional athletes, software billionaires to scientific geniuses, to show that the story of success is far more surprising, and far more fascinating, than we could ever have imagined. He reveals that it's as much about where we're from and what we do, as who we are - and that no one, not even a genius, ever makes it alone. Outliers will change the way you think about your own life story, and about what makes us all unique. 'Gladwell is not only a brilliant storyteller; he can see what those stories tell us, the lessons they contain' Guardian 'Malcolm Gladwell is a global phenomenon ... he has a genius for making everything he writes seem like an impossible adventure' Observer 'He is the best kind of writer - the kind who makes you feel like you're a genius, rather than he's a genius' The Times

**Edible Insects** Arnold van Huis, Food and Agriculture Organization of the United Nations.2013 Edible insects have always been a part of human diets, but in some societies there remains a degree of disdain and disgust for their consumption. Although the majority of consumed insects are gathered in forest habitats, mass-rearing systems are being developed in many countries. Insects offer a significant opportunity to merge traditional knowledge and modern science to improve human food security worldwide. This publication describes the contribution of insects to food security and examines future prospects for raising insects at a commercial scale to improve food and feed production, diversify diets, and support livelihoods in both developing and developed countries. It shows the many traditional and potential new uses of insects for direct human consumption and the opportunities for and constraints to farming them for food and feed. It examines the body of research on issues such as insect nutrition and food safety, the use of insects as animal feed, and the processing and preservation of insects and their products. It highlights the need to develop a regulatory framework to govern the use of insects for food security. And it presents case studies and examples from around the world. Edible insects are a promising alternative to the conventional production of meat, either for direct human consumption or for indirect use as feedstock. To fully realise this potential, much work needs to be done by a wide range of stakeholders. This publication will boost awareness of the many valuable roles that insects play in sustaining nature and human life, and it will stimulate debate on the expansion of the use of insects as food and feed.

**Cultural and Spiritual Values of Biodiversity** United Nations Environment Programme.1999 Weaving together philosophical, historical, legal, scientific and personal viewpoints, this book gives a rich sample of the vast web which makes up our cultural, spiritual and social diversity. The volume highlights the central importance of cultural and spiritual values in the appreciation and preservation of all life and argues that these values give us a true reflection of worth. It demonstrates how many cultures see Nature as an extension of society, and how sensitive stewardship is an integral part of existence. The book covers: language and how cognition and speech encode indigenous knowledge systems are critical for preservation of diversity; the complex issue of indigenous people and the problems of preserving their relationships both with and within their

societies; voices of the world - expressions of concern and disquiet over the declining world diversity; holistic health practices where environment and diet are integrated into indigenous medical health systems; the importance of developing effective intellectual property rights and territorial and land rights to enhance and maintain local control. This book arose out of the Global Biodiversity Assessment (GBA), a massive review of current knowledge in the broad field of biological diversity, commissioned by United Nations Environmental Programme (UNEP)

**Architects of Buddhist Leisure** Justin Thomas McDaniel.2018-04-30 Buddhism, often described as an austere religion that condemns desire, promotes denial, and idealizes the contemplative life, actually has a thriving leisure culture in Asia. Creative religious improvisations designed by Buddhists have been produced both within and outside of monasteries across the region—in Nepal, Japan, Korea, Macau, Hong Kong, Singapore, Laos, Thailand, and Vietnam. Justin McDaniel looks at the growth of Asia's culture of Buddhist leisure—what he calls “socially disengaged Buddhism”—through a study of architects responsible for monuments, museums, amusement parks, and other sites. In conversation with noted theorists of material and visual culture and anthropologists of art, McDaniel argues that such sites highlight the importance of public, leisure, and spectacle culture from a Buddhist perspective and illustrate how “secular” and “religious,” “public” and “private,” are in many ways false binaries. Moreover, places like Lek Wiriyaphan's Sanctuary of Truth in Thailand, Suối Tiên Amusement Park in Saigon, and Shi Fa Zhao's multilevel museum/ritual space/tea house in Singapore reflect a growing Buddhist ecumenism built through repetitive affective encounters instead of didactic sermons and sectarian developments. They present different Buddhist traditions, images, and aesthetic expressions as united but not uniform, collected but not concise: Together they form a gathering, not a movement. Despite the ingenuity of lay and ordained visionaries like Wiriyaphan and Zhao and their colleagues Kenzo Tange, Chan-soo Park, Tadao Ando, and others discussed in this book, creators of Buddhist leisure sites often face problems along the way. Parks and museums are complex adaptive systems that are changed and influenced by budgets, available materials, local and global economic conditions, and visitors. Architects must often compromise and settle at local optima, and no matter what they intend, their buildings will develop lives of their own. Provocative and theoretically innovative, *Architects of Buddhist Leisure* asks readers to question the very category of “religious” architecture. It challenges current methodological approaches in religious studies and speaks to a broad audience interested in modern art, architecture, religion, anthropology, and material culture.

**Ulysses** James Joyce.2024-02-10 The book consists of 18 chapters, each covering roughly one hour of the day, beginning around 8 a.m. and ending sometime after 2 a.m. the following morning. Each chapter employs its own literary style, and parodies a specific episode in Homer's *Odyssey*. Furthermore, each chapter is associated with a specific colour, art or science, and bodily organ. This combination of kaleidoscopic writing with an extreme formal schematic structure renders the book a major contribution to the development of 20th-century modernist literature. The use of classical mythology as an organising framework, the near-obsessive focus on external detail, and the occurrence of significant action within the minds of characters have also contributed to the development of literary modernism. Nevertheless, Joyce complained that, I may have oversystematised *Ulysses*, and played down the mythic correspondences by eliminating the chapter titles that had been taken from Homer. As he was completing work on *Dubliners* in 1906, Joyce considered adding another story featuring a Jewish advertising canvasser called Leopold Bloom under the title *Ulysses*. Although he did not pursue the idea further at the time, he eventually commenced work on a novel using both the title and basic premise in 1914. The writing was completed in October 1921. Three more months were devoted to working on the proofs of the book before Joyce halted work shortly before his self-imposed deadline, his 40th birthday (2 February 1922). This publication encountered censorship problems in the United States; serialisation was halted in 1920 when the editors were convicted of publishing obscenity. Although the conviction was based on the *Nausicaä* episode of *Ulysses*, *The Little Review* had fuelled the fires of controversy with dada poet Elsa von Freytag-Loringhoven's defence of *Ulysses* in an essay *The Modest Woman*. Joyce's novel was not published in the United States until 1933. With the appearance of both *Ulysses* and T. S. Eliot's poem, *The Waste Land*, 1922 was a key year in the history of English-language literary modernism. In *Ulysses*, Joyce employs stream of consciousness, parody, jokes, and virtually every other established literary technique to present his characters. The action of the novel, which takes place in a single day, 16 June 1904, sets the characters and incidents of the *Odyssey* of Homer in modern Dublin and represents Odysseus (*Ulysses*), Penelope and Telemachus in the characters of Leopold Bloom, his wife Molly Bloom and Stephen Dedalus, parodically contrasted with their lofty models. The book explores various areas of Dublin life, dwelling on its squalor and monotony. Nevertheless, the book is also an affectionately detailed study of the city, and Joyce claimed that if Dublin were to be destroyed in some catastrophe it could be rebuilt, brick by brick, using his work as a model. To achieve this level of accuracy, Joyce used the 1904 edition of Thom's *Directory*—a work that listed the owners and/or tenants of every residential and commercial property in the city. He also bombarded friends still living there with requests for information and clarification.

**The China Dream** Joe Studwell.2007-12-01 “An entertaining, if cautionary, tale of Western business woes in China, stretching back seven hundred years” (*The Wall Street Journal*). In *The China Dream*, acclaimed business journalist Joe Studwell challenges the predictions that China will become an economic juggernaut on the world stage in the twenty-first century—and instead foresees an economic crisis. Tracing the most recent developments in China from Deng Xiaoping's “liberalization” of its market in the 1980s through the opening of its economy to foreign investment in the 1990s, Studwell examines the roadblocks to the continuation of the country's unprecedented expansion and why its economy will fail once more—but this time, harder than ever before, and with potentially catastrophic results. Provocative and flawlessly researched, *The China Dream* analyzes what's really going on in China—and what we can do to prepare for the coming crisis. “The much-needed antidote to the delusions . . . about the riches to be made from investing and selling in China. Brimming with . . . statistics.” —*The Washington Post* “[A] detailed account . . . An excellent examination of the political and economic history of China, fascinating and mostly unknown to Westerners.” —*Booklist* (starred review) “Lays bare much of the stuff and nonsense that surrounds the China dream, and traces how myth and misunderstandings—compounded by hype and lashings of snake oil—have bewitched some of the world's most respected corporations and led them to ruin the proverbial \$1.3 billion consumer market . . .
