Tracing the Roots of Globalization and Business Principles Lawrence A. Beer. 2011-08-17 A central theme to the text is in fact that the commercial process is central to the human condition. The onus to exchange, the bartering of the fruits of one's labor, achieved by physical work or applied knowledge, with another is the natural condition of humankind. It separates us from all other species on earth and underscores humankind's desire to reach out and touch - integrate with others. Such natural process, the trade initiative, is the root of modern globalization. It is also the prime contributor to the development of civilization and has provided the world with a continuing component that sustains progress and improves life. Given this consideration, the business system, and the institutions created to utilize it, have continued to live up to its influential heritage as a central tool in societal progression; although like most human endeavors it is fought with mistakes and errors - it is not perfect. Acquainting students and managers with their heritage sets the stage for the next act in the never ending commercial process. The trading activity, although always beset with stumbling blocks, has always strived to live up to its human promise to make the world a unified better place. Such a goal should not be forgotten and students as well as managers need to reflect on their wider role - providing the golden thread in the continuing tapestry of a global integrated civilization. The commercial process is not just about wealth accumulation or profit and loss; it is ingrained with social progression and the changes over time. Today's business student must see the world on a wider horizon, appreciate and understand the richness of the role their commercial ancestors played in shaping the world if they are to be properly educated on the position and responsibilities they will be required to fulfill in the business of the future.

Critical Theory Ethics for Business and Public Administration David M. Boje. 2008-09-01 The purpose of this book is to develop those ethical traditions. For example, Horkheimer's books *Eclipse of Reason* and *Critique of Instrumental Reason*, and his early and now classic essay *Materialism and Morality* ask for a reformation of Kantian ethics. The reform sought is that categorical imperative in an individualism capitalism serves to worsen the difference between business ethics and moral philosophy. That is, it is not enough to try to be good or ethical as individuals when it is the systemic processes that must be dealt with. Therefore, Horkheimer asks that the maxim that would be made universal be done at the level of people organizing with others to change the social system that is producing the unethical behaviors. The book is organized into several sections. The first section sets the stages, beginning with a challenge to the field of social responsibility in business and public administration (Jones, Ten bos, & Parker have a new book out that is smashing). Then, we turn to Carr and to Zanettic who each have done critical theory work in public administration. This is followed by Heather Hopfl, who edited an issue on ethics of goodness, and does the kind of writing that makes deep connections. The next set of chapters make topic connections: rhizomatics, dialogics of co experience, story/narrative, and postmodern. The third set of topics focus on application: technofuturist, international business, economics, university, environment, accounting, spirituality, strategy, and ending with Mills' work on silence of race/ethnicity in business (and public administration) ethics writing.

The Routledge Companion to International Management Education Denise Tsang, Hamid H. Kazeroony, Guy Ellis. 2013-06-19 Crises and scandals in the world of international management have brought a new spotlight onto how the subject is taught, studied and understood. There has

been a plethora of literature on international management, but a lack of focus on how international management education (IME) can be shaped to respond to existing and future global business challenges. The Routledge Companion to International Management Education gathers together contributors from academia, industry and university administration involved in IME, to: introduce the domain of IME; describe the emerging state in new geographical areas; discuss the major issues and debates revolving around IME; explore the linkage of technology and international management, and shed light on the future of IME. The diverse background of the contributors provides a global perspective that challenges the dominant Anglo-American view, with up-to-date specific insights originating from their indigenous view points, which has often been neglected and inadequately covered. The volume answers important questions, such as: Do we need a vision in IME? What is the current state of IME? How has IME grown in emerging market segments? What roles does technology play in its recent development? The volume provides thought-provoking reading for educators, administrators, policy makers, human resources professionals and researchers. It will also give future international management students a glimpse of IME from a global inside-out perspective.
